Part Number	Used on XLRA/XLR	Type of Mounting	Chain Length A
XLR-11RC	XLR-11C (11SC) -15	Mounted to cable relief bushing .630 $^{+.010}_{-.002}$ (16.00 $^{+0.25}_{-0.05}$) dia. ring	3¼
XLR-12PC	-12C (12SC)		2 15/16
XLR-13RC	-13 -31	Screw mounted coupling has clearance hole for #6 screw	1 13/16
XLR-14PC	-14 -32 -42		1 13/16
XLR-11SRC	-11C (11SC) -13 -15 -31		3¼
XLR-12SPC	-12C (12SC) -14 -32 -42		2 15/16
XLR-13N-RC	-13N -35 -35-2G	Shell mounted 1 17/64 dia. ring	2⅛
XLR-14N-PC	-14N -36 XLR-36-2G		2⅛ ±3/32

CONTACT DATA

Series	Number of Contacts	Voltages Test	Voltages Service	Current Rating (amps)	Wire Size B & S
XLRA	3	1400	133	10	16
XLR	3	1400	133	15	14
	4	1400	133	10	16
	5	1400	133	7.5	18

VOLTAGE RATINGS

TEST CONDITIONS: 25°C ambient temperature, 40% relative humidity, 29.7 in. Hg barometric pressure.

METHOD: Sixty-cycle AC sine-wave potential was applied between adjacent contacts and shell in steps of 100 volts, maintaining each step at approximately 80% of the initial flashover value. All values are rms meter readings.

SELECTED VALUES: The safe test potential sustained for one minute on the lowest capacity circuit encountered was selected as the governing value of all circuits in all connectors of similar construction and spacing.

STANDARD CIRCULAR HIGH ENVIRONMENTAL CONNECTORS designed to MIL-C-005015F

The United States Navy Specification MIL-C-005015F (Navy) provides specifications for the connector series covered by this catalog. These connectors are available for many applications, from commercial/industrial and mass transportation systems to the most stringent high reliability military and space requirements.

The MS/CV345* connector manufactured by ITT Cannon Electric to MIL-C-005015F (Navy) is a threaded coupling, removable rear release crimp contact type. Fully intermateable with existing MIL-C-5015 and threaded MIL-C-83723 (USAF) type connectors, they provide for minimum effort and high economy upgrades for existing applications. In addition, they offer simplified design for new and interphase equipment.

MS/CV connectors covered under MIL-C-005015F (Navy) utilize fluid resistant elastomers to provide maximum protection against degrading fuels, oils, coolants and cleansers.

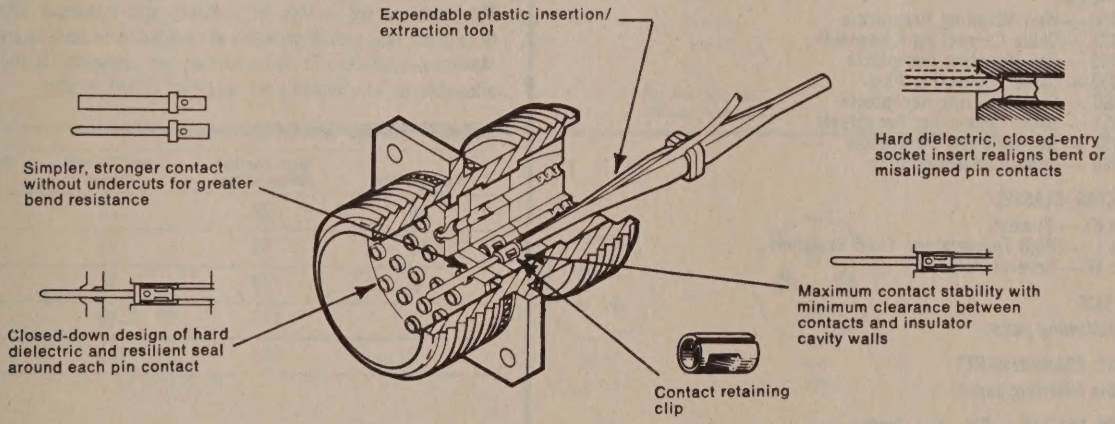
Temperature withstanding capabilities range from −55°C to +200°C depending upon the class. The use of electroless nickel and cadmium plating for hardware finishes gives the connectors maximum protection from the above factors. High quality manufacturing processes and materials combine to insure the optimum in performance and reliability under an extreme range of environmental conditions.

The MS/CV connector manufactured by ITT Cannon Electric is available in four shell styles and 58 contact arrangements accommodating from 1 to 48 contacts (sizes 0, 4, 8, 12 and 16).

This connector series is manufactured to accommodate the following backshells: MS3414, MS3415, MS3416, MS3417, MS-3418 and MS3419.

Shell polarization is effected by a single keyway and key, and standard MS polarization positions are available to prevent mismating.

FEATURES



Expendable plastic insertion/ extraction tool
Simpler, stronger contact without undercuts for greater bend resistance
Hard dielectric, closed-entry socket insert realigns bent or misaligned pin contacts
Closed-down design of hard dielectric and resilient seal around each pin contact
Maximum contact stability with minimum clearance between contacts and insulator cavity walls
Contact retaining clip

1. **Universal Insertion/Extraction Tool Style**—A single, expendable plastic tool is used for insertion and extraction of both pins and sockets. Tool never touches engaging ends of contacts, cannot damage insert.
2. **Simple, Strong Contact Design** — One basic configuration eliminates undercuts, maximizes bend resistance for positive contact mating.
3. **Interfacial Pin Insert Seal** — Universal Interconnect permits design of raised moisture barriers around each pin which mate into lead-in chamfers of hard face socket insert for individual contact sealing. Interfacial seal is never touched by service tools.
4. **Superior Contact Stability**—"Closed-down" design of each contact cavity in the insulator supports each contact, minimizes contact splaying.
5. **Closed Entry Socket Insert**—Hard dielectric socket face of mating connector has lead-in chamfers for positive alignment of pins and sockets.
6. **Simplified Assembly Operations** — One standard procedure for assembling connectors and contacts . . . standard MS crimp tools . . . all servicing of contacts accomplished from the rear of the connector.

CONNECTOR GENERAL CAPABILITIES

Class	Moisture Resistance	Fluid & Fuel Resistance	Operating Temperature	
			Maximum	Minimum
MS345*KT	Yes	Complete	+175°C	−55°C
MS345*L	Yes	Complete	+200°C	−55°C
MS345*W	Yes	Partial	+125°C	−55°C

NOTES: Fluid and fuel resistance definitions are as follows:

Limited: Resistant to hydraulic fluid per MIL-H-5606 and lubricating oil per MIL-L-7808.

Partial: Resistant to hydraulic fluid per MIL-H-5606, lubricating oil per MIL-L-7808, Aerosafe 2300, and Skydrol (LD).

Complete: Resistant to hydraulic fluid per MIL-H-5606 or Skydrol (LD), lubricating oils per MIL-L-7808 and MIL-L-23699, cleaners CeeBee A694 or Aerosafe 2300, jet engine fuel per MIL-J-5624 Grade JP-5, Ethylene Glycol, and Coolanol 25.

TEST DATA

HIGH POTENTIAL TEST VOLTAGE

MS/CV connectors show no evidence of breakdown when the test voltage given below is applied between the two closest contacts and between the shell and the contacts closest to the shell for a period of one minute.

TEST VOLTAGE

Service Rating	Test Voltage (rms) 60 cps	Suggested Operating Voltages* DC	AC (rms)
Inst.	1000	250	200
A	2000	700	500
D	2800	1250	900
E	3500	1750	1250
B	4500	2450	1750
C	7000	4200	3000

*As indicated in previous MS Specification and to be used by the designer only as a guide.

TEST CURRENT

Maximum current ratings of contacts and maximum allowable voltage drop under test conditions when assembled as in service are shown below. Maximum total current to be carried per connector is the same as that allowable in wire bundles as specified in MIL-W-5088.

CURRENT RATING (MIL-C-005015 test method)

Contact Size	Max. Current Rating (amps)	Test Current (amps)	Potential Drop (millivolts)
16	22	13	50
12	41	23	50
8	73	46	25
4	135	80	14
0	245	150	12

TOOLS

A complete line of crimp, insertion and extraction tools is provided for MIL-C-005015 connectors. Crimp tools are made from high quality metal and are designed for long life and trouble-free service. Insertion and extraction tools are made of a durable plastic and are inexpensive and expendable.

CVA/M83723 (SERIES II) INTERMATEABLE / INTERMOUNTABLE WITH ALL MIL-C-5015

The United States Air Force specification, MIL-C-83723, USAF Series II, reflects a vastly upgraded, hi-rel version of the MIL-C-5015 type connectors. These connectors are suited for a variety of applications from commercial/industrial to the most stringent, high performance, high reliability military and space applications.

The M83723/CVA connector, manufactured by ITT Cannon Electric, is a threaded coupling, removable rear release crimp contact type which is fully qualified and QPL approved under MIL-C-83723 (USAF). They are fully intermateable/intermountable with all existing MIL-C-5015 connectors.

The removable rear release crimp contact concept utilized by this connector has become the standard design in the military/aerospace and commercial industries. Features such as faster and easier wire termination, use of common termination tooling and minimizing field repair during maintenance are combined to provide a maximum savings in termination and training time.

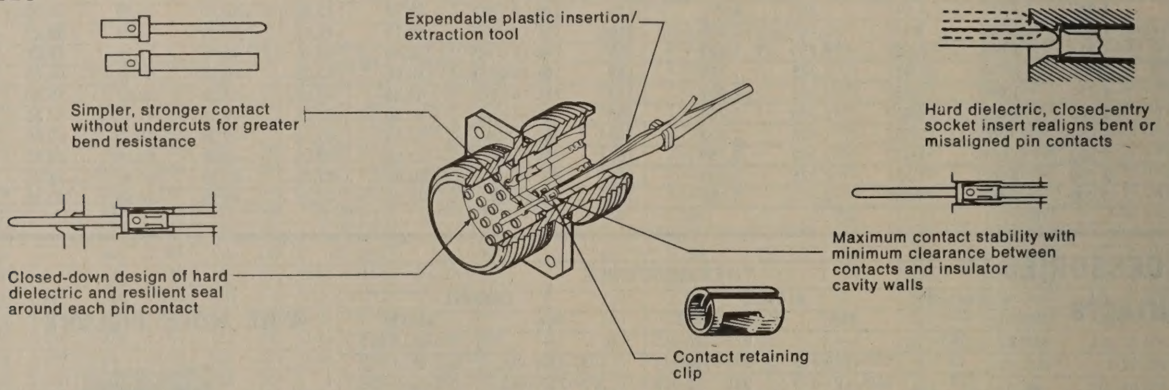
CVA connectors covered under MIL-C-83723 (USAF) utilize fluid resistant elastomers to provide the greatest protection against degradation from a wide variety of fuels, oils, coolants, and cleaning agents. The hardware is finished in electroless nickel to provide for operating temperatures from −55° to +200°C. All materials, finishes and processes used in the manufacture of ITT Cannon's CVA connectors assure the best performance and reliability in the industry for the widest possible range of environmental conditions.

The M83723/CVA connector manufactured by ITT Cannon is available in 4 shell styles and 75 contact arrangements accommodating from 1 to 48 contacts (sizes 0, 4, 8, 12 and 16).

Backshells are available in three configurations for the CVA connector series: straight with strain relief, 90° with strain relief, and straight, short without strain relief. All are fully qualified and QPL-listed under MIL-C-83723 (USAF). **Backshells are not included with the connector and must be ordered separately.**

Shell polarization is effected by a single key and keyway with alternate insert positions available to prevent mismating.

FEATURES



Expendable plastic insertion/extraction tool
Simpler, stronger contact without undercuts for greater bend resistance
Hard dielectric, closed-entry socket insert realigns bent or misaligned pin contacts
Closed-down design of hard dielectric and resilient seal around each pin contact
Maximum contact stability with minimum clearance between contacts and insulator cavity walls
Contact retaining clip

1. **Universal Insertion/Extraction Tool Style** — A single, expendable plastic tool is used for insertion and extraction of both pins and sockets. Tool never touches engaging ends of contacts, cannot damage insert.
2. **Simple, Strong Contact Design** — One basic configuration eliminates undercuts, maximizes bend resistance for positive contact mating.
3. **Interfacial Pin Insert Seal** — Universal Interconnect permits design of raised moisture barriers around each pin which mate into lead-in chamfers of hard face socket insert for individual contact sealing. Interfacial seal is never touched by service tools.
4. **Superior Contact Stability**—"Closed-down" design of each contact cavity in the insulator supports each contact, minimizes contact splaying.
5. **Closed Entry Socket Insert** — Hard dielectric socket face of mating connector has lead-in chamfers for positive alignment of pins and sockets.
6. **Simplified Assembly Operations** — One standard procedure for assembling connectors and contacts . . . standard MS crimp tools . . . all servicing of contacts accomplished from the rear of the connector.

MILITARY SPECIFICATION CROSS REFERENCE CHART

MIL-C-83723/MIL-C-5015

Shown here are the corresponding MIL-C-83723 slash sheet numbers of those connectors that are equivalent to the MIL-C-5015 connectors.

Replacements For MIL-C-5015	MIL-C-83723 "Slash" Sheet Numbers* Sockets	Pin	ITT Cannon Equivalent Prefix Designation for MIL-C-83723	Description

* If parts per MIL-C-83723 are desired, order per applicable M83723 number only.
** Requires 90° Backshell (must be purchased separately).

STANDARD CIRCULAR CONNECTORS CVA/M83723 (SERIES II)

For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

GENERAL INFORMATION

Use the Military part number (M83723) when ordering connectors for military use. These M part number connectors have the required acceptance testing for each part lot per Mil Spec requirements. If a military type connector is needed but without the added acceptance testing for each part, yet having "in process" checking, specify the ITT Cannon equivalent part number on the drawing or purchase order.

ELECTRICAL DATA

TEST CURRENT

Maximum current ratings of contacts and maximum allowable voltage drop under test conditions when assembled as in service are shown below. Maximum total current to be carried per connector is the same as that allowable in wire bundles as specified in MIL-W-5088.

HIGH POTENTIAL TEST VOLTAGE

CV connectors show no evidence of breakdown when the test voltage given below is applied between the two closed conacts and between the shell and the contacts closest to the shell for a period of one minute.

Number of Contacts — 1 through 48
WIRE SIZE

Contact Size	Wire Size (MIL-W-16878)	Insul. O.D. Minimum	Limit (inch.) Maximum
16	16 thru 22	.068 (1,73)	.103 (2,62)
12	12 thru 14	.097 (2,46)	.158 (4,01)
8	8 thru 10	.164 (4,17)	.255 (6,48)
4	4 thru 6	.288 (7,32)	.370 (9,40)
0	0 thru 2	.415 (10,54)	.550 (13,97)

CURRENT RATING (MIL-C-5015 Test Method)

Contact Size	Max. Current Rating (amps)	Test Current (amps)	Potential Drop (millivolts)
16	22	20	21
12	41	35	22
8	73	60	46
4	135	110	38
0	245	200	36

TEST VOLTAGE

Service Rating	Test Voltage (rms) 60 cps	Suggested* Operating Voltages DC	AC (rms)
Inst.	1000	250	200
A	2000	700	500
D	2800	1250	900
E	3500	1750	1250
B	4500	2450	1750
C	7000	4200	3000

*As indicated in previous MS Specification and to be used by the designer only as a guide.

TERMINATION TOOLS

A complete line of crimp, insertion and extraction tools is provided for MIL-C-83723 connectors. Crimp tools are made from high quality metal and are designed for long life and trouble-free service. Insertion and extraction tools are made of a durable plastic and are inexpensive and expandable.

K CONNECTORS

RUGGED CIRCULAR CONNECTORS WITH QUICK CONNECT/DISCONNECT ACME THREADS

K standard circular connectors with special Acme thread coupling are rugged, lightweight and economical. These connectors are extremely versatile, with eight shell types and insert diameters, totaling more than 350 contact arrangements, in a variety of amperage and voltage capacities. K connectors have made the quick disconnect concept a standard in the industry, saving time and money in servicing, assembly, testing and inspection. K connectors are used on aircraft, transmitters, instrument panels, Geiger counters, television cameras, potentiometers, cathode ray recorders and other equipment.

The general basic K series connectors are shown as follows:

- **K/RK** Standard circular connector with special Acme thread couplings for quick connect and disconnect. Used in color and monochrome TV cameras, transmitters, telephone circuits, etc.
- **SK** "BEEP" telephone connectors — special telephone, television applications, and for use on general ground support equipment.

PART NUMBER EXPLANATION

Reverse Coupling
Shell Size
Series Prefix
Contact Arrangement
Shell Style
Cable Clamp
Clamp Capacity

REVERSE COUPLING

R — Pin insert typical in plug, socket insert typical in receptacle and coupling nut reversed; will not mate with K connectors.

SHELL SIZE

W — ⅞" threaded coupling dia.
N — 1 9/16" threaded coupling dia.
L — 2½" threaded coupling dia.
G — 1 3/16" threaded coupling dia.
F — 1 13/16" threaded coupling dia.
S — 1 5/16" threaded coupling dia.
I — 2¼" threaded coupling dia.

SERIES PREFIX

K — ITT Cannon Prefix

CONTACT ARRANGEMENT

See following pages

SHELL STYLE

21 — Straight plug, socket insert
22 — Straight plug, pin insert
23 — 90° plug, socket insert
24 — 90° plug, pin insert
31S — Small flange receptacle, socket insert
31SL — Large flange receptacle, socket insert
32S — Small flange receptacle, pin insert
32SL — Large flange receptacle, pin insert

CABLE CLAMP

C — Cable clamp

CLAMP CAPACITY

See K-21C, K-22C, RK-22C, K-23, K-24 and RK-24C

CONDENSED DATA

STANDARD MATERIALS AND FINISHES

Shell — Aluminum alloy, cadmium plate (clear)

Insulator — Thermosetting plastic or fabricated phenolic

Contacts — Copper alloy, silver plate (gold plate for size 20 contact only)

ELECTRICAL DATA

Number of Contacts — 1 thru 110

Wire Size / Amps —
#20 — 7.5 amps
#16 — 10 amps
#14 — 15 amps
#10 — 30 amps
#8 — 40 amps
#6 — 60 amps
#4 — 80 amps
#2 — 115 amps
#0 — 200 amps

Other Contacts Available — Coax. min. coax.

Termination — Solder pot

MECHANICAL FEATURES

Coupling — K — Special Acme thread coupling nut
RK — Reverse coupling nut

Cable Entry — Cable clamp

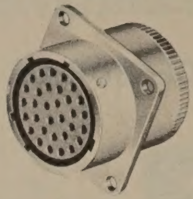
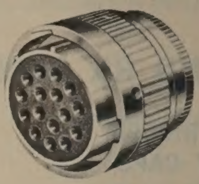
MINIATURE CIRCULAR CONNECTORS DESIGNED TO MIL-C-26482 SERIES I, SOLDER AND CRIMP CONTACTS

KPT/KPTM/KPSE





This catalog describes CANNON® connectors using MIL-C-26482 Series I type hardware with three-point bayonet coupling and five-key polarization. These miniature circular connectors are grouped into three series ranging from general purpose solder pot connectors . . . to high performance, crimp connectors . . . to connectors with high contact density. This broad range provides the most complete family of 26482 connectors available today. The versatility of these connectors is proven by the fulfillment of requirements ranging from general purpose to space environmental.

In addition to the three basic series, connectors for special applications are also available. They include RFI filtering versions (with low pass internal filter pin contacts), hermetic connectors for high pressure watertight requirements, and twist-on pull-off couplers for MIL-C-26482 plugs.

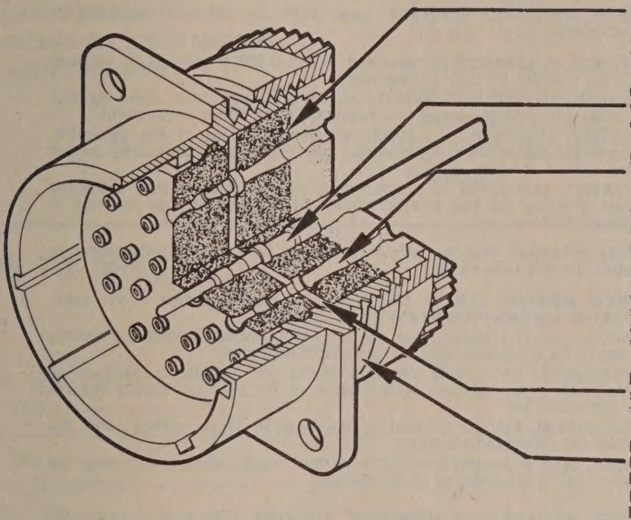
GENERAL PURPOSE, CRIMP CONTACT CONNECTORS

KPTM SERIES



DUAL-SHORE® INSULATOR is integrally molded polychloroprene with a firm front section and a soft resilient rear section that provides a moistureproof seal around each wire. A hard plastic web is molded within the firm front section to prevent over-insertion of the contacts. This construction eliminates the moisture traps characteristic of other types of insulators.

CRIMP, SNAP-IN CONTACTS are to MIL-C-23216 specification and can be crimped with the standard M22520/1 crimp tool. They are especially suited to quick and easy field service by unskilled personnel.

BOW SPRING SOCKET CONTACTS increase socket contact area, provide smooth insertion and prolong connector life.

CLOSED-ENTRY SOCKETS eliminate damage from abuse by test probes and automatically correct misaligned pins. Lead-in chamfers around the socket assures proper mating even with up to .060" misalignment or splay of mating pins.

INTERFACIAL SEALING is assured by raised barriers around each pin contact that compress into the lead-in chamfers at each socket contact. This method provides such a positive seal around each pair of mated contacts that, if several contacts are removed from the insert, there will be no leakage to the remaining contacts when the connector is immersed in water.

POSITIVE STOP, a tough thermoplastic web molded into the DUAL-SHORE insulator, prevents over-insertion of contacts by providing a close-fitting seat for the shoulder of each pin or socket.

HARDWARE is aluminum alloy, finished to QQ-P-416, and conforms to MIL-C-26482. Five key polarization assures correct hardware engagement, and three-point bayonet lock provides quick connect/disconnect. To aid further in sealing, a peripheral neoprene ring is mounted in the receptacle and is compressed by the plug barrel while engaged.

FEATURES

- **unique DUAL-SHORE insulator**
- **crimp snap-in contacts**
- **closed-entry bow spring socket contacts**
- **interfacial sealing**
- **positive stop to prevent over-insertion of contacts**

KPTM connectors are recommended for applications which require an extremely reliable, environment-resistant connector designed for economy, efficiency and simplicity, but not requiring MIL-SPEC qualifications. The KPTM is a version of the KPT with a DUAL-SHORE insulator and MS-3192/3193 crimp snap-in contacts. The DUAL-SHORE insulator is a simple, compact unit with no retaining clips or rings to move or obstruct, and no glued joints to loosen or serve as moisture entry paths.

Interfacial sealing is assured by raised barriers around each pin contact cavity that compress into the lead-in chamfers at each socket contact cavity when mated, providing such a positive seal there will be no leakage when the connector is immersed in water even if several contacts are removed.

KPTM connectors are intermateable, intermountable and interchangeable with all MIL-C-26482 connectors. In fact, they utilize the same crimp, removable (MIL-C-23216) contacts as used in the MIL-qualified KPSE series, thus allowing the user to standardize on one contact for use in both the qualified MS (KPSE) series and the KPTM series.

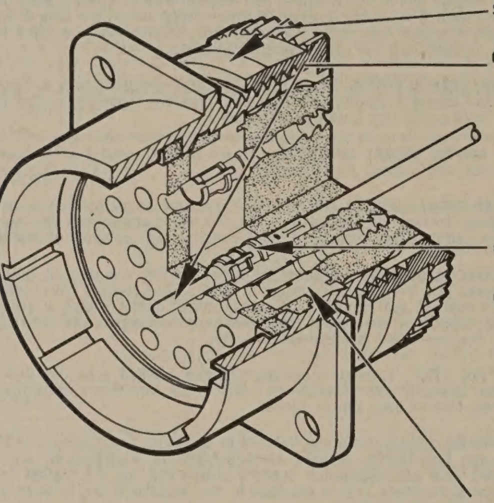
HIGH PERFORMANCE, MIL-C-26842 SERIES I CRIMP CONTACT CONNECTORS

KPSE SERIES



STANDARD MIL-C-26482 HARDWARE mates with any connector designed to MIL-C-26482.

CRIMP, SNAP-IN CONTACTS are designed to MIL-C-23216 and can be crimped with the standard M22520/1 crimp tool.

CLOSED-ENTRY SOCKET CONTACTS eliminate damage from abuse by test probes and help to correct any misaligned pins during engagement.

CONTACT INSERTION is accomplished from the rear of the connector. When the contact is fully inserted, the clip tines snap securely behind the contact shoulder.

CONTACT EXTRACTION is accomplished with a front-inserted extraction tool. Pressing the tool plunger pushes the contact out thru the rear of the connector.

CONTACT RETAINING CLIP is completely encased in a tough plastic wafer to protect the clip from damage.

COMPLETE MOISTURE SEALING is achieved by combining four seals: shell, peripheral, interfacial and wire seals.

SHELL SEAL is effected when the plug shell pushes against the sealing ring in the receptacle when the connectors are mated.

PERIPHERAL SEAL around the edge of the pin insulator is designed so that mating the connector puts tension on the seal and greatly reduces compression set.

INTERFACIAL SEAL is achieved by the insulator faces meeting when the plug and receptacle are mated.

WIRE SEAL is accomplished by a multiple ripple design, exceeding the wire sealing requirements of MIL-C-26482.

POSITIVE INSERT-TO-SHELL MECHANICAL RETENTION with hard plastic wafer firmly locked into a groove in the shell, in addition to a strong adhesive bond between the insert and shell.

FEATURES

- environment-resistant
- voidless integrally molded insulator
- front-release, crimp snap-in contacts
- closed entry socket contacts
- 4 moisture seals for complete sealing
- contact clip protected in hard dielectric
- positive insert-to-shell mechanical retention

KPSE environment-resistant, miniature circular, quick disconnect connectors, qualified to MIL-C-26482, are designed for the exacting requirements of today's electronic industry. The KPSE features an insulator which is mechanically retained in the shell by a positive, hard plastic-to-metal lock retention augmented by a reliable adhesive bond. Complete moisture sealing is achieved by four seals; shell, peripheral, interfacial and wire seals.

Crimp snap-in contacts are retained in clips that are completely encased in a tough hard dielectric wafer, thus protecing the clip tines from damage. Closed-entry socket contacts facilitate positive mating.

The KPSE series is intermateable, intermountable and interchangeable with all MIL-C-26482 connectors, whether crimp or solder type, and is available with many materials, finishes and configurations.

GENERAL PURPOSE, MIL-C-26482 SOLDER CONTACT CONNECTORS

KPT SERIES

FEATURES

- general purpose
- closed-entry socket contacts
- solder termination

KPT connectors are a series of general-purpose, environment-resistant, miniature circular connectors, qualified for use in military applications. These connectors are also widely used in industrial applications calling for quick-disconnect connectors with fixed contacts for solder termination.

The KPT series is intermateable and intermountable with all MIL-C-26482 connectors, whether solder or crimp type and is available with many materials, finishes and configurations.

KPTB CONNECTORS

- general purpose
- double ended pin and socket contacts
- contains KPT socket insert
- nonremovable contacts

KPTB connectors are a series of general purpose, miniature circular connectors, qualified for use in military applications. They are also widely used in industrial applications. The KPTB in a thru-bulkhead version with double faced pin and socket insert construction allowing mating from both ends. They contain KPT socket inserts with feedthru (pin/socket) nonremovable contacts.

The thru-bulkhead receptacle is provided for applications requiring the disconnection of a power source from either side of a panel. A typical connector to be used if air leakage requirements are critical.

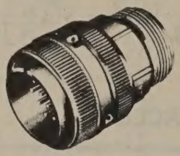
MS STANDARD CIRCULAR CONNECTORS DESIGNED TO MIL-C-5015

MSA / MSB / MSE / MSF / MSR /ER SERIES DESIGNED TO MIL-C-5015

• Uniform high quality • Shell sizes and types for every application • Widest range of contact arrangements

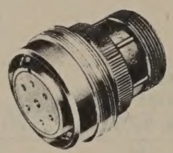
This catalog describes ITT Cannon connectors designed and manufactured to MIL-C-5015, the military specification covering "MS" electrical connectors. These circular connectors were originally designed for aircraft, but are now widely used in many other fields. They are particularly suitable for commercial applications requiring low cost and high reliability.

GENERAL PURPOSE MS-A, MS-B



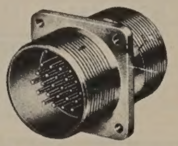
Designed to MIL-C-5015, MS-A and MS-B connectors are widely used in aircraft, commercial and industrial applications. MS-A connectors have solid endbells; MS-B connectors have split endbells; MS-C connectors are pressurized. Standard insulation is diayll phthalate. Shells are aluminum alloy. Contacts are silver plated copper alloy.

QUICK DISCONNECT CA-AQ AND CA-BQ



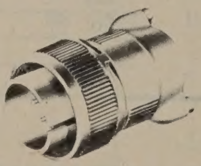
CA-AQ and CA-BQ are MS-A and MS-B plugs incorporating a quick-disconnect accessory. The accessory consists of a coupler and an adapter. CA-AQ and CA-BQ connectors are used in quick disconnect applications, such as between breakaway assemblies or where disconnect by a straight-away pull is required.

PRESSURIZED BULKHEAD BFR AND TBF



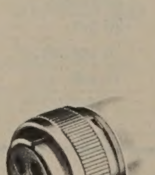
The BFR is a pressurized bulkhead connector that will mate with standard MS plugs. The TBF is a thru-bulkhead version with double faced construction allowing mating from both ends. Both connectors use resilient insulators. Contacts are silver plated copper alloy. Shells are aluminum alloy.

ENVIRONMENTAL RESISTANT MS-E, MS-F, MS-R and F-80 (Solder/Crimp Termination)



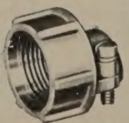
MS-E, MS-F and MS-R are similar to MS-A and MS-B connectors but have resilient insulators and wire sealing grommets for extreme environmental conditions and high altitude sealing. MS-E's and MS-F's have a mechanical cable clamp; the MS-R has a shorter, lighter weight endbell without the cable clamp. Both the MS-F and MS-R have O rings to supplement the interfacial seal. Shells are aluminum alloy. Contacts are silver plated copper alloy. The F-80 modification (crimp contact termination) is available in E, R, F and BFR styles with resilient insulators.

POTTING ER CONNECTORS (Solder Contact Termination)



These lightweight potting connectors provide resistance to salt water, fuels, etc., and will withstand the effects of high vibration. 3100 and 3106 connectors with plastic potting cups and resilient inserts meet the requirements of MS3103 and MS25183. Contacts are silver plated copper or brass. ER insulators are resilient; shells are aluminum alloy. A 90° plug (3108ER) is also available.

ACCESSORIES



Accessories to fit MS connectors include junction shells, protective caps, dummy or stowage receptacles, cable clamps, telescoping bushings.

ITT Cannon is the foremost manufacturer of MS and MS type connectors with the widest range of connector styles, sizes and variations in the industry. These connectors utilize the finest materials, which, along with precision manufacturing and rigid quality control, assure ITT Cannon customers of the finest quality connectors.

GENERAL INFORMATION

CONTACTS

Pin and socket contacts are designed to resist severe vibration and repeated connection and disconnection. The average force to either engage or separate pin and socket contacts will not exceed the average values given in the latest revision of MIL-C-5015.

Force in Lbs.	Contact Sizes 16	12	8	4	0
Maximum	3.00	5.00	10.00	15.00	20.00
Average	2.10	3.50	7.00	10.50	14.00
Minimum	.25	.50	.75	1.00	2.00

THERMOCOUPLE CONTACTS

Size 12 and 16 contacts, machined from matching thermocouple lead wire alloys, can be supplied in ITT Cannon connectors. These thermocouple contacts maintain continuity from thermal-sensor leads thru a bulkhead or other closures in temperature measuring applications.

These contacts for matching lead wires are detailed by the standards of the Instrument Society of America (I.S.A.):

I.S.A. Standards	Material
J and Y	Iron and constantan
K	Chromel and alumel
T	Copper and constantan

Since the thermocouple connector application determines the soldering methods and materials to be used, thermocouple contacts, identified by permanent markings, are normally supplied with untinned solder pots. Thermocouple contacts are supplied only in connectors having resilient insulators.

WIRING

For class E, R and F connectors, satisfactory moisture sealing will be obtained if AWG and MS wire sizes and insulation outside diameters are governed by this table.

Contact Size	Wire Size (MIL-W-5086)	Insulation OD Limit (inches)
16	16 thru 22	.064 min. to .130 max.
12	12 thru 14	.114 min. to .170 max.
8	8 thru 10	.164 min. to .255 max.
4	4 thru 6	.275 min. to .370 max.
0	0 thru 2	.415 min. to .550 max.

ELECTRICAL SERVICE DATA

Maximum current ratings of contacts and maximum allowable voltage drop under test conditions when assembled as in service are shown below. Maximum total current to be carried per connector is the same as that allowable in wire bundles as specified in MIL-W-5088.

Contact Size	Max. Current Rating (amps)	Test Current (amps)	Potential Drop (millivolts)
16	22	20	21
12	41	35	20
8	73	60	12
4	135	110	10
0	245	200	10

HIGH POTENTIAL TEST VOLTAGE

MS connectors show no evidence of breakdown when the test voltage given below is applied between the two closest contacts and between the shell and the contacts closest to the shell for a period of one minute.

MS Service Rating	Test Voltage (RMS) 60 cps	Suggested* Operating Voltages DC	AC (rms)	Air Spacing Nom. (inches)	Creepage Distance Nom. (inches)
Inst.	1000	250	200		1/16
A	2000	700	500	1/16	1/8
D	2800	1250	900	1/8	3/16
E	3500	1750	1250	3/16	1/4
B	4500	2450	1750	1/4	5/16
C	7000	4200	3000	5/16	1

*As indicated in previous MS Specification and to be used by the designer only as a guide.

ITT CANNON ELECTRIC

MS STANDARD CIRCULAR CONNECTORS DESIGNED TO MIL-C-5015

For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

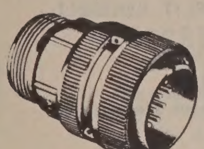
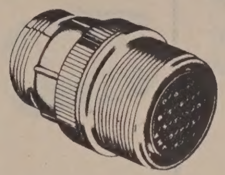
GENERAL PURPOSE MS-A/MS-B





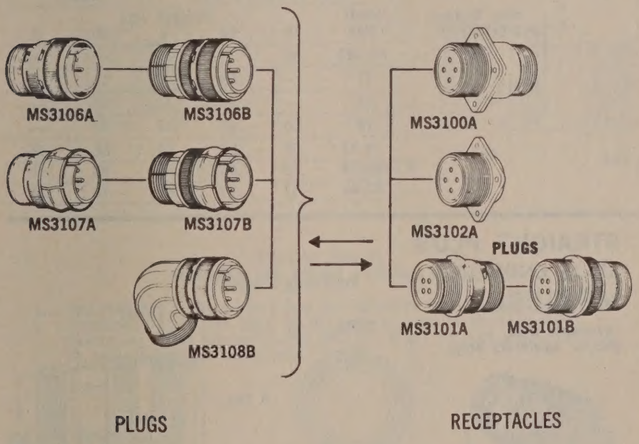
MS-A and MS-B connectors were originally designed and approved under Military Specifications for use in military aircraft. Since then, commercial and industrial demand for these connectors has grown because of their uniform quality, dependability, low cost and interchangeability as prescribed in MIL-C-5015. These MS connectors are available in two classes:

- A — Solid endbell with plastic or resilient insulators.
- B — Split endbell with plastic insulators for greater accessibility to solder connections.

The MS-A and MS-B are available as plugs or receptacles. The term plug applies to any assembly fixed to the end of a cable. The term receptacle applies to any assembly mounted to a wall or box. MS shells will accept either pin or socket insert assemblies. Socket contacts are the closed-entry type.

Standard MS connectors are available with from 1 to 100 contacts in 15 different insert diameters ranging from .250 to 2.550 inches. Each contact arrangement is available with pin or socket contacts and will mate with all MS type connectors having the same size and contact arrangement.

TYPICAL MATING GUIDE



STANDARD DATA

Shell	Material	Aluminum alloy
	Finish	Olive drab chromate coating over cadmium plating
Insulator	Material	(Plastic) diayll phthalate
Contacts	Material	Brass or copper alloy
	Finish	Silver plate
	Termination	Tinned solder pot

CONTACT ARRANGEMENTS

See pages 49-51

CONTACT TYPE

P for Pin; S for Socket

ALTERNATE INSERT POSITIONS

See pages 51-52

*When resilient insulators are desired, see pages 49-51 for availability.
When ordering (EG) a 10SLA4 contact arrangement it will be the same as a 10SL-20-4 which is stamped on the shell.

MS STANDARD CIRCULAR CONNECTORS DESIGNED TO MIL-C-5015

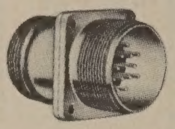
For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

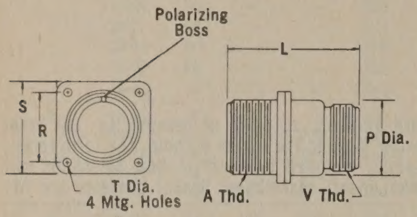
GENERAL PURPOSE MS-A/MS-B

WALL MOUNTING RECEPTACLE

SOLID SHELL

MS3100A



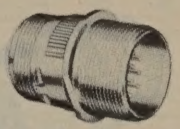


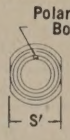
MS3100A wall mounting receptacles are used with the MS3057 cable clamp or with conduit to eliminate need for the conduit box in applications where wires are carried thru walls or bulkheads.

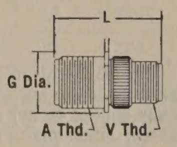
CABLE CONNECTING PLUG

SOLID ENDBELL

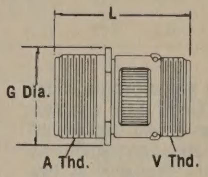
MS3101A







SIZES 8S thru 16



SIZES 18 thru 36

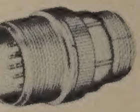
MS3101A solid endbell cable connecting plugs are used for cable extension requirements where mounting provisions are unnecessary.

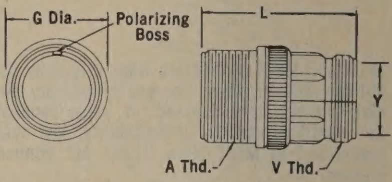
CABLE CONNECTING PLUG

SPLIT ENDBELL

MS3101B

(Available with plastic insulators only)



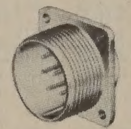


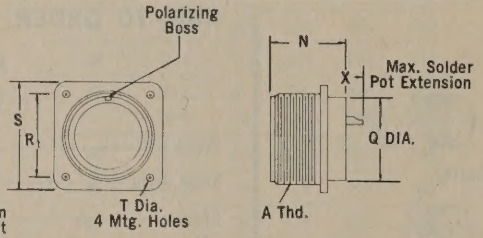
MS3101B split endbell cable connecting plugs are used for cable extension requirements where mounting provisions are unnecessary.

BOX MOUNTING RECEPTACLE

MS3102A

(Available with plastic or resilient insulators)





The MS3102A box mounting receptacles are used on boxes and equipment cases where no cable support is required.

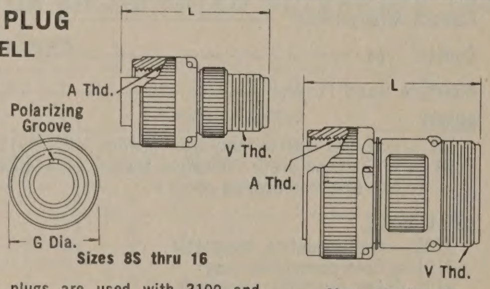
STRAIGHT PLUG

SOLID ENDBELL

MS3106A



Sizes 8S thru 16

Sizes 18 thru 40

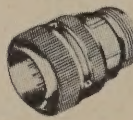
MS3106A straight plugs are used with 3100 and 3102 receptacles and 3101 plugs.

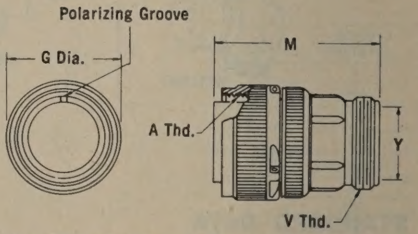
STRAIGHT PLUG

SPLIT ENDBELL

MS3106B

(Available with plastic insulators only)





MS3106B straight plugs with split endbell are used to connect circuits with 3100 and 3102 receptacles and 3101 plugs.

ITT CANNON ELECTRIC

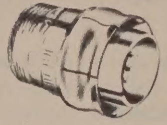
MS STANDARD CIRCULAR CONNECTORS DESIGNED TO MIL-C-5015

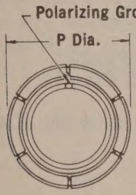
For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

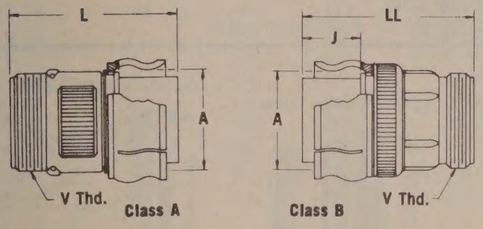
GENERAL PURPOSE MS-A/MS-B

QUICK DISCONNECT PLUG

SOLID ENDBELL
MS3107A
SPLIT ENDBELL
MS3107B





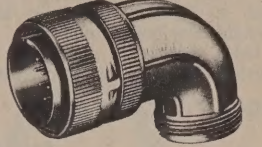


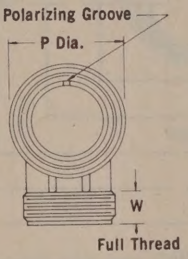
Sizes 8S thru 28
(Available with plastic insulators only)

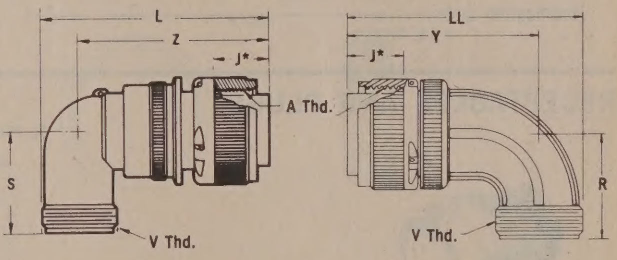
The MS3107A (solid endbell) and the MS3107B (split endbell) quick disconnect plugs are used at the end of a cable on equipment demanding rapid disconnection. MS3107 plugs are not adaptable to severe vibration conditions.

90° ANGLE PLUG

SOLID ENDBELL
SPLIT ENDBELL
MS3108A
MS3108B







Class A
(Available with resilient insulators only)

Class B
(Available with plastic insulators only)

Sizes 8S thru 48

MS3108B 90° angle plugs, have a split endbell and are used where wires must be brought at an abrupt angle. Where a solid endbell is required, MS-3108A is available in sizes 8S thru 36 only. Either the split or solid endbells on the 3108 are capable of being rotated and locked.

QUICK DISCONNECT AQ/BQ

CA-AQ and CA-BQ connectors are used in quick disconnect applications, such as between break-away assemblies or where disconnect by a straight-away pull is required.

Quick disconnect accessories (adapters and couplers) fit standard plastic insert MS and CA connectors. The manual coupler replaces the coupling nut on the plug; the adapter screws onto the coupling thread on the receptacle. These accessories are available thru size 28 and may be purchased separately or as part of a standard plastic insert MS or CA connector assembly.

QUICK DISCONNECT AQ/BQ

CA22181 ADAPTERS

FOR STANDARD PLASTIC INSULATOR MS AND CA RECEPTACLES

The CA22181 adapter is designed to screw over the coupling threads of a standard MS or CA receptacle with plastic insulator. It has a locking groove, which receives the formed end of the coupler latch when fully engaged.

Adapters may be ordered as part of a standard plastic insulator MS or CA receptacle, or they may be ordered separately. To order adapters separately, a listing is given in the table below. To order complete assemblies (standard plastic insulator MS or CA receptacles with adapters), see page 56.

ITT CANNON ELECTRIC

MS STANDARD CIRCULAR CONNECTORS DESIGNED TO MIL-C-5015

For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

MS-E/MS-R/MS-F
SOLDER/F80 CRIMP ENVIRONMENTAL

In the latest revision of MIL-C-5015, a new class of environment-resistant connectors was added. This new class F connector supersedes the previous class E connector. The MS-3106F is identical to the MS-3106E except that the MS-3106F has an "O" ring under the coupling nut. The class E will still be available upon request for existing programs, and upon ordering will also bear the E nomenclature on the shell.

ITT Cannon MS-F and MS-R connectors are designed to operate in the extreme environmental conditions of high altitude flight. These connectors must be completely sealed to withstand moisture, condensation, vibration, corona and flashover caused by high altitude environments.

MS-F and MS-R connectors have a resilient grommet with internal restrictions in the wire cavities which act as O rings around the wires. This allows the wires to slide thru the grommet with a minimum of friction, yet when the ferrule is seated and the endbell tightened it provides a perfect wire seal thru a wide variety of wire diameters. This seal at the rear, plus the interfacial seal at the front, effects a completely environment-resistant assembly when the plug is mated to an F or R receptacle. Sockets are of the closed-entry type.

The F-80 modification (crimp contact termination) is available in resilient insulators in the E, R, F, and BFR styles, creating a large selection of insert assemblies and hardware. Components are identical to the MS–5015 except that the contacts are modified for crimp termination providing an inexpensive crimp contact connector with the proven reliability of and complete intermateability with the MS-5015 series. See page 61 for assembly instructions.

Cable clamps have been integrally designed with the endbell on MS-E and MS-F connectors. Class R is without the cable clamp.

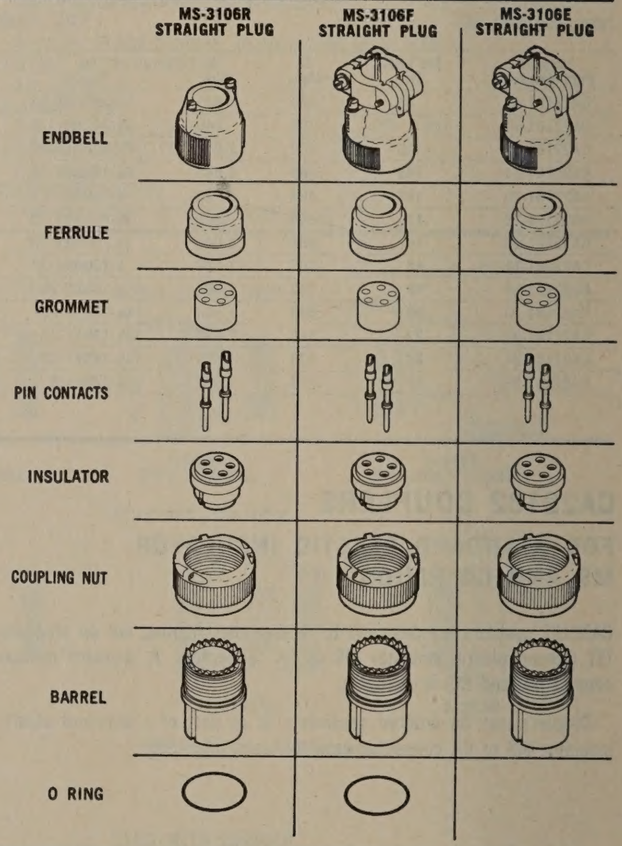
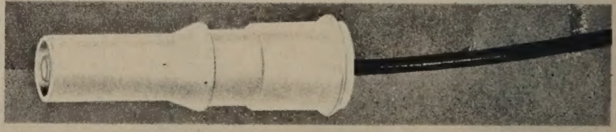
Insulator	Material	Polychloroprene (resilient)
Contacts	Material	Brass or copper alloy
	Finish	Silver plate
	Termination	Tinned solder pot



HIGH VOLTAGE CARTRIDGES FOR MS-E AND MS-R

- **Standard contact arrangements are adaptable to high voltage applications.**
- **Eliminates need for a separate high voltage connector.**
- **Assembly time is reduced.**

High voltage conductors as well as power and/or control signal conductors can now be connected simultaneously in standard MS connectors. Previously, MS connectors involved in high voltage circuitry required individual design considerations and could only be ordered as a "special." The new high voltage cartridge allows conversion of a standard connector to one capable of handling up to 15,000 volts DC (Test Voltage — mated), operating voltage — sea level 5,000 VDC or 3,500 VAC. These cartridges are molded of nylon and provide a high degree of arc-over protection between adjacent contacts or between a contact and the connector shell. Unmated, each cartridge provides a nylon isolating barrier capable of withstanding up to 10,000 volts DC (or peak).



The contact within the cartridge is a 7.5 amp, size 20, crimp snap-in type with dielectric rear release clip retention. This contact is removable with the plastic CIET20 insertion/extraction tool provided the insulation is .084" or less. The contact may be crimped with the standard MS-3191 tool and hand inserted into the nylon cartridge. The cartridge body is installed in the connector at the factory.

High voltage cartridges now available fit in the space normally occupied by a #4 or #8 size contact in an MS-E, MS-R or MS-F type connector.

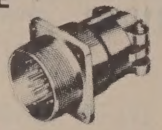
Over forty-nine contact arrangements are currently available in which these high voltage cartridges may be used. Consult factory for ordering information.

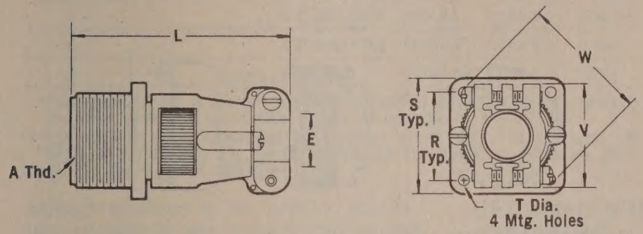
MS STANDARD CIRCULAR CONNECTORS DESIGNED TO MIL-C-5015

For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

MS-E/MS-R/MS-F
SOLDER/F80 CRIMP ENVIRONMENTAL

WALL MOUNTING RECEPTACLE
INTEGRAL CABLE CLAMP
MS3100E / MS3100F

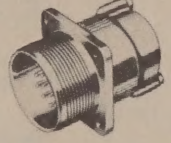


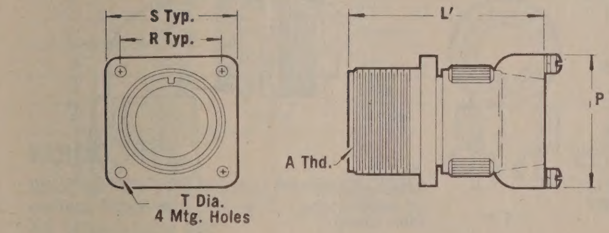


MS3100E is identical to MS3100F and is available upon request. For new equipment, customer should specify MS3100F.

MS3100F wall mounting receptacles are used to carry wires thru walls or bulkheads, or to provide a means of disconnection at a bulkhead. MS3100F receptacles mate with 3106 and 3108 plugs.

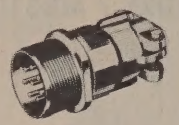
WALL MOUNTING RECEPTACLE
MS3100R

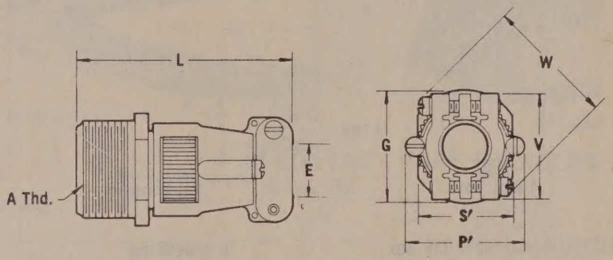




The MS3100R receptacle is identical in purpose to the MS3100F. The MS3100R features a shorter lightweight endbell and mates with 3106 and 3108 plugs.

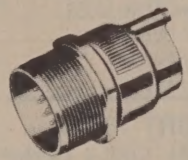
CABLE CONNECTING PLUG
INTEGRAL CABLE CLAMP
MS3101E / MS3101F

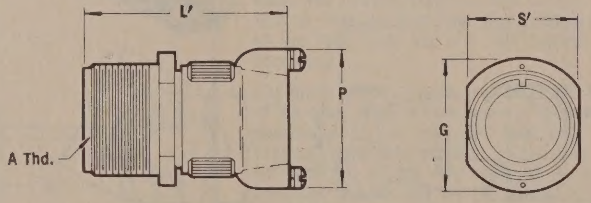




MS3101E cable connecting plugs are used for cable extension requirements, where mounting provisions are unnecessary. MS3101E plugs mate with 3106, 3107 and 3108 plugs. Note: The D revision of MIL-C-5015 has changed the nomenclature of the 3101 from receptacle to plug.

CABLE CONNECTING PLUG
MS3101R





MS3101R cable connecting plug is identical in purpose to the MS3101E. The MS3101R features a shorter lightweight endbell and mates with 3106, 3107 and 3108 plugs. Note: The D revision of the MIL-C-5015 specification has changed the nomenclature of the 3101 from receptacle to plug.

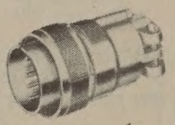
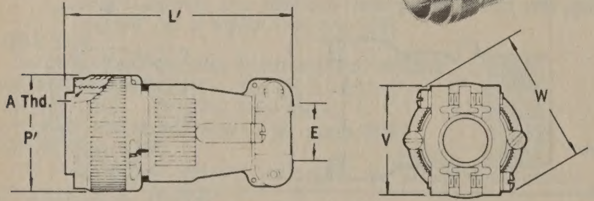
STRAIGHT PLUG

INTEGRAL CABLE CLAMP

MS3106E / MS3106F



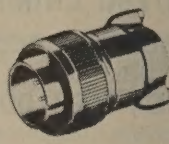


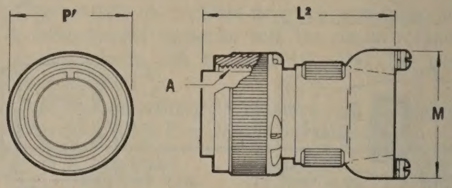
MS3106E is identical to MS3106F except for O ring under the coupling nut, and is available upon request. For new equipment, customer should specify MS3106F.

MS3106F straight plugs mate with 3100 and 3102 receptacles and 3101 plugs.

STRAIGHT PLUG

MS3106R

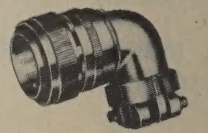


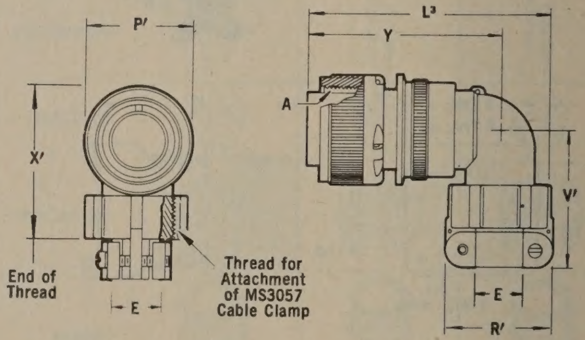


The MS3106R straight plug is identical in purpose to the MS3106F. The MS3106R has the shorter endbell. This plug will mate with 3100 and 3102 receptacles and 3101 plugs.

90° ANGLE PLUG

MS3108E / MS3108R





MS3108R 90° angle plugs (with O ring seal less cable clamp) and the MS3108E 90° angle plugs (less O ring seal with cable clamp) are used where there is limited space and where wires must be brought at abrupt angles. This plug will mate with 3100 and 3102 receptacles and 3101 plugs.

MS STANDARD CIRCULAR CONNECTORS DESIGNED TO MIL-C-5015

For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

F80 ASSEMBLY INSTRUCTIONS

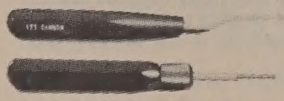
TOOLS

ITT Cannon provides a complete line of crimp insertion and extraction tooling to be used with CA-F80 contacts as follows:

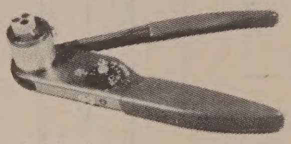
Contact Size	Hand Crimp Tool*	Locator	Power Crimp Tool**	Crimp Head	Locator	Gauge
16	M-22520/1-01	TH-70-1				
12	M-22520/1-01	TH-70-1	CBT-600/600B	CCN-12-2	CCHP-12-2	—
8	—	—	CBT-600/600B	CCN-8-1	CCHP-8-1	CCN-8-1
4	—	—	CBT-600/600B	CCN-4-1	CCHP-4-1	CCN-4
0	—	—	CBT-600B	CCH-0-1	CCHP-0-9	CCN-0

*The M-22520/1-01 is the MIL standard crimp tool for #12 thru #20 contacts and when used with crimp #12, 16, and 20 contacts for the CA-F80.

**The CBT-600- is recommended for crimping of #4 thru #12 contacts. The 6BT-600B for #0 thru #8. The appropriate locators and crimp heads are available as shown above.



Insertion/Extraction Tools



M-22520/1-01

CBT-600

Although obsoleted by MIL-T-22520, MS3191-1 tool is commonly used in non-military commercial applications. The chart below specifies contact size and corresponding locator used with the MS3191-1 tool.

Shell Styles	Contact Size	Locator
8S thru 16S	16 Pin 16 Socket	L-16-3191-7 L-16-3191-46
12 thru 36	16 Pin 16 Socket 12 Pin 12 Socket	L-16-3191-10 L-16-3191-52 L-16-3191-16 L-16-3191-20

Insertion and extraction tools used for these connectors are available for contact sizes 16 thru 0 as shown.

Contact Size	Insertion Tools	Extraction Tools	Handle Color
16	CIT-16	CET-16-4	Blue
12	CIT-12	CET-12-2	Yellow
8	CIT-8	CET-8	Red
4	CIT-4	CET-4	Blue
0	CIT-0	CET-0	Yellow

GUIDE PINS

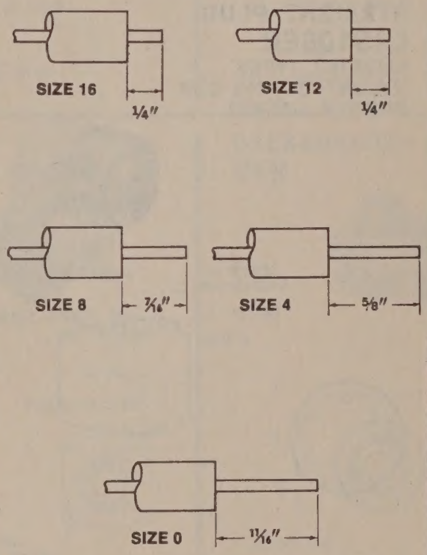
Guide pins are used to assist insertion of socket contact Sizes #16 and #12. Larger sizes do not require guide pins.

Contact	Guide Pin
#16	226-1017-000
#12	226-1018-000

CRIMPING CONTACTS

1. Check the crimp tool to be sure that the proper crimp head locator is used.
2. Cycle the tool to be sure the indentors are open.
3. Place the contact, mating end first, into the tool.
4. Insert the stripped wire into the hollow end of the contact. Be sure the wire is inserted as far as it will go.
5. Close the tool completely to crimp. Unless the tool is closed completely, the tool will not release the contact.
6. Remove the crimped contact from the tool. Check the inspection hole to verify that the wire is fully inserted.

RECOMMENDED WIRE STRIPPING



INSERTION OF CONTACTS

1. Before inserting the contacts, remove the endbell, grommets, and ferrule from the receptacle. Remove the endbell, grommet, ferrule, and coupling nut from the plug. Slide the hardware over the wire bundle in the proper order for reassembly after all the contacts are inserted.
2. To assist insertion of contacts, lubricate insert cavities with isopropyl alcohol. Alcohol will evaporate and will not leave a conductive film. **Caution: Never use any lubricant other than isopropyl alcohol.** Hold the plug or receptacle body firmly and insert the wired contacts as far as possible by hand. Starting at one side of the insulator, work progressively from contact to contact across the layout. When inserting socket contacts, be sure to provide fixture space below the front face to permit length of guide pins for #16 and #12 contacts to clear insulator face.

PIN CONTACT PART NUMBERS

Contact Size	F80
16S	330-0345-016
16	330-0351-016
12	330-0351-012
8	330-0351-008
4	330-0351-004
0	330-0351-000

SOCKET CONTACT PART NUMBERS

Contact Size	F80
16S	031-0554-161
16	031-0560-161
12	031-0560-121
8	031-0560-081
4	031-0560-041
0	031-0560-001

3. Place the correct insertion tool on the contact so that the wire runs along the groove in the tool. (Tool tip will butt against the shoulder.)
4. Beginning with a cavity on the outer edge of the plug, apply a slow, even pressure perpendicular to the insulator face until the contact snaps into position. If contacts are not inserted all the way prior to removing insertion tool, do not try to reinsert the insertion tool. Instead, using the extraction tool, push the contact back to position it was in when the insertion tool was originally placed over the contact for push-in; otherwise the inside of contact cavity may be damaged by reinserting the insertion tool.
5. Inspect the front end of the insulator to assure that the contacts are inserted to the proper depth.

COMPLETION

After all the cavities have been filled, slide the hardware back into position on the barrel. Tighten the endbell until the ferrule and endbell are flush. Compression of the grommet in this manner results in maximum sealing characteristics of the plug.

EXTRACTION OF CONTACTS

1. Select the appropriate tool. (Tool tips are reversible for either pin or socket.) Place the extraction tool over the pin or into the socket.
2. Apply a slow, even pressure to push the contact out of the rear of the insulator.

MS STANDARD CIRCULAR CONNECTORS DESIGNED TO MIL-C-5015

For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

ER POTTING CONNECTORS

MS type potting connectors are available with nylon cups. 00 and 06 shell styles with plastic cups and resilient insulators meet the requirements of MS3103 and MS25183. Also available is the 08 plug with resilient insulator and 90° angle nylon potting cup.

ITT Cannon provides for a ¼" clearance for potting on all contact sizes.

MS STANDARD CIRCULAR CONNECTORS DESIGNED TO MIL-C-5015

For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

BULKHEAD CONNECTORS BFR / TBF

TBF and BFR pressurized bulkhead receptacles mate with standard MS type plugs (3106, 3107 and 3108) if contact arrangements correspond. Both the BFR and TBF have resilient insulators. The TBF (thru-bulkhead fitting) version has a double-faced construction allowing mating from both ends. An O ring is supplied as standard on both the BFR and the TBF. Contacts are silver plated copper or brass alloy. Shells are aluminum alloy.

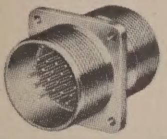
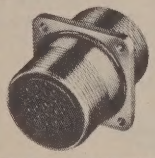
THRU-BULKHEAD RECEPTACLE

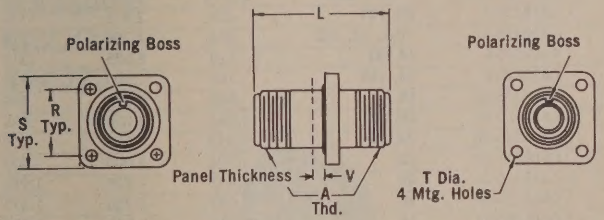
TBF — RESILIENT INSULATOR



PIN INSERT END



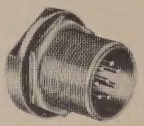
SOCKET INSERT END



TBF thru-bulkhead fittings have pressurized resilient insulators. Special double-face pin and socket contact construction permits cable components to be wired and tested in the shop and then to be plugged into the mounted TBF plug to complete the installation. The TBF mates with 3106, 3107 and 3108 plugs.

PRESSURIZED BULKHEAD RECEPTACLE

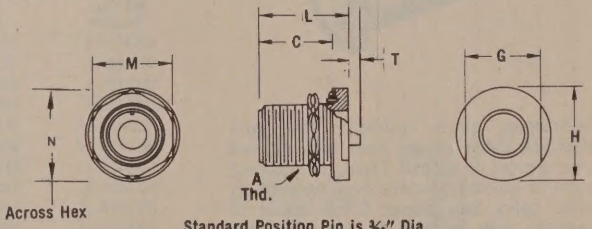
BFR



TYPE 1

Shell	Standard
Insulator	Polychloroprene
Lock Nut	Hex with 6 wire holes
O Ring	Neoprene
Position Pin	Standard
Mounting	Figure 1 or 2

PART NO. EXAMPLE: BFR14S-5P-1



Standard Position Pin is $\frac{3}{32}$" Dia.

BFR pressurized bulkhead receptacles withstand the air leakage requirements of MIL-C-5015 not to exceed 1 cu. in. of air per hour when subjected to a pressure differential of 30 psi at −55°C. Insulators are resilient material bonded to the aluminum shell. Both pin and socket assemblies are available. The BFR will mate with standard MS type 3106, 3107, 3108 plugs.

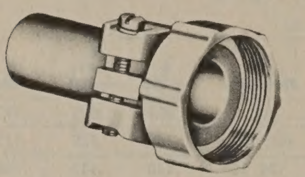
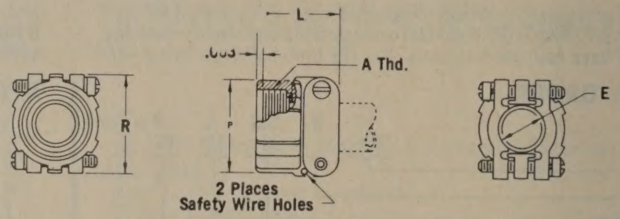
ACCESSORIES

CABLE CLAMP WITH OR WITHOUT BUSHING

MS3057A





The MS3057A cable clamp is made for plugs and receptacles that have an endbell with external conduit threads. The double clamping action provides a balanced, positive hold on the wires and greatly reduces moisture transmission. Provision is made for safety wiring. This clamp is supplied without bushing; to order bushing, add "with bushing" after part number.

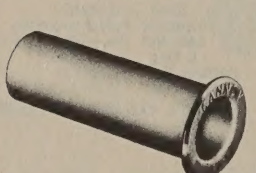
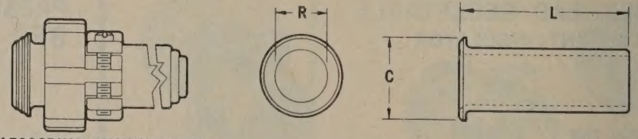
†MS bushings are polychloroprene.

TELESCOPING BUSHING

MS3420 / MS39056 (REF.)





TELESCOPING BUSHING WITH MS3057A CABLE CLAMP

Telescoping gland bushings (used with MS3057A cable clamp) keep dirt, oil and moisture out of endbell. Taping or wrapping wires is eliminated since bushing protects wires going thru clamp. Combinations of bushings may be used to decrease cable entry diameter to improve sealing. Material is polychloroprene (MS).

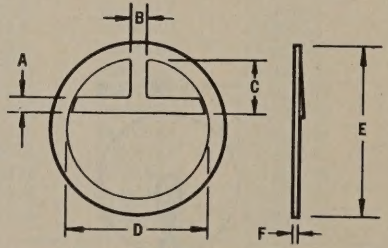
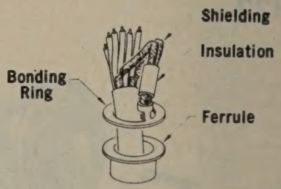
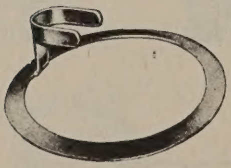
BONDING RING

CA2250
AN3111







APPLICATION

The wire shield is separated from wire by drawing wire thru a pierced hole in the shielding. The bonding ring tongues are formed around the shielding pigtail and soldered. The soldered connection is protected by insulation such as plastic tubing or friction tape to prevent stray wires of the shielding braid from rupturing the insulation of other wires, thereby causing a short circuit. When the flexible conduit nut or cable clamp is tightened to the endbell of the plug, a satisfactory bond between the wire shielding and plug endbell is ensured.

Bonding rings are used for bonding between endbell and wire shielding, and may be used with either a cable clamp or a flexible conduit coupling nut. Material is soft copper. All excess lengths of tongue may be cut away.

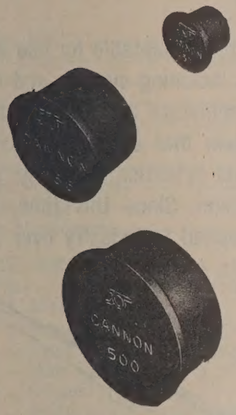
ITT CANNON ELECTRIC

MS STANDARD CIRCULAR CONNECTORS DESIGNED TO MIL-C-5015

For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

ACCESSORIES

PLASTIC PROTECTIVE CAPS



Protective dust caps are designed to cover the coupling and conduit ends of MS connectors where there is a possibility of foreign matter accumulating on the interior of the connector or of damage to the threaded parts. Material is red polyethylene. Plastic dust caps can be reused, but are not intended to replace the standard aluminum dust caps shown on preceding pages.

ITT CANNON ELECTRIC

MINIATURE CIRCULAR CONNECTORS
PV/M83723/M26482

PVA/MIL-C-83723 (SERIES I)
PV7*/MIL-C-26482 (SERIES II)

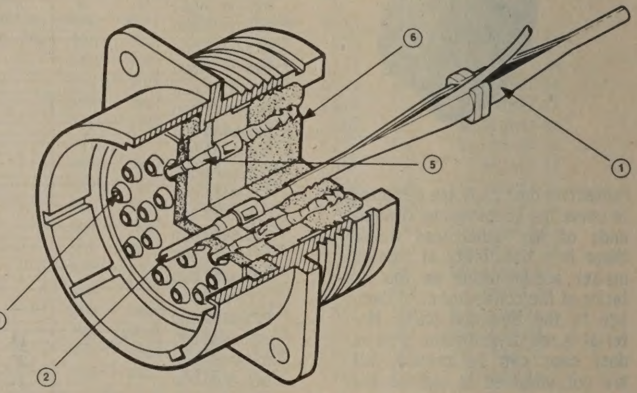
- **Intermateable with MIL-C-26482 Series I and NAS1599**
- **Operating temperature —55°C to +200°C**

The PV connector series is designed to meet the rugged requirements of NAS1599, the specification which delineates the critical requirements of space-age applications. PV connectors have been used extensively on major aerospace programs requiring general-purpose, miniature cylindrical bayonet coupling connectors such as Apollo, ATM, OWS, Minuteman, Skylab, Space Shuttle, Thor-Delta, Titan IIIC, and Viking.

PVA/PV7* connectors are available under numerous industrial specifications, some of which are listed below:

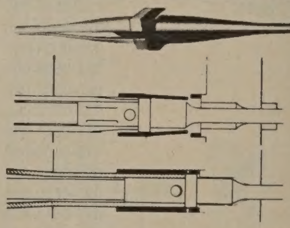
- MIL-C-83723 (Series I) USAF
- 40M39569 NASA, George C. Marshall Sprace Flight Center
- 81D52 Martin Marietta, Denver Division
- MC414-0365 Rockwell International Space Division
- AC414-0013 Rockwell International Autonetics Division
- STS0003 McDonnell Douglas Astronautics
- SV81 NAS1599 Martin Marietta/NASA Langley
- MIL-C-26482 (Series II) Navy

The PV series is an important member of the Universal Interconnect System (UIS) — the only system that can perform all interconnection missions. This system is adaptable for use with connectors of all shapes and sizes, including circular and rectangular configurations, standard, miniature and subminiature sizes. UIS is a rear servicing system that evolved from the LITTLE CAESAR® rear release contact retention assembly, pioneered and developed by ITT Cannon. Since this time, ITT Cannon, and its licensees, have supplied to industry over 250 million interconnections utilizing this system.



Universal Insertion/Extraction Tool Style — A single, expendable plastic tool is used for insertion and extraction of both pins and sockets. The tool never touches the engaging ends of contacts, and cannot damage the insert. **Contact Insertion** is accomplished with the colored insertion tip of the tool that butts against the contact shoulder. When the contact is fully inserted, the tines snap behind the contact shoulder. **Contact extraction** is equally simple. Using the white ends of the tool, insert the tool tip into the rear of the plug (or receptacle), expanding the tines beyond the contact shoulder and releasing the contact.

1.

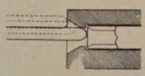


Simple, Strong Contact Design — One basic configuration eliminates undercuts and maximizes bend resistance for positive contact mating.

2.

Closed-Entry Socket Insert — Hard dielectric socket face of mating connector has lead-in chamfers for positive alignment of pins and sockets.

3.

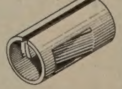


Interfacial Pin Insert Seal — Universal interconnect permits design of raised moisture barriers around each pin which mate into lead-in chambers of hard face socket insert for individual contact sealing. Interfacial sealing is never touched by service tools.

4.

Superior Contact Stability — Rear Contact Release System (LITTLE CAESAR contact assembly) features a stamped metal retaining clip captivated by molded-in shoulders of each contact cavity in the insulator. A rear-inserted plastic tool expands the tines beyond the contact shoulder, releasing the contact.

5.



Polarized Backshells — Interlocking teeth on the front of the backshell and rear portion of the shell allow endbells to be positioned as desired, eliminating chafing of wire during assembly.

6.

HOW TO ORDER

SERIES I — MIL-C-83723

ITT CANNON DESIGNATION

PVA 0 R 22 B 55 P N C L

- Series Prefix
- Shell Style
- Class
- Shell Size
- Coupling Means
- Contact Arrangement
- Contact Style
- Insert Polarization
- Endbell Type
- Less Components

SERIES PREFIX

PVA — Interchangeable with MIL-C-83723, Series I

SHELL STYLE

0 — Narrow flange mounting receptacle
1 — Cable connecting receptacle
4 — Wide flange mounting receptacle
6 — Straight plug
7 — Single hole mounting receptacle

CLASS

R — Conductive finish (nickel), operating temp. −55°C to 200°C, fluid resistant
G — Conductive finish (nickel), operating temp. −55°C to 200°C, fluid resistant, RFI grounding (plug only)
A — Non-conductive finish (black anodize), operating temp. −55°C to 200°C, fluid resistant

SHELL SIZE

10, 12, 14, 16, 18, 20, 22 and 24

COUPLING MEANS

B — Bayonet

CONTACT ARRANGEMENTS

See following page.

INSERT POLARIZATION

N (normal), W, X, Y and Z

ENDBELL TYPE

C — Short (without strain relief)
R — 90° (with strain relief)
S — Straight (with strain relief)

LESS COMPONENTS

Use letter "L" if connectors are to be supplied less contacts, grommet sealing plugs, and insertion/extraction tools. ("L" is not marked on connectors)

PV76	MS3476	— Straight plug

CLASS

PV Series

L

MS Series

E — High temperature, 200°C, conductive finish (nickel)
L — Fluid resistant, 175°C, conductive finish (nickel)
(NOTE: ITTCE's PV, class "L" connectors meet the qualification requirements for both class "E" and "L" of MIL-C-26482.)

SHELL SIZE

10, 12, 14, 16, 18, 20, 22 and 24

CONTACT ARRANGEMENTS

See following page.

CONTACT TYPE

P — Pin contact
S — Socket contact
A — Less pin contact* (MS only)
B — Less socket contacts* (MS only)
*The "A" and "B" designators are used only when **other** than power contacts are to be installed (i.e. shielded, coaxial and thermocouple contacts).

ALTERNATE POLARIZING

No designation required for normal position.
Standard MS alternate positions available.

LESS CONTACTS

Use "L" if PV connectors are ordered less contacts, grommet sealing plugs and insertion/extraction tool ("L" is not stamped on connectors). To order MS connectors less contacts, purchase order must state less contacts.

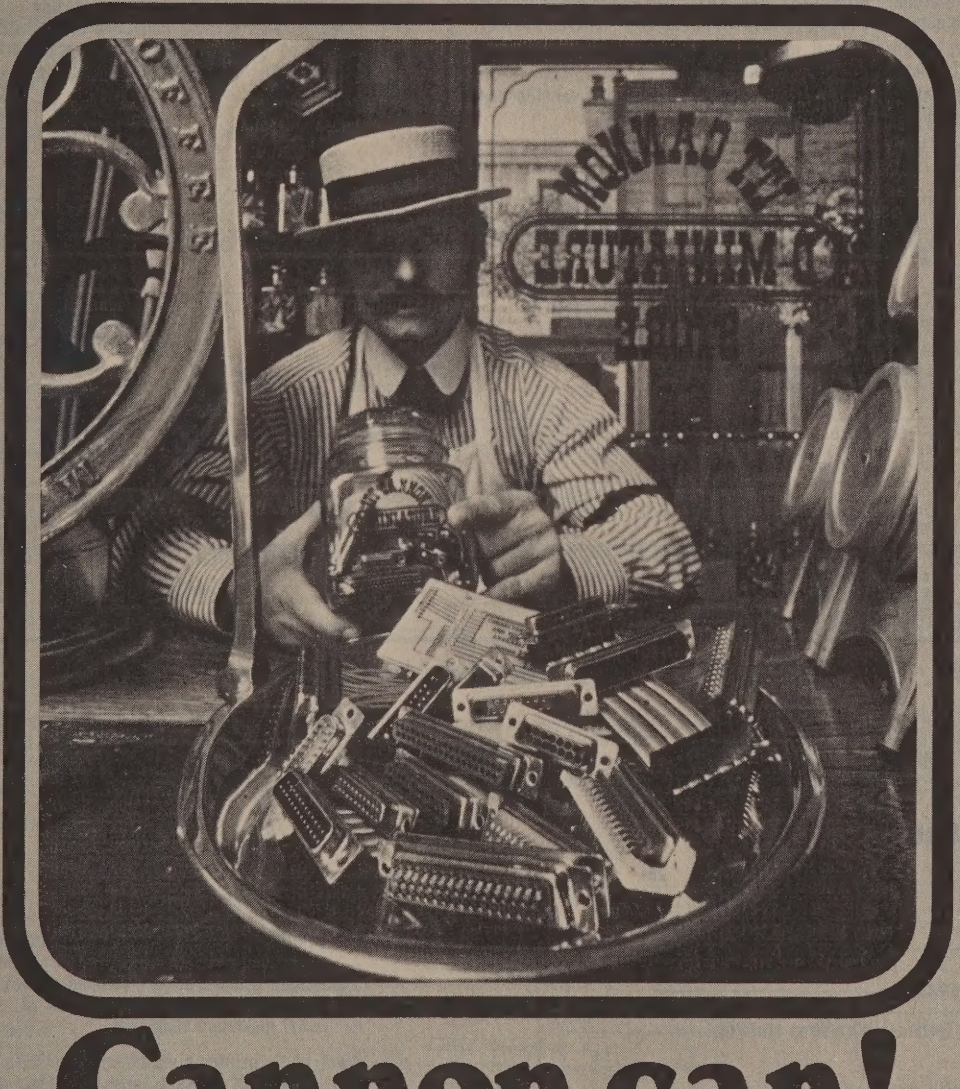
Who can meet your greatest needs in D Subminiatures?



Cannon can!

Six decades on the leading edge of interconnect technology.

CANNON ITT

For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

GENERAL INFORMATION

D Subminiature rectangular connectors are designed for applications where space and weight are prime considerations. They accommodate a great number of circuits in relation to their size and weight and are especially suited for aircraft, missile, and ground support systems. Although designed essentially for rack/panel applications, D series connectors may be adapted for cable attachments by accessory junction shells (shields) with integral clamps.

- ORIGINAL D with solder pot contacts in a two-piece insulator.
- BURGUN-D Mark IV connector with crimp snap-in contacts in a rear release dielectric retention assembly for economical, commercial applications.
- D*U: Flame-retardant BURGUN-D low cost non-environmental subminiature connectors with rear release crimp, snap-in contacts.
- D*P: Flame retardent 90° all plastic PCB connectors ideal for low cost high performance commercial applications.
- D*SP: Mas/Ter interconnect system connectors providing reliable high speed mass termination; flame retardant.
- D*M: GOLDEN-D Mark I connector with solder pot contacts in a monobloc insulator for improved moisture resistance.
- D*M: ROYAL D Mark III connectors have crimp snap-in contacts in the LITTLE CAESAR® rear release contacts retention assembly for high performance, high reliability applications.

These intermateable connectors will accommodate up to 50 contacts that are rated at 5-amps per contact for #20 gauge wire. A high density arrangement with 78 size 22 contacts is also available, as are combination arrangements with provisions for coaxial, power, and/or high voltage contacts and printed circuit terminations. Polarization is by the keystone shape of the shell; coupling is by friction.

The versatility of the D Subminiature line is enhanced by the variety of finishes, as well as by a complete line of accessories. Many of these D Subminiature connector series and accessories are U.L. recognized. Inquiries regarding modifications and custom harnessing of connectors are invited.

SUMMARY

Series	Description	Designation	Insulator	Contacts Termination
D*	D Subminiature connector, low cost	ORIGINAL-D	Two pieces, white Nylon	Solder, Wire-Wrap† and printed circuit
D*C	D Subminiature connector, low cost for commercial applications	BURGUN-D (Mark IV)	Two pieces, burgundy, glass-filled Nylon	Crimp snap-in rear release, and printed circuit Plastic retention clip
D*U	Flame-retardant BURGUN-D D Subminiature	BURGUN-D (Mark IV)	Two pieces, black, glass-filled thermoplastic	Crimp snap-in, rear release, and printed circuit Plastic cone retention
D*P	D Subminiature 90° all plastic PCB connector, low cost, high performance, flame retardant	—	Housing / Retainer: glass-filled thermoplastic, UL rated 94V-0, black	Solder and printed circuit
D*SP	D Subminiature, connectors with high speed mass termination for lower cost, flame retardant	Mas/Ter-D	Glass-filled thermoplastic, UL rated 94V-0, black	Insulation displacement technique
D*M	D Subminiature connector for more critical applications conforms to MIL-C-24308	GOLDEN-D (Mark I)	Monobloc, Diallyphthalate glass-filled, dark green	Solder and printed circuit Coaxial, high power and high voltage
D*MA	D Subminiature with LITTLE CAESAR contact retention system conforms to MIL-C-24308	ROYAL-D (Mark III)	Monobloc, Diallylphthalate glass-filled, dark green	Crimp snap-in, rear release coaxial and/or high voltage

† Wire-Wrap is a registered trademark of Gardner-Denver

ORIGINAL D* Solder Type, Non-Removable Contacts

The Original D connector utilizes a two-piece nylon insulator in five basic shell sizes: E, A, B, C, and D. These nylon insulators operate in temperatures ranging from −65°F to +250°F (−55°C to +120°C). Contact arrangements accommodate 9, 15, 25, 37, and 50 size 20 solder pot, Wire-Wrap or printed circuit contacts respectively. Standard contact terminations accommodate up to #20 AWG stranded wire. Current rating is 5 amps. Polarization is by keystone shape of the shell. Locking accessories and shells with float mounts are also available.

HOW TO ORDER

D B E 25 P A

Series Prefix — D
Shell Size — B

• Dimensions B, D, G, and H are measured as outside dimensions at the bottom of draw.
For shell with float mounts, add letter F after letter C, e.g., DEF-9P.

NOTE: B • and D • are the O.D. dims. for socket side, B' and D' are the I.D. dims. for pin side.

For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

BURGUN-D (Mark IV) D*C/D*U Crimp Type, Removable Contacts

BURGUN-D CONNECTORS

CRIMP SNAP-IN CONTACTS

BURGUN-D Mark IV connectors are non-environmental, subminiature rectangular connectors with rear release, crimp snap-in contacts. They are intermateable and intermountable with existing types. BURGUN-D connectors operate in temperatures from −65°F to +250°F (−55°C to +120°C) and are used for plug-in module applications, cable-to-cable and cable-to-panel installations, computers, business machines, and many other commercial applications. Available in both glass-filled Nylon (D*C) and flame-retardant glass reinforced thermoplastic UL rated 94V-0 (D*U).

These connectors feature size 20 crimp contacts, accommodating wire size #18 thru #30 AWG stranded wire, the socket contact is a highly reliable, sleeveless, spring finger contact. These contacts are inserted and extracted from the rear of the insulator with an expendable, plastic insertion/extraction tool CIET- HDB, or consult the factory for a metal tweezer type device for high volume users. Closed entry socket insulators correct misaligned pins during engagement. Connectors may be ordered

There is a variety of contacts available for termination to printed circuit boards and flex circuits. Semi-automatic crimp machines are also available for volume crimping requirements. For additional cost savings, purchase these connectors without contacts (Code FO), then purchase the contacts in bulk and use them in the connectors as required. With the vast amount of contact combinations in the standard BURGUND-D connector this connector has proven to be one of the most versatile, low cost, rugged connectors available.

The five shell sizes accommodate from 9 to 50 contacts. Polarization and coupling are accomplished through shell configuration and friction, respectively.

with or without contacts. When ordering connectors less contacts, the suffix "FO" must be added to the part number, and the contacts ordered separately. All assembly tools are ordered separately.

REAR RELEASE CONTACT RETENTION SYSTEM UTILIZING DIELECTRIC BIFURCATED CONES

The D*C and D*U connectors feature a rear insulator with integral, molded contact retaining tines. These plastic tines permit the insertion and extraction of contacts from the rear of the connector with a simple, expendable plastic insertion/extraction tool.

During contact insertion, the retaining tines expand as the contact passes thru. These rugged tines snap into place behind the contact shoulder when the contact is fully inserted. The tool is inserted to expand the tines, allowing easy extraction of the wired contact.

The retention system and the integral contact retaining tines guarantee functional reliability in many environments.

- **Mates with existing D types**
- **Operates in temperatures to +250°F**
- **Crimp snap-in contacts**
- **Highly reliable socket contacts**
- **Insertion/extraction with expendable tool**
- **Corrects misaligned contacts**

Code	
D	Series Prefix
B	Shell Size
C	Class
E	Mounting Type
25	Contact Arrangements
P	Contact Type
*	Printed Circuit Terminal Type
*	Printed Circuit Terminal Modifier
FO	Modification (Connector Less Contacts)

SERIES PREFIX

D — ITT Cannon designation

SHELL SIZE

E, A, B, C and D

CLASS

C — Contact retention cone, rear release contacts
U — Flame retardant, contact retention cone, rear release contacts

MOUNTING TYPE

No designator: standard .120" (3,05) diameter mounting holes
E — 4-40 clinch nut for rear panel mounting
F — Float mount for rear panel mounting
G — 2-56 clinch nuts for rear panel mounting
K — .154 (3,91) diameter mounting hole
R — Reverse float mount for front panel mounting

CONTACT ARRANGEMENTS

9, 15, 25, 37 and 50 (basic arrangements); 13W3 coaxial

CONTACT TYPE

P — Pin; S — Socket

PRINTED CIRCUIT TERMINAL TYPE

A — 90° contacts
B — Straight

PRINTED CIRCUIT TERMINAL MODIFIER

A — .030/.026 (0,76/0,66) dia. with .164/.149 (4,16/3,78) extension from bracket (stamped contacts with bracket).
B — .030/.026 (0,76/0,66) dia. with .159/.129 (4,04/3,28) extension from rear of insulator (stamped contacts).
D — .030/.026 (0,76/0.66) dia. with .164/.149 (4,16/3,78) extension from bracket. Machine contacts to be supplied.
F — .030/.026 (0,76/0,66) dia. with .159/.129 (4,04/3,28) extension from rear of insulator. Machine contacts to be supplied.
K — .030/.026 (0,76/0,66) dia. with .164/.149 (4,16/3,78) extension from flange, less bracket (machined contacts).
L — .030/.026 (0,76/0,66) dia. with .125/.095 (3,18/2,41) extension from bracket (stamped contacts with bracket).

MODIFICATION

FO — Connector less contacts (not stamped on connector)

CONDENSED DATA

STANDARD MATERIALS AND FINISHES

Shell	Steel, yellow chromate over cadmium plate
Insulator	Glass-filled burgundy nylon (D*C) Glass reinforced thermoplastic, UL rated, 94V-0, black (D*U)
Contacts	Machined: Copper alloy, gold over nickel plate Stamped: Copper alloy, selectively plated gold over nickel
Rivets and Washers (float mounting)	Stainless steel

MECHANICAL FEATURES

Coupling	Friction and lock accessories
Polarization	Keystone-shaped shells
Contact Type	Crimp snap-in

ELECTRICAL DATA

Contact Termination	Crimp
Wire Size	Size 20 Contacts: #20, #22 and #24 AWG stranded wire; size 20-18 contacts: one #18 or two #22 AWG stranded wire; size 20-26 contacts: #26, #28 and #30 AWG stranded wire
Current Rating	Size 20 Contacts: 5 amps

VOLTAGE RATING (See Page 99 for Data)

BURGUN-D (Mark IV) D*C/D*U Crimp Type, Removable Contacts

STAMPED CONTACTS

Stamped contacts are furnished on reels for use with the semi-automatic ABT-500 crimp and strip/crimp machines. These contacts will accommodate wire sizes #18 thru #28 AWG solid and stranded wire.

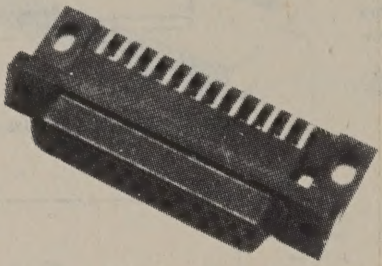
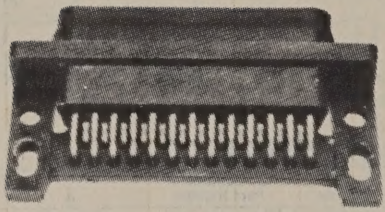
ITT CANNON ELECTRIC

D SUBMINIATURE RECTANGULAR CONNECTORS

For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

ALL PLASTIC 90° D*P A UNIVERSAL LOW COST RIGHT-ANGLE CONNECTOR FOR PRINTED CIRCUIT BOARDS.





The new Cannon D*P all plastic 90° PCB connector is ideal for telecommunications, computer, industrial control and other applications where low cost and high performance are required.

These printed circuit board connectors are available in the 15, 25 and 37-contact versions, with other contact arrangements planned.

Plugs and receptacles are fully intermateable with all D Subminiature connectors whether solder, crimp or the new insulation displacement types. Mating is complete even when junction shells are used, as in telephone industry applications.

Contacts are held in place by a special snap-in retainer plate that prevents contact pushout and holds the pins precisely aligned for easier assembly to the printed circuit board. Two configurations are available, one for printed circuit boards drilled for any Cannon 90° D Subminiature-type PCB connector, and one for boards drilled for other 90° PCB connectors, metal or plastic. The D*P is fully intermountable in both applications with no redrilling, no extra hardware.

The D*P connector is flame retardant (UL listed 94V-0) glass filled thermoplastic, while contacts are those used in the low-cost Cannon Burgun-D Series.

STANDARD DATA

Housing/Retainer	Glass reinforced thermoplastic, UL rated 94V-0, black.
Contacts	Gold over nickel electroplate on copper alloy.
Coupling	Friction.
Polarization	Keystone shape.
Contact Type	Captivated.
Contact Termination	Solder.
Current Rating	Size 20 contacts: 5 amperes.
Dielectric Withstanding Voltage	1000 VAC sea level to 20,000 feet (6096 meters)
Insulation Resistance	1000 megohms
Temperature Range	−55°C to +125°C (−67°F to +257°F)

MAS/TER-D D*SP

The new Cannon® Mas/Ter-D (Mass Terminated, D Subminiature) pin-and-socket connectors provide reliable high-speed mass termination at a lower total installed cost than conventional mass termination techniques.

Fully intermateable and intermountable with the Cannon D Subminiature Series, Mas/Ter-D connectors are part of the new Cannon Mas/Ter Interconnect System. The Mas/Ter Interconnect System eliminates the drawbacks of conventional mass termination systems while providing several benefits all its own.

- Fully intermateable and intermountable with and accepts locking device accessories from the Cannon D Subminiature Series.
- Entire connector is terminated at once with no insulation stripping, no complex tooling.
- Terminates cables or may be used in a daisy chain configuration with no break in the cable.
- Each contact size terminates two wire gages, solid or stranded, utilizing both variable spaced .054/.050 (1,37/1,27) and .050/.050 (1,27/1,27) spaced round conductor flat cable or individual wires, with most standard insulation materials.
- Plastic materials used are flame retardant, U.L. listed.

For more information on the full capabilities of the Cannon Mas/Ter Interconnect System, contact your nearest ITT Cannon Sales Office.

HOW TO ORDER

Example: To order a D Subminiature connector with 25 contacts using the Mas/Ter termination technique, standard .120" (3,05) diameter mounting holes, for solid or stranded wire from #22 thru #24 AWG and pin contacts, order as follows:

D B SP — A 25 P

STANDARD DATA

Insulator	Glass reinforced thermoplastic, U.L. rated 94V-0 (flame retardant), black
Contacts	Gold over nickel electroplate on copper alloy
Shell	Yellow chromate over cadmium plate on steel
Termination technique	Insulation displacement
Coupling	Friction
Polarization	Keystone shape
Contact size	20
Wire accommodation	Contact A: #22 thru #24 AWG solid and stranded, .053 (1,35) max. insulation dia., non-irradiated PVC insulation preferable. Contact B: #26 thru #28 AWG solid and stranded, .041 (1,04) max. insulation dia., non-irradiated PVC insulation preferable.
Current rating	3 amperes continuous, contact A 1 ampere continuous, contact B
Dielectric withstanding voltage	650 VAC
Insulation resistance	1000 megohms
Contact resistance	15 milliohms
Temperature range	—55°C to +105°C (—67°F to +221°F)

(millimeters are in parentheses)

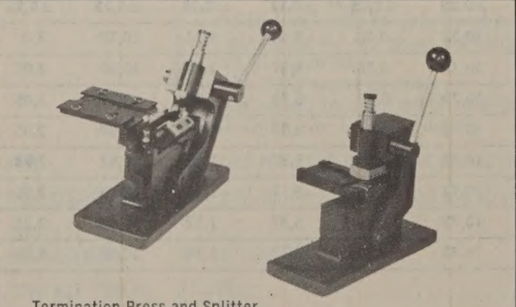
ASSEMBLY PROCEDURE

The lower total installed cost of the Mas/Ter Interconnect System is achieved through a quick, simple termination procedure. The entire operation is performed at a single work station with a single stroke of the press, with no stripping of insulation and no complex tooling.

Either .054/.050 (1,37/1,27) variable-spaced or .050/.050 (1,27/1,27) fixed-spacing round conductor flat cable may be mass terminated with the Mas/Ter interconnect system. .050/.050 (1,27/1,27) wires are first separated on a splitting press. For assembly, the .054 (1,37) portion of the variable-spaced or the separated portion of the fixed-spacing flat cable is positioned over the connector body, the cap is placed over it, and a single stroke of the press terminates all wires. After termination, a strain-relief clamp may be snapped into place quickly and easily.



Termination Press and Splitter

MAS/TER-D Tooling Ordering Information:

Select appropriate components and equipment press to terminate various cable configurations and connector sizes from locator and comb kit listing below.

LOCATOR KITS		COMB KITS	
Connector Layout	**P/N Locator**	**Wire Type**	**P/N**
37 Contacts Pin and Socket	320-7004-005	.050" (1,27) Split Cable*	320-7004-009
25 Contacts Pin and Socket	320-7004-006	.050" (1,27) Split Cable* .050"/.054" (1,37/1,27) Variable Pitch	320-7004-010 320-7004-014
15 Contacts Pin and Socket	320-7004-007	.050" (1,27) Split Cable*	320-7004-011

Termination Press P/N 317-1489-000

*Splitter (P/N 070296-0001) is required to pre split .050" cable prior to termination. Splitter will split **all** widths (15 to 37 conductors) with adjustment of wire guide.

EXAMPLE: Required to terminate 25 conductor .050" (1,27) flat cable to 25 contact connector (pin or socket).

SELECT — Locator Kit 320-7004-006
— Comb Kit 320-7004-010
— Termination Press 317-1489-000
— Splitter 070296-0001

For other connector layout and wire configuration not shown consult factory for appropriate kit numbers.

For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

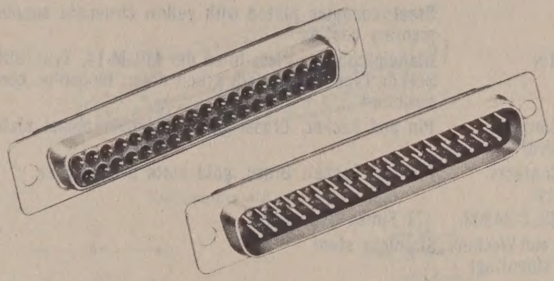
GOLDEN-D (Mark I) D*M Solder Type, Non-Removable Contacts

GENERAL INFORMATION

The D*M connector features solder pot contacts in a monobloc insulator for improved temperature characteristics and increased moisture resistance. Two insulator types are available: combination arrangements with accommodations for coax, power and/or high voltage contacts, plus standard AWG wire contacts; and arrangements with standard AWG wire contacts only. The five amp* solder pot contacts accommodate wire sizes up to #20 AWG standard wire. Socket contacts are of the closed entry type. Operating temperatures of insulators range from −65°F to +300°F (−55°C to +148°C).

Combination arrangements are supplied with unfilled coax, power and/or high voltage contact cavities. Coax, power, high voltage contacts must be ordered separately, and may be used interchangeably in any of the arrangements listed. High voltage contacts accommodate up to #20 wire sizes. Coax contacts (with crimp or solder braid type terminations) and high voltage contacts are snap-in and removable. Coax and high voltage contacts have captivated solder type center contacts.

Standard coax and high voltage plugs contain female center contacts; receptacles contain male center contacts. Combination arrangement pin connector assemblies accommodate coax, power, and high voltage plugs only; socket assemblies accommodate receptacles. Connector assemblies and contact inserts are matched and color coded to ease assembly. No insertion tool is required for coax, power, and high voltage contacts; they may be extracted with ITT Cannon Tool CET-C6B.



Connectors for non-magnetic applications are available. Standard NMB non-magnetic connectors have magnetic flux densities less than 200 gamma after magnetization with a 5000 gauss magnet.

HOW TO ORDER

GOLDEN-D (Mark I) D*M Solder Type, Non-Removable Contacts

STANDARD DATA

Shell	Steel, cadmium plated with yellow chromate supplementary coating
Insulator	Diallylphthalate, glass-filled per MIL-M-14, Type GDI-30F or Type SD6-F, dark green color, monobloc construction
#20 Contacts (Standard)	Pin and Socket: Brass, gold plate over nickel plate
#20 Contacts (Military)	Pin and Socket: Brass, gold plate over copper
Ref. MIL-C-24308	ITT Finish Code A156
Rivets and Washers (Float Mounting)	Stainless steel
High Voltage Contacts	*Pin: Brass, gold plate over nickel plate *Socket: Copper alloy, gold plate over nickel plate
Coaxial Contacts	Outer Contact: *Plug: Brass, gold plate over nickel plate; *Receptacle: Beryllium copper, gold plate over nickel plate *Center Female Contact: Copper alloy, gold plate over nickel plate *Center Male Contact: Brass, gold plate over nickel plate Insulator: Teflon
High Power Contacts	*Pin: Brass, gold plate over nickel plate *Socket: Beryllium copper, gold plate over nickel plate
Voltage Rating	See page 99

***NOTE:** Also available in Military Finish: Gold over copper plate (ITT Cannon Finish Code A156).

ROYAL-D (Mark III) D*MA Crimp Type, Removable Contacts

LITTLE CAESAR® REAR RELEASE CONTACT ASSEMBLY

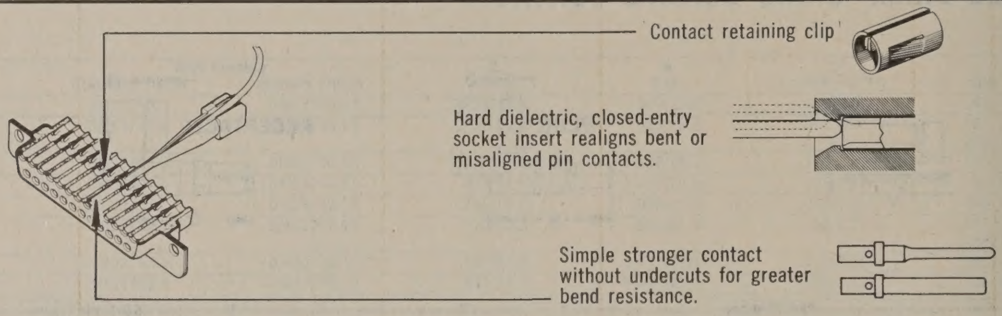
The D*MA connector is a D Subminiature connector that utilizes the LITTLE CAESAR rear release contact assembly. This contact assembly allows rear insertion, release and extraction of crimp snap-in contacts. The simplified contact design with no undercuts offers greater bend resistance and a hard closed entry socket insulator insures positive contact alignment. Consult the factory for availability of rear release coaxial, power and/or high voltage contacts. Crimp terminations accommodate #18, #20, #22, #24, #26 and #30 AWG stranded wire and are rated for 5 amps.†

Extra contacts may be ordered for replacement purposes; for part numbers of contacts, see page 100.

Connectors for non-magnetic applications are available. Standard NMB non-magnetic connectors have magnetic flux densities less than 200 gamma after magnetization with a 5000 gauss magnet.

---

†Military rating of 20 contacts or wires is 1.5 amps average, and 7.5 amps maximum. See Current Ratings shown on page 99.

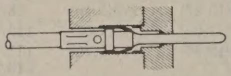


Contact retaining clip
Hard dielectric, closed-entry socket insert realigns bent or misaligned pin contacts.
Simple stronger contact without undercuts for greater bend resistance.

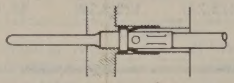
CONTACT INSERTION

Size 20 Contacts

Contact partially inserted.

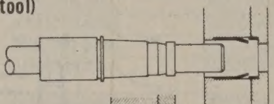


Tines snap behind contact shoulder when contact is fully inserted.

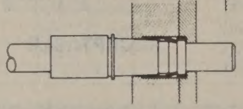


Coaxial Contact and Size 8 High Power Contacts (with built-in metal extraction tool)

Contact partially inserted.

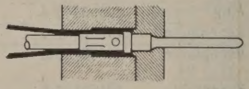


Tines snap behind contact should when contact is fully inserted.

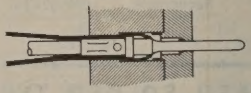


CONTACT EXTRACTION

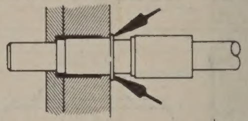
Tines expanded beyond contact shoulder with extraction tool, ready for release.



Contact partially removed.



Depress flange of built-in extraction tool until flush with rear of insulator.



Contact being pulled from connector.

MILITARY SPECIFICATION
M — For connectors to MIL-C-243008 specification — omit for standard

MOUNTING TYPE
No designator: standard .120 (3,05) diameter mounting hole
E — 4-40 clinch nut for rear panel mounting
F — Float mount for rear panel mounting
G — #2-56 clinch nut for rear panel mounting
K — .154 (3,91) diameter mounting hole
R — Reverse float mount for front panel mounting

CONTACT ARRANGEMENTS See page 100

CONTACT TYPE
P — Pin; S — Socket

MODIFICATION
Please consult factory

FO
Connector without contacts (FO will not be printed on the connector)

ROYAL-D (Mark III) D*MA Crimp Type, Removable Contacts

STANDARD DATA

Shell	Steel with yellow chromate over cadmium plate
Insulator	(Monobloc-type) Dially phthalate, glass-filled per MIL-M-14 Type GDI-30F or Type SD6F, dark green color
#20 Contacts (Standard)	Pin: Leaded copper, gold plate over nickel plate Socket: Copper alloy, gold plate over nickel plate with stainless steel sleeves
#20 Contacts (Military) Ref: MIL-C-24308	Pin and Socket: Gold over copper (ITT Cannon finish code A156)
Rivets and Washers (Float Mounting)	Stainless steel
High Voltage Contacts	*Pin: Brass, gold plate over nickel plate *Socket: Copper alloy, gold plate over nickel plate Insulator: Nylon (Temperature Range: —65°F to +250°F (—55°C to +120°C)
Coaxial Contacts	Outer Contact: *Plug: Brass, gold plate over nickel plate *Receptacle: Beryllium copper, gold plate over nickel plate Center Contact: *Female: Copper alloy, gold plate over nickel plate *Male: Brass, gold plate over nickel plate Insulator: Teflon
High Power Contacts	*Pin: Brass, gold plate over nickel plate *Socket: Beryllium copper, gold plate over nickel plate
Contact Retention	9 lbs. min (40 N) after 10 insertions
(#20 Contacts)	5 lbs. min. (22 N) after 100 insertions
Voltage Ratings	See below

***NOTE:** Also available in Military Finish: Gold over copper plate (ITT Cannon Finish Code A156).

VOLTAGE AND CURRENT RATING

CONNECTORS WITH BASIC ARRANGEMENTS
AWG #20 wire contacts only

All voltages are measured from contact to contact and from contact to shell in unmated condition.

		Altitude (feet/m)			
Connector Type		Sea Level	20,000/6096	50,000/15240	70,000/21336
D*MA, D*C, D*U	Average Flashover	1500	1000	500	500
	Test	1000	650	325	325
D*M, D*	Average Flashover	1700	1000	650	500
	Test	1250	750	475	375

All voltage figures are AC 60 rms cps, measured at approximately 77°F, 50% rh.

CONNECTORS WITH COMBINATION ARRANGEMENTS
AWG #20 wire contacts with coaxial, high power, and/or high voltage contacts

All voltages are for plugs and receptacles in both mated and unmated conditions.

		Altitude (feet/m)							
		Sea Level		20,000/6096		50,000/15240		70,000/21336	
Type of Contact		90°	Straight	90°	Straight	90°	Straight	90°	Straight

ROYAL-D (Mark III) D*MA Crimp Type, Removable Contacts

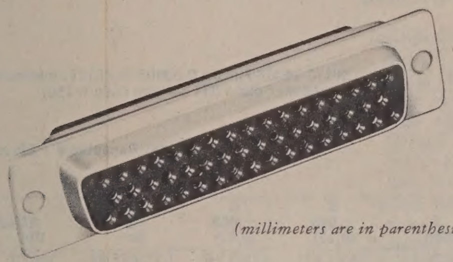
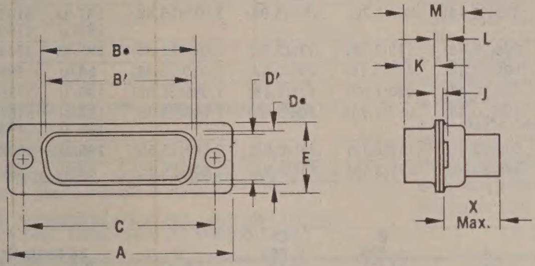
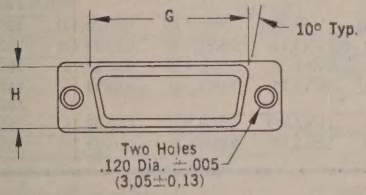
STANDARD SHELL

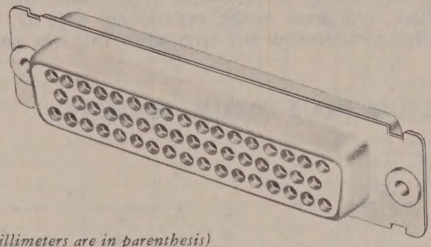


(millimeters are in parenthesis)

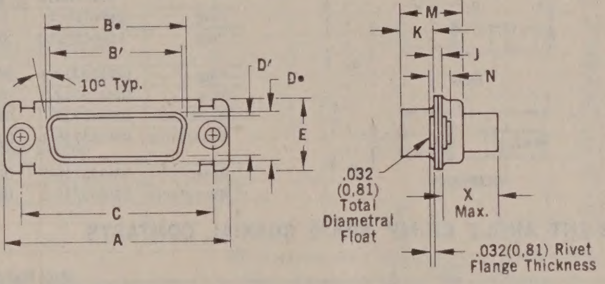


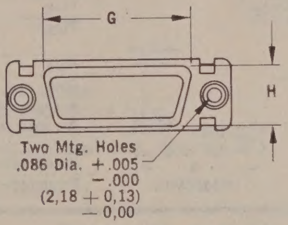


SHELL WITH FLOAT MOUNTS



(millimeters are in parenthesis)





It is recommended that only one assembly, either pin or socket, be float mounted. For front panel mounting use reverse float mount; see page 108.

•Dimensions B, D, G, and H are measured as outside dimensions at the bottom of draw. For shell with float mounts, add letter F after letter C, e.g., DECF-9P.

NOTE: B• and D• are the O.D. dims. for socket side, B′ and D′ are the I.D. dims. for pin side.

*Add number of contacts for basic arrangements, OR add contact arrangement number for coaxial and/or HV comb. arrangements.

ROYAL-D (Mark III) D*MA Crimp Type, Removable Contacts

REMOVABLE COAXIAL, HIGH VOLTAGE, AND HIGH POWER CONTACTS

All coaxial and high voltage contacts have solder center contact. For coax, high voltage, and power contact material see page 92. For recommended stripping dimensions and termination data see page 112.

* MIL-C-24308 Finish: 0.00005 (0,00127) minimum gold plate over copper plate (ITT Cannon code A 156)

ACCESSORIES (Cont'd)

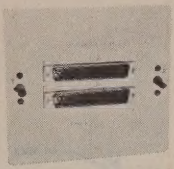
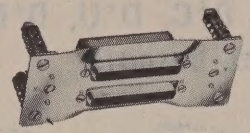
MODULAR PLATES





MALE

Consists of from 1 to 3 D Subminiature pin connectors float mounted to retaining plate and protected by connector housing at front face of assembly. Available in 36 fixed polarizing positions. Consult factory for part number and additional information.

FEMALE

Consists of from 1 to 3 D Subminiature socket connectors with terminal sealing kits assembled to spring mounted retaining plate. Available in 36 fixed polarizing positions, and a 32- or 48-pound total spring force. Consult factory for part number and additional information.

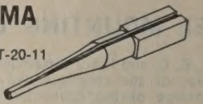
NOTE: To extract a contact with a #18 wire the wire will have to be clipped off the contact first.

EXTRACTION D*MA



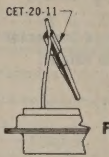


Figure 2

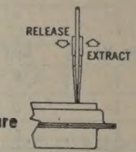

Figure 3

The CET-20-11 tool extracts size 20 pin and socket contacts from the D*MA Series.

Operating Instructions:

A. Place the tool slot over the wire (Figure 2) with the tool tip approximately ¼ inch behind the insulator. Then slide the tool back along the wire until the tool slit opens and surrounds the wire.

B. Slide the tool forward along the wire (Figure 3) and push the tool firmly into the insulator until it bottoms, releasing the contact. Press the wire against the tool and remove wire, tool, and contact from the connector.

D*MA

Connector	Contact	Crimp	Insertion	Extraction
D*MM	Coaxial	CCT-DM (braid only)	None Required	CET-C6B
	Size 8, 12 & 16 High Power and High Voltage	None (solder type)	None Required	CET-C6B

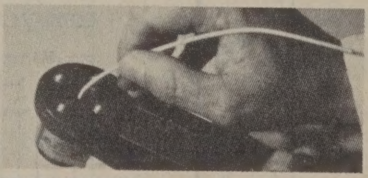
D*MAM	Coaxial	CCT-DM (braid only)	None Required	Integral Part of Coaxial
	Size 8 High Power	None (solder type)	None Required	Integral Part of Coaxial
	Size 12 and 16 High Power and High Voltage	None (solder type)	None Required	CET-12-14
	Shielded Contacts	Inner contact: M22520/2-01 with locator M22520/2-12 Outer Shell: M22520/1-01 with locator M22520/1-02	None Required	CET-16

*Combination insertion/extraction tool.

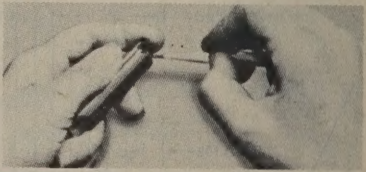
ASSEMBLY OF D*C, D*U, D*MA

	Min.	Max.
D*C/D*U	.156 (3,96)	.187 (4,75)
D*MA	.188 (4,78)	.208 (5,28)

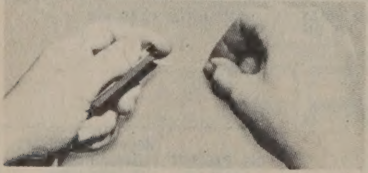
WIRE STRIPPING
1. Cut wires to length. Strip insulation per above illustration. Check for broken or frayed wires.



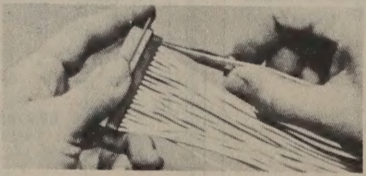
CONTACT CRIMPING
2. Insert contact and wire into proper crimp tool (and locator, if required). Crimp contact to wire. Inspect crimp.



CONTACT INSERTION
3. Center wired contact in groove of insertion tool (for size 22D also, D*MA) with tool tip butting contact shoulder. Insert contact into cavity until a positive stop is felt. Inspect insertion.



4. To be sure contact is locked securely, pull back lightly on wire. Repeat for balance of contacts, working row by row across the insulator.



CONTACT EXTRACTION
5. Place wire into extraction tool tip. (See above for D*MA extraction.)

6. Insert tool tip into contact cavity until tip bottoms against contact shoulder, releasing tines. Hold wire against tool with finger and remove tool and contact. Repeat for balance of contacts.

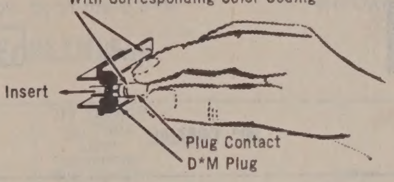
For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

TOOLS (D*MA, D*C, D*U COAXIALS)

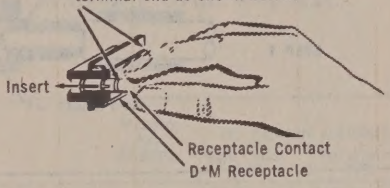
INSERTION D*M COAX, POWER, AND HV CONTACTS

No insertion tool is required. Color coded coax, power, and high voltage contacts are accepted by corresponding color coded D*M assemblies.

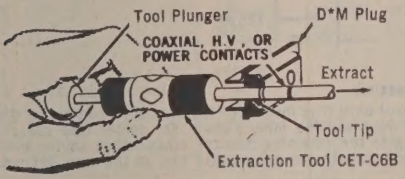
RED Color Coded Connector Accepts Contacts With Corresponding Color Coding



BLUE color coded connectors accepts contacts with corresponding color coding. Insert from terminal end as shown below.



EXTRACTION D*M COAXIAL, H.V., AND POWER CONTACTS CET-C6B
(Formerly CET-C6A)

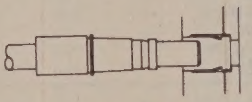


The CET-C6B tool extracts coax, power and high voltage contacts (plug and receptacle) from the D*M Series.

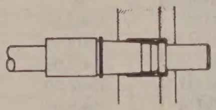
Operating Instructions:
To extract the D*M coax contact, hold the tool by the body and insert the tip into the front of the contact cavity until it booms and closes the coax retaining ring. Holding the body in this position securely enough to keep coax retaining ring closed, push the plunger; contact will be pushed out of the rear of the assembly.

INSERTION D*MA COAXIALS AND HIGH POWER CONTACTS

Contact partially inserted.



Tines snap behind contact shoulder when contact is fully inserted.

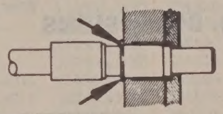


No insertion tools are required for the coaxial contact, size 8 high power contacts, and sizes 12 and 16 high power and high voltage contacts.

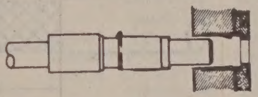
Insertion Procedure:
Push the contact into the rear of the connector. Tines will snap behind the contact shoulder when the contact is fully inserted.

EXTRACTION D*MA COAXIALS AND HIGH POWER CONTACTS

Depress flange of built-in extraction tool until flush with rear of insulator.



Contact being pulled from connector.



A separate extraction tool is not required for the coaxial contact or the size 8 high power contacts. The tool is an integral part of the contact.

Insertion Procedure:
Depress flange of built-in extraction tool until it is flush with the rear of the insulator. Contact can then be pulled from the connector. For extraction of sizes 12 and 16 high power and high voltage contacts the CET-12-16 is recommended.

STRAIGHT COAXIAL

STEP 1: Straight and 90° Coaxials

1. Slide the outer ring over the cable jacket. Trim the cable as specified in the table of Coax Cable Trim Dimensions. Insert the cable dielectric and center conductor into the inside diameter of the inner sleeve. Then solder the center conductor to the coax center contact.

STEP 2: Straight and 90° Coaxials

2. Slide the outer ring forward until it is flush with the coax shell containing the braid between the outer ring and the inner sleeve. For solder type coaxes, soft solder the outer ring to the assembly thru the cross-drilled solder hold. For crimp type coaxes, crimp with the appropriate tool in the area defined.

Soft Solder
STEP 1
Crimp Area
Cap
STEP 2

STEP 1: Straight Type

Slide outer sleeve over cable jacket and trim cable. Insert cable dielectric and center conductor into inside dimension of inner sleeve. Solder center conductor to coaxial center contact.

Slide outer sleeve forward until flush with inner sleeve to confine braid. Crimp outer sleeve, using crimp tool CCT-DM. Crimp as close as possible to the inner sleeve shoulder. Push extraction tip over the coaxial (as shown) until it rests against the inner sleeve shoulder.

STEP 2: 90° Angle Type

Slide outer sleeve over cable jacket and trim cable. Insert cable dielectric and center conductor into inside dimension of inner sleeve. Solder center conductor to coaxial center contact.

Slide outer sleeve forward until flush with coaxial shell, confining braid between outer and inner sleeves. Crimp in area shown. Soft solder cap in place.

ITT CANNON ELECTRIC

SMA SERIES CONNECTORS

The SMA Series is a 50 ohm impedance, threaded coupling, high frequency (0-18 GHz) connector. ITT CANNON ELECTRIC SMA's meet all requirements of and, indicated connectors are, qualified to MIL-C-39012. The stainless steel bodies are available in gold plated or passivated finishes. Both male and female center contacts are gold plated beryllium copper. The dielectric material is TFE. Moisture sealing is provided by silicone rubber gaskets.

PERFORMANCE DATA AND SPECIAL APPLICATIONS INFORMATION AVAILABLE UPON REQUEST.

Who can solve your electronic packaging interconnection requirements?

Cannon can!

Six decades on the leading edge of interconnect technology.

CANNON ITT

ITT CANNON ELECTRIC

ADAPTA-CON
P. C. AND I/O PACKAGING

For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

A SPECIAL APPROACH TO P. C. AND I/O PACKAGING DESIGNS...

- **Low cost**
- **Post and Receptacle P. C. interconnections**
- **Printed circuit, I/O applications**
- **Custom made backplane panels**
- **Contacts on .100″ (2,54), .125″ (3,18) and .150″ (3,81) centers**
- **High and low force versions**

ITT Cannon Electric's ADAPTA-CON connector series meets the ever increasing demand for more versatile post and receptacle interconnections at less cost per termination. The ADAPTA-CON connector series reflects a new concept in electronic packaging and represents the latest state of the art.

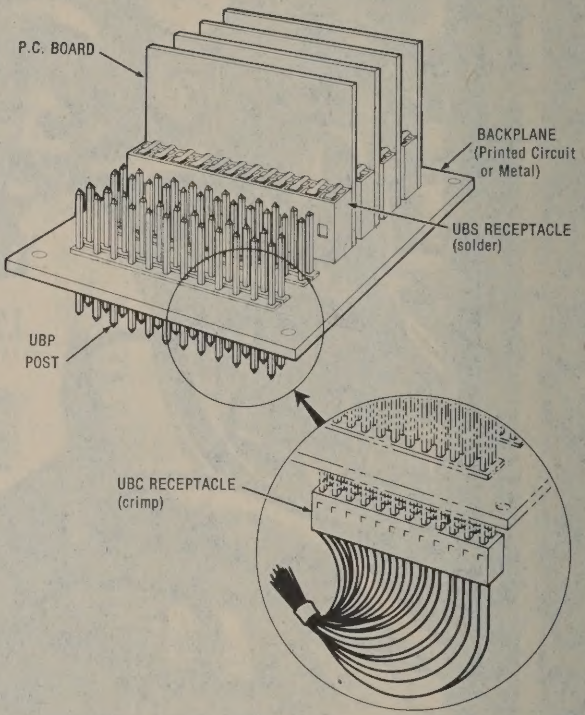
ADAPTA-CON connectors provide a versatile approach to dual contact P. C. and I/O interconnecting packaging designs. They are available in two styles: the UBS (solder type) for printed circuit applications; and the UBC (crimp type) for I/O applications. These designs fulfill the industry's need for post and receptacle connections between P. C. boards and backplane assemblies as well as for I/O applications.

UBS receptacles are mounted to the P. C. board by standard flow-solder techniques. The unit is then mated with UBP posts mounted in a metal or epoxy backplane.

UBC receptacles utilize insertable and removable crimp contacts that accommodate #18 thru #30 AWG wire for I/O applications.

The UBP mounting plate post contact is a simple, economical post with a .025″ square tail, standard for wire wrapping termination. For optimum electrical continuity, the mating receptacle square is designed with a closed entry to guide the post contact during mating. A simple, but rugged tang lock retains the receptacle contact in the insulator.

To fulfill your mounting and interconnect requirements, our backplanes are custom made to **any** size or configuration. And, they are precision punched with .100″ (2,54), .125″ (3,18), or .150″ (3,81) center-to-center holes for use with either grounded or insulated .025″ (0,64) square posts.



STANDARD DATA

GENERAL INFORMATION

HOW TO ORDER

UBS connector assemblies with solder contact termination (.100" (2,54), .125" (3,18) and .150" (3,81) centers)

UBS 4 A 022 A 1 D L *

Series Prefix
Contact Spacing
Contact Finish
Number of Contacts
Termination Length
Mounting
Contact Rows
Contact Forces
Modification Code

SERIES PREFIX
UBS — Solder type P.C.

CONTACT SPACING
4 — .100" (2,54) centers
5 — .125" (3,18) centers
6 — .150" (3,81) centers

CONTACT FINISH (selective plating)
A — 20 microinches gold over 50 microinches nickel
B — 30 microinches gold over 50 microinches nickel
C — 50 microinches gold over 50 microinches nickel
E — Electrodeposited bright 90% tin and 10% lead†

NUMBER OF CONTACTS
4 to 65 — (.100" (2,54) centers) single row*
8 to 130 — (.100" (2,54) centers) double row
4 to 51 — (.125" (3,18) centers) single row*
4 to 43 — (.150" (3,81) centers) single row*
8 to 86 — (.150" (3,81) centers) double row

TERMINATION LENGTH
A — .115 (2,92) nominal

MOUNTING
1 — P.C. board mounting

CONTACT ROWS
S — Single
D — Double

CONTACT FORCES
L — Low: .5 to 6 oz. (0,14 to 1,67 N)
H — High: 2 to 8 oz. (0,56 to 2,22 N)

MODIFICATION CODE
Consult factory for modifications

* When ordering an even number of contacts for the single row UBS connector the number 1 contact will have the termination tail on the mating face (left hand side) unless otherwise specified.
† Consult factory for availability.

UBC connector insulators with crimp contact termination (.100" (2,54), .125" (3,18) and .150" (3,81) centers)

To order UBC connector insulators use the part numbers shown in the tables on pages 114 and 115. Contacts for UBC connections are available in bulk or reel and must be ordered separately.

See page 116 for contact part numbers. Please consult the factory for termination tooling for UBC.

C — .125 (3,18) for .062 (1,57) thick PCB—vertical mount.
D — .156 (3,96) for .093 (2,36) thick PCB—vertical mount
E — .188 (4,78) for .125 (3,18) thick PCB—vertical mount

ITT CANNON ELECTRIC

ADAPTA-CON P. C. AND I/O PACKAGING

For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

UBC CRIMP CONTACTS

At the time of ordering, customer may specify whether reel carrier strip contacts or loose contacts are desired. Ordering information is below.

NOTE: All gold plated contacts are selectively plated with specified minimums of gold in contact area only. Balance of contact is plated gold flash. For example, -012 plating is defined as 20 microinches of gold in contact area over 50 microinches nickel with gold flash in non-contact area.

BULK TYPE

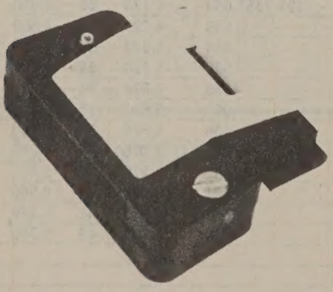
NOTE: Minimum withdrawal force using .024 sq. gauge. Maximum insertion force using .026 sq. gauge.
*Consult factory for availability.

SPECIAL ASSEMBLIES



These three special assemblies consist of a modified UBC insulator into which standard UBC contacts are inserted. Cable protection and strain relief is provided by molded plastic clam shells. A locking clip is also provided for latching to printed circuit headers. These connectors mate to matching groups of .025 square pins.

	Material
Contacts	Copper Alloy

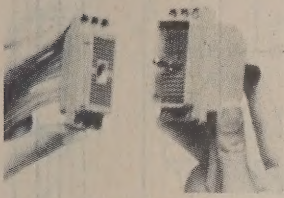
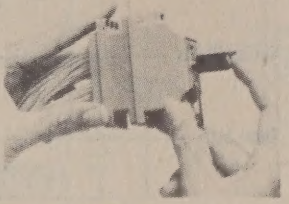
CANNON DL SERIES ZERO INSERTION FORCE CONNECTORS ARE LONG-LIVED, FAST AND INEXPENSIVE



This is our "DL" Series.



Simply place it together.

Turn the cam lock a quarter turn.

It's locked and mated.

The Cannon DL Series of ZIF connectors fills the need in the commercial/industrial, computer and peripheral equipment market places for low-cost, high performance multiple-wire power and signal connectors.

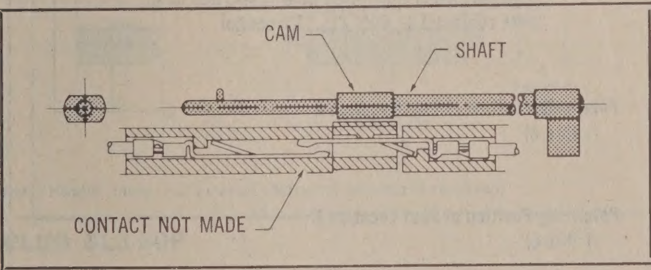
DL connectors feature: a minimum rated life of 10,000 complete mating and unmating cycles with no performance loss; can be mated and unmated in less than two seconds even with as many as 2,496 contacts; and they cost less (often as much as 25% less) per mated line than competitive high-density rack-and-panel connectors.

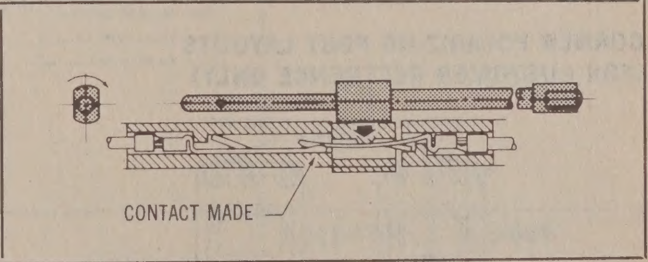
The long life and rapid mating are achieved through the use of our Zero Insertion Force design. Contacts in the plug and receptacle do not touch each other while the connector halves are being engaged. Instead, the plug is placed over the receptacle, then a quarter turn of an actuating shaft mates all the contacts at once, while also physically locking the connector halves together. Connector engagement force is zero, and the only wear on the contacts occurs as they are pressed together and lightly wiped past each other during the camming and locking operation.

Simple. Effective. And reliable.

Combining their special design with commercial-grade materials and low cost crimp and wrappable hermaphroditic contacts that may be hand or machine terminated makes the DL Series of ZIF connectors the finest low-cost-per-mated-line I/O connectors available today.

For more information, contact your nearest ITT Cannon Field Office.





STANDARD DATA

MATERIALS AND FINISHES

Connectors

- Glass filled thermoplastic insulator
- Copper alloy contacts
- Stainless steel insulator retainer
- Stainless steel cam actuator
- Contacts plated .000020" gold over .000050" nickel or 90/10 tin lead, electrodeposited

Accessories

- Thermoplastic junction shell
- Stainless steel cable clamp
- Glass filled nylon actuating handle
- Polyvinyl chloride protective boot
- Polyethylene protective cap

MECHANICAL FEATURES

- Crimp or wire wrapping contacts
- 60, 96, 156, 624, 1248 or 2496 contact positions
- Multiple polarizing positions
- 8 lbs. (35,585 N) min. contact retention
- Permanent raised cavity identification
- Actuation by screwdriver, socket wrench, allen wrench (for DLI, 2 and 3 only) or handle

ELECTRICAL DATA

- Ambient Operating Temperature: See page 128
- Wire Range: 18 AWG thru 30 AWG (solid or stranded)
- Current Rating: 5 amps (see page 128)
- DWV: 1200 VAC at sea level
- Contact Resistance: 15 milliohms max.
- 5000 megohms insulation resistance min.

HOW TO ORDER

STANDARD PLUGS AND RECEPTACLES

The basic DL connector is a standard plug and receptacle for applications requiring cable-to-cable, cable-to-panel and panel-to-panel interconnections. Either crimp or wrap post contacts may be used in any connector. DL Series connectors are available in shell sizes 1, 2, 3 and 4.

DL 4-2496 RW 4

Series Prefix

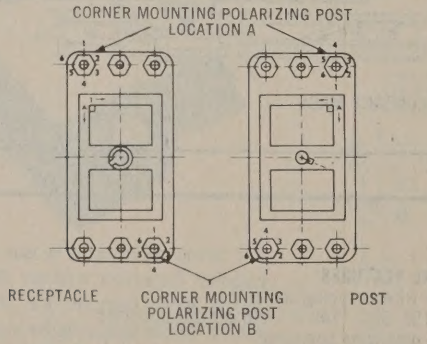
Shell Size
1, 2, 3 or 4

Number of Contacts
Shell Size 1: 156 Contacts
Shell Size 2: 96 Contacts
Shell Size 3: 60 Contacts
Shell Size 4: Three shell sizes — 2496 Contacts or 1248 Contacts or 624 Contacts

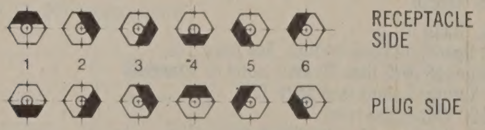
Shell Style
P — Plug (crimp contacts must be ordered separately)
R — Receptacle (crimp contacts must be ordered separately)
PW — Plug with wrap post contacts and adapter assembled (with front insertable/removable contacts)
RW — Receptacle with wrap post contacts and adapter assembled (with front insertable/removable contacts) Note: DL1, 2 and 3 receptacles are also available with rear-entry wrap post contacts.

.025" (0,64) Square Wrap Post Tail Length
(Use only when specifying front removable wrap post contacts) 4: .605" (15,37) nominal

CORNER POLARIZING POST LAYOUTS (FOR CUSTOMER REFERENCE ONLY)



DL1-156, DL2-96 and DL3-60
REFERENCE VIEWS FOR POLARIZING ARRANGEMENTS



NOTE: All polarizing is accomplished by installing P/N DL-POL-POST in corners. May be used in place of mounting nut.

POLARIZED PLUGS AND RECEPTACLES

Polarizing is available only on DL1, 2 and 3 connectors, and requires three digits. If no polarization required, leave blank.

DL 1-156 RW 4 X X C

Series Prefix

Shell Size
1, 2 or 3

Number of Contacts
Shell Size 1: 156 Contacts
Shell Size 2: 96 Contacts
Shell Size 3: 60 Contacts

Shell Style
P — Plug (crimp contacts must be ordered separately)
R — Receptacle (crimp contacts must be ordered separately)
PW — Plug with wrap post contacts and adapter assembled (with front removable/insertable contacts)
RW — Receptacle with wrap post contacts and adapter assembled (with front removable/insertable contacts) Note: DL1, 2 and 3 connectors are also available with rear-entry wrap post contacts.

.025" (0,64) Square Wrap Post Tail Length
(Use only when specifying front removable wrap post contacts) 4: .605" (15,37) nominal

Polarizing Position of Post Location A
(1 thru 6)

Polarizing Position of Post Location B
(1 thru 6)

Corner Polarizing Post
Standard

EXAMPLE:
DL1-156RW432C describes a Size 1 receptacle connector with 156 front insertable/removable wrap post contacts with polarization position 3 at location A and position 2 at location B.

Note:
All corner mounting polarization is accomplished by replacing the nut with the polarizing post (Part No. DL-Pol-Post)

EXAMPLE:
Receptacle DL1-156RW432C would mate with plug DL1-156PW432C.

TEMPERATURE/CURRENT RATING

The curves shown represent the rated current carrying capacity of the Cannon DL1, DL2 and DL3 electrical connectors, derated to 80% of the values recorded using the methods specified by International Electro-Technical Commission Document 48 (1975).

Current was applied to the total connector (all contacts) in one-half ampere increments and maintained at each current level until thermal stability was achieved. A thermocouple inserted into the "hottest area" of each connector then measured the connector temperature at the same time that an ambient temperature reading was taken. The difference between the two measured values is the heat rise or self-heating created solely by the current flow, and this temperature rise for each current level was deducted from the insulator material rated temperature. These values were then derated to 80% to obtain the curves below.

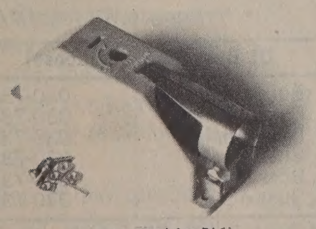
ACCESSORIES

JUNCTION SHELL KITS



(Standard for DL1)

PART NO. DL1-J/S

- Stainless steel cable clamps
- Fits on plug or receptacle housing
- Cable clamp can be mounted for right angle and straight cable entry
- Knockout plug provides alternate second cable entry

(Standard for DL3)

PART NO. DL3-J/S

- Stainless steel cable clamps
- For max. .625 (15,9) cable entry
- 90° or 180° cable entry

Dimensions subject to change.

(Millimeters are in parentheses)

ITT CANNON ELECTRIC

DL "ZIF" RECTANGULAR CONNECTORS

For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

ACCESSORIES

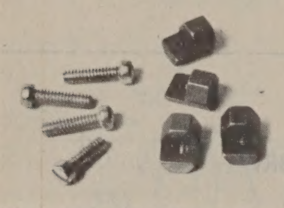
CABLE CLAMPS

PART NO. DL1-C/C
- For use on DL1 junction shell only

PART NO. DL2-C/C
- Also used on DL3 junction shell

Standard for DL2)

PART NO. DL2-J/S-LRG-C/C
- Stainless steel cable clamps
- For .625" (15,9) max. cable entry
- Two piece junction shell
- 45° cable entry



(Standard for 1-156, 2-96 and 3-60)

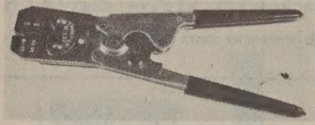
CORNER MOUNTING POLARIZING KIT
PART NO. DL-POL-POST
- Provides multiple polarizing positions

NOTE: For center mounting polarizing kit for DL1-156 and 2-96 please consult the factory.

ACTUATING HANDLE KIT
PART NO. DL-HANDLE
- Provides a convenient method of actuating the contacts and cam for locking the connector
- Kit provides actuating handle and attaching self tapping screw
- Pointer on handle denotes "locked" and "open" positions

TOOLING

HAND CRIMP TOOL

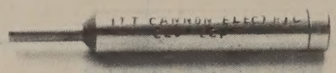


Part No. CCT-DL (for AWG 20 thru 30 wire)

CONTACT EXTRACTION TOOL

Part No. CET-DL-2

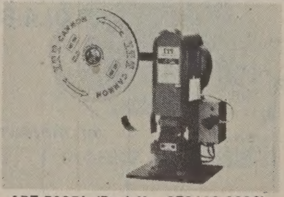
FRONT REMOVABLE CONTACT EXTRACTION TOOL



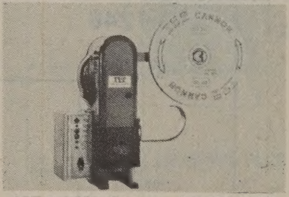
PART NO. CET-ECP
Front removable .025 (,64) Square Wrap Post Contact Extraction Tool.

SEMI-AUTOMATIC CRIMPING MACHINES (FOR REEL CARRIED CONTACTS)

Designed to meet high volume crimping requirements with 10,000 reel carried contacts on each reel. Modified "B" type crimp with wrap-around insulation support. Crimp machine and die set can be ordered together or separately.



ABT-500DL (Part No. 070186-0002)
Crimp machine. Die sets available for crimping contacts on pre-stripped individual #18 thru #30 AWG wires.

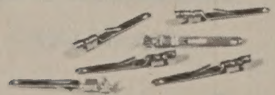


ABT-500CCS (Part No. 070232-0000)
Stripper Crimper
Stripper-Crimper machine. Die sets available for stripping wire and crimping contacts onto multi-conductor jacketed cable in #18 thru #30 AWG sizes.

ABT-606DL (Part No. 070293-001)
Pneumatic crimp machine for crimping contacts onto pre-stripped individual #18 thru #30 AWG wires. Used by customers requiring moderate quantities of contacts.

CONTACTS

LOOSE



- Hermaphroditic for low cost

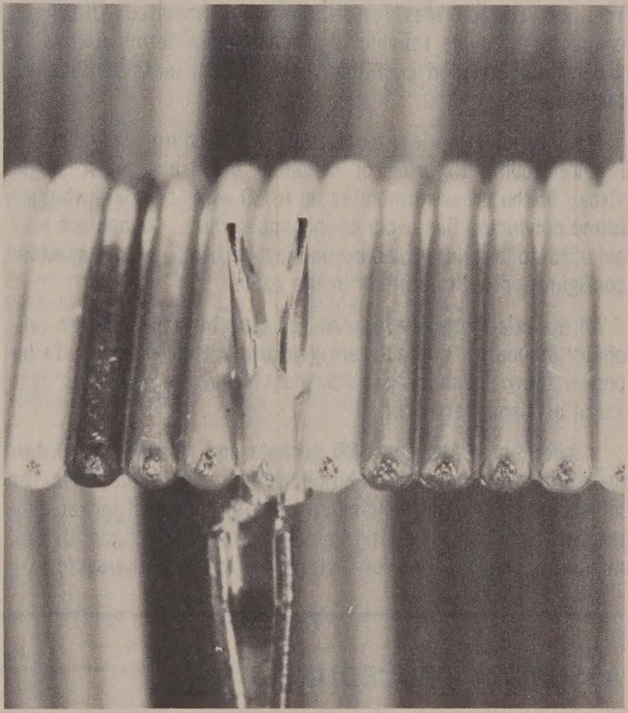
MAS/TER-UND

A NEW LEVEL OF RELIABILITY IN LOW-COST MASS TERMINATION.

THE MAS/TER INTERCONNECT SYSTEM

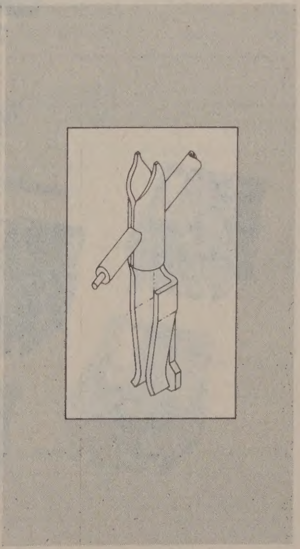
Mas/Ter-UND (Mass Terminated, UND-type) connectors, while intermateable with other similar connectors, are part of the new Cannon® Mas/Ter Interconnect System. The Mas/Ter Interconnect System eliminates the drawbacks of conventional mass termination systems while providing several benefits all its own:

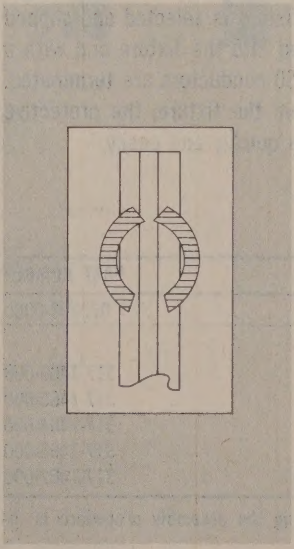
- With the Cannon Mas/Ter system, the entire connector is terminated at one time with no insulation stripping, no wire trimming and no complex tooling, utilizing either standard round conductor flat cable or individual wires, solid or stranded.
- The Mas/Ter contact penetrates and displaces the insulation, makes contact with the conductor, and provides insulation support to the wire.
- Integral contact spring action wipes the conductor during termination to produce a high force, low resistance interface.
- Uniform, constant force is maintained even under extremes of temperature, shock and vibration.
- Mas/Ter contact design provides 25% more wire-to-contact surface area.



A NEW LEVEL OF RUGGEDNESS, RELIABILITY, VERSATILITY

The key to the Mas/Ter Interconnect System is a special insulation-displacement, spring-action contact.





The contact is essentially a cylinder with a thin slit down the front and a wider slot part way down the back, with the two cylinder halves pointed at the top.

As a wire is terminated, the contact points penetrate the insulation, then push it aside. The interface where mating occurs is the thin slit at the front of the contact. The angled entry increases the effective surface area. The rear slot may contact the conductor, but serves primarily as an integral strain relief.

Insertion of the conductor into the slit causes the two halves of the cylinder to exert a spring force as they spread. This produces a wiping action that ensures a reliable low resistance interface consistently. It also adds to the flexibility of the system as it permits the termination of two wire sizes, solid or stranded, with the same contact.

This inherent spring action also increases the reliability of the contact under adverse operation conditions. The contact spring action maintains a constant pressure on the conductor under extremes of temperature, shock and vibration, even when tested without the cable retaining cap.

MAS/TER-UND INTERCONNECT SYSTEM

For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

LOWER COST MASS TERMINATION

The new Cannon Mas/Ter-UND (Mass Terminated, UND-type) connectors provide reliable high-speed mass termination at a lower total installed cost than conventional mass termination techniques.

Mass termination is a quick, simple procedure that does not require double fixturing or stripping of insulation. A single stroke of the press terminates up to 50 wires at once, whether round conductor flat cable or individual wires. Connectors may be used to terminate cables or may be used in a daisy-chain configuration with no break in the cable.

All materials used have been selected to maintain high reliability standards. Contacts are gold over nickel electroplate on copper alloy. Insulator is black glass filled thermoplastic, U.L. listed as flame retardant.

In addition to Mas/Ter-UND sockets and headers that intermate with other mass termination systems, the Cannon Mas/Ter Interconnect System includes subminiature pin-and-socket connectors that are fully intermateable with the Cannon D Subminiature Series. Other connector types will join the system.

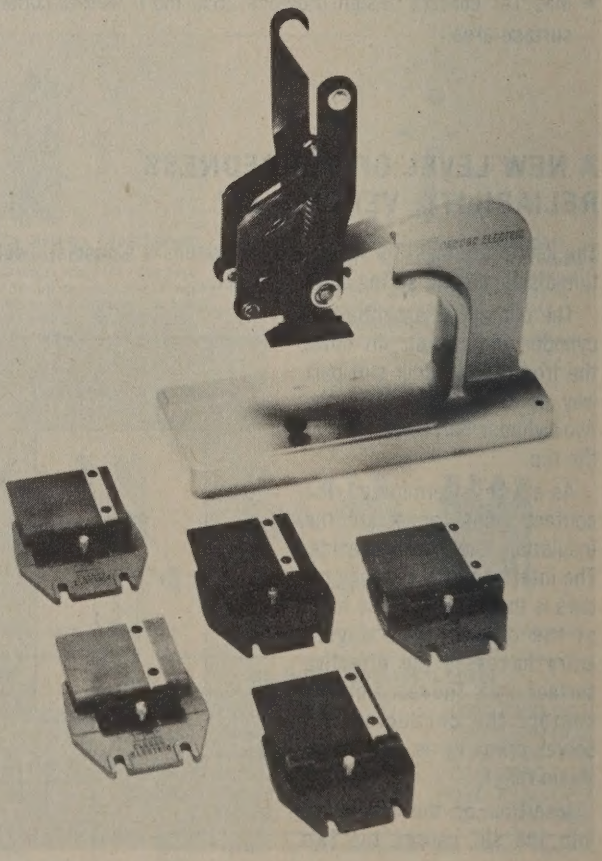
TEST	CONDITIONING	CRITERIA OF ACCEPTANCE
Thermal shock	—55°C to +105°C	No physical damage
Physical shock	100 G's, 3-axes	No physical damage. No loss of continuity >1 μsec.
Contact resistance	Low level—1 mA	Initial: 10 milliohms max. After conditioning: 15 milliohms max.
Vibration	15 G's, 10-2,000 Hz 12 hours	No physical damage. No loss of continuity >1 μsec.
Salt spray	48 hours	Shall be capable of mating and unmating, and meet contact resistance requirements.
Durability	500 cycles of mating and unmating	
Industrial gas	100 hours in hydrogen sulfide (H_2S) solution vapor	

ASSEMBLY PROCEDURE

The lower total installed cost of the Mas/Ter Interconnect System is achieved through a quick, simple termination procedure. The entire operation is performed at a single work station with a single stroke of the press, with no stripping and no complex tooling.

Termination fixtures for each UND connector configuration are color coded and imprinted for ease of selection. They may be used in the Cannon press or other presses of similar design.

For assembly, the termination fixture is selected and slipped into the press. The cable is placed into the fixture and with a single stroke of the press, up to 50 conductors are terminated. After removing the connector from the fixture, the protective cable retaining cap is snapped on quickly and easily.



ORDERING INFORMATION

DESCRIPTION	PART NUMBER
Press assembly	070290-0000
Connector fixture for	
UND 20	317-1466-000
UND 26	317-1465-000
UND 34	317-1464-000
UND 40	317-1463-000
UND 50	317-1462-000

A complete instruction manual detailing the assembly procedure is included with each assembly tool.

MAS/TER-UND INTERCONNECT SYSTEM

CANNON ITT

The interconnect system scaled for today's requirements

In electronic systems today, space is becoming a precious commodity. More and more is being designed into less and less space, with resulting demands for reductions in size and weight yet with no relaxation of reliability requirements.

A frequent choice for interconnecting microminiature systems has been hard-wiring—in spite of the loss of plugability and versatility—because conventional connectors are too large.

But there is a better choice.

Cannon microminiature connectors.

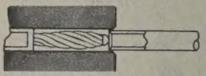
Our microminiature connectors are available with densities as high as 1600 contacts per square inch and, with reliability in excess of 99.9%, provide the reliability of hard-wired systems with none of the drawbacks. Three basic contact families encompass 40,000 standard line items that may be used in their standard configurations, readily and inexpensively modified for your specific applications, or provided in completely assembled, wired and tested multiple connector harnesses.

We have manufactured hundreds of millions of contact lines in our microminiature connectors and have a high volume capability and range of designs that make our microminiature connectors competitive in even the most cost-conscious commercial applications.

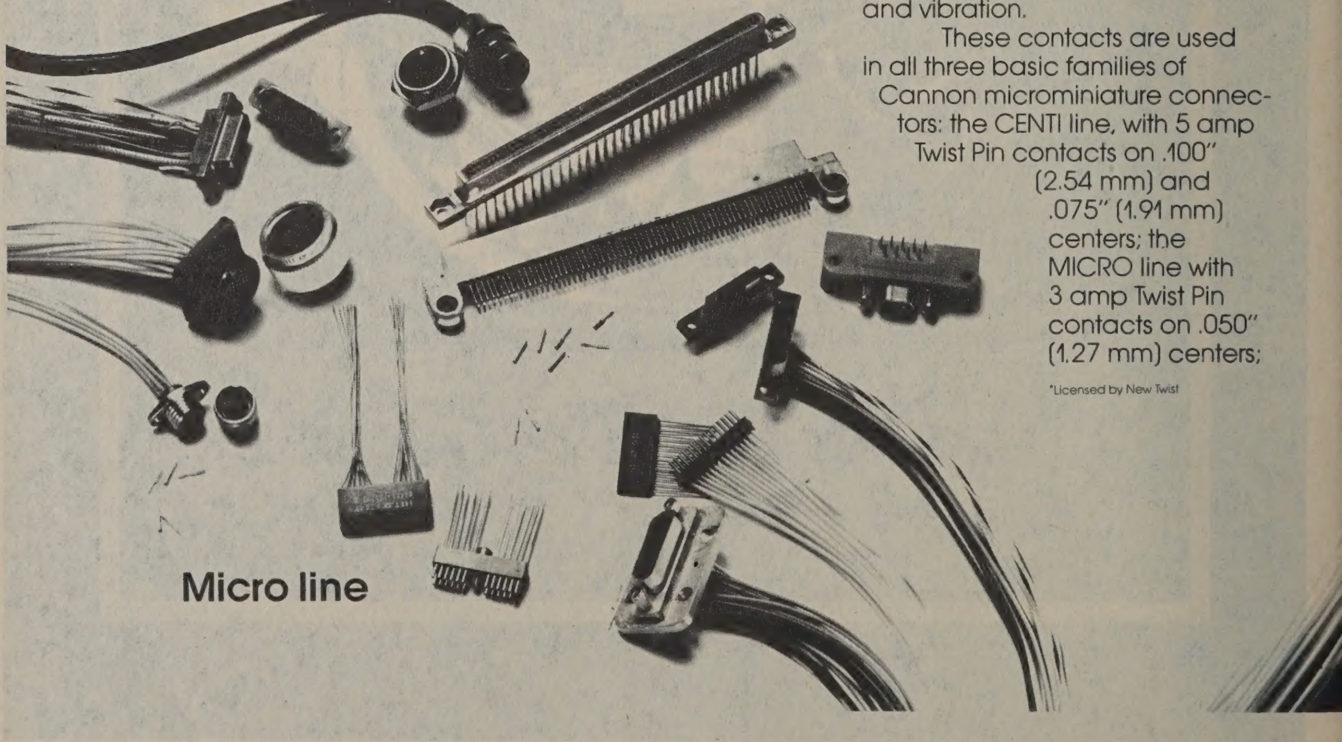
Our microminiature connectors are flying in artillery shells where they withstand 20,000 G shocks and in model airplanes, computer mainframes and peripherals, seismic streamers and portable radios.

The key to the high performance and reliability of Cannon microminiature connectors is the Twist Pin Contact* system. In this design, the conventional positions and action of the pin and socket are reversed. The spring action is in the flexible Twist Pin, not the socket, and the socket is exposed while the pin is recessed within a positive alignment cavity within the insulator.

The flexible Twist Pin Contact consists of several strands of wire in a compressible spiral which is welded at both ends, with one end crimped into a tubular sleeve. During mating, the protruding socket is guided into the pin cavity by the lead-in chamfer. The walls of the pin cavity keep the pin within the capture radius of the socket, while the controlled radius on the pin tip combines with the interior chamfer of the socket to cam the pin into alignment, assuring positive mating. Once mated, the compression of the pin spring members exerts a constant pressure that ensure electrical continuity and resists the highest levels of shock and vibration.



These contacts are used in all three basic families of Cannon microminiature connectors: the CENTI line, with 5 amp Twist Pin contacts on .100" (2.54 mm) and .075" (1.91 mm) centers; the MICRO line with 3 amp Twist Pin contacts on .050" (1.27 mm) centers;



Micro line

---

*Licensed by New Twist

and the NANO line, with 1 amp Twist Pin contacts on .025"(0.64 mm) centers. Connectors are available in miniature rectangular, circular, center jackscrew, strip and many other special configurations. The MICRO and NANO lines can be ordered in metal and plastic shells; with solder pots and P.C. tail terminations; in your choice of several insulator materials, some with interfacial seals; as standard catalog items or customized versions; with coax or 16 amp power contacts; and in complete multi-connector harnesses. The CENTI line is available as connectors you wire yourself or in complete assembled harnesses.

The remainder of this catalog details our standard line items. For more information and applications assistance, contact your nearest ITT Cannon Electric field office, or call our Microminiature Products Group at our 24-hour toll-free number: (800) 854-3573; in California, (800) 432-7063.

Section I: The MICRO Line

The Cannon MICRO Series established the standards for performance and reliability in microminiature interconnects. Exceptionally versatile, MICRO connectors are available in rectangular, circular, and strip configurations, with 3 amp MICROPIN®/MICROSOCKET® contacts on .050" (1.27 mm) centers, or with special arrangements of power and coaxial contacts.

The heart of the Cannon MICROPIN/MICROSOCKET contact system is a multi-element Twist Pin Contact recessed within an insulating housing. The rugged, cylindrical sockets are mounted in the exposed half of the connector. When connector halves are mated, the chamfered sockets are first aligned by the connector body, then guide the spiral MICROPIN contacts into proper and positive alignment, even under worst-case tolerance conditions. This is Cannon's POS-A-LINE® connector design.

The multiple spring elements of the MICROPIN, then under compression, form a multipoint contact system of high mechanical and electrical integrity. Contacts will provide fail-safe reliability over thousands of mating and unmating cycles, and have proven themselves in applications that range from commercial products to equipment that has been landed on the moon.

STANDARD DATA

- Contact rating—3 amps max.
- Minimum contact centers—0.050" (1.27 mm).
- Wire sizes—#26 thru #30 AWG, stranded or solid.
- Contact termination—multiple indent crimp.
- Contact retention—fixed via epoxy.
- Contact materials and finish—Copper alloy, gold-plated per MIL-G-45204, Type II, Grade C, Class 1.
- Mating/unmating force—8 oz. per contact, max.

PERFORMANCE DATA

The table below summarizes the results of key tests performed in accordance with MIL-STD-202, where applicable. Data is applicable to standard connectors with standard terminations. Variations may affect this data, so please consult the factory for further information on your requirements.

TEST	METHOD	CRITERIA OF ACCEPTANCE
Dielectric Withstanding Voltage	Method 301: 900 VAC at sea level 300 VAC at 70,000' altitude	 No breakdown No breakdown
Insulation Resistance	Method 302, Condition A	5,000 megohms minimum
Thermal Shock	Method 107, Condition B: −65°C to +125°C	No physical damage
Physical Shock	Method 213, Condition I: 1100 G's, 3-axes, 6 millisecond duration sawtooth pulse	No physical damage No loss of continuity >1 μsec
Vibration	Method 204, Condition B: 15 G's, 10-2,000 Hz, 12 hrs.	No physical damage No loss of continuity >1 μsec
Durability	500 cycles of mating and unmating, 500 CPH max.	No mechanical or electrical defects
Moisture Resistance	Method 106, omit 7b	Insulation resistance >100 megohms
Salt Spray	Method 101, Condition B: 48 hours	Shall be capable of mating and unmating, and meet contact resistance requirements
Contact Resistance	Method 307: At 3 amps At 1 milliamp	 8 milliohms maximum 10 milliohms maximum
Contact Retention	——	5 lb. minimum axial load

ITT CANNON ELECTRIC

MICROMINIATURE CONNECTORS MDM SERIES

For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

INTRODUCTION

MDM connectors are used in applications requiring highly reliable, extremely small, lightweight connectors. They are available in 7 shell sizes accommodating from 9 to 1 contacts, and special arrangements of power and coaxial contacts.

These connectors are designed to meet the rapidly increasing demands for an environmental, high performance, rugged, moisture-sealed microminiature connector. This connector employs size 24 MICROPIN® /MICROSOCKET® contacts on .050" (1,27 mm) centers in a contact density identical to the standard MICRO-D connector series, but with these additional features:

- Aluminum shells to provide greater strength, prevent chipping, cracking or breaking, offer electromagnetic (EMI) and RFI shielding.
- Silicone elastomer compression interfacial seal to provide a complete moisture and humidity seal between each contact and between contacts and shell.

For further technical and applications information, contact your nearest ITT Cannon Electric field office or call our Microminiature Products Group at our 24-hour toll-free number: (800) 854-3573; in California, (800) 432-7063.

STANDARD DATA

STANDARD MATERIALS AND FINISHES

Shell	— Aluminum alloy, cadmium plate, yellow chromate
Insulator	— Glass-filled diallyl phthalate per MIL-M-14, Type SDGF.
Contacts	— Copper alloy, gold plate
Jackscrew & Jackpost	— 300 Series stainless steel, passivate

ELECTRICAL DATA

No. of Contacts	— 9 thru 51 standard; 5 signal/2 coaxial; 5 signal/2 power; 20 signal/4 coaxial
Coaxial Contacts	— RG-196/U and RG-178/U
Wire Size	— #24 thru #30 AWG
Contact Termination	— Crimp stationary

MECHANICAL FEATURES

Size or Length	— 7 sizes
Service Classes	— Environmental
Coupling	— Friction/jackscrews
Polarization	— Keystone-shaped shells
Contact Spacing Centers	— .050 (1,27)
Shell Styles	— Plug and receptacle

NOTES:

1. Front mounting (figure 1) and rear mounting (figure 2) accommodates #2-56 screws.
2. Front mounting is preferred. However, when rear mounting is necessary, use figure 2 dimensions.
3. Edgeboard mounting bracket (figure 3) uses #2-56 screws. Dimension .450 ± .002 (11,43 ± 0,05) locates the MDM receptacle insulator flush with the end of the board.

Dimensions subject to change.

ITT CANNON ELECTRIC

MICROMINIATURE CONNECTORS
MDM-PCB SERIES

For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

INTRODUCTION

MDM-PCB connectors are designed for use with flex circuitry, flat cable and printed circuit boards. They use the standard MDM metal shell and provide high density and high reliability in board-to-board, board-to-cable and cable-to-cable applications.

MDM-PCB connectors are available in 7 shell sizes with 9 to 51 contacts. Terminations may be straight or at 90° for PCB mounting. Jackpost mounting and locking hardware is also available.

If the connectors shown in this catalog do not meet the requirements of your application, a special shape, size or layout using the standard MDM metal shell can be made available. Contact the factory for details.

For further technical and applications information, contact your nearest ITT Cannon Electric field office or call our Microminiature Products Group at our 24-hour toll-free number: (800) 854-3573; in California, (800) 432-7063.

CONSULT FACTORY FOR PCB PIN IDENTIFICATION NUMBERS AND FOR MOUNTING HOLE PATTERN DIMENSIONS

MDM COAXIAL/POWER SERIES

MDM COAXIAL

The MDM Metal Shell Connectors have been tooled in several coaxial layouts and offer the versatility of combining coaxial and signal lines in the same connector. Any modifications to these layouts or new requirements, please consult the factory. For ordering information see page 141. For contact layouts see page 142.

MDM POWER

The same insulator that is used with coaxial contacts is available with power contacts. This offers the versatility of combining power and signal lines in the same connector. Power contacts are rated at 13 amps, 24V rms, AWG #16 white stranded.

MDM COAXIAL/POWER

Power and coaxial contacts can be interchanged as desired.

MICROMINIATURE CONNECTORS MDM TRI-TERM SERIES

For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

INTRODUCTION

MDM TRI-TERM connectors provide RF performance in standard MDM metal shells and insulator layouts. RG196, RG178 coaxial or shielded cables are terminated to three MICROPIN®/MICROSOCKET® contacts, providing isolation of the center conductor in a standard connector.

MDM TRI-TERM connectors are available in seven shell sizes that accommodate up to a maximum of 17 coax or shielded terminations. Terminations are designed for operation from 100 to 1000 MHz with VSWR's of 1.2:1.0 to 1.4:1.0. Overall envelope and mounting dimensions are the same as the standard MDM Series, except for an additional .250"(6,35mm) max. rear back potting for strain relief.

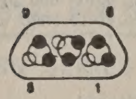
Shown below are arrangements with coaxial or shielded wire terminations, but coaxial and signal lines can be mixed in the same shell size. A 15-pin shell could have the following combinations:

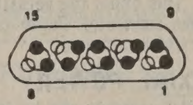
1 coax + 12 signal
2 coax + 9 signal
3 coax + 6 signal
4 coax + 3 signal
5 coax + 0 signal

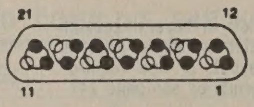
For further technical and applications information, contact your nearest ITT Cannon Electric field office or call our Microminiature Products Group at our 24-hour toll-free number: 800-854-3573; in California, 800-432-7063.

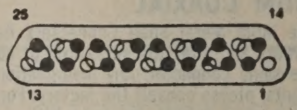
CABLE TERMINATION ARRANGEMENTS

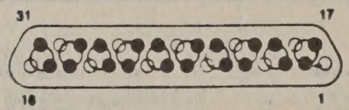
Coaxial termination arrangements as viewed from the engaging face of the pin side — use reverse order for socket side.

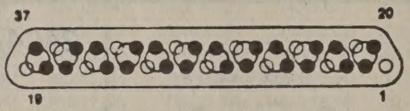


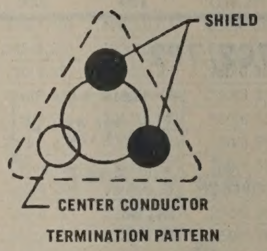












The above contact arrangements are the maximum densities that can be obtained in each shell size when using RG 196 A/U or RG 178 B/U cable.

MICROMINIATURE CONNECTORS MEB SERIES

INTRODUCTION

The Micro Edgeboard (MEB) connector system has been added to the microminiature products line to provide a combination of high density and high reliability for applications in airborne and space systems, computers and peripherals, and industrial and commercial control systems. Its design incorporates the pioneer Micropin®/Microsocket® contact system. This system has an outstanding record of high reliability and millions of contacts are in use in various applications where electrical interconnects are used.

The MEB has cast aluminum shells for ruggedness, diallyl phthalate insulation for top electrical performance and a 36-position polarization key system to prevent cross plugging. Contacts are on .050″ (1.27mm) center spacings. As with other members of the Micro family of connectors, the MEB has the advantage of a wide variety of types of termination. Termination types available include 90° P.C. pigtails for multi-layered boards, "coke bottle" termination for double-sided P.C. boards, and capability for Wire-Wrap† termination. Harnessing capability is also available for both pin and socket sides.

The MEB, including the SBR 90° variation available for multi-layer boards, can be mounted on the female (daughter) side of double or single-sided P.C. boards. The mating male (mother) board side can have the terminations formed to meet the application demands. Wire-wrapping, using .025″ x .025″ (0.64mm x 0.64mm) square posts is also available.

For further information, contact your nearest ITT Cannon Electric field office, or call our Microminiature Products Group at our 24-hour toll-free number: 800-854-3573; in California, 800-432-7063.

STANDARD DATA

STANDARD MATERIALS AND FINISHES

Shell	— Aluminum alloy, cadmium plate, yellow chromate
Insulation	— Glass-filled diallyl phthalate
Contacts	— Copper alloy, gold plate
Jackscrew and Jackpost	— 300 stainless steel, passivate

TERMINATION TYPES — Consult Factory

MECHANICAL FEATURES

Size or Length	— 2 sizes
Coupling	— Friction/Jackscrew
Polarization	— Shells, keys, pins
Contact Spacing Centers	— .050″ (1,27 mm)
Shell Styles	— Plug and receptacle

SHELL PLATING MOD CODES

No Number = Standard cadmium over yellow chromate
A174 = Electroless nickel
A172 = Gold over nickel
A141 = Irridite

ITT CANNON ELECTRIC

MICROMINIATURE CONNECTORS MICRO-K/MIK SERIES

For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

INTRODUCTION

MICRO-K microminiature circular connectors are rugged yet lightweight — and meet or exceed the applicable requirements of MIL-C-26482. Applications include computers, biomedical, instrumentation and miniature black boxes.

MIK: Accommodate up to 55 contacts on .050(1,27mm) centers (equivalent to 420 contacts per square inch). Five keyway polarization prevents cross plugging. The threaded coupling nuts provide strong, reliable coupling. MIK receptacles can be either front or back panel mounted; in back mounting applications, panel thickness of up to 3/32" can be used on the larger sizes.

Standard MIK connectors are available in two shell sizes accommodating two contact arrangements pre-wired to your specific requirements.

MIKM: Similar to our MIK, except has a steel shell and receptacle for improved ruggedness and RFI resistance. It accommodates up to 85 twist pin contacts.

MIKQ: A quick disconnect metal shell and receptacle version that can be instantaneously disconnected yet provides a solid lock when engaged. Applications include commercial TV cameras, portable radios, military gun sights, airborne landing systems and medical equipment.

For other variations of the basic MIK circular design, contact your nearest ITT Cannon Electric office or call our Microminiature Products Group at our 24-hour toll-free number: (800) 854-3573, in California, (800) 432-7063.

ITT CANNON ELECTRIC

MICROMINIATURE CONNECTORS MD SERIES

For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

MICROMINIATURE RECTANGULAR CONNECTORS WITH MICROPIN® CONTACTS ON .050″ (1,27 mm) CENTERS

MICRO-D microminiature rack/panel connectors are used in applications requiring highly reliable, extremely small, lightweight connectors.

These connectors are available in 4 insulator materials, 2 mounting variations, 7 shell sizes accommodating from 9 to 51 contacts and a special arrangement of 5 micro contacts and 2 coaxials. The 4 insulator materials listed give the MICRO-D connector wide versatility in most applications required by industry:

ITT Cannon Electric can terminate a wide variety of stranded or solid wire directly to MICRO-D contacts. Crimp attaching the wires before inserting and fixing the contacts is often desirable in high density arrangements.

MICRO-D connectors can also be custom harnessed to meet any customer requirement of single or multiple connectors. Piptail lead and harness description must be given by the customer. A typical description would be: ½″ #25 AWG, gold plated copper leads or 18″ of #26 yellow, Teflon-insulated, Type E wire. Shown below are various methods of termination. Consult factory for any routine or complex harnessing of MICRO-D connectors.

- Glass-filled diallyl phthalate — a thermoset material used in high temperature applications, −65°F to +300°F (−18°C to +149°C), that is immune to cleaning solvents. It also has excellent dielectric properties.
- Glass-filled nylon — a thermoplastic material that is not affected by cleaning solvents, and is used in applications when a high temperature resistant material is not required.
- Glass-filled polycarbonate — a thermoplastic material exhibiting excellent dielectric properties and dimensional stability.
- Glass-filled polyester — a thermoplastic that is not affected by cleaning solvents and exhibits excellent dielectric properties.

For further technical and applications information, contact your nearest ITT Cannon Electric field office or call our Microminiature Products Group at our 24-hour toll-free number: 800-854-3573; in California, 800-432-7063.

STANDARD DATA

STANDARD MATERIALS AND FINISHES

Shell/Insulator (One-Piece) — MD/MDB: Glass-filled thermoset—plastic
MDA/MDN/MDNB/MDVB: Thermoplastic
Contacts — Copper alloy, gold plate

ELECTRICAL DATA

No. of Contacts — 9 to 51; 1 arrangement of 5 contacts and 2 coaxials
Coaxial Contacts — RG-196/U and RG-178/U
RG-196A/U and RG-178B/U

Wire Size — #24 thru #30 AWG
Contact Termination — Crimp stationary

MECHANICAL FEATURES

Size or Length — 7 sizes
Coupling — Friction/jackscrews

MDB COAXIAL SERIES

For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

MDB COAXIAL WITH SCREW MOUNTING HOLES

MDB connectors with two coaxial and five MICROPIN®/MICROSOCKET® contacts. Crimp-type coaxial contacts accommodate RG-196/U and RG-178/U miniature cables.

A plastic insertion/extraction tool is supplied with each connector assembly.

PANEL MOUNTING HARDWARE

CLIP MOUNTING

Illustrated is the recommended method of front mounting with metal panel mounting keys. Panel mounting keys are available with or without coupling retention clips.

For front mounting, place the rear of the connector thru the panel cutout. With the mounting flange against the panel, fully insert the panel mounting keys thru the slots in the flange and thru the panel cutout. Retaining the keys in this position, bend them outward against the rear of the panel. When mating a front mounted connector with an unmounted connector, a coupling retention clip assembly may be used to securely lock the two together. Mounting screw brackets are available and may be used instead of the panel mounting keys.

Description	Part Number
*Panel Mounting Key	201-9100-000
*Mounting Key and Coupling Clip Assembly	294-9100-000
*Mounting Screw Bracket	015-9100-000
*Edgeboard Mounting Bracket	015-5009-000
**Edgeboard Mounting Bracket and Coupling Clip Assembly	MD51428-1

*Must be ordered separately; specify left and right hand for complete assembly.

**Must be ordered separately; assembly already contains a set of left and right hand.

NOTE: Panel mounting keys, coupling clip assemblies and mounting screw brackets are accessories and must be ordered separately.

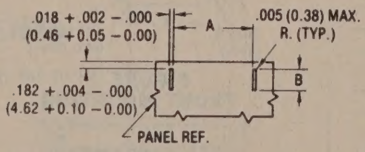

FIGURE 4
EDGEBOARD MOUNTING

NOTES:

1. A panel thickness of ½″ (3.17mm) maximum is recommended for ease of tab bending when a panel mounting key & clip assembly or edgeboard mounting brackets are used.
2. Front mounting is preferred. However, when rear mounting is necessary, use figure 3 for dimensions.
3. Figure 4 is for edgeboard mounting bracket or edgeboard clip assembly. The .184 ± .002 (4.67 ± 0.05) dimension locates the MD socket insulator flush with the end of the board.
4. Screw brackets (015-9100-000) will accommodate #2-56 screws.

ITT CANNON ELECTRIC

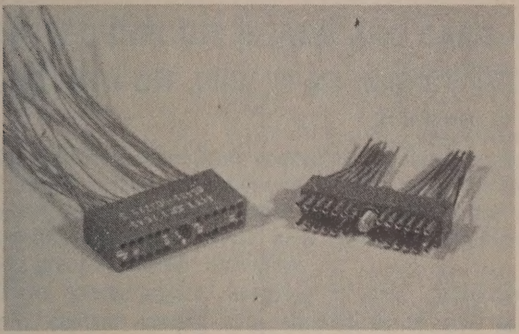
MICROMINIATURE CONNECTORS MJS SERIES

For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).



MICRO CENTER JACKSCREW

The MJS center jackscrew series provides a reliable interconnect for board-to-board, board-to-cable and in-line cable-to-cable applications. Arrangements accommodating up to 66 MICROPIN®/MICROSOCKET® contacts are available, with the same wide range of options as are offered with the other MICRO products offered in this catalog.

For further technical and applications information, contact your nearest ITT Cannon Electric field office or call our Microminiature Products Group at our 24-hour toll-free number: 800-854-3573; in California, 800-432-7063.

PRINTED CIRCUIT BOARD AND CARD MOUNTING FRAME APPLICATIONS

CONTACTS ON .050" (1,27 mm) CENTERS

50-MIL STRIP microminiature connectors are designed for space and weight saving applications in a space conscious industry. The strip configuration provides an extremely dense and reliable interconnection device in a minimum profile package, giving great application flexibility.

These connectors are available in many combinations of length, contact spacing and terminations to give designers maximum latitude in their packaging and interconnection solutions. They have been used successfully on printed circuit boards and card mounting frames. Because of its configuration, the 50-MIL STRIP connector is particularly suited for mounting with high strength epoxy adhesive. In lengths over 2" (50,80 mm), guides, rails or other systems should be used to assure alignment.

50-MIL STRIP connectors use either a flexible insulator of polycarbonate or nylon thermoplastic that can be mounted on curved surfaces up to a radius of approximately eight inches, or a more rigid insulator of diallyl phthalate — giving the connector a higher temperature capability. Up to 120 micropin contacts can be held in a single strip on .050" (1,27 mm) centers. Guide pins and polarizing devices are available. Special termination with hookup wire is available to meet specific customer requirements. Crimping hookup wire to contacts before they are inserted is often desirable in high density contact arrangements. Color coded wires of any length in sizes #24 thru #30 AWG solid and #26 thru #30 AWG stranded can be harnessed by the factory. For further technical and applications information, contact your nearest ITT Cannon Electric field office or call our Microminiature Products Group at our 24-hour toll-free number: 800-854-3573; in California, 800-432-7063.

HOW TO ORDER

MT* 1- 120 P L 1- **

Series and Materials
Contact Spacing
Number of Insulator Cavities
Contact Type
Termination Type
Termination Code
Modification

SERIES AND MATERIALS

MTA = Glass filled polycarbonate (105°C)
MTB = Glass filled diallyl phthalate (150°C)
MTN = Glass filled nylon (105°C)
MTV = Glass filled polyester (125°C)

CONTACT SPACING

1 = .050" (1,27 mm) centers MTA1, MTB1, MTN1 and MTV1 only
2 = .100" (2,54 mm) centers MTA2, MTB2, MTN2 and MTV2 only

*See Termination Codes below for additional length modification codes.
**Consult factory for variations from standard not shown.

NUMBER OF INSULATOR CAVITIES

MTV1, MTA1, MTN1 = 120 Max.
MTV2, MTA1, MTN2 = 60 Max.
MTB1 = 81 Max.
MTB2 = 41 Max.

CONTACT TYPE

P = Pin
S = Socket

TERMINATION TYPE

L = Uninsulated solid pigtail
H = Insulated
S = Solder pots

TERMINATION CODE*

(H) 001 = 18" #26 AWG per MIL-W-16878 Type E Teflon yellow.
(H) 003 = 18" #26 AWG MIL-W-16878 Type E Teflon, color coded to MIL-STD-681, System I.
(L) 1 = ½" uninsulated solid #25 AWG gold plated copper.
(L) 2 = 1" uninsulated solid #25 AWG gold plated copper.

MODIFICATION**

01 = Guide posts each end of socket strip — blank cavities each end of pin strips.

NOTE: PCB terminations preformed at 90° increments of .050" (1,27 mm) to bend from rear of insulator on solid uninsulated leads are available. Consult factory for proper ordering nomenclature.

STANDARD WIRE TERMINATION CODES

The following termination codes are listed for your Teflon information. For lengths not shown, consult factory for proper modification code. All wire lengths are minimum.

HARNESS TYPE — (H)
#26 AWG per MIL-W-16878 Type E, Teflon Stranded

STANDARD DATA

STANDARD MATERIALS AND FINISHES

One-piece insulator — MTA: glass-filled polycarbonate
MTB: glass-filled diallyl phthalate
MTN: glass-filled nylon
MTV: glass-filled polyester

Contacts — Copper alloy, gold plate

ELECTRICAL DATA

No. of Contacts — MTA/MTN/MTV: 120 max.
MTB: 81 max.

Wire Size — Solid: #24 thru #30 AWG
Stranded: #26 thru #30 AWG

Contact Termination — Crimp stationary

MECHANICAL FEATURES

Size or Length — MTA/MTN/MTV: 6.04" (153,42 mm) max. "yardage"
MTB: 4.09" (103,89 mm) max. "yardage"

Coupling — Friction

Polarization — Guide posts

Contact Spacing Centers — .050" (1,27 mm) and .100" (2,54 mm)

TEST DATA

CONTACT RESISTANCE

Tests give constant resistance readings from 10 μa to 3 amps on individually mated contacts. The maximum allowable contact resistance, measured on the wire at the rear of the contact, is 8 milliohms. The average contact resistance is 6 milliohms.

Current Rating—3 amps max.
Max. Voltage Drop—24 millivolts at 3 amps.
Average Voltage Drop—12 millivolts at 3 amps.
Low Level Contact Resistance—Measured voltage drop is .24 x 10^{-8} volts at 10 x 10^{-6} amps.

DIELECTRIC WITHSTANDING VOLTAGE

Min. Flashover voltage (at room temp.) at 60 cps rms 50% R.H.
Sea Level—900 VAC
70,000 feet—250 VAC

VIBRATION AND SHOCK

No discontinuity detected (in excess of 1 micro second) after twelve 15-min. sweeps from 10 to 2000 cps at .060" (1,52 mm) double amplitude or 20g, or after twenty shocks of 50g. Connectors were mounted to simulate service condition. Tests conducted to MIL-STD-202, Method 204A, Condition D and Method 213, Condition G.

TEMPERATURE RANGE

MTA, MTN: —65°F to +275°F (—53°C to +135°C)
MTB: —65°F to +302°F (—53°C to +150°C)

ENGAGING AND SEPARATING FORCE

For an individual contact the maximum engaging force is 8 ounces (226,80 grams). Minimum separating force is 0.5 ounces (14,17 grams) per contact. Test conducted using min./max. bushings.

SALT SPRAY

No damage or unacceptable increase in contact resistance after mated sample subjected to 48 hours of salt spray per MIL-STD-202, Method 101C, 5% solution, Condition B.

Note: MICRO-D environmental connectors were tested successfully in accordance with MIL-C-26482, Para. 4.6.14, and MIL-STD-202, Method 106B. The moisture resistance test was conducted using mineral-free water for a 10-day period. After this, insulaton resistance tests were conducted with satisfactory results.

CONTACT AND INSERT RETENTION

Over 6 lbs. (2,72 kg.) min. axial load after 10 cycles.

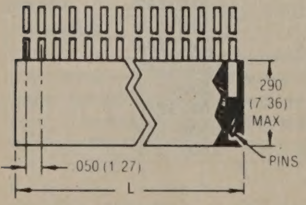
DIMENSIONAL DATA

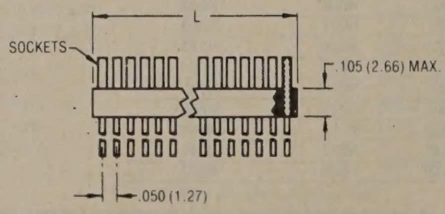
LENGTH

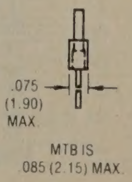
Contact cavities in 50-MIL STRIP connectors are in a single row and located on .050" (1,27 mm) centers or increments thereof. MTA and MTN connectors can be supplied in lengths up to 6.02 inches (157,91 mm) with a maximum of 120 contacts on .050" (1,27 mm) centers. MTB connectors can be supplied in lengths up to 4.07 inches (103,37 mm) with a maximum of 81 contacts on .050" (1,27 mm) centers. Length of connectors can be calculated as follows:

L = number of contacts times .050" (1,27 mm) plus .020" (0,51 mm)

EXAMPLE:
50 contacts (installed in each cavity):
L = (50 x .050)") + .020" = 2.52" length of strip
L = (50 x 1,27 mm) + 0,51 mm = 64,01 mm length of strip





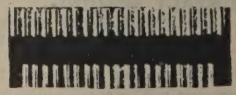


WEIGHT

			lbs.	gms.
Contact (with std. ½" copper pigtails)		pin	.000088	.040
		socket	.000088	.040
Insulator (per contact cavity)	MTB	pin	.000046	.021
		socket	.000013	.006
	MTA MTN MTV	pin	.000031	.014
		socket	.000009	.004
Guide Post	Stainless Steel		.000079	.035

NOTE: MTA not to be terminated with insulated wire in more than 41 cavities.

POLARIZATION



Modification code "-01" in the part number refer to guide posts located on both ends of the socket side of the 50-MIL STRIP connector and blank cavities on the pin side to accept the guide posts.

Although in many cases it is not necessary to polarize 50-MIL STRIP connectors, there are several ways to prevent cross plugging. One method is the use of guide posts that can be located in specified cavities to assure that the contacts will align when these posts are positioned before mating.

Section II: The CENTI Line

Cannon CENTI connectors are especially suitable for commercial applications such as computers, instrumentation, model airplane R/C equipment, calculators, communications and audio equipment. They are available in D subminiature size metal shell rectangular, plastic shell rectangular and strip configurations.

All CENTI connectors use the same reliable Twist Pin Contact design as our MICRO connectors, but in a slightly larger 5 amp version terminated on .075" (1.91 mm) and .100" (2.54 mm) centers. This larger contact is crimp removable, so CENTI Series connectors are available in connector kits and as bulk parts for customer assembly. Standard crimp and assembly tools are available.

As in our MICRO Series, the Twist Pin Contact is recessed within the insulator housing while the rugged cylindrical socket is exposed. When the connector halves are mated, the chamfered sockets guide the pins into positive alignment.

The CENTIPIN contact, now under compression, forms a multi-point contact with the CENTISOCKET to provide fail-safe reliability over thousands of mating and unmating cycles.

STANDARD DATA

- Contact rating—5 amps max.
- Minimum contact centers—0.075"(1.91 mm).
- Wire sizes—#22 thru #26 AWG, stranded or solid.
- Contact termination—multiple indent crimp.
- Contact retention—crimp snap-in/removable.
- Contact materials and finish—Copper alloy, gold-plated per MIL-G-45204, Type II, Class 0.
- Mating/unmating force—10 oz. per contact, max.

PERFORMANCE DATA

The table below summarizes the results of key tests performed in accordance with MIL-STD-202, where applicable. Data is applicable to standard connectors with standard terminations. Variations may affect this data, so please consult the factory for further information on your requirements.

TEST	METHOD	CRITERIA OF ACCEPTANCE
Dielectric Withstanding Voltage	Method 301: 1,000 VAC at sea level 300 VAC at 70,000' altitude	No breakdown No breakdown
Insulation Resistance	Method 302, Condition A	5,000 megohms minimum
Thermal Shock	Method 107, Condition A: −55°C to +85°C	No physical damage
Physical Shock	Method 213, Condition I: 100 G's, 3 axes, 6 millisecond duration sawtooth pulse	No physical damage No loss of continuity >1μsec
Vibration	Method 204, Condition B: 15 G's, 10-2,000 Hz, 12 hours	No physical damage No loss of continuity >1 μsec
Durability	500 cycles of mating and unmating, 500 CPH max.	No mechanical or electrical defects
Moisture Resistance	Method 106m omit 7b	Insulation resistance >100 megohms
Salt Spray	Method 101, Condition B: 48 hours	Shall be capable of mating and unmating, and meet contact resistance requirements
Contact Resistance	Method 307: At 5 amps	9 milliohms maximum
Contact Retention	— —	4 lb. minimum axial load

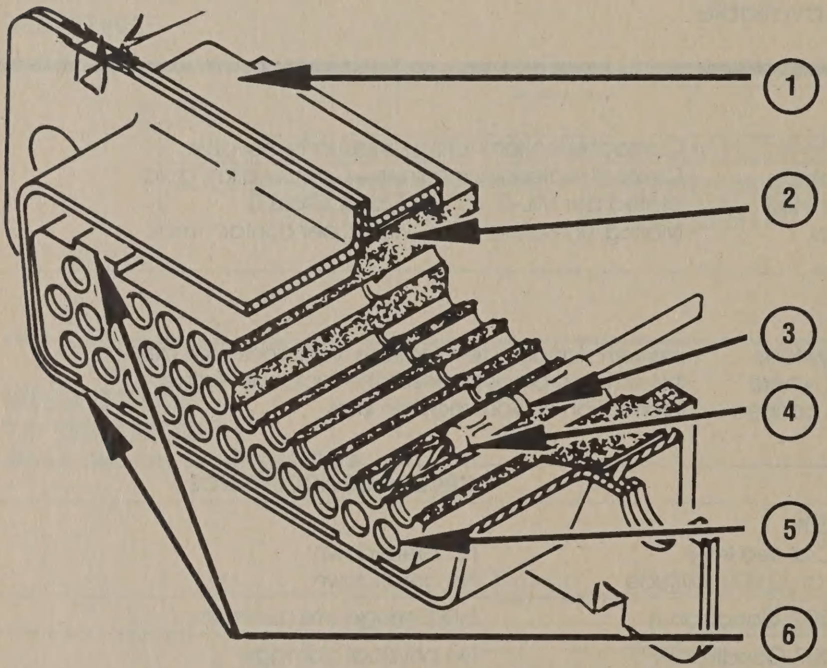
INTRODUCTION

The Double Density D is a rectangular connector in the popular D Subminiature shell configuration featuring double the contact density in the same insert area. The Double Density D connector can thus accommodate up to 100 contacts instead of 50.

This double contact density is achieved by using field-proven, highly reliable centipin/centisocket contacts on .075" (1,91) mm) centers, in the positive contact alignment design. In this design contact positions are reversed; the flexible centipin contacts are recessed in the insulator and the more rugged centisocket contacts are exposed. This reversal of positions, and the chamfered-entry of the sockets, assures positive mating even under severe misalignment conditions. The contacts are retained in the monobloc insulator by a resilient internal shoulder that snaps into a locking groove in the contact. The chamfered front of the contact will not damage the internal shoulder in the insulator. Contacts are crimp removable type.

The Double Density D connector is available in the five popular shell and insert sizes accommodating up to 100 contacts. While these connectors do not intermate with standard D Subminiature connectors, they do share a wide range of accessories that can be used interchangeably, including junction shells, potting cups, switching shells, guide pin plates, and dust caps.

For further technical and applications information, contact your nearest ITT Cannon Electric field office or call our Microminiature Products Group at our 24-hour toll-free number: (800) 854-3573; in California, (800) 432-7063.



1. **STANDARD D HARDWARE—** including full range of D Subminiature accessories
2. **MONOBLOC INSULATOR—** glass-filled nylon material
3. **CONTACT RETENTION—** thermoplastic internal shoulder snaps into a locking groove in the contact.

   Retention Force: 10 lbs. min. initially 4 lbs. min. after 10 cycles.
4. **TWIST PIN CONTACTS—** seven outer wiping surfaces assure electrical continuity even under severe shock and vibration
5. **POSITIVE CONTACT ALIGNMENT—** flexible pin is recessed in insulator cavity and rugged socket is exposed
6. **GUIDE-IN KEYS AND KEYWAYS—** assure alignment during mating and prevent scooping

DOUBLE DENSITY D/CENTI-LOC® CONNECTORS ASSEMBLY INSTRUCTIONS

The Double Density D and CENTI-LOC Connectors are highly reliable and simple connectors to use. There are a few helpful suggestions that will assure complete satisfaction when followed:

1. The instructions found under the section marked ASSEMBLY should be followed.

2. The proper crimp tool and locator (if required) must be used. These tools have been designed for use with this product. Substitutions of crimping equipment may result in connector failure at the assembly operation.

3. After crimping a contact to a lead the selection of insertion tools is shown in the section marked TOOLING. It is of vital importance that the proper tool be used to assure seating the contact in the insulator in the proper position. Any substitution of insertion tools may result in over or under insertion of the contact which will damage the retention system of the insulator.

4. The female (socket) side of the connector has been designed with a controlled float to allow for ease of mating. To avoid reducing this float or causing a splaying of the contacts, any unnecessary strain by clamping too close to the rear of the connector should be avoided.

Recommended tooling together with proper assembly techniques with the knowledge and care required by a microminiature unit will pay dividends in reliability and reduced costs.

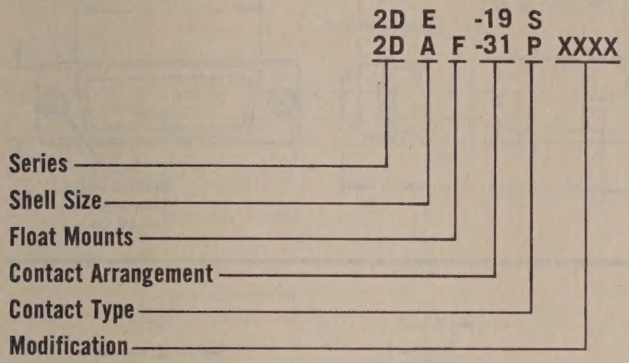
HOW TO ORDER



NOTE: Connectors may be ordered less contacts by adding the mod callout "FO" at end of number. Contacts are then supplied in bulk form. For type of contacts and installation/assembly tools refer to pages 168-171.

MODIFICATION
For modification, consult factory

STANDARD DATA

STANDARD MATERIALS AND FINISHES

*Shell — Steel, cadmium plated with yellow chromate supplementary coating
Float mounts — Stainless steel
Insulator — Glass-filled nylon
Contacts — Copper alloy, gold plate

MECHANICAL FEATURES

Sizes — Five shell sizes: E, A, B, C, and D
Coupling — Friction, jackscrew
Polarization — Keystone-shaped shells
Contact Spacing — .075 (1,91)
Contact Termination — Crimp snap-in

ELECTRICAL DATA

No. of Contacts — 19, 31, 52, 79 and 100
Wire Size — #26, #24 and #22 AWG stranded wire
Current Rating — 5 amps/contact
Contact Resistance — 9 milliohms max.
DWV — Sea level: 1000 VAC
70,000 ft.: 250 VAC
Max. Voltage Drop — 45 millivolts at 5 amps
Temperature Rating — —55°C to 105°C

*Brass non-magnetic also available

CONTACT ARRANGEMENTS

MICROMINIATURE CONNECTORS
CTA STRIP CONNECTORS

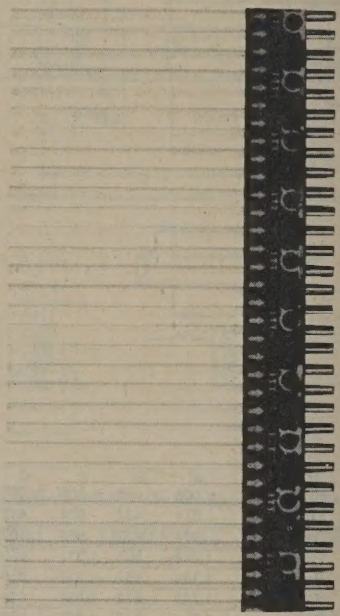
For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

INTRODUCTION

CENTILOC® connectors are low-cost nylon strip connectors designed for commercial applications such as computers, instruments, communications, audio equipment, calculators, model equipment and prototype development. They are available in "yardage" from up to a 6" (152,40 mm) maximum length, accommodating from 1 to 60 rear insertion, front release, crimp snap-in size 22 CENTIPIN/CENTISOCKET contacts. These contacts are utilized in the proven positive contact alignment design, giving additional contact strength and positive contact alignment during mating.

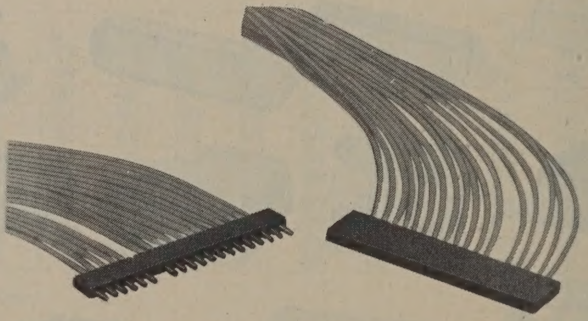
These connectors can be ordered in kit or bulk form. The kit comprises all the parts necessary to assemble one complete 6" (152,40 mm) strip connector with 60 contacts on .100" (2,54 mm) centers or a 4" (101,60 mm) strip with 53 contacts on .075" (1,91 mm) centers. If more than one connector is required, the parts can be ordered in bulk and assembled as desired.

For further technical and applications information, contact your nearest ITT Cannon Electric field office or call our Microminiature Products Group at our 24-hour toll-free number: 800-854-3573; in California, 800-432-7063.



ORDERING INFORMATION FOR STRIP CONNECTORS

The CENTI-LOC strip connector can be ordered in kit or bulk form. The kit includes mating insulators with a full compliment of contacts and two guide posts. If more than one connector is required, the parts can be ordered in bulk and assembled as desired.



GUIDE POSTS **POLARIZING POSTS**

KIT FORM

Kits include mating insulators with full complement of contacts and two guide posts.

Part Number	Contact Center Spacing
CTA3-KIT	.075 (1,91)
CTA4-KIT	.100 (25,40)
CTA3-CTA4-KIT	.075 (1,91) & .100 (2,54)

The guide posts and polarizing posts are inserted in the same manner as the contacts. The guide posts are inserted into the socket insulator, and the polarizing posts are inserted into the pin insulator. The corresponding contact in the mating insulator must be removed for each. See assembly instructions on page 171.

MICROMINIATURE CONNECTORS

2D/CTA CONTACT DATA

CONTACT PART NUMBERS

The contacts are retained in the monobloc insulator by means of a resilient internal shoulder that allows contact to snap into a locking groove. The front of the contact is chamfered so that the internal shoulder in the insulator is not damaged as the contact is pushed thru.

NOTE: Plating except as noted is 30 pin gold.

*Consult factory for any tail size or plating requirements.

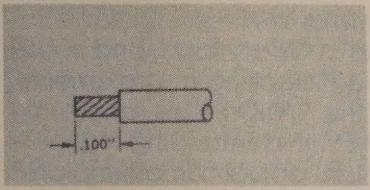
PIN EXTRACTION TIP

MICROMINIATURE CONNECTORS 2D/CTA ASSEMBLY

For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

ASSEMBLY

(See page 169 for crimp insertion and extraction tools)

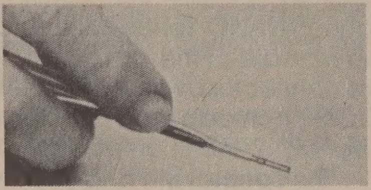


WIRE STRIPPING

1. Cut the wires to length required and strip .100" of insulation from the end to be crimped. Check for cut or broken wires and frayed insulation.

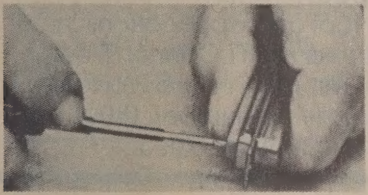
CONTACT CRIMPING

2. Using the proper crimp tool and locator, insert the contact into the locator. Insert the stripped end of the wire into the contact crimp pot, and crimp the contact to the wire. Squeeze the handles firmly to insure a proper crimp (tool will not release if crimping is incomplete). NOTE: Contact stop must be changed in tool locator when crimping pin and socket contacts.

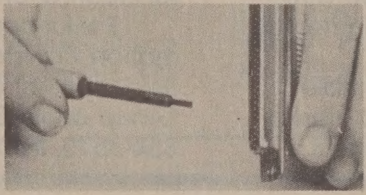


CONTACT INSERTION

3. Place the proper insertion tip in the insertion/-extraction handle and put the tip over the wire as shown. The tool tip will butt up against the crimp pot. Connector must be firmly supported during both insertion and extraction operations.

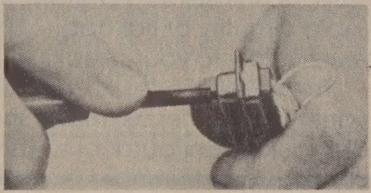


4. Using a firm, steady pressure, push the contact into the cavity until the resilient internal shoulder in the insulator snaps into the locking groove in the contact. The shoulder of the tool tip bottoms against the rear of the insulator, preventing over-insertion. Repeat for balance of contacts.



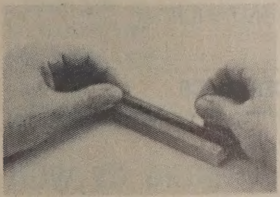
CONTACT EXTRACTION

5. For contact extraction, remove the insertion tool tip and replace it with the proper extraction tool tip. (The socket tip will fit into the socket, and the pin tip will slide over the pin bundle). Insert the tool tip into the contact cavity: (the pin tip will butt up against the shoulder of the pin contact, and the socket tip will bottom in the socket contact.)



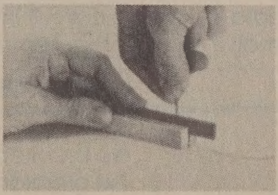
6. Apply a firm, steady pressure until the contact is released from the internal shoulder in the insulator. The shoulder of the tool tip will bottom against the insulator face to prevent damage to the internal shoulder. Remove the tool tip and pull the contact from the rear of the connector. Repeat for the balance of contacts to be removed.

CTA

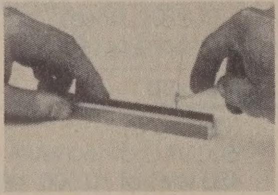


INSERTION

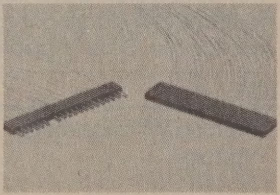
1. Place the connector into the slot in the assembly block with the arrows on the insulator pointing downward. The connector will bottom against the internal shoulder in the groove in the assembly block. Start contact insertion by placing the crimped contact in the cavity by hand.



2. Position the insertion tool tip on the rear of contact as shown. The insulation must be pulled back from the crimp pot approximately 1/32" to allow the tool tip to butt against the contact crimp pot.



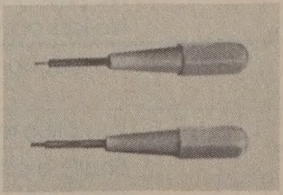
3. With firm steady pressure, push the contact into the cavity until the resilient internal shoulder snaps into the locking groove in the contact. To prevent over insertion, the tool tip bottoms against the rear of the insulator.



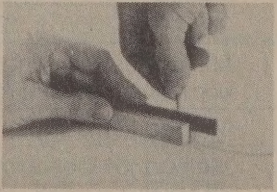
4. The guide post and polarizing posts are inserted in the same manner as the contacts. The guide posts are inserted into the socket insulator, and the polarizing posts are inserted into the pin insulator. The corresponding contact in the mating insulator must be removed for each.

EXTRACTION

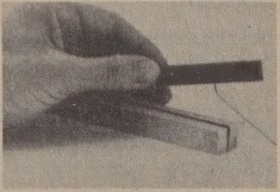
5. To extract the contacts, place the connector face up in the assembly block so that the contact to be extracted is in the end of the block that has a fully slotted opening.



The pin extraction tool tip is tubular, slides over the pin bundle and butts against the front shoulder of the pin. The socket extraction tool is a solid rod that fits into the socket contact, the external shoulder butts against the contact socket shoulder.



6. Insert the extraction tool into the cavity and apply firm pressure until the contact is pushed thru the rear of the connector.



7. Lift the insulator from the groove and pull the contact out. Repeat for balance of contacts to be removed.

Section III: The NANO Line

Cannon NANO Series connectors are the current state-of-the-art in high density miniature connectors, with 1 amp NANOPIN/NANOSOCKET contacts on .025"(0.64 mm) centers for a density of 1600 contacts per square inch.

The special pin and socket design permits this extremely high contact density with no degradation in reliability, maintaining continuity in these dense areas even under severe shock and vibration while requiring very low engagement and separation forces. Terminations can consist of uninsulated pigtails, insulated wire, flexible circuitry or flat cable, all pre-harnessed at our factory to your specifications.

The NANO Series is currently available in a variety of strip forms; metal shell and plastic rectangular configurations, with or without center jackscrew; a metal shell rectangular combining signal and coax contacts; and in a discrete board-to-board stacking arrangement.

Applications for the NANO Series range from military programs with demanding high reliability requirements to actual human implantations in medical research. In all of them, the NANO Series has proven highly successful.

If the NANO connectors shown do not meet your specific needs, consult the factory. Other connectors can be designed and economically fabricated for your specific applications.

For further technical and applications information, contact your nearest ITT Cannon Electric field office or call our Microminiature Products Group at our 24-hour toll-free number: (800) 854-3573; in California, (800) 432-7063.

STANDARD DATA

- Contact rating—1 amp max.
- Minimum contact centers—0.025"(0.64 mm).
- Wire sizes—#30 and #32 AWG, stranded or solid.
- Contact termination—integral pigtail or multiple indent crimp.
- Contact retention—fixed via epoxy.
- Contact materials—pin sleeve and socket: nickel silver.
  —pin: precious metal alloy.
- Mating/unmating force—6 oz. per contact, max.

PERFORMANCE DATA

The table below summarizes the results of key tests performed in accordance with MIL-STD-202, where applicable. Data is applicable to standard connectors with standard terminations. Variations may affect this data, so please consult the factory for further information on your requirements.

TEST	METHOD	CRITERIA OF ACCEPTANCE
Dielectric Withstanding Voltage	Method 301: 600 VAC at sea level 150 VAC at 70,000' altitude	 No breakdown No breakdown
Insulation Resistance	Method 302, Condition A	5,000 megohms minimum
Thermal Shock	Method 107, Condition B: −65°C to +125°C	No physical damage
Physical Shock	Method 213, Condition I: 100 G's, 3-axes, 6 millisecond duration sawtooth pulse	No physical damage No loss of continuity >1 μsec
Vibration	Method 204, Condition D: 20 G's, 10-2,000 Hz, 12 hours	No physical damage No loss of continuity >1 μsec
Durability	500 cycles of mating and unmating, 500 CPH max.	No mechanical or electrical defects
Moisture Resistance	Method 106, omit 7b	Insulation resistance >100 megohms
Salt Spray	Method 101, Condition B: 48 hours	Shall be capable of mating and unmating, and meet contact resistance requirements
Contact Resistance	Method 307: At 1 amp At 100 milliamps	 60 milliohms maximum 60 milliohms maximum
Contact Retention	— —	3 lb. minimum axial load

ITT CANNON ELECTRIC

MICROMINIATURE CONNECTORS NANO SERIES

INTRODUCTION

To meet the growing need for microminiaturization, ITT Cannon Electric has designed the NANO Contact System. These NANO Series connectors are the current state of the art in high density miniature connectors, with 1 amp NANOPIN/NANOSOCKET contacts as close as .025″(0.64) centers. Densities to 1600 contacts per square inch can be accomplished.

The special pin and socket design permits this extremely high contact density with no degradation in reliability, maintaining continuity in these dense areas even under severe shock and vibration while requiring very low engagement and separation forces. Terminations can consist of uninsulated pigtails, insulated wire, flexible circuitry or flat cable, all pre-harnessed at our factory to your specifications.

The NANO Series is currently available in a variety of strip forms; metal shell and plastic rectangular configurations, with or without center jackscrew; a metal shell rectangular combining signal and coax contacts; and in a discrete board-to-board stacking arrangement.

Applications for the NANO Series range from military programs with demanding high reliability requirements to actual human implantations in medical research. In all of them, the NANO Series has proven highly successful.

If the NANO connectors shown do not meet your specific needs, consult the factory. Other connectors can be designed and economically fabricated for your specific applications.

For further technical and applications information, contact your nearest ITT Cannon Electric field office or call our Microminiature Products Group at our 24-hour toll-free number: 800-854-3573; in California, 800-432-7063.

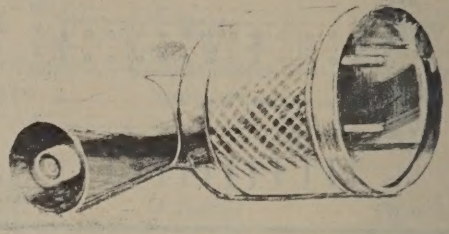
CONNECTOR SELECTION GUIDE



This guide lists additional catalog information (for products not shown in this directory) available from ITT Cannon.

It is designed to help you select the proper connector series and the appropriate catalog from which to specify your requirements. Determine your basic application: Rectangular, Rack/Panel, Circular, Printed Circuit/Input-Output, Filters, or Special Application connectors.

Go to the appropriate heading in the chart. Below each heading are several blocks listing the various connector series. Check these requirements with the data on the right side of each block. Write ITT Cannon Electric, 666 E. Dyer Road, Santa Ana, California 92702, or telephone (714) 557-4700 for the proper catalog, detailed product data, and ordering information, or consult your nearest ITT Cannon sales office. Should you need immediate information dial our direct, no charge, 24 hour "Hot Line" number: 800/854-3573 (in California: 800/432-7063).

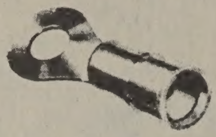
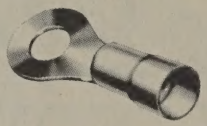
TERMINALS

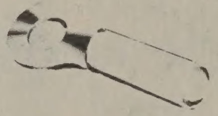
- **Wire Ranges:** #26 thru #4/0 AWG, Loose Piece. Mounted on Tape or in Continuous Strips in #26 thru 10 sizes.
- **Tongue Types:** Ring, Rectangular, Spade, Flanged Spade, Hook, Slotted Ring and Snap Spade.
- **Approvals:** Terminals are covered by UL, CSA and Military Specifications, where Applicable.



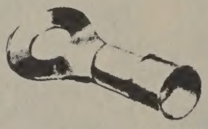
AVIKRIMP® — Tin-plated brass sleeve strengthens barrel. Color coded Nylon insulating sleeve adds more wire protection. Operating temperatures: continuous duty — −40°F to 250°F, intermittent duty — to 350°F. WIRE RANGE: #26-10. Also available on tape.



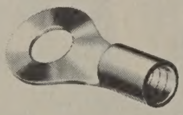
INSULKRIMP® — PVC insulation sleeve permanently attached to butted seam barrel (#22-10) or brazed seam barrel (#8-2). Operating temperatures: continuous duty — −40°F to 167°F, intermittent — to 300°F. WIRE RANGE: #22-2. Also available on tape.



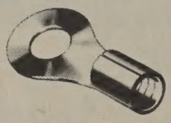
NYLAKRIMP™ — Ideal for larger wire applications involving temperature extremes and vibration. Rigid, overhanging Nylon insulating sleeve covers silver-brazed barrel. Withstands continuous duty temperatures from −60°F to 250°F. WIRE RANGE: #8-4/0.



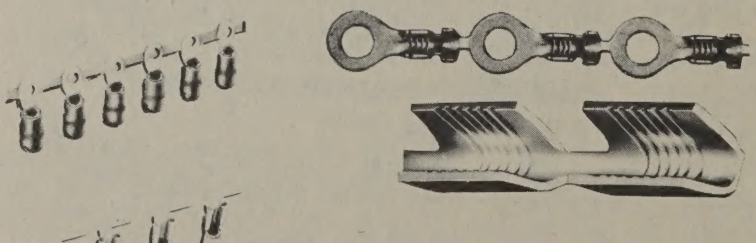
VIBRAKRIMP® — Made for excessive vibration applications. Seamless tin-plated brass sleeve covers basic KRIMPTITE barrel. Its overhang prevents wire flex. Single crimp terminates wire. WIRE RANGE: #22-10. Also available on tape.



VERSAKRIMP™ — Has silver brazed barrel. Seam will not open under stress or wire pull. Crimps using many types of tooling. Ideal for solid or stranded wires. WIRE RANGE: #22-4/0. Also available on tape.



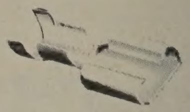
KRIMPTITE® — One piece, non-insulated design. Ideal general purpose terminal for uses where special features are unnecessary. Full length barrel makes crimping easy. WIRE RANGE: #26-10. Also available on tape.



AUTOMATED STRIP AND TAPED TERMINALS, quick disconnects and magnet wire splices from #26 thru #10 AWG sizes. Popular tongue types, barrels insulated or open with insulation support. Quick disconnects available in straight or flag designs.

QUICK CONNECTS

- **Female Receptacles and Male Tabs**

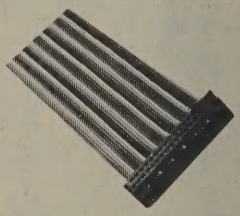


PDQ™ quick connect receptacle terminals handle #26-12 AWG wires and .110 x .020, .110 x .032, .187 x .020 and .250 x .032 inch male tabs. Insulated or non-insulated barrels. Available loose piece, on tape or continuous strip. Meet NEMA and UL standards. Male tabs and single or twin tab lugs are .250 thru .110 inches wide for PDQ female receptacles.

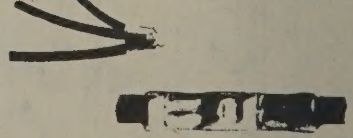
CABLE TIES

NYLON CABLE TIES are one-piece self-locking straps that quickly and safely speed harness assemblies. Different sizes handle bundle diameters up to 4″. Rugged application tools provide the right tension and cut ties flush with tie heads.

CONNECTORS & SPLICES



FLAT CABLE CONNECTOR — Easy way to mass terminate all .050 spaced flat cable with up to 50 conductors. Receptacles available in seven contact layouts. Assorted Pin Headers available. Assemble with ETC Tool.



CLOSED-END CONNECTORS AND SPLICES — Provide secure connections in insulated or non-insulated styles. WIRE RANGE: #22-4/0.

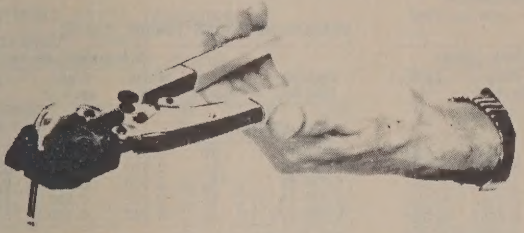
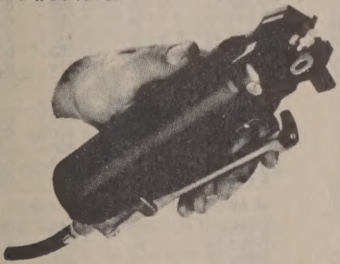
CONNECTING DEVICES FOR EVERY NEED

CRIMPING TOOLS

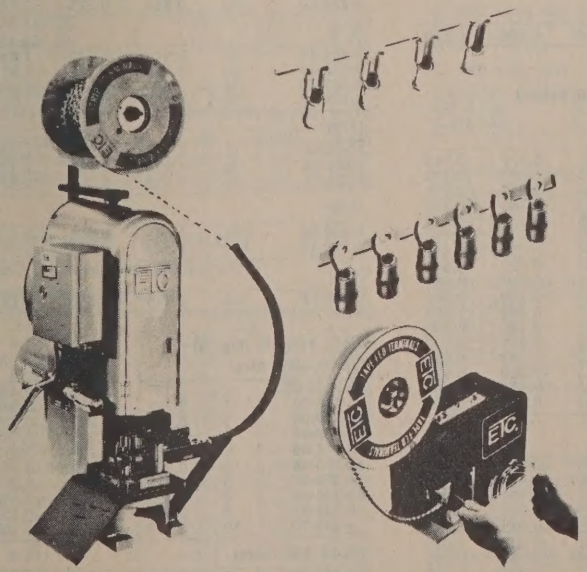
- Hand Operated and Semi-automatic ... Matched-to-terminal Designs ... Free 30-day Evaluation Trials



RATCHET HAND TOOLS — Special ratchet mechanism won't allow terminal to be released until fully crimped. Handle terminals and splices from #26 thru #10 AWG.



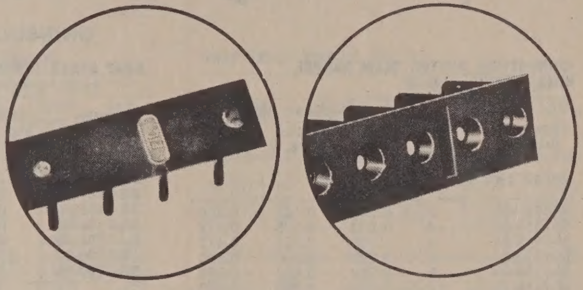
PORTABLE AIR TOOLS — 27 oz. AT-200 hand tool uses standard air pressure to crimp #26 thru #6 AWG terminals and splices. Bench adapter accessories available.



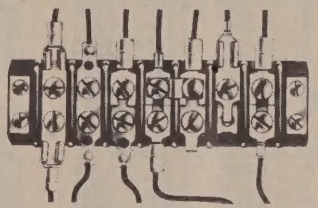
AUTOMATIC FEED TAPE AND STRIP PRESSES — Terminals are loaded into crimping dies automatically. Cycled for up to 3,600 terminations per hour. Crimps #26 thru #10 AWG sizes. Air and electrically operated models.

TERMINAL BLOCKS

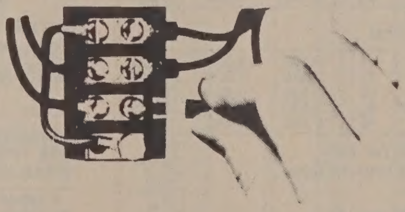
- Closed Back ... Open Back ... Military Blocks



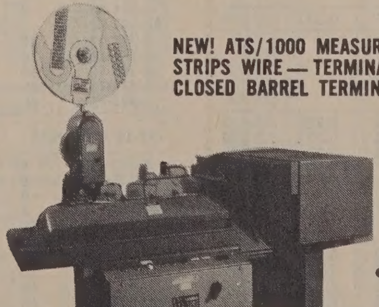
CLOSED BACK **OPEN BACK**



TWIN SCREW OR SINGLE SCREW — Choose closed back design with molded-in plates and protected mounting holes. Or open back design. Rated 5 to 30 amps. Complete selection of lugs and hardware.



TERMINAL BLOCK TERMINALS — Match-fitting to blocks assures reliability in sizes #26 thru #10 AWG. Spade, Flanged Spade and Rectangular tongues are 3/16", 19/64", 21/64" or 27/64" wide.



NEW! ATS/1000 MEASURES, CUTS, STRIPS WIRE — TERMINATES OPEN AND CLOSED BARREL TERMINALS

- 3,000 terminated wire leads per hour.
- Attractive lease rates.

CANNON ETC INSULATION DISPLACEMENT CONNECTORS

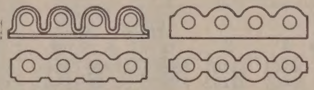
A SIMPLIFIED, LESS EXPENSIVE APPROACH TO RELIABLE MASS TERMINATION OF FLAT CABLES

ETC Series PS connectors combine low cost mass termination with consistently high reliability.

Receptacles are available in seven contact layouts to terminate all .050(1,27) spaced flat cable with up to 50 conductors with no pre- or post-assembly operations and may be applied to the cable ends or at any point on the cable for daisy-chain assemblies. These receptacles are intermateable with all existing flat cable system pin headers, and accept .025(,64) round or square pins.

Matching straight, right angle and wrappable headers are available in a standard configuration that allows access to the pins for testing, or with shielded pins to prevent inadvertent short circuits. Shielded pin headers are also available with an integral latch and with a latch and quick-release feature.

MATERIALS AND FINISHES	
Insulator	Glass-filled polyester, U.L. rated 94V-O (flame retardant), black
Contacts	Gold over nickel electroplate on copper alloy
MECHANICAL FEATURES	
Contact spacing	.100(2,54) by .100(2,54) grid
Max. engagement force	3000 grams per contact
Min. separation force	40 grams per contact
ELECTRICAL DATA	
Current rating	1 ampere max.
Temperature rating	−50°C to +105°C
Insulation resistance	>5000 megohms
Contact resistance	15 milliohms max. initial 20 milliohms max. after conditioning
Dielectric withstanding voltage	>650 V rms at sea level
TERMINATION (RECEPTACLES)	
Type	Insulation displacement
Cable	Flat ribbon cable on .050(1,27) centers, tin plated, any of the following types:



Wire size	#26 thru #28 AWG, solid and stranded

CANNON ETC TERMINAL BLOCKS— CLOSED AND OPEN BACK

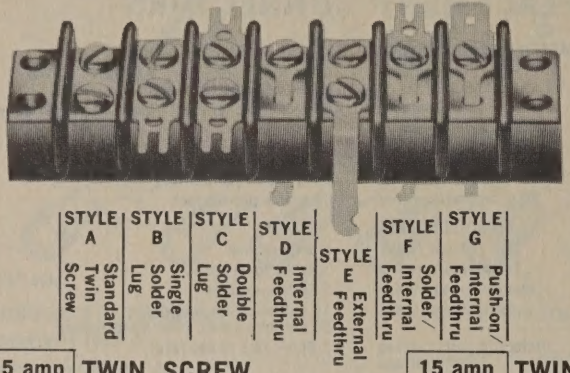
Cannon Terminal Blocks are available with closed or open backs. The part number tables on these pages show the closed back number. See tables for ordering open back version. Standard block material is general purpose phenolic. Other materials available that meet or exceed Mil. Spec. requirements: MIL-M-14F and MIL-M-19833.

Open Back Blocks are available with Lugs and Quick Disconnect Blades permanently riveted to the Block. Lugs available with rivets are: Double Solder Lug; Solder/Internal Feedthru; Push-on Internal Feedthru.

To order riveted version, change first digit of Open Back Block from "2" to "1."

57000 Series: A 6-32 x 3/16" binder head screw version of the 27000 Series is available. Use 57000 in place of 27000.

67000 Series: A 6-32 x 3/16" binder head screw version of the 37000 Series is available. Use 67000 in place of 37000.



STYLE A Standard Twin Screw
STYLE B Single Solder Lug
STYLE C Double Solder Lug
STYLE D Internal Feedthru
STYLE E External Feedthru
STYLE F Solder/ Internal Feedthru
STYLE G Push-on/ Internal Feedthru

5 amp TWIN SCREW

Closed Back Only: 1 to 26 terminal sections (52 screws). Standard screws are 2-56 x 5/32" binder head brass nickel-plated.

ETC Terminal Products Unit
CANNON ITT

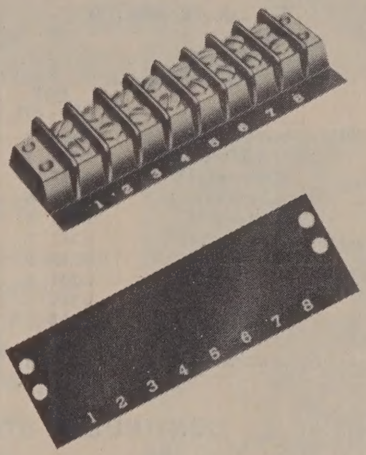
CANNON ETC MARKER STRIPS

Cannon Marker Strips serve the dual purpose of affording additional insulation protection and serving as a method of terminal identification. Numbers are 1/8″ high and are imprinted in white on a dark surface. Twin or Single Screw Blocks.

Insulating Strips — Open-back blocks are available with permanently bonded insulating strips. Suffix "-88" to block part number. To order unbonded insulating strip, do not suffix printing style code (see ordering system below).

Permanently Bonded Marker Strips: To order, suffix "-91" for a printed marker strip bonded to block. Suffix "-92" for an unprinted marker strip bonded to block.



Available material:

XP	Paper base phenolic (black)
VF	Comm. grade vulcanized fiber (black): MIL-F-1148
XXXP	Paper base phenolic (black): L-P-513
NPG	Nylon cloth phenolic: MIL-P-15047
GMG	Fiberglass, Melamine: MIL-P-15037
GEE	Fiberglass, Epoxy: MIL-P-18177

NOTE: A special moisture and fungus-proof varnish can be provided to seal the surfaces and edges of the Marker Strips, in accordance with MIL-V-173A.

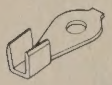
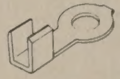
CONTINUOUS STRIP TERMINALS AND CONNECTING DEVICES

#10 to #24 AWG. Non-insulated or with insulation supports where vibration is excessive. Tin and other plating available.

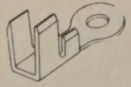
RING TONGUES



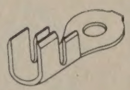
Part No. RX-20
Basic part: .020 brass, #16-20 AWG.



Part No. RX-100
Basic part: .030 brass, #14-18 AWG.

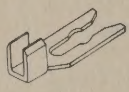


Part No. R-81
Basic part: .020 brass, Insul. Range: .120-.170, #14-18 AWG.

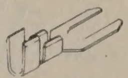


Part No. R-98
Basic part: .030 brass, Insul. Range: .140-.200, #10-12 AWG.

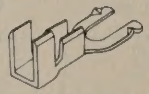
SPADE TONGUES



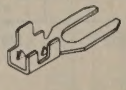
Part No. S-300
Marine Application, Basic part: .032 brass, #12-16 AWG.



Part No. S-2
Standard Spade, Basic part: .020 brass, Insul. Range: .060-.100, #18-20 AWG.



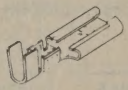
Part No. SG-17
Grip design tongue, Basic part: .025 brass, Insul. Range: .130-.180, #14-18 AWG.



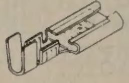
Part No. SP-60
Insulation Piercing for Tele/Communication Equip., Insul. Range: .055-.090, #20-24 AWG.

QUICK CONNECTS

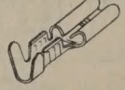
General use on appliances: fits .187 and .250 mating tabs.



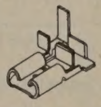
Part No. Q-6
For .032 x .250 tab, Insul. Range: .120-.170, #14-18 AWG.



Part No. Q-95
For .188 x .020 tab, Insul. Range: .090-.130, #16-20 AWG.



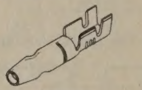
Part No. QJ11
For .020 x .205 tab, Insul. Range: .085-.125, #18-22 AWG.



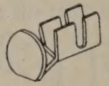
Part No. Q-25R
For .250 x .020 tab, Insul. Range: .090-.170, #16-20 AWG.

AUTOMOTIVE CONNECTING DEVICES

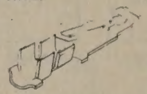
Wide range of devices in wire ranges to cover most applications.



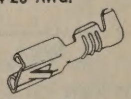
Part No. MT-740
Multiple Connector, Insul. Range: .090-.190, #12-18 AWG.



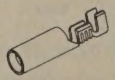
Part No. BC-55
Bulb Contact for head/stop lights. Insul. Range: .075-.121, #18-16 AWG.



Part No. 89
Multiple Connector, Insul. Range: .075-.160, #14-20 AWG.



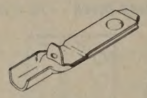
Part No. Q-220
Multiple Connector for .250 x .032 tab, Insul. Range: .109-.187, #12-18 AWG.



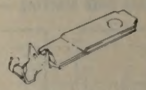
Part No. F-60
Multiple Connector, Insul. Range: .090-.190, #12-20 AWG.

BLADES

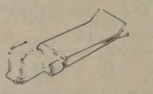
Male, female and grounding contact blades for cord and live set mfgs.; #14-20 AWG. Male blades are available polarized.



Part No. 6MBHX44-247
Material: Brass, #16-20 AWG.

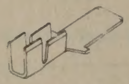


Part No. 11MBH44-250
Material: Brass, #18-20 AWG.

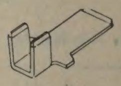


Part No. F-288
Wiper Blade, Material: Brass, #14-18 AWG.

TABS

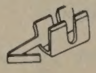


Part No. T-80
¼ Male Tab, with or without insulation supports, #14-18 AWG.

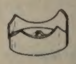


Part No. TX-83
.187 Male Tab, with or without insulation supports, #14-18 AWG.

OTHER CONNECTING DEVICES



Part No. PF-401
Printed Circuit Contact, Insul. Dia.: .065, #22 AWG.



Part No. CC-140
Crown Crimp, Screw Series: 6, 8, 10, #16-18 AWG.

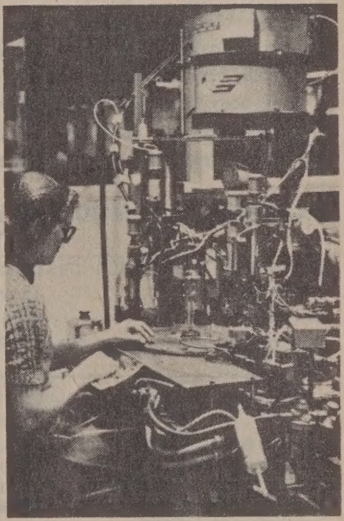
POMONA ELECTRONICS

We are proud of the service and quality of the products we manufacture. Customers and others having an interest in our products are welcome to visit us at any time.

POMONA TEST ACCESSORIES...

Designed to Meet Rigid Industrial and Military Applications



ITT Pomona Electronics provides an extremely broad, versatile line of electronic test accessories, usable by virtually anyone working with any electronic equipment.

Specialization in items such as molded patch cords, cable assemblies, test socket adaptors, ¾" spaced molded accessories, molded test leads, connecting leads and other design accessories make ITT Pomona Electronics your best source for electronic test accessories.

Our complete engineering facilities are geared to assuring excellent product quality. Every item is the result of choosing the best in materials, and carefully planning the processing and assembly.

We offer wide distribution and off-the-shelf delivery at all times. Our processing and shipping facilities are geared to fast, accurate deliveries to meet your most demanding delivery schedule.

ITT POMONA ELECTRONICS A Division of International Telephone and Telegraph Corporation
1500 East Ninth St. • Pomona, Calif. 91766 • Phone: (714) 623-3463 TWX: 910-581-3822

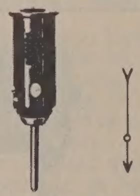
QUANTITY PRICE DISCOUNT SCHEDULE

For the convenience of our many industrial customers who purchase Pomona products in quantities, we offer a simplified ordering procedure.

You will find a code letter printed next to the single-item net price of every model listed in the general catalog. This code refers to the particular quantity discount price schedule that applies to each individual item.

To find the quantity discount price for a specific model, simply note the net price, and quantity discount schedule code letter listed for the item in the catalog. Then, referring to the industrial price list, locate the net price in the left-hand column, and the code letter in one of the right-hand columns. This will give you the quantity discount price for that particular item.

ADAPTER



MODEL 1432
(Specify Color)

BANANA JACK TO PIN TIP

Permits standard single banana plug patch cords to be used with equipment having tip jacks.

UPPER: Banana jack, .166 dia. Brass, nickel plated.

LOWER: Pin tip, .080 dia. Brass, nickel plated. Cross hole (.166 dia.) in body provides side Stack Up connection.

COLORS: Black, Red.

¾" SPACED MOLDED BANANA PLUGS

POMONA
ELECTRONICS

General specifications listed below apply to items using banana plugs in this catalog.

FEATURES

- One piece beryllium copper heat treated spring for maximum long life.
- Rounded spring design results in maximum contact area.
- Stack-up feature allows an unlimited number of connections at the same electrical point.
- Tough thermoplastic molded directly on to the metal body of the plugs and connectors.

SPECIFICATIONS

- Fits standard 4,22mm (.166) dia. banana jacks.
- Spring, beryllium copper alloy 170 per QQ-C-533.
- Plug body, brass per QQ-B-626, berylco 25.
- Nickel plated per QQ-N-290, Class 2.
- Contact resistance less than 0.001 ohm per banana plug.

RATINGS	MODELS: MDP; MDP-ST; 1330; 1330-ST; 2970
• Capacity	0.8 pf to 10 MHz
• Current	15 amps. cont., 30 amps. int.
• Voltage	5000 W VDC
• Temperature	−25°C to +85°C, operating temp.

BNC HERMETIC SEALED BULKHEAD RECEPTACLE

Excellent for use with equipment which requires a hermetic seal for pressure differences. Front hole mounting.

FEATURES:

- Non-tarnish finish.
- 50 Ohm impedance.
- Teflon insulation.
- Gold flashed beryllium copper contacts.
- Silicon rubber O ring, withstands 50 psi.
- Mounts in panels up to 9,37mm (.369) thick.

SMA ADAPTERS/TERMINATIONS

POMONA ELECTRONICS

These SMA adapters are manufactured in accordance with MIL-C-39012. The 50 ohm miniature series R.F. connectors are especially adaptable to microwave component applications such as couplers, dividers and mixers.

MATERIAL:

- Bodies and coupling nut: Beryllium copper per QQ-C-530, cond. H.T., gold plated.
- Female contact: Beryllium copper, gold plated.
- Male contact: Brass per QQ-B-626, alloy #360, cond. H.T., hard, gold plated.
- Teflon insulation.
- Gaskets: Silicone rubber per ZZ-R-765a, Class II, Grade 50.

SPECIFICATIONS:

- Nominal impedance: 50 ohms.
- Frequency range: 0-12.4 GHz.
- Dielectric withstanding voltage: 1000 VRMS, 60 Hz at sea level.
- R.F. leakage: 90 db min. between 6-8 GHz.
- Temperature range: −65°C to +165°C.

COMPONENT MOUNTING ISOLATION PLUGS

POMONA ELECTRONICS

SPLIT-TERMINAL ISOLATION PLUGS

Create passive and active networks, voltage dividers, isolation networks or attenuators with the split-terminal isolation plugs described below.

Gold flashed solder turret terminals provide permanent, reliable noise-free connections for component mounting.

Tough thermoplastic material molded to plug body and connectors insures maximum strength, moisture resistance and excellent insulative properties.

Specifications for MDP-X, 1390, 1837, 1468:

- Fits standard 4,22mm (.166) dia. banana jack.
- Spring, heat treated beryllium copper berylco 25 per QQ-C-533.
- Plug body, brass per QQ-B-626, alloy #360.
- Nickel plated per QQ-N-290, class 2.
- Contact resistance less than 0.001 Ohms per banana plug.

TYPICAL APPLICATION

SERIES PARALLEL ISOLATION PLUGS & CONNECTOR TEST ADAPTERS

POMONA ELECTRONICS

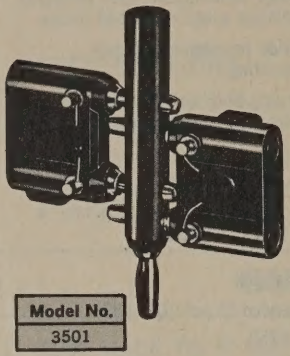
SERIES PARALLEL ISOLATION PLUGS

These plugs enable you to build unlimited combinations of series parallel networks e.g., voltage dividers attenuator, etc.

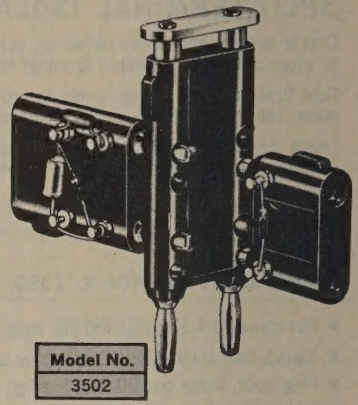
Upper crossholes spaced ¾″ on centers from lower crossholes to allow connection of double banana plugs. Double banana plugs may be plugged in from both sides.

FEATURES:

- Fits 4,22mm (.166) dia. banana jacks.
- Spring, heat treated beryllium copper berylco 25 per QQ-C-533.
- Plug bodies and jacks, brass, nickel plated per QQ-N-290 class 2.
- Tough thermoplastic molded to banana jacks and plug bodies.



Model No. 3501



Model No. 3502

SERIES-PARALLEL ISOLATION PLUG

Top banana jack and upper pair of crossholes isolated from lower pair of crossholes and banana plug.

QUANTITY DISC. CODE A **NET 5.85**

CONNECTOR TEST ADAPTERS

An ideal test adapter for the rapid testing of the hard to get at contacts of multi-pin MS type connectors such as miniature circular, standard circular and rack and panel. Excellent for testing of continuity, voltage and signal on individual contacts. Test adapter available in pin and socket contact sizes 20, 16 and 12.

- Gold flashed contacts conform to "MS" dimensions.
- Flexible tip prevents damage to connector contacts if test adapter is accidentally bent.
- Flexible tip allows testing of adjacent contacts.
- Fully insulated to prevent accidental shorting.
- Accepts standard banana plug.

UPPER: Banana jack, 4,22mm (.166) dia., brass, nickel plated.

LOWER: "MS" style contact, gold flashed, see tab block.

INSULATED BINDING POSTS

POMONA ELECTRONICS

INSULATED LEXAN* POLYCARBONATE BINDING POSTS

These binding posts fill the needs of most critical requirements. The plastic molding on these units is Lexan* polycarbonate which has high impact strength, low loss, low power factor and high insulation resistance. Thin line design for high-density packaging.

FEATURES:

- Polycarbonate insulation.
- Thin line design.
- Standard and low thermal EMF types available.
- Lower insulator, white.
- 5 way binding post.
- Accepts standard banana plug.
- Captive thumb nut.
- Gold or nickel plated.
- Upper insulator same color as thumb nut.
- 2,54mm (.100) dia. wire cross hole is perpendicular with flat on insulator.
- 8-32 hex nut and lockwasher included.
- Mounts in panels 1/16-1/4" thick.

RATINGS:

- Operating temperature: −65°C to +150°C.
- Working voltage: 1500 VDC.
- Current: 15 amps cont., 30 amps int.

STANDARD TYPE

Brass body and thumb nut insert, available gold flashed per MIL-G-45204 or nickel plated per QQ-N-290 class 2.

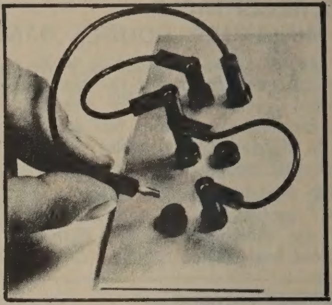
MINIATURE BANANA PLUG PATCH CORDS

POMONA ELECTRONICS



Miniature patch cords for use with 2,64mm (.104) dia. miniature banana jacks. Excellent for miniaturization of test equipment and high density packaging for patch systems.

Banana plug springs precision formed of one piece beryllium copper, heat treated for maximum life and low contact resistance. Tough thermoplastic molded to plug body and wire.

FEATURES:

- Fits .104 dia. miniature banana jacks. Plug body brass, per QQ-B-626, alloy #360.
- Gold flashed per MIL-G-45204 Type II (.00001/.00002). Spring, one piece heat treated beryllium copper, berylco 25 per QQ-C-533.

SPECIFICATIONS:

- Wire: 20 awg, strand. 41 x 36 T.C. extra flexible polyvinyl insulation 2,21mm (.087") O.D.
- Rated: 5 amps cont., 10 amps int., 5000 VDC
- Operating temperature: −0°C to +105°C.

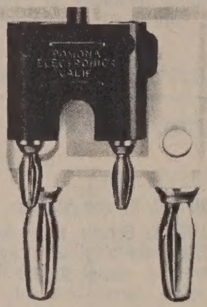
½" SPACED MINIATURE DOUBLE BANANA PLUG PATCH CORDS

POMONA ELECTRONICS

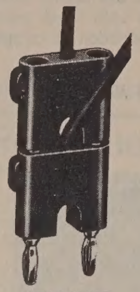
MOLDED MINIATURE DOUBLE BANANA PLUG PATCH CORDS ⅓ SMALLER

A miniature double banana plug on ½" centers. This patch cord enables miniaturization of test equipment and high density packaging for patch systems.

Banana plug springs precision formed of one piece beryllium copper, heat treated for maximum life and low contact resistance.



ACTUAL SIZE



STACK-UP

FEATURES:

- One piece beryllium copper heat treated spring for long life.
- Rounded spring design results in maximum contact area.
- G.N.D., clearly molded on plug body and shell.
- Solder-bonded noise-free connections.

SPECIFICATIONS:

- Fits standard 2,64mm (0.104) dia. banana jacks, on ½" centers.
- Spring, beryllium copper berylco 25 per QQ-C-533.
- Plug body brass per QQ-B-626, alloy #360.
- Gold flashed per MIL-G-45204, Type II.

CABLE DESCRIPTION:

Shielded coax., RG174/U polyethylene insulation, vinyl jacket, nom. cap. 29.5 pf/ft., nom. imp. 50 ohms, nom. O.D. 2,54mm (100"). Color: Black.

"DIP CLIP"™ IC TEST CLIP

POMONA ELECTRONICS

The "Dip Clip" is engineered for the attachment of test probes to I.C. Packages. The clip has many built in features that permits hand-free testing and still maintains a good electrical connection. Several test probes can be used at one time.

The "Dip Clips" with reduced thickness are used for testing ultra dense packaged chips that have only 2,54mm, (.100") spacing between each other. Models: 4236, 4324 and 4340.

FEATURES

- Solid non-tarnish nickel silver contacts.
- Serrated 1,27mm,(.050") wide contacts on lower end for good electrical connection. Will assist in removal of foreign material from DIP.
- 0,63mm, (.025") square serrated test points on upper end will accept wire wraps or mini test clips.
- Molded barrier between each contact allows connections to be made on live boards without accidental shorting of adjacent contacts.
- Can be used as an insertion and removal tool for DIPS.
- Glass-filled nylon, withstands 240°C at 40% R.H.

DO IT YOURSELF GRABBER

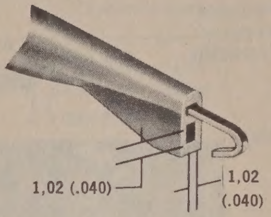
POMONA ELECTRONICS

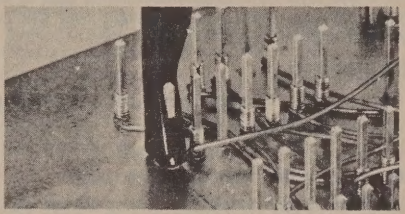
FEATURES:

- Plunger type action between thumb and two fingers.
- Comfortable finger grip operation.
- Positive connection that won't pop off.
- No sharp teeth to damage or nick wires.
- Simplified assembly procedure.
- High temperature material that resists melting when soldering.
- Accepts wire up to 2,29mm (.090″) dia.

MATERIALS:

- Molded glass-filled nylon, withstands 240°C at 40% R.H.
- Beryllium copper contact per QQ-C-533, Berylco 25.
- Gold plated per MIL-G-45204 Type I.
- Stainless steel spring.





THE "MAXI GRABBER"

The maxi-grabber is an extended length do-it-yourself grabber designed especially for high-rise packaging of electronic components where depth of testing point is a key factor. The maxi-grabber will fit entry holes as small as ¼″ dia. and the unit is completely field serviceable. The gold plated contact hook can be connected rapidly to component leads or the tip will accept 0,63mm (.025) square Wire-Wrap† terminals. The entire unit is molded of nylon thermoplastic.

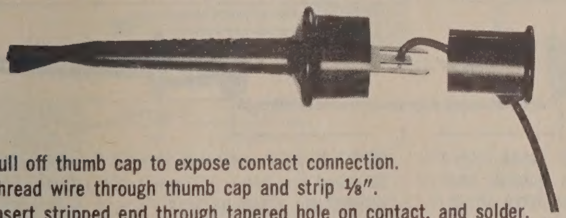
SIMPLIFIED ASSEMBLY PROCEDURE



1. Pull off thumb cap to expose contact connection.
2. Thread wire through thumb cap and strip ⅛″.
3. Insert stripped end through tapered hole on contact, and solder.
   NOTE: Stripped end should be placed into the large opening of the tapered hole.
4. Slide thumb cap back onto contact.

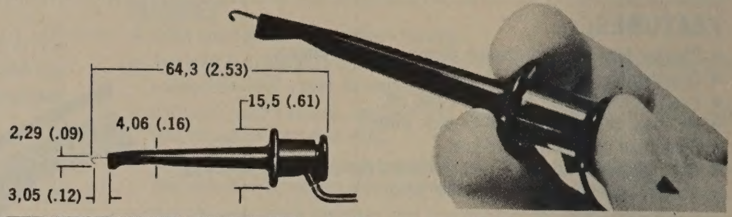
MINI TEST CLIP GRABBER

POMONA
ELECTRONICS

These plunger type action clips are called "grabbers." The gold plated contact hook can be connected rapidly to component leads and the specially designed tip slides down over 0,63mm (.025″) square Wire-Wrap† pins. Nylon insulation molded directly onto clip and wire providing a strong, reliable integral unit. Clip is completely insulated to point of connection.



FEATURES:

- Plunger type action between thumb and two fingers.
- Comfortable finger grip operation.
- Positive connection that won't pop off.
- No sharp teeth to damage or nick wires.
- Beryllium copper conductor Berylco 25 per QQ-C-533; gold plated per MIL-G-45204 Type I.
- Stainless steel spring.
- Molded glass-filled nylon.

DIE CAST SHIELDED "BLACK BOXES"

POMONA ELECTRONICS

Now available, **shielded** "Black Boxes." Boxes that fulfill the requirement for RF applications.
Ideal for compact packaging (voltage dividers, isolation networks, impedance matching networks), and other varied uses.
Cover and screws included.

SPECIFICATIONS: (All Models)

- Operating temperature: −55°C to +150°C.
- Working voltage: 500 V peak (Model 2415, 1500 V peak).
- Noise rejection: Greater than 70 db.

FEATURES:

- Shielded housing; Die cast aluminum.
- Finish: Blue baked enamel per Federal Standard 595 #25109 over phosphoric etch per MIL-C-15328A.
- Cover: Aluminum #6061-T6 with clear anodized finish per MIL-A-8625A.
- Screws secure cover for proper shielding.

SHIELDED "BLACK BOXES" — SIZE "C"

POMONA ELECTRONICS

A series of larger shielded "Black Boxes."

These larger boxes are excellent for compact packaging of voltage dividers, isolation networks and many other applications.

SPECIFICATIONS: (All Models)

- Operating temperature: −55°C to +150°C.
- Working voltage: 500 peak.
- Noise rejection: Greater than 70 db.

FEATURES:

- Shielded housing: Die cast aluminum, alloy #A380.
- Finish: Blue baked enamel per Federal Standard 595 #25109 over phosphoric etch per MIL-C-15328A.
- Cover: 2,03mm (.080) thick aluminum #6061-T6 with clear anodized finish per MIL-A-8625A.
- 8 ea. #4-40 x ¼" screws secure cover for proper shielding.
- Solder turret terminals for permanent noise free connection of components.
- 2 flanges for easy mounting of box.

SHIELDING DIVIDERS FOR SIZE "E" BOX

These aluminum dividers are for dividing the box into shielded compartments.

MATERIAL: 1,60mm (.063) aluminum, clear anodized per MIL-A-8625A.

- Divider 38,1mm (1.50) x 60,71mm (2.39) used laterally.
- Divider 38,1mm (1.50) x 99,06mm (3.90) used lengthwise.

This divider is for use with Model 4226.

SHIELDED "BLACK BOXES" – SIZE "D"

POMONA ELECTRONICS

Another series of shielded "Black Boxes." These boxes fill the need between the size "B" and "C" boxes and are excellent for compact packaging of voltage dividers, isolation networks and many other applications.

SPECIFICATIONS: (All Models)

- Operating temperature: −55°C to +150°C.
- Working voltage: 500 peak.
- Noise rejection: Greater than 70 db.

FEATURES:

- Shielded housing: Die cast aluminum, alloy #A380.
- Finish: Blue baked enamel per Federal Standard 595 #25109 over phosphoric etch per MIL-C-15328A.
- Cover: .063 thick aluminum #6061-T6 with clear anodized finish per MIL-A-8625A.
- 4 ea. #4-40 x ¼" screws secure cover for proper shielding.
- Solder turret terminals for permanent noise free connection of components.

SHIELDED "BLACK BOXES"

POMONA ELECTRONICS

Aluminum boxes, slotted to accept 1/16" circuit boards and shielding dividers. Excellent for packaging electronic circuitry. Boxes have removable top and bottom covers.

SPECIFICATIONS: (All Models)

- Operating temperature: −55°C to +150°C.
- Working voltage: 500 peak.
- Noise rejection: Greater than 70 db.

FEATURES:

- Shielded housing: Extruded aluminum, alloy #6061-T6.
- Finish: Blue baked enamel per Federal Standard 595 #25109 over phosphoric etch per MIL-C-15328A.
- Covers: Top and bottom, 2,03mm (.080) thick aluminum #6016-T6 with clear anodized finish per MIL-A-8625A.
- Cover screws: #4-40 x ¼" screws secure top and bottom cover for proper shielding.
- Solder turret terminals for permanent noise free connection of components.

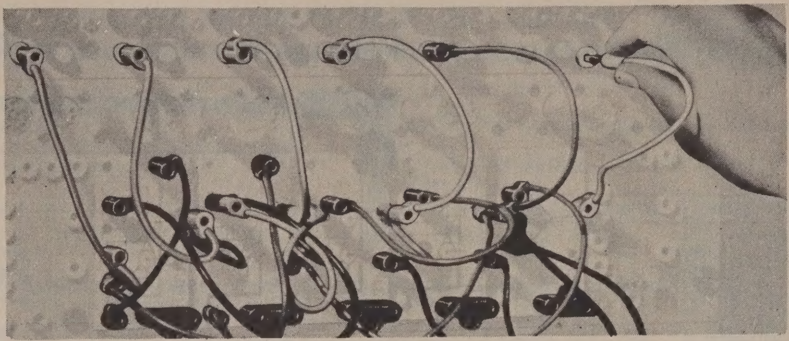
STANDARD BANANA PLUG PATCH CORDS

POMONA ELECTRONICS

POMONA BANANA PLUG PATCH CORDS

Tough thermoplastic insulation molds the plug and leads into a strong moisture resistant integral unit. Excellent for computer board and test equipment applications.

Used by leading industries in applications where extreme reliability is of prime importance.



FEATURES:

- One piece beryllium copper heat treated spring for maximum long life.
- Rounded spring design results in maximum contact area.
- Extra flexible polyvinyl insulation used on all leads.

SPECIFICATIONS:

- Fits standard 4,22mm (.166) dia. banana jacks.
- Spring, beryllium copper Berylco 25 per QQ-C-533.
- Plug body, brass per QQ-B-626, alloy #360.
- Nickel plated per QQ-N-290, Class 2.
- Contact resistance less than 0.001 ohm per banana plug.
- Operating temperature: —0°C to +105°C.
- Wire, 18 AWG, stranding 65 x 36 T.C.
- Insulation, polyvinyl 3,66mm (.144") O.D.
- Ratings: 15 amps cont., 30 amps int. 10,000 W VDC.

STACK-UP BANANA PLUG PATCH CORD

Model No.	Length	Net
B-4 *	4"	1.80

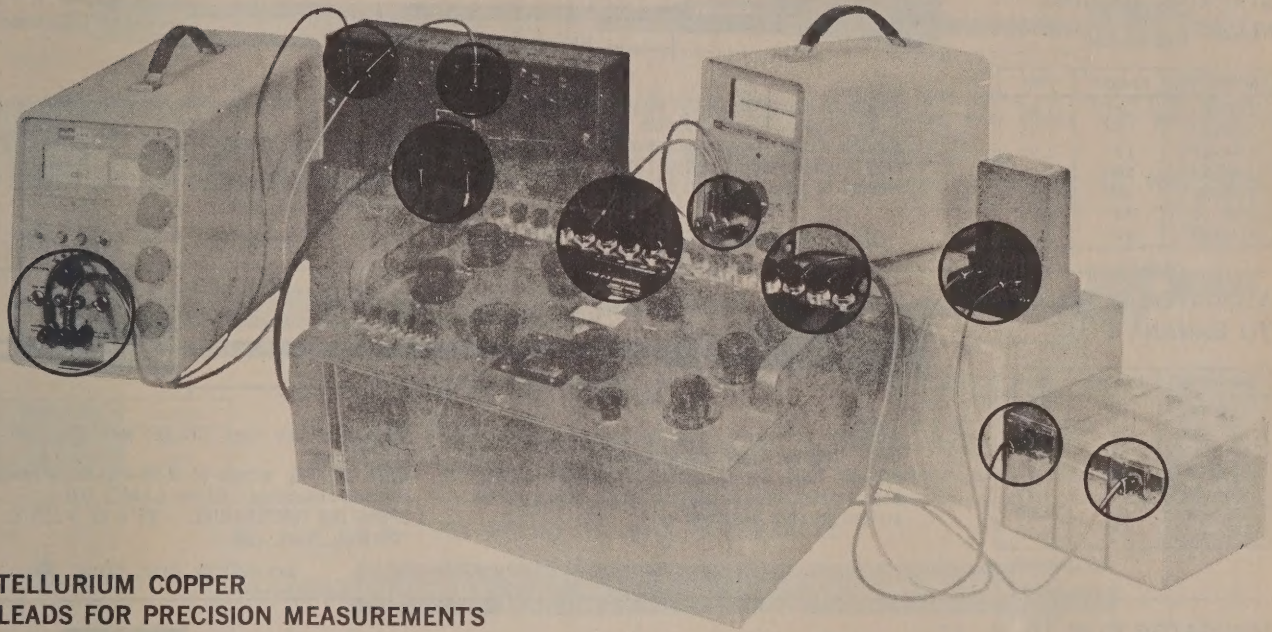
LOW TERMINAL E.M.F. SPADE LUG JUMPERS

POMONA
ELECTRONICS



TELLURIUM COPPER LEADS FOR PRECISION MEASUREMENTS

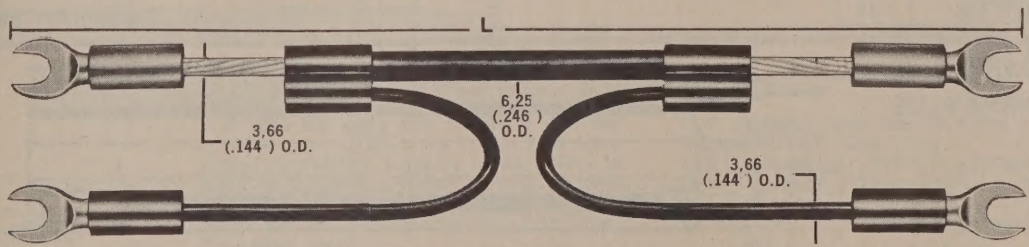
Pomona Electronics has advanced the state of the art in measurements where Thermoelectric Effects are significant sources of error. Comparators designed for use with the Kelvin-Varley voltage divider and microvolt leads were tested with Primary Standards Laboratory equipment.

Thermoelectric voltages were not detected until the most sensitive galvanometer range was used.

Thermoelectric properties — Tellurium copper gold plated spade lugs cold-staked to multi-stranded 12 gauge copper wire minimize thermoelectric effects — an absolute necessity for low voltage, high precision measurements.

Low resistance — 12 gauge multi-stranded copper wire results in extremely low cable resistance. Spade lugs plated with 15 micro inches gold for minimum contact resistance and minimum thermal EMF when using copper binding posts (less than 0.01 μV/°C).

TELLURIUM COPPER SPADE LUGS, SHIELDED LEAD



Model No.	Length
1756-24	24″
1756-48	48″

Designed for use with Kelvin-Varley voltage dividers where extreme precision is required for low voltage measurements. Features guard shield to effectively reduce shunt resistance. Tough thermoplastic molded to spade lug body, color; center conductor lug red, shield lug black. Tellurium copper heavy duty one piece machined spade lug gold plated per MIL-G-45204, Type II, Class I. Center conductor 12 AWG multi-stranded bare copper, shield lead wire, 18 AWG, stranded. Polyethylene primary insulation. Braided shield bare copper. Polyvinyl jacket, color black, per MIL-C-17C Type IIA.

HIGH VOLTAGE TEST PROBES

POMONA ELECTRONICS

TEST COLOR OR BLACK & WHITE TELEVISION SETS — VOLTAGES UP TO 42 KV — USING JUST THIS ONE SELF-CONTAINED INSTRUMENT

Pomona Electronics perfected and introduced the first high voltage test probe with built-in meter back in 1967. Now we offer this new advanced test probe, Model 4242, to test existing television sets (color or black & white), plus new and future models with voltages up to 42KV.

It is easy to make high voltage adjustments in the home without carrying bulky equipment. Just ground the probe to TV chassis with alligator clip, contact test probe tip to high voltage anode, read voltage indicated on built-in meter, and make adjustments as required. On-off switch in handle protects meter when not in use.

Model No.
4242

★ QUANTITY DISC. CODE C NET 24.95

SPECIFICATIONS:

- **RANGE:** 42,000 VDC.
- **SENSITIVITY:** 20,000 ohms/volt.
- **METER MOVEMENT:** 50 μa.
- **ACCURACY:** ±2% full scale.
- **MULTIPLIER RESISTANCE:** 720 megohm ±2%.
- **MATERIAL:** Handle and probe Lexan*.
- **LENGTH:** 14¾″ overall.
- **WEIGHT:** 8¼ ounces.

DESIGNED TO TROUBLESHOOT ELECTRONIC AIR CLEANER SYSTEM MALFUNCTIONS

The Model 3157 High Voltage Test Probe is designed to speed and simplify the servicing of electronic air cleaner systems. It replaces heavy, bulky old fashioned voltmeters with a modern, compact hand-held instrument which a serviceman can carry in his tool case. He can use it to check for ionizer screen continuity, line opens, transformer failure, or other component malfunctions in less than a minute. Extended probe tip gets into those hard-to-reach places with ease. Unit is priced so low that every serviceman can carry his own probe.

10 KV AC HIGH VOLTAGE TEST PROBE WITH BUILT-IN METER

This AC high voltage probe is excellent for testing of high potential AC voltages such as neon sign transformers, Hi-pot testers, etc. Shielded meter movement for protection from stray magnetic fields. Probe is supplied with Model 3295 carrying case.

Easy to operate! Just ground the test probe instrument by attaching alligator clip to chassis, contact test probe tip to high voltage being measured and read voltage from the built-in meter. No warm-up time. No batteries.

SPECIFICATIONS:

- **RANGE:** 10,000 VAC.
- **SENSITIVITY:** 2,000 ohms/volt (500 μA) movement.
- **ACCURACY:** ±3% 30 Hz to 1,000 Hz.
- **MULTIPLIER RESISTANCE:** 20 megohm ±2%.
- **MATERIAL:** Handle — high impact thermoplastic. Probe — high impact polystyrene.

¾" DOUBLE BANANA PLUG PATCH CORDS

POMONA ELECTRONICS

These patch cords are indispensable for bridge transformer connections, three terminal capacitor measurements and general hook-up for two wire systems. They are horizontally and vertically stackable in parallel. Tough thermoplastic material molded to plug body and cable insures maximum strength, moisture resistance and excellent insulative properties. Used by leading industries in applications where extreme reliability is of prime importance.

FEATURES:

- One piece beryllium copper heat treated spring for long life.
- Rounded spring design results in maximum contact area.
- GND., clearly molded on plug body and shell.
- Solder-bonded noise-free connections.

SPECIFICATIONS:

- Fits standard 4,22mm (.166) dia. banana jacks, on ¾" centers.
- Contact resistance less than 0.001 ohms per plug.
- Spring beryllium copper Brylco 25 per QQ-C-533.
- Plug body brass per QQ-B-626, alloy #360
- Nickel plated per QQ-N-290, Class 2.

BNC CABLE ASSEMBLIES & PATCH CORDS

POMONA ELECTRONICS

STRESS RELIEVED AND WEATHERPROOFED CRIMP BNC CABLE ASSEMBLIES

These new cable assemblies feature polyethylene collars which are molded directly onto cable jacket and connector body. The resulting encapsulation offers two outstanding advantages, stress protection against failure from excess bending, flexing, and twisting. Weatherproof seal between cable and connector. Connectors have non-tarnish finish and conform to MIL-C-39012.

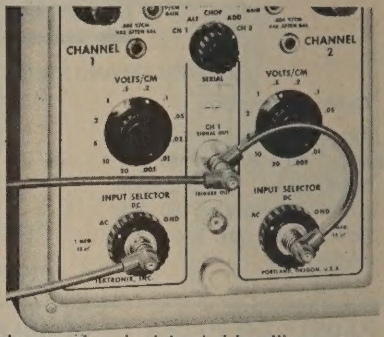
"PUSH ON" STACKING BNC PATCH CORDS



These multiple stacking patch cords connect the center conductors of BNC jacks having a common chassis. Excellent for use with instruments such as oscilloscopes. Stacking feature enables an endless number of connections to the same point.

FEATURES:

- **CONTACT:** Male and female, one piece heat treated beryllium copper, gold flashed.
- **WIRE:** 18 AWG, stranded 65 x 36 T.C., polyvinyl insulation.
- **INSULATION:** Tough thermoplastic, polypropylene, molded around contact and wire.
- **OPERATING TEMPERATURE:** −25°C to +125°C.

TUBE TEST SOCKET ADAPTERS & HOLDER

POMONA
ELECTRONICS

Pomona test socket tube adapters are ideal for making measurements of voltage, resistance, audio and video without tracing complicated circuits from the bottom of the chassis. They feature: Extended test tabs for easy use with either alligator clips or test prods; low loss mica-filled molded phenolic construction per MIL-M-14, MFE. Power factor less than 0.010 at 10 MHz; high insulation resistance, the I.R. exceeds 500,000 megohms at 40% R.H., at 24°C; distributed capacity, inter-element approximately 1 pico farad; high voltage operation, voltage breakdown elements exceeds 1,700 VAC or DC. Models TVS-12 and 1779 molded of electrical grade black phenolic.

TALL TEST SOCKET TUBE ADAPTERS For sockets having captive or telescoping tube shields

- Extra height — clears shields.
- Ready access to socket connections.
- Exposed operation saves time.
- Pins .040 dia.

These adapters rise above the shield and place testing in the open. Shields or tuner covers do not have to be removed. All construction is the highest quality. Inter-element distributed capacity is approximately 1.5 pico farad. Voltage breakdown elements exceed 1800 VAC or DC.

BREADBOARD SOCKETS—RELAY SOCKETS & SOCKETS SAVERS® ADAPTERS

POMONA ELECTRONICS

SURFACE MOUNTED BREADBOARD SOCKETS

Surface mounted breadboard sockets are ideal for experimental circuit design, portable and enclosed units, plug-in and packaged assemblies. They feature: An insulated base to prevent connections from shorting to chassis; elimination of double chassis design; circuits may be wired in an enclosed unit; base connections are numbered for easy identification; grade-A phosphor bronze spring contacts; standard center to center mounting holes. For ease of installation the 7 and 9 pin miniatures may be mounted either in the center or on the sides, the 8 pin octal is mounted on the sides; small mounting holes permits the re-use of experimental chassis.

11 CONTACT RELAY SOCKET

Ideal for use in Industrial Control equipment requiring a rugged compact 11 contact configuration.

FEATURES:

- Simplified above chassis mounting.
- Socket and base molded of melamine-phenolic, electrical, per MIL-M-14 Type CMG.
- Socket connections numbered for easy identification.
- Socket may be gang mounted.
- Heat treated beryllium copper contacts.
- 600 VRMS at 10 amps.
- Contacts accept 2,36mm (.093) dia. pins.
- Height 22,35mm (.88).
- 50,8mm (2.00) square base.
- Mounting holes 41,40mm (1.63) center to center. Dia. 3,81mm (.150).
- 19,05mm (.750) pin circle dia.

SOCKET SAVER® ADAPTERS

The Socket Saver® Adapter is designed to be installed on tube checkers and other electronic equipment to prevent wear and tear of sockets on original equipment. They are easy to install and remove. This eliminates the necessity of replacing and rewiring sockets on original equipment. Built of quality materials. Beryllium copper long life contacts to give maximum service.

JOHNSON®

E. F. JOHNSON COMPANY, WASECA, MINNESOTA 56093

Connectors

COAXIAL CONNECTORS

The JCM is a miniature (3mm) connector that is fully compatible with SMA types, at a fraction of SMA prices.

The JCM is designed for commercial and industrial applications where low cost is a major factor, and SMA compatibility is required.

The non-galling gold finish is resistant to wear and abrasion.

Cable clamp JCM plugs and jacks consist of 5 or fewer parts which are easily assembled. Only one set of stripping dimensions is required for all cables from 0.075 to 0.216" overall diameter. Panel, bulkhead, and PC mounting receptacles are preassembled.

Beryllium copper center contacts assure superior spring qualities and lowest contact resistance.

Available on special order basis with nickel plating for especially cost conscious applications.

- **Rugged, high strength construction**
- **UL recognized**
- **Available in 36-23-14 pin sizes**
- **Low cost**
- **Crimp or solder type terminals**
- **Wide variety of configurations and options available**

Moisture-resistant insulator block is glass-filled nylon. It is impact resistant and functionally designed. Recessed contacts in both male and female housings provide proper mating and protection for contacts. Hood provides cable positive strain relief.

Contacts are replaceable with use of simple tool. A blade and tuning-fork concept assures low, constant contact resistance.

Jackscrews are available for maximum vibration and shock resistance.

SPECIFICATIONS

Voltage Rating (adjacent contacts)	250 VRMS
Flashover Voltage	1000 VDC
Current Rating (continuous max/ckt)	3 amps
Contact Resistance (typical) .006 ohms (max.)	.0075 ohms
Insulation Resistance	5000 Megohms
Contact Material (male)	Nickel Silver
Contact Material (female)	Nickel Silver
Insertion Force (per contact pair)	6 oz. min./17 oz. max.
Withdrawal Force (per contact pair)	5 oz. min./12 oz. max.
Cycle Life	500 min.
Insulation	Type 6/6 30% Glass Filled Nylon

STANDARDIZED TERMINAL BOARDS

STANDARDIZED TURRET TERMINAL BOARDS

Cut your production cost by eliminating the tooling and setup charge usually applied to nonstandardized boards. Terminals are securely riveted and hot tinned for easy soldering.

TERMINALS: Your choice of most popular types.
Made of Brass: QQ-626, comp. 22, ½ hard.
Hot Dip Solder finish: Mil-F-14072 Type 221.

Material: Your choice of either PBE or GEE Phenolic.

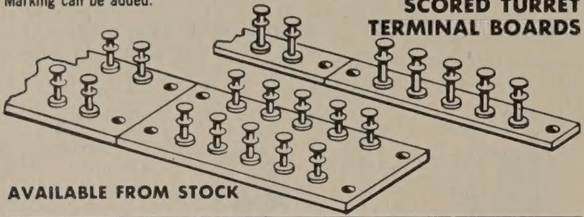
PBE: Paper base electrical, Mil-P-3115C, Temp. 250° F max. Type XXXP.

GEE: Glass Epoxy, Mil-P-18177, Temp. 300° F max. Type G-10.

Five sections **SCORED** for easy **separation** M'tg. holes in each section.

These boards **CAN BE MODIFIED** with terminals staked in all holes, scoring eliminated. Marking can be added.

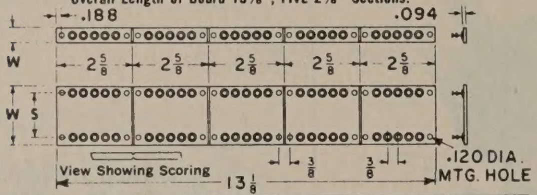
SCORED TURRET TERMINAL BOARDS



AVAILABLE FROM STOCK

3/8" SPACING AND SCORED

3/32" THICK PHENOLIC — Choice of 4 Types of Terminals
Overall Length of Board 13⅛", FIVE 2⅝" Sections.



Five sections **SCORED** for easy operation.
M'tg. holes in each section.

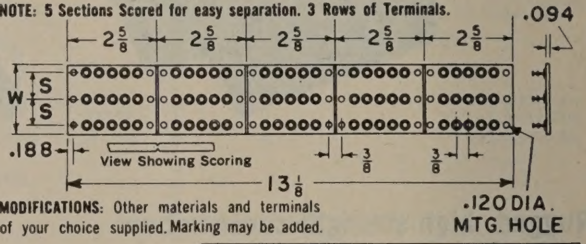
UNIVERSAL TERMINAL BOARDS

Designed for production or experimental use, these **standardized boards** are well suited for any electronic application requiring a sturdy mounting surface for resistors, condensers and components.

TERMINAL: 1503-3 HOT TIN DIP finish for easier soldering and infinite shelf life.

MATERIALS: PBE (Paper Base Elect. Mil-P-3115C type XXXP)
GEE (Glass Epoxy Mil-P-18177 type G-10)

NOTE: 5 Sections Scored for easy separation. 3 Rows of Terminals.



MODIFICATIONS: Other materials and terminals of your choice supplied. Marking may be added.

Assembled. with **TERMINAL** 1503-3

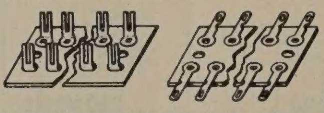
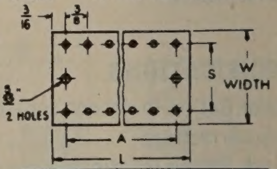
READI-MADE TERMINAL BOARDS

• **ECONOMICAL** • **SAVE TOOLING COST**
• **DELIVERY FROM STOCK** • **RANGE OF SIZES** • **APPROVED MATERIALS**





Readi-Made Terminal Boards are ideal for General Use. Excellent for mounting resistors, condensers, etc. Choice of Terminals.

MATERIAL: 1/16" thick Bakelite (Mil Spec 3115C Pbe-P grade).

TERMINALS: 1204 and 1268 are stamped from .023 thick brass. 1539 is turned from 3/16" dia. brass rod.

PLATING: 1204 is Cadmium plated. 1268 and 1539 are Hot Tinned for easy soldering.

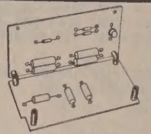
HINGED STANDOFFS FOR TERMINAL BOARDS

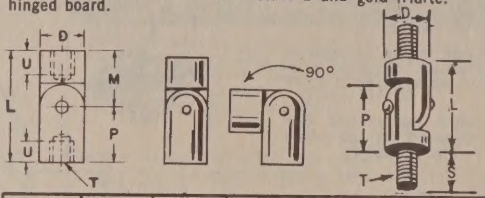


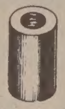
Only 2 screws used to fasten board in place or open the hinged board.

- APPLICATIONS UNLIMITED • TIME SAVER
- CUT COST OF SERVICING • SPACE SAVER
- INTERCONNECT CIRCUITS OR SERVICES WITHOUT DANGER OF SHORTING • WIRING EXPOSED FOR EASY TEST

Material: Made of Brass MIL Spec. QQ-B-626A Comp. 22—½ Hard.

Finishes: Cadmium plate per QQ-P-416 Type 2 Class 2 and gold Iridite.





These standoffs mount at front of the board.

ELECTRONIC COMPONENTS

PLUG IN HOUSINGS

Enhance the appearance and give that professional look to your products using these molded housings. Ideally suited for packaging relays, logic packages, networks and miniature circuitry. Durable, lightweight covers that will withstand vibrations and rough usage.

HEADERS: Molded of GP black phenolic and fit standard sockets. Pins are brass. Nickel plated guide hole tapped 8-32 for terminal board mounting stud.

- **Variety of molded materials**
- **Good chemical resistance**

MATERIAL CHARACTERISTICS:

Polystyrene: For general purpose use where high impact strength is not required and temperature would not exceed 170°F.

Butyrate: 3 times the impact strength of Polystyrene and excellent electrical properties, use wherever temperatures of 210°F exist.

Nylon: Impact strength slightly less than Butyrate but recommended for use where temperatures are as high as 300°F.

THREADED SPACERS

Material: ALL HARDWARE ON THIS PAGE IS MADE OF: BRASS MIL SPEC. QQ-B-626A COMP. 22 — ½ HARD.

Finishes: Nickel Plate Mil-F-14072 QQ-N-290 Type V.

Cadmium plate per QQ-P-416 Type 2 Class B and clear chromate. Other finishes available on special order.

Threaded spacers ¼″ O.D. threaded 4-40, 6-32, 8-32 available either in round or hex. Round type is nickel plated, hex type is cadmium.

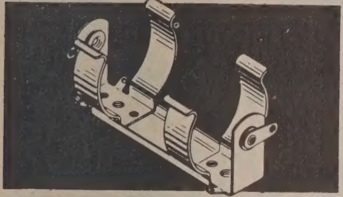
KEYSTONE ELECTRONICS CORP., 49 BLEECKER ST., NEW YORK, N. Y. 10012 • (212) 475-4600

KEYSTONE ALL STEEL BATTERY HOLDERS

STANDARDIZED ALL STEEL BATTERY HOLDERS

An important advance in design that has gained wide acceptance for military and commercial usage. Battery when installed is held under spring tension at a constant pressure assuring low resistance contact will hold up to 4 cells in series in sturdy insulating tube. Retainer clips available to lock battery securely. This prevents shifting or loosening of battery in holder. Recommended for use where shock or severe vibration is encountered.



- **CORROSION RESISTANT NICKEL PLATED**
- **STAINLESS STEEL CONTACTS**
- **MOISTURE PROOF INSULATING WASHERS**
- **IDEAL FOR NI-CAD AND ALKALINE CELLS**

SPECIFICATIONS

Made of SAE 1065 Carbon Steel to MIL Spec. 17919, heat treated to spring temper and nickel plated .0002 thick. Contact assembly consists of a stainless steel eyelet, moisture proof vulcoid washers and a coated copper solder lug. Ribbed carbon steel base for added support is nickel plated and has 2 mounting holes for ease in mounting.

SPACE SAVER BATTERY CLIPS

Available with insulated contact or dimple. Positive contact grips battery securely. They will accommodate the "AA" — "C" — "D" — **Mercury** and **NI-CAD batteries.**

- **CORROSION RESISTANT NICKEL PLATED**
- **STAINLESS STEEL CONTACTS**

Clips — Carbon Steel, SAE 1065 per Mil-S-17919-#4, Heated Treated to Spring Temper, Nickel Plate Finish.
Contact Eyelets — Stainless Steel per Mil-S-18170 Comp 304.
Insulating Washers — Resin Impregnated Fibre.
Terminal Lugs — Copper Per QQ-C-576A, Cad. Plated per QQ-P-416.

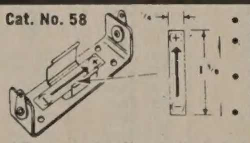
POLARITY LABELS

Cat. No. 58



- PRESSURE SENSITIVE
- WILL ADHERE TO ANY SURFACE
- NO GLUE OR DAMPING REQUIRED
- ECONOMICAL

Wherever circuit polarity is to be shown labels are colored Blue and Red.

A standard line of battery holders available for immediate shipment from stock. Low cost, lightweight and sturdily constructed of quality materials. Good electrical contact, low leakage current and snap-fit clips are the outstanding features.

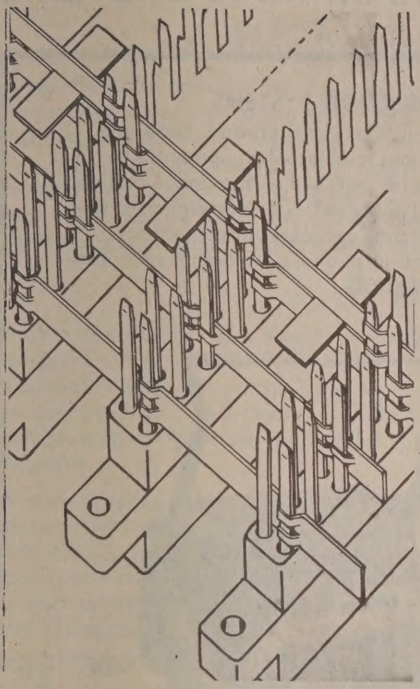
LSi Pin Bar® means:



- Thousands of "hi-rel" solderless bussing connections per hour at a fraction the cost of your present busing method.
- Fast, simple, "foolproof" connections that lower production costs — eliminate continuity checks.
- Low uniform contact resistance that will electrically enhance any circuit — especially frequency applications.
- Efficient back panel design (greater pin exposure, increased discrete wiring area and easier checkout).
- A "spec" performance electrical component produced to your exact requirements.

solderless bus bar for common connections

SPECIFICATIONS

Terminal Spacing and Length: Selectable.

Spacing Tolerance: ±0.010" between terminals — ±0.020/foot cumulative.

Material: 1000, 1200 Series: Beryllium Copper Alloy #172 per QQ-C-533.
1100 Series: Beryllium Copper Alloy #175 per QQ-C-533.

Standard Finishes:

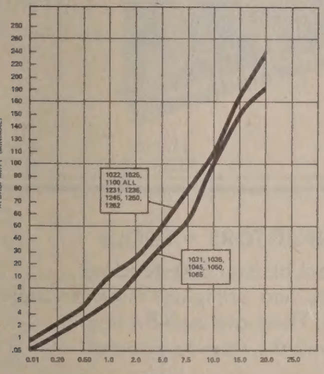
Tin: Electro-tin plate, fused, per MIL-T-10727, Type I, 0.0003" thickness.

Gold: Gold plate per MIL-G-45204, Type II, 0.000050" minimum thickness over nickel plate per QQ-N290, 0.000050" minimum thickness.

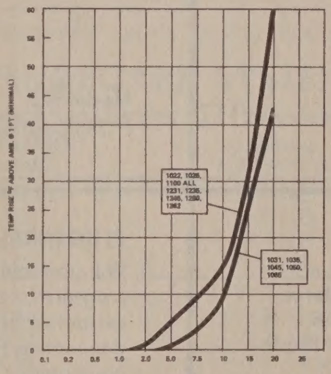
Options: Insulation, special finishes, unique end configurations.

Insertion: Manual or semi-automatic insertion equipment available.

PERFORMANCE DATA



IR DROP



TEMPERATURE RISE

The following performance data meets or exceeds MIL-STD-202 "D" (Full Report Available).

Thermal Shock: Method 107, Condition A.

Mechanical Shock:
Method 213, Condition H.

Vibration: Method 201.

Corrosion Resistance: Method 101, Condition B 48 Hour Exposure Salt Spray.

Contact Voltage Drop:
0.533 millivolts maximum per amp.

Gas Tight Contact: 10 minutes of 1:1 hydrochloric/nitric acid followed by 10 minutes of ammonium sulfide fumes.

DESIRED PIN BAR CONFIGURATION

Alternate Pins (Series 1000 & 1200)		Connector Pin Size	Adjacent Pins (Series 1100)
	1022	.022" x .036"	1122

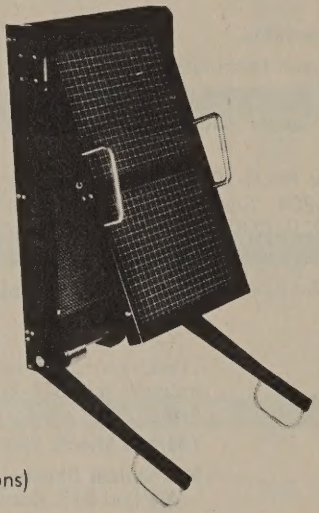
MAC/PANEL PLUGBOARD PROGRAMMING SYSTEMS

SERIES 140 PLUGBOARD SYSTEMS

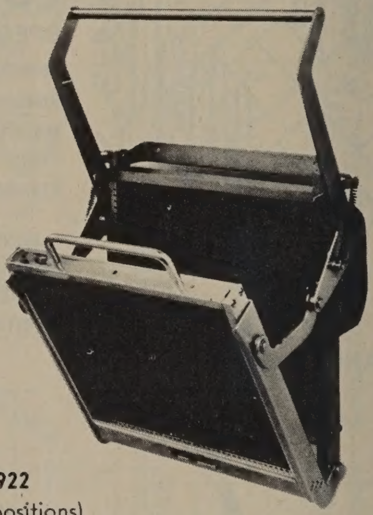
Extremely strong and compact systems with removable plugboards. Features cam-closing mechanism. Choice of taper pin or wrap terminations for connecting to external equipment. A complete line of manual or fixed (semi-permanent) plugwires are offered. Nine standard sizes from 240 to 5,120 gold or nickel plated contact positions, mounted in phenolic or diallyl phthalate insulation on 0.250" x 0.250" centers. Catalog 102.



Model 939
(2,560 positions)

SERIES 157 PLUGBOARD SYSTEMS

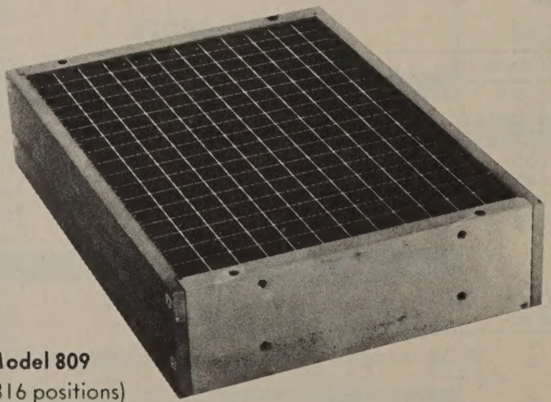
Reliable, economical program control. Taper pin or wrap terminations to external equipment. Removable plugboards patched with manual or fixed (semi-permanent) plugwires. Nineteen standard sizes from 200 to 5,120 gold or nickel plated contact positions, mounted in phenolic or diallyl phthalate insulation. Catalog 101.



Model 922
(1,280 positions)

FIXED PLUGBOARD SYSTEMS

Used where program change requirements do not dictate the use of removable plugboards. Systems from 200 to 1,632 contact positions are offered from stock. Sizes up to 9,600 positions are made to order.



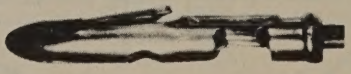
Model 809
(816 positions)

PLUGWIRES • CONNECTORS • TOOLS

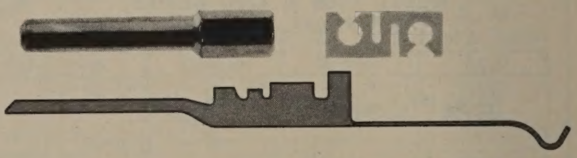
We maintain shelf stock on over 500 standard plugwires, connectors, and crimping, insertion and extracting hand tools. These are used for interconnecting the plugboard system to external equipment.

Series 157

Series 140



Series 157 Fixed



MAC/PANEL Company maintains a large inventory of catalogued components; most orders are shipped "off-the-shelf." Our design engineers are available for consultation on unique or unusual problems. See your MAC/PANEL representative, or write or call for catalog data and specifications.

MAC/PANEL

PLUGBOARD PROGRAMMING SYSTEMS

APPLICATIONS OF REMOVABLE PLUGBOARD SYSTEMS

MAC/PANEL Plugboard Programming Systems are used whenever there is a need for frequent or fast changes in the functions performed by electrical equipment and circuits or in the interconnection of two or more machines and/or circuits. Removable Plugboards are prewired with plugwire assemblies to provide a given pattern of interconnection. Changes can be made either by changing the program wired in the removable Plugboard or by simply replacing the Plugboard in the Receiver with another preprogrammed Plugboard in a matter of a few seconds. *MAC/PANEL* Plugboard Programming Systems are used as large connectors with up to 5,120 contact positions on standard models. Thousands of *MAC/PANEL* systems have been installed in the United States and in over forty foreign countries since 1958.

GENERAL PRODUCT DESCRIPTION

Each system consists of a Receiver and one or more removable Plugboards. The Receiver is the frame and the engaging mechanism that accepts the removable Plugboard. Depending on the system, thew are from one to six molded black phenolic or blue diallyl phthalate panels in the Receiver and Plugboard frames. A molded panel will contain from 200 to 1280 holes or contact positions. These panels are silk screened with a grid pattern that provides a unique alphanumeric address for each contact position in the system. Special customized printing in any number of colors can be provided on either the Plugboard or Receiver.

A contact spring is factory installed in each Receiver contact position. The front portion of these nickel or gold plated contact springs mates with nickel or gold plated plugwire tips inserted in the appropriate contact position of the Plugboard when the Plugboard is inserted in the Receiver. All Receivers are equipped with a mechanical interlock that assures proper mating of contact springs and plugwire tips. Each contact position can also be directly connected to the equipment from the rear of the Receiver by soldering, insertion of taper pins, or wire-wrapping. The desired method of connection must be determined prior to ordering so that the appropriate type of contact springs will be provided in the Receiver.

MAC/PANEL maintains shelf stock on over 500 types of plugwire assemblies. These include single conductor and multi-conductor unshielded and shielded plugwires as well as crimpable and wire-wrapable plugwire tips.

MAC/PANEL customer service personnel and design engineers invite your inquiries. We can promptly and economically design, build, and install a special custom system or plugwire if our standard product will not meet your requirements.

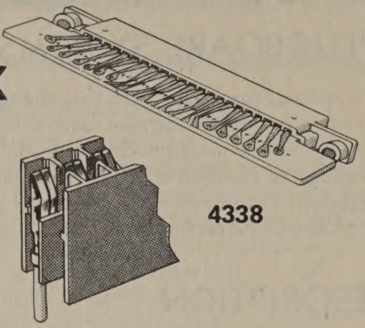
New Molex Value-Engineered Connectors & Sockets

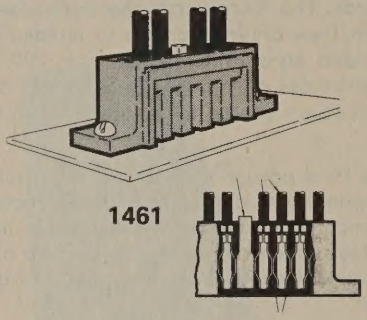
molex®



4338

DUALCON™ Dual P.C. Board Edge Connector
4338 Series

Molex has introduced a new .156 crimp/snap-in dual read out edge connector for .062 P.C. cards. The crimp snap-in type contact allows greater production flexibility and at the same time reduces labor/assembly man-hours, because you use only the contacts you need. The black polyester housing is dimensionally stable and requires no mounting panel revisions to replace most of the currently available edge-connectors of the solder loop or P.C./wire wrap type. The 5 AMP rated terminals are available with pre-tin gold over nickel, or selective gold plating and will accommodate 18-24, and 24-30 AWG. Crimp, solder loop, and split eyelet type terminals are available. Inter-contact and on-contact polarizing keys are optional. The connector housing is available with or without mounting flanges in 6, 8, 10, 12, 15, 18, 22, 24, 25 and 28 dual row positions.

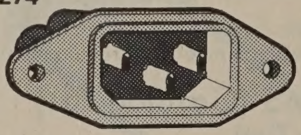


1461

COMPLUS™ Commoning Connector 1461 Series

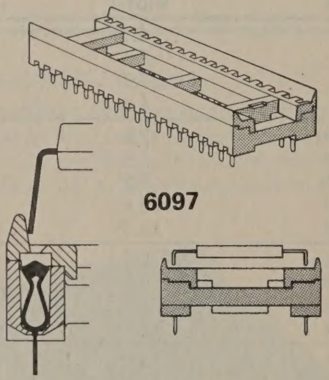
A simple, less expensive method for power distribution in electric/electronic products. This system allows a two part inventory, greater design flexibility, stackable for multiple rows, low cost crimp/snap-in termination and the ability to design any practical commoning combination. Optional polarizing key. Cold stamping standard. Housings available in 5, 10, 15 and 20 circuits. Terminals are in two sizes to accommodate wire sizes from #14 to #22 gauge wire and insulation diameter of .061 to .145 inches maximum. 15 AMP rating.

4274



A.C. RECEPTACLE 4274 Series

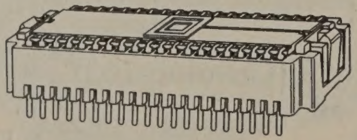
Three prong inter-nationally approved line cord receptacle for equipment which must be unplugged offers the lowest installed cost in the industry today. Approved by UL, CSA and VDE. Contacts do not have to be soldered. Three crimp/snap-in type rectangular pins rather than the conventional solder lugs are used in a polarized receptacle.



6097

ZIPCON™ Closed Entry LSI Socket 6097 Series

The socket combines the time-tested quality of the Molex Soldercon 1938 Dual Beam contact with a new 94V-O flame retardant polyester housing. This new combination allows insertion and withdrawal of fragile LSI's without damage while maintaining sufficient normal force for a reliable low-level electrical contact. The Molex Soldercon features side bearing contacts. These contacts offer better overall contact reliability, mechanically and electrically, because we are making contact with the main surface of the lead frame. The 94V-O black housing design incorporates many desirable features such as the closed entry cap ... a tapered lead-in ramp to insure positive positioning of the LSI in the contact areas, and a closed socket base to prevent solder wicking during wave soldering. The 6097 is available in 24, 28 and 40 positions on .100 x .600 spacing. Contact platings and materials are available in tin, selective gold, and overall gold over brass or phos-bronze material.



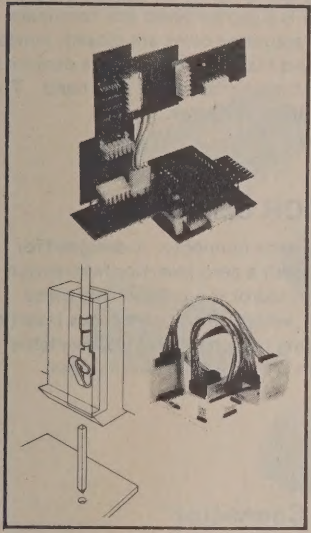
ZERO FORCE LSI Sockets 24, 28, or 40 Position

Features zero axial insertion force, assures that LSI leads will not be damaged even after multiple insertions. Positive lock-in in the loaded position. Plus self-ejection of the LSI module. SE-O nylon housings.

Molex Incorporated, Dept. EEM74, 2222 Wellington Court, Lisle, Illinois 60532, (312) 969-4550

Molex Value-Engineered Connectors

molex



KK-100 and KK-156 Interconnection Systems

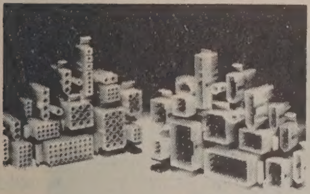
11 basic components handle all your printed circuit interconnection needs: cable-to-board; board-to-board, parallel; board-to-board, perpendicular; board-to-chassis; and power transistor connectors.

Cable-to-board connections: 2 to 24 circuits
Board-to-board connections: 2 to 18 circuits
Pin material: tin-plated brass; gold plating available upon request
Housing material: nylon 94VE-2 (SE-2 rated)

.025″ and .045″ rigid square wire pins—simple . . . low cost . . . reliable. 1/2″ to 2″ lengths permit connecting multiple boards to the same circuit.

KK system includes:

- Flat wafer connectors (round wire with nylon wafer).
- Crimp-type connectors with locking ramp.
- Nylon wafer connectors (round wire).
- Right-angle wafer connectors (square wire with nylon wafer).
- Friction-lock wafer connectors (round wire with nylon wafer).
- P.C. board connectors (right-angle, top, and bottom entry).
- Polarizing wafer connectors (round wire with nylon wafer).
- Crimp-type connectors (mates to square wire or round wire assembly).
- Crimp-type edge connectors (plain and with optional mounting ears).
- Power transistor sockets (.156″ crimp-type and solder-tail; .100″ crimp-type and solder-tail).



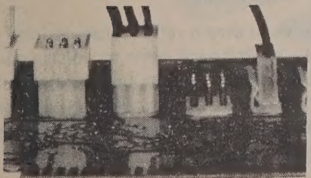
Molex .093″/.062″ Multi-Pin Connectors

.093″ connectors in 3, 6, 9, and 15 circuits
.062″ connectors in 1 through 36 circuits

These famous Molex connectors are SE-2 rated nylon with integral shielding sleeves that isolate each terminal. A positive locking device prevents connectors from separating due to vibration. Integrally molded mounting ears provide fast snap-lock panel mounting without screws, brackets, etc. Connectors cannot be misconnected. Pin and socket terminals can be inserted for added polarity. Use Molex standard .093″ dia crimp-type pin and socket. Hand, bench, and automatic assembly tools are available.

Edgecon^(R) Edge Connectors

Fast, reliable, and economical means for connecting circuits to the edges of .063″ printed circuit boards. Bifurcated flat terminal contact makes excellent connection with board contact faces without damaging pads. Available with or without mounting flanges and in right angle or straight models for added design flexibility. Housings accept Molex 1797/1799 crimp terminals. Also, terminals can be supplied with selective or overall gold plating. Consult Molex for details.



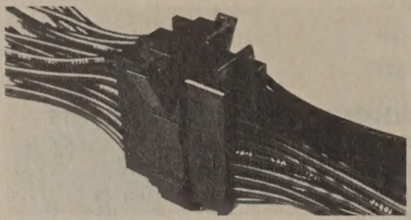
Wafercon^(R) Printed Circuit Connectors

These .093″ bead pin-type terminals are preassembled into nylon wafers to save time and labor during production, testing, and servicing. Assemblies are supplied ready for press fitting and soldering into place. Intermix of male and female terminals assures error-free connection and positive polarity. Wafercon connectors may be mated anywhere on the board—circuits do not have to be run to the edge. Use Molex standard .093″ dia receptacles.

Molex Incorporated, Dept. EEM74, 2222 Wellington Court, Lisle, Illinois 60532

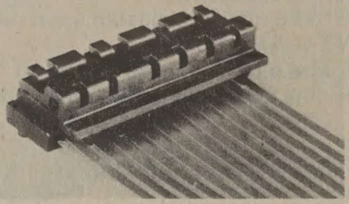
New Molex Value-Engineered Connectors

molex®



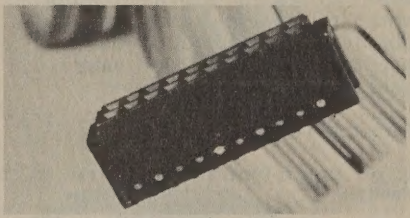
ZIFCON 4346 Zero Force Connector

The design and operation of the 4346 ZIFCON zero insertion force connector is simple, economical and reliable. When the plug is mated with the receptacle, there is a gap between the terminals and no contact is made. As the actuating cams are closed, contact is made between the terminals and the two housings are positively locked together. The operation can be made with one hand. The connector comes in 16, 24 and 36 circuit sizes.



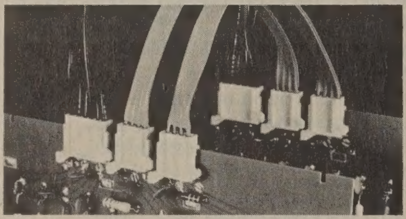
4850 FLAT CONDUCTOR Connector

The new Molex 4850 Flat Conductor connector is designed for cable or flexible etched circuits with a zero insertion/extraction force. The focal point of the connector is a unique two-piece design with a snap-on hinge cam, which allows numerous insertions and withdrawals without damaging expensive and fragile etched circuits. The 4850 is available in 5 through 25 circuit sizes.



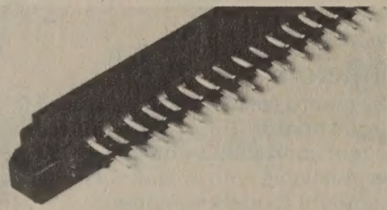
4700 RIBBON CABLE Connector

The 4700 is an insulation displacement connector. It is designed for mass termination of ribbon cable with conductors on .050″ centers. Featured is accurate placement of the cable relative to the insulation displacement terminal by grooves in the mating housing.



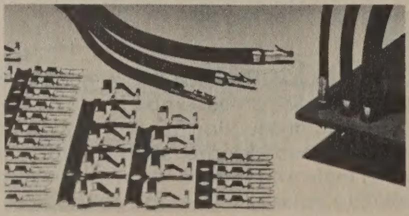
PRESS-SURE-MATE 6763 Connector

Cut your interconnection costs by eliminating gold contacts and by gang crimping with the new Press-Sure-Mate 6763 connector series. This unique zero insertion force connector system incorporates a high pressure point contact to achieve connection to P.C.B. solder pads creating a gas-tight interface. The connector is available in 2, 4 and 6 contact configurations.



6511 DOUBLE-SIDED, P.C. Tail Edge Connector

With the 6511, Molex enters the P.C. tail double sided edge connector market. Terminals are phosphor bronze, selectively gold plated on .156″ centers and .140″ and .200″ row to row spacing of P.C. tails. Housings are sturdy 30% glass filled polyester.



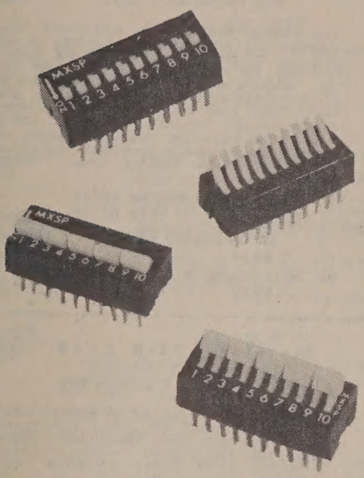
4811 STRAIN RELIEF Terminal

The recently developed 4811 series of strain relief terminals are used to secure wire leads to a printed circuit board prior to soldering. Thus, eliminating the need for pre-affixed eyelets or griplets on the printed circuit board. The terminal construction allows the actual wire lead to be soldered, and because the terminal fills the printed circuit board hole, solder voiding is minimized.

Molex Incorporated, Dept. EEM74, 2222 Wellington Court, Lisle, Illinois 60532, (312) 969-4550

Molex Switch Products

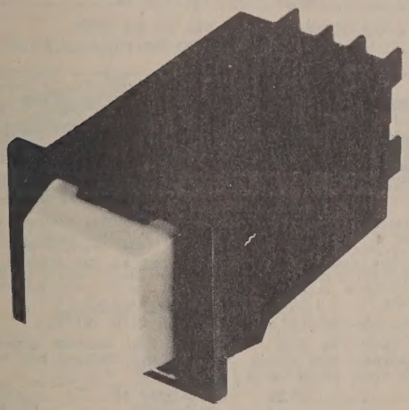
The BOSS™ Switch 4130 series
Binary Option Selection Switch



BOSS™ Multi Position Dip Switches
4130 Series

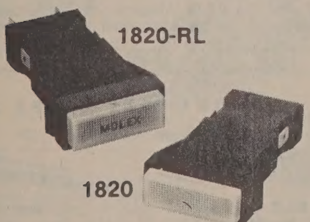
Molex has introduced a versatile DIP switch family developed for printed circuit board applications. The Boss (Binary Option Selection Switch) Switch Family consists of a unique SPST long actuator lever, SPDT or DPST model, and SPST low profile (.360" high) version. Every switch in the Boss Family offers a truly low cost method of programming functions into solid state equipment. Any electronic device requiring optional preset logic to achieve a varying result can use this type of product. Solder-tail leads on .100 x .300 centers let you mount the Boss through a DIP socket or directly to the P.C. board eliminating the cost of interconnection wiring to perform the switching function. Snap-on covers and rubber boots are available. The Boss is rated for 50 ma at 30 VDC; minimum contact resistance of 100 Milli-Ohms and tested to 5,000 actuations; and it programs a savings of up to 50%.

Molex Lighted Pushbutton Switches



"THE SWITCH FOR UNDER A BUCK"
Replaceable Lamp Lighted Push Button Switch 10400 / 10410 / 10420 Series

Molex has introduced a new U.L. listed replaceable bulb/lens lighted push button switch family. The buttons may be molded in an assortment of colors and shapes to enhance the appearance of your assembled unit. Switch actions include SPST, SPDT, DPST, and DPDT with momentary or alternate action. Applications include office machines, appliances, computers and the home entertainment field. 10400 Rectangular bezel w/molded mounting ears. 10410 Rectangular bezel w/spring clip mounting. 10420 Square bezel w/spring clip mounting. 50,000 minimum life cycle. In addition to the 10.1 AMP rating, the entire series offers reliable switching action at low levels (100 milli-amps at 30 volts), and a replaceable T 1-3/4 bulb in all but the 125 Neon version.



1820 – combines functional beauty with economy. Available in more than 1000 variations of bulbs, button colors, button shapes, bezels, and legends. Light may be wired independently or to show on-off action of the switch. Integrally molded mounting ears speed panel mounting, without additional hardware,

1820-RL – the popular 1820 series featuring a replaceable light bulb. Bulb can be easily and quickly replaced from the front.

Standard lighted push button, rocker, and combination switch and receptacle units are also available through local distributors.

mueller clips

a complete line of

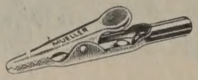
ALLIGATOR TEST & BATTERY CLIPS

Mueller Electric Co. CLEVELAND, OHIO 44114

"60 SERIES" ALLIGATOR CLIPS

U.S. Patent No. 3,321,736

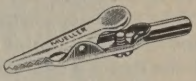
No. 60—CONVENTIONAL TYPE



New slim design with full-meshing teeth. Convenient, round thumb grip, barrel connection for banana plug. Equipped with small soldering lip. Strong spring with a hard bite. Cadmium plated. 2" long.

EACH NET........................ $0.16 LOTS OF 10........................ $0.122

No. 60-S—SCREW CONNECTION



Eliminates necessity for soldering. Otherwise same as No. 60.

EACH NET.... $0.19 LOTS OF 10... $0.143

No. 60-NS—ALLIGATOR NEEDLE CLIP

Like No. 60-S, but with insulation piercing needle in one jaw. Screw connection. 2" long. 10 per box.

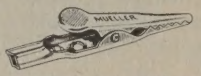
EACH NET........................ $0.35 LOTS OF 10........................ $0.264

No. 60-CS—COPPER ALLIGATOR CLIP

Solid copper version of No. 60-S. Screw connection. 2" long. 10 per box.

EACH NET........................ $0.30 LOTS OF 10........................ $0.225

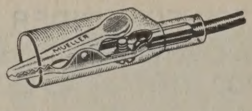
No. 60PR-2—SPECIAL BARREL FOR TEST PROD OR PHONE TIP



Barrel crimped to provide friction fit on standard test prod or phone tip. Holds prod on test, frees hand for other work.

EACH NET........................ $0.24 LOTS OF 10........................ $0.18

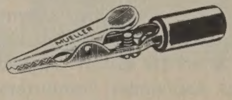
No. 62 FLEXIBLE VINYL INSULATOR



Red and black insulators for Alligator Clips 60, 60-S, 60-CS, 60PR-2, 60-NS.

EACH NET........................ $0.09 LOTS OF 10........................ $0.071

No. 60-HS—STEEL ALLIGATOR CLIP WITH INSULATED HANDLE



Same as No. 60-S except equipped with red and black insulating sleeves on end. Very convenient for distinguishing leads. Has screw connection also. Cadmium plated. 2$\frac{11}{32}$" long. Shipped half red, half black.

EACH NET........................ $0.26 LOTS OF 10........................ $0.195

No. 60-CHS—COPPER ALLIGATOR CLIP, INSULATED HANDLE

Solid copper version of No. 60-HS. Screw connection. Shipped with half red, half black insulating sleeves. 10 per box.

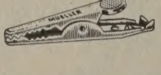
EACH NET........................ $0.36 LOTS OF 10........................ $0.27

"70 SERIES" ALLIGATOR CLIPS

U.S. Patent No. 2,762,028

Features simplified design, fast connection of wire with cord strain relief ears, patented hinge construction and lower cost.

No. 70—FOR SOLDERED CONNECTION



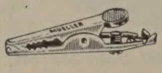
Steel, cadmium plated. 1$\frac{11}{16}$" long.

EACH NET..... $0.13 LOTS OF 10...... $0.098

No. 70-S—SCREW CONNECTION

Otherwise same as No. 70.

EACH NET..... $0.16 LOTS OF 10...... $0.12

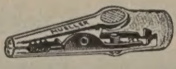


No. 70-CS—COPPER SCREW CONNECTION

Solid copper version of No. 70-S.

EACH NET...... $0.26 LOTS OF 10..... $0.196

No. 72— SKIN-TIGHT INSULATOR FOR 70 SERIES ALLIGATOR CLIPS!



For the first time complete, skin-tight, one-piece insulation for a standard size Alligator Clip! Covers entire clip right down to nose. Special tip slot permits full jaw opening without exposing teeth.

EACH NET........................ $0.09 LOTS OF 10........................ $0.071

MICRO-GATOR CLIP

(Smallest Insulated Clip Ever Made)

U.S. Patent No. 2,762,028 Trademark Reg.

Micro-Gator

Micro-Gator with Insulator

The alligator clip with the microscopic tip! This is the alligator clip you now can use where no other clip will do . . . on printed circuits, in tight spots and on tiny terminals too crowded for anything but its microscopic tip. Including separate skin-tight insulator the tip is no bigger than the head of a pin! Yet the Micro-gator has ample thumb grip, and plenty of bite to stand up straight on the smallest terminals. Ample $\frac{7}{32}$" jaw spread. 1$\frac{3}{32}$" long. Solder connection. Skin-tight flexible vinyl insulator (sold separately) has "lip-action" tip slot so that jaws stay covered whether open or closed.

No. 34 (Steel, cadmium plated)

EACH NET........................ $0.11 LOTS OF 10........................ $0.083

No. 34-C (Solid Copper)

EACH NET........................ $0.14 LOTS OF 10........................ $0.105

No. 36 (Insulator for Nos. 34 and 34-C)

EACH NET........................ $0.07 LOTS OF 10........................ $0.054

MINI-GATOR CLIP

U.S. Patent No. 3,321,736

Trademark Reg.

Mini-gator

Mini-gator with Insulator

Indispensable for testing or incorporation into miniaturized equipment. New design features rivet hinge for greater strength, full-meshing teeth to grip finest wires. Skin-tight flexible Vinyl insulator (sold separately) covers completely — has slotted "lip action" tip. Clip weighs 1/20th oz., has tiny $\frac{11}{64}$" O.D. nose, but ample $\frac{3}{16}$" jaw spread 1$\frac{3}{32}$" long. Crimping ears. Solder connection. Surprisingly strong bite penetrates corrosion and coatings.

No. 30 (Steel, cadmium plated)

EACH NET........................ $0.13 LOTS OF 10........................ $0.10

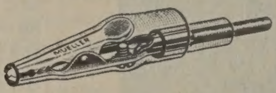
No. 30-C (Solid Copper)

EACH NET........................ $0.16 LOTS OF 10........................ $0.12

No. 32 (Insulator for Nos. 30 and 30-C)

EACH NET........................ $0.07 LOTS OF 10........................ $0.054

COMPLETELY INSULATED ALLIGATOR CLIPS



Patent Pending

No. 63 or 63-C Clip

Sold only as a unit, with factory-applied insulators.

Completely insulated right down to the nose. Flexible 2-piece skin-type vinyl insulator of high dielectric strength, with "lip action" slotted tip that permits opening of clip without exposing metal. Insulator nose is only 13/64" O.D. The tight fitting sheath preserves all the slimness of the Alligator Clip, still giving complete protection against shorts in even the tightest spots. Screw connection easily made by slipping insulator forward. 2$\frac{1}{8}$" long.

No. 63—INSULATED ALLIGATOR CLIP (STEEL)

Composed of Mueller No. 60-S Alligator Clip steel, cadmium plated, screw connection, complete with 2-piece vinyl insulator. Shipped half with red insulators, half black. 10 per box.

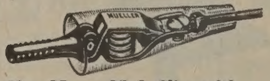
EACH NET........................ $0.36 LOTS OF 10........................ $0.27

No. 63-C—INSULATED ALLIGATOR CLIP (COPPER)

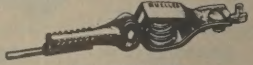
Composed of Mueller No. 60-CS Alligator Clip, solid copper, screw connection. Shipped half with red insulators, half black. 10 per box.

EACH NET........................ $0.42 LOTS OF 10........................ $0.317

CROCODILE CLIPS



No. 85 or 85-C Clip with No. 87 Insulator



No. 85-T Clip

No. 85—A very small clip with slender, elongated jaws for getting into tight places in radio or electrical test work. Screw connection. 2$\frac{1}{8}$" long.

EACH NET........................ $0.19 LOTS OF 10........................ $0.143

No. 85-C—Same as No. 85,, except solid copper with phosphor bronze spring, brass screw. A radio frequency, entirely non-ferrous test clip. 10 per box.

EACH NET........................ $0.38 LOTS OF 10........................ $0.285

No. 85-T—Crocodile "Tip-Clip"—equipped with standard phone tip on one jaw, otherwise same as No. 85. Ideal for use as a prod, for ordinary clip connections and for connections to insulated binding posts having non-removale heads. 2$\frac{5}{8}$" long. 10 per box.

EACH NET........................ $0.50 LOTS OF 10........................ $0.375

Use No. 87 Insulators for clips 85, 85-C and 85-T. Red and Black. Cover entire clip except nose. Protect against short and shock. Help to distinguish leads.

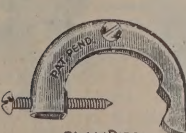
GROUND CLAMP

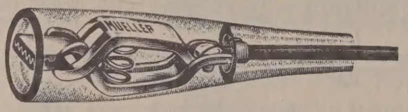


CLAMPIPE
No. 58

The ClamPipe will not spread, bend or lop over when applied. Point of large screw bites through corrosion into clean metal to insure good contact. Applicable to pipe ⅜" to 1⅜" O.D. The best ground clamp on the market!

EACH NET..... $0.48 LOTS OF 10..... $0.36

FLEXIBLE INSULATORS FOR CLIPS



A convenient protection against short circuit and electric shock. Colors help to distinguish leads. Packed half red and half black to indicate polarity. Long tail prevents breakage of wire. Constructed so that clip is held in firmly. NOW AVAILABLE also in blue, white, yellow and green at 10% above regular price are insulators marked * below.

MUELLER *QUALITY* BATTERY BOOSTER CABLES

Highest quality cables, equipped with famous Hippo-Clips, for boosting "dead" 6 or 12-volt vehicle batteries with an external battery. Cables are pure copper, finely stranded for high flexibility and covered with rubber insulation which stays flexible in the coldest weather and resists oil, grease and acid. 413 strands of No. 30 wire in the 4-gauge cable and 259 strands of No. 30 wire in the 6-gauge cable. The many fine features of the Hippo-Clips alone are listed elsewhere on this page. The clips are both soldered to the cable and clinched around the cable insulation by means of clinching ears.

Packaged: pair of cables with clips in a bright, attractive display carton. Standard shipping container 10 cartons.

No. 8A6—8 ft., 6-gauge, with No. 41A Hippo-Clips (Steel, bright copper plated)
NET PRICE PER PAIR......$11.10

No. 12A6—12 ft., 6-gauge, with No. 41A Hippo-Clips (Steel, bright copper plated)

SECOND INSULATOR OUTLINED TO SHOW CONSTRUCTION
SECOND INSULATOR OUTLINED TO SHOW CONSTRUCTION

HIPPO-CLIP

HIPPO-CLIP—For battery booster cables and fast chargers. Proved higher quality and superior design. Built-in solder strap and clinching ears for fast, sure cable connection. Supplied with vinyl handle insulators in red or black. Full 1-9/16" jaw spread. 6" long.

	Net price ea.
No. 41-A Steel, bright copper plated, 100 amp.	$0.93
No. 41-C Solid Copper, 200 amp.	2.46

PIGMY HIPPO-CLIP

PIGMY HIPPO-CLIP—A new small plier clip for battery operated equipment and automotive test. Flat, wide handle allows positive grip. Won't "squirt away". Built-in solder strap and wire clinching ears. Supplied with vinyl handle insulators in red or black. Ample 1⅛" jaw spread. 3" long.

	Net price ea.
No. 46-A Steel, bright copper plated, 50 amp.	$0.30
No. 46-C Solid Copper, 75 amp.	.48

NATIONAL TEL-TRONICS

DEPT. EM, STATE ROAD HILL, MEADVILLE, PA. 16325
A division of Electro Audio Dynamics, Inc. (814) 724-6440

For all your connector and component needs, there is no larger or more reliable source than National Tel-Tronics. Having produced parts for over twenty-five years for all the major OEM equipment manufacturers, National Tel-Tronics has a vast background of component and connector experience on which to draw. Complete tool shop, stamping facilities and in house production capability enable us to have the flexibility to rapidly produce a vast range of electronic connectors and components, either standard or to the customer's specific requirements. Many of our standard parts are listed here. If you don't see your specific requirement, contact our company for a fast and reliable quotation.

PHONO PLUGS AND JACK PLUGS

Choose from the largest selection of plugs; solder, all-crimp, shielded, short and long shell, handled and insulated versions. Also offering the largest selection of single and multiple phono jacks for chassis, panel and P.C. mounting.

BINDING POST BOARDS

6-32 screw type binding post boards manufactured to standard and custom configurations. Standards include 1 through 12 lug positions in 7⁄16″ or ½″ spacing. Heavy-duty ⅛″ boards and heavy-duty binding post lugs also available. Can be manufactured to custom configurations with silk-screening, hot stamping, fungus resistant finishes and other special requirements.

TIP PLUGS AND JACKS

.080 tip plugs are available in a full selection of both solder and solderless types, insulated and non-insulated, including the needle tip and chuck versions. Fully insulated push button meter type plug is also standard for rapid assembly. Molded handles in 1″, 4″ and 5½″ lengths, both threaded and force fit are standard for creating insulated plugs or test probes. Tip jacks are available in insulated and non-insulated types in a variety of colors. Molded nylon tip jacks with metal shell or all nylon shells are also available, including a speed clip type for inexpensive and rapid assembly.

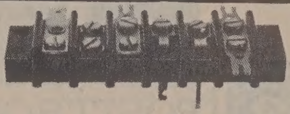
BARRIER BLOCKS

A complete line of high quality, double row, barrier blocks are available in ⅜″ and ⁷⁄₁₆″ pitch spacing with a variety of terminations to meet your needs. Both eyelet and screw type terminations are available. Eleven terminal variations, 2 block styles and 20 lead positions offer a choice of over 400 standard configurations.



BANANA PLUGS AND JACKS

A full variety of standard and miniature banana plugs with nickle-plated brass bodies and phosphor bronze springs are standard, including side screw and top hex stud mounting version. Insulated handles are available for all plugs. Insulated push-button meter type plug is also standard. Included in the standard line are stacking banana plugs in both single and dual fully molded versions. Banana jacks are available in insulated and non-insulated types in a variety of colors.

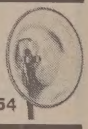
ANODE AND HIGH VOLTAGE CONNECTORS

Anode connectors to 40 KV rating for BW and color television, and oscilloscopes, are available in a variety of configurations. Spring clips and solderless stainless-steel clips assure continuity. Anode cups are standard in neoprene rubber, flame retardant grade PVC or silicone rubber variations in sizes of 1½″, 1¾″ and 3″. Anode connectors are UL approved.

250

239



254

INTERLOCK RECEPTACLES

Both flush and bathtub type receptacles for AC connections are standard in a variety of materials from XP phenolic through UL approved flame retardant materials. Solder type, polarized and quick disconnect type pins are standard. Molded snap-in types are also available in flame retardant materials. All the interlocks are approved by Underwriter's Laboratories and Canadian Standard Assn.

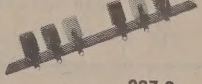
MOLDED AND COMPRESSION TERMINAL BLOCKS

A variety of molded terminal blocks in flexible PVC are available as standard items. Screw type connections, screw driver slot, and .250 quick disconnect connections are standard. Standard size blocks are in a 12 position configuration but can be cut to smaller size if desired. Two types of compression type boards are available from stock. Series 927 features push-button multi-covered terminals which are mounted on phenolic or FR type boards. Available in six different colors in single or multi-roll configurations.

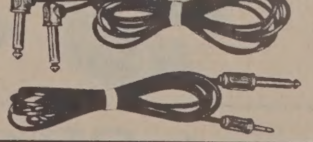
905



927-6

MOLDED CABLE AND HARNESS ASSEMBLIES

A complete molding facility allows great flexibility in providing the audio and electronics industry with a variety of molded cable assemblies. Standard molds includes phone plugs and jacks in 2 and 3 conductor configurations, phono plugs and jacks, miniature phono plugs and miniature jacks, mike connectors, ultra-miniature plugs, coaxial connectors and various adapters. Coaxial and zip cord cables are readily available as well as those for more special applications. Custom assemblies include molds designed to customer specifications and also include capability of amp and molex crimp type assemblies, wire harnesses and multiple conductor assemblies.



DIN CONNECTORS

NTT European style "Europlugs" are available in two, three and five contact arrangements in both male and female versions. In-line and panel mounted types are standard in both flush and extended barrel configurations.

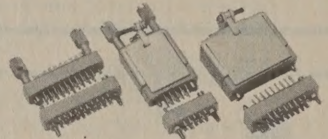
POSITRONIC INDUSTRIES, INC.

At Positronic Industries, we produce connectors for our customers under a *Complete Capability Concept*, which means total in-house manufacturing of all connector components. Complete capability minimizes stock shortages and insures prompt deliveries. For quality and service at a fair price, we are unbeaten. Give us a try. We are in business to serve you.

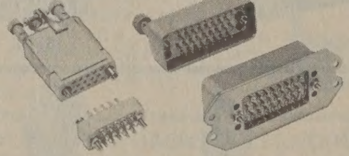
STANDARD CONNECTORS

RECTANGULAR, RACK & PANEL CONNECTORS



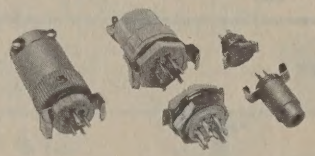
SGM AND SLM, SUB-MINIATURE RECTANGULAR CONNECTORS

Number of Contacts — 5, 7, 9, 14, 20, 26, 29, 34, 44, & 50.
Contacts — Copper Alloy, Gold Plated, 5 & 3 AMP Rated.
Insulator — Glass Filled DAP, SDG-F
Polarization — Guides or Rotating and Fixed Threadlocks, as Desired.
Termination — Solder Cup, Accepts 22 AWG Wire
Hoods — Available for Most Sizes



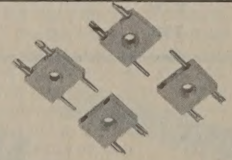
GM AND XGM SERIES, MINIATURE RECTANGULAR

Number of Contacts — 7, 8, 9, 14, 18, 20, 21, 26, 34, 41, & 50.
Contacts — Copper Alloy, Gold Plated, 7.5 AMP Rated.
Insulator — Glass Filled DAP, SDG-F
Polarization — Guides or Rotating and Fixed Threadlocks, as Desired.
Termination — Solder Cup, 20 AWG Wire, and Turret Style.
Hoods & Shells — Available on All Size Connectors. Hoods Have Both Top & Side Cable Opening:
Underwriters' Laboratory Listed*



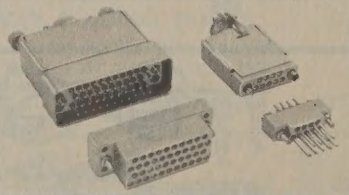
GH & MGH SERIES, MINIATURE AND SUB-MINIATURE HEXAGONAL

Number of Contacts — 4, 5, 7, 9, and 10, Miniature, 3 for Sub-Miniature.
Contacts — Copper Alloy, Gold Plated, 5 & 7.5 AMPS.
Termination — Solder Cup Accepts 20 & 22 AWG Wire
Insulator — Glass Filled DAP, SDG-F
Polarization — Contact Placement Permits Proper Engagement.
Hoods — Glass Filled DAP, SDG-F & Aluminum. Order With or Without Strain Relief.
Accessories — Vibration Locks, Mounting Nuts and Lock Washers.



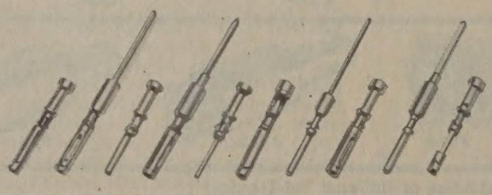
GF SERIES, MINIATURE, SIDE MOUNTING

Number of Contacts — 2 and 4.
Contacts — Copper Alloy, Gold Plated, 7.5 AMP Rated.
Termination — Solder Cup, Accepts 20 AWG Wire, Dip Solder, .025 Dia. for P.C. Mount.
Insulator — Glass Filled DAP, SDG-F and Glass Phenolic.
Polarization — Contact Arrangement Provides Polarization
Optional — Closed Entry Contacts



GMCT SERIES, MINIATURE RECTANGULAR REMOVABLE CONTACT CONNECTORS

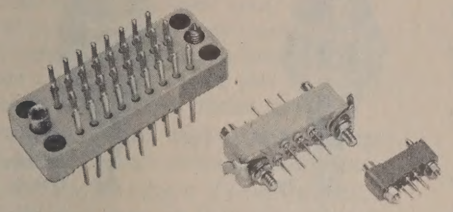
Number of Contacts — 9, 14, 18, 20, 26, 34, 41, 42, 50, 66, 75 & 104.
Removable Contacts — Copper Alloy, Gold Plated, 13 & 7.5 AMP Rated
Contact Termination — Solder, Dip Solder, Crimp and Wire Wrap Wire Size, 14 to 30 AWG
Insulator — Glass Filled DAP, SDG-F
Polarization — Guides or Fixed and Rotating Threadlocks, as Desired
Hoods & Shells — Aluminum, Available for all Sizes.
Underwriters' Laboratory Listed*



CONTACTS, REMOVABLE, SOLDER, DIP SOLDER, CRIMP AND WIRE WRAP

Removable contacts are for use with GMCT Series connector bodies. Contacts are machined copper alloy, gold plated over copper flash. Crimp and solder styles are sized to accept 14 to 30 AWG wire. Wire wrap terminations are .045 and .025 Sq.-dip solder terminations are .026 dia. Crimp and solder styles are available in both .062 and .040 pin diameters. Wire wrap and dip solder are .062 dia. Contacts may be purchased on reels of 2,000 for automatic installation. Contact crimping tools, insertion tools, and removal tools are available from stock.

PRINTED CIRCUIT CONNECTORS



GM, GAP, AND SGM SERIES, PERPENDICULAR MOUNTING ON P.C. BOARD, PIN OR SOCKET

Number of Contacts — GM Series, 7, 8, 9, 14, 18, 20, 21, 26, 34, 41, and 50.
GAP Series, 9, 14, 18, 20, 26, 34, 41, and 50.
SGM Series, 5, 7, 9, 14, 20, 26, 34, 44, and 50.

Contacts — Rated 7½ amps for GAP Series, 5 amps for GM Series, and 3 amps for SGM Series. GM and SGM Series available both pin and socket. GAP Series — pin only, copper alloy, gold plated.

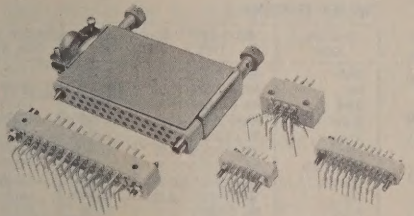
Termination — Dip solder, GAP series .034 dia., SGM and GM Series .025 dia. Tails from 3/32, 4/32, 5/32 and 6/32 long.

Spacing — .150 between contact spacing for GAP and GM Series, and .094 for SGM Series.

Insulator — Glass filled DAP, SDG-F

Polarization — Guides and Threadlocks, also used for mechanical mounting of connector to P.C. Board.

Hoods and Strain Reliefs — Available for mating cable connector Underwriters Laboratory Listing for GM and GAP Series.



GMPL, GAPL, AND SMPL SERIES, RIGHT ANGLED CONTACTS, PARALLEL MOUNTING ON P.C. BOARD, PIN OR SOCKET

Number of Contacts — GMPL Series, 7, 8, 9, 14, 20, 21, and 41.
GAPL Series, 9, 14, 20, 26, 34, 41, and 50.
SMPL Series, 5, 7, 9, 14, 20, 26, and 29.

Contacts — GMPL Series, pin or socket, 5 amp rating. GAPL SERIES, pin only, 7½ amp rating. SMPL Series, pin or socket, 3 amp rating. Copper Alloy, Gold Plated.

Termination — Dip Solder, GMPL Series .025 dia., GAPL Series .034 dia., SMPL Series .020 dia.

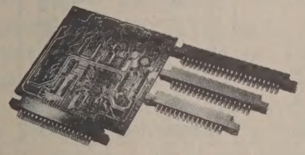
Spacing — .150 hole spacing on P.C. Board for GMPL and GAPL Series, and .094 hole spacing for SMPL Series.

Insulator — Glass filled, DAP, SDG-F

Polarization — Guides and threadlocks for positive alignment and vibration locking.

Mounting — Angle bracket available for bolting of connector to P.C. Board. Connector can also be cemented to board.

Mating Cable Connector — GMPL mates with GM series, GAPL with GMCT Series, SMPL with SGM Series.



GQD AND GKD SERIES, DOUBLE ROW CARD RECEPTACLE TYPE, .156 CONTACT CENTERS.

Number of contacts — 10/20, 15/30, 18/36, 22/44, 28/56, 36/72, and 43/86

Contacts — Bellows, Gold Plated, Phosphor Bronze and Berlyllium Copper. 5 amp rated.

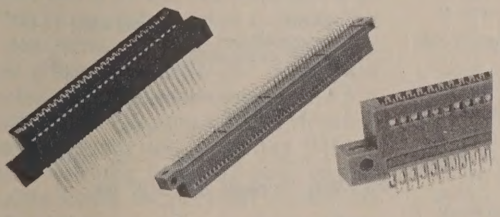
Termination — Dip solder and solder eyelet styles

Insulator — Glass filled DAP, SDG-F for GQD series, Glass filled, flame retardant phenolic for GKD series

P.C. Board Thickness — Will accommodate from .054 through .071 in. thickness

Polarization — Between contacts, plastic keys

Mounting — .128 dia. clearance hole, floating bushings or threaded inserts.



HE 901 AND HE 902 SERIES, DOUBLE ROW CARD RECEPTACLE TYPE, .100 CONTACT CENTERS

Number of Contacts — HE 901 Series, 19/38, 25/50, 31/62, 37/74, 43/86 and 49/98
HE 902 Series, all combinations between 10/20 and 50/100

Contacts — Phosphor Bronze, Bifurcated Type, Gold Plated, 3 amp. current rating.

Termination — Wrap post .025 SQ., dip solder, and solder eyelet.

Insulator — Glass filled phenolic for HE 901, and glass filled polycarbonate for HE 902 Series.

P.C. Board Thickness — Will accommodate from .054 through .071 in. thickness.

Polarization — Between contacts, and in contact key polarization positions.

Mounting — Clearance hole .126 diameter.

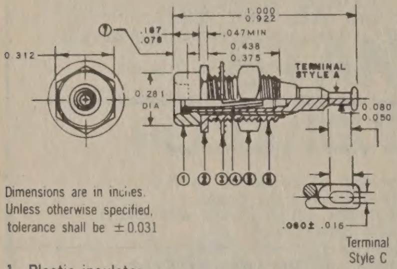
BUSHING MOUNTED TIP JACK

The Raytheon MIL-C-39024/10 tip jack combines highest quality materials and design techniques to provide a highly reliable tip jack for both military and industrial electronic equipment applications. The tip jacks fully meet the requirements of MIL-C-39024. An outstanding, and exclusive, design feature of this jack is its separate beryllium copper spring pin closed entry contact. Closed entry contact design prevents damage to contact through careless probe insertion.

These jacks are designed to accept a 0.080 ± 0.001 dia. test probe and to **prevent** the entrance of a 0.085" test probe.



Dimensions are in inches.
Unless otherwise specified,
tolerance shall be ±0.031

1. Plastic insulator
2. Metal sleeve
3. Internal tooth lockwasher 13/32 o.d. x .013 to .026 thk
4. Spring pin contact
5. Hex nut 11/32 across flats x 1/8 thk
6. Threaded body (insulator) 1/4-32 UNEF-2A
7. Plastic to metal distance 0.062 min.

MATERIAL DATA

Insulator—Polyamide per MIL-P-17091. Teflon material per MIL-P-19468.

Contact—Beryllium copper per QQ C-533, Cond. A, gold plated per MIL-G-45204, Type II, Class I (50 millionths).

Threaded Sleeve—Brass per QQ-B-626, nickel plated per QQ-N-290. Type V, Class 1.

Terminal—Brass per QQ B-626, plated

Mounting Nut—Brass per QQ-B-626, nickel plated per QQ-N-290, Type V, Class I.

Lockwasher—Phosphor bronze per QQ-P-330, Cond. A, Spring temper. Nickel plated per QQ-N-290, Type V, Class I.

ENVIRONMENTAL AND MECHANICAL DATA

Thermal Shock— −65°C to 125°C Method 107 Cond. B MIL-STD-202.

Salt Spray—48 hours—Method 101, Cond. B. MIL-STD-202.

Vibration—Method 201 MIL-STD-202.

Durability—1000 insertion-withdrawal cycles.

Withdrawal Force— 8 oz. minimum (0.080 ± 0.001 probe)

Insertion Force—5 lb. max.

Shock Test—MIL-STD-202, Method 213, acceleration at 50G.

ELECTRICAL CHARACTERISTICS

Rated Current—5 amperes, max.

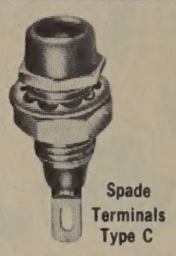
Operating Voltage—2000 volts RMS at sea level, 350 volts RMS at 80,000 feet.

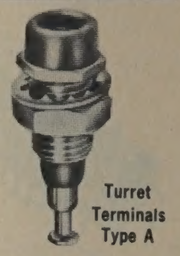
Insulation Resistance—5,000 megohms per Method 302, MIL-STD-202 Cond. A 100 vdc.

Dielectric Withstanding Voltage—3000 volts RMS, 60 Hz, at sea level per Method 301, MIL-STD-202.

Millivolt Drop—at 5 amperes, 15 mv after completion of all environmental and durability tests.

Capacitance— <10 pf at 1500 KC.





ORDERING DATA

Commercial Version also available

Contact and terminal has 400 millionth tin-plate. To order add C in order number prefix. That is, TJC, etc.

MINIATURE PC MOUNT JACKS

Raytheon Printed Circuit Test Jacks are miniature units designed specifically for printed circuit applications. Two types are offered; a **standard** model for dip solder board application, and a **short** model for use on boards soldered on automatic flow soldering equipment, or for back-to-back board mounting.

The units consist of a small diameter nylon insulator, a Beryllium-copper spring pin contact, and a gold-plated contact sleeve. Nine brilliant insulator colors are available for convenient visual circuit identification. They accept the standard. .080 dia. test prods.

ELECTRICAL AND MATERIAL SPECIFICATIONS

Rated current: 5 amperes maximum

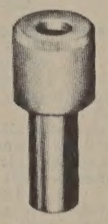
Operating voltage: 1500 volts RMS, 60Hz at sea level, and 300 volts RMS, 60Hz at 80,000 feet.

Contact Resistance: Less than .0015 ohm, at room temperature with standard .080 test prod.

Insulator material: Nylon, per MIL-M-20693.

Contact Sleeve material: Brass, yellow per QQ-B-626, Comp 22, half hard temper, underplate of .0002 minimum thickness of copper per class 3 of MIL-C-14550, overplate of .004 thick tin plate per type 1 of MIL-T-10727.

Contact material: Beryllium copper per QQ-C-533, Condition A. Gold plated (50 millionths) per MIL-G-45204 type 11, class 1.



Standard

Short

ENVIRONMENTAL AND MECHANICAL DATA

Thermal Shock: MIL-STD-202, Method 107, Condition B (−65°C to +125°C)

Salt Spray: MIL-STD-202, Method 101, Condition B (48 hours)

Humidity: MIL-STD-202, Method 103, Condition B (96 hours)

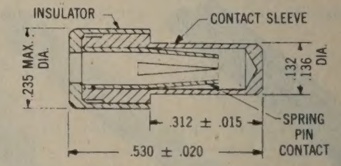
Fungus: Non-nutrient material.

Solderability: Per MIL-STD-202

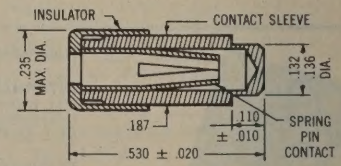
Insertion force: 5.0 lbs. maximum

Withdrawal force: 0.4 lbs. minimum (.080 ± .001 test probe)

Standard Style: For panels up to 1/4" thk.



Short Style: For panels up to 3/16" thk.



ORDERING DATA

Commercial Version also available

Contact and terminal has 400 millionth tin-plate. To order add C in order number prefix. That is, TJC, etc.

RIGHT ANGLE PC MOUNT TEST JACKS

Raytheon right angle test jacks fulfill a need for a high quality, single .080 contact connector for use with closely spaced printed circuit boards. Straight-forward design and use of highest quality materials combine to provide a miniature connector with an unusual degree of reliability at modest cost.

Their entry contact design prevents damage to contact through careless probe insertion.

These jacks are listed in U.S. Navy Handbook of Miniature Parts for Electronic Equipment (NAVSHIPS-93440(B)) because of their high reliability.

They are also color coded in ten Federal Standard 595 colors.

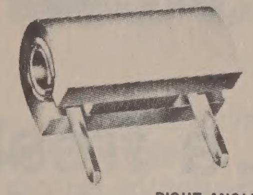
As illustrated in the figures, two terminal spacings are available, either on .300″ or .400″ centers.

MATERIAL DATA

Insulator—Polyamide per MIL-M-20693. Colors—Per MS16108C and MIL-STD-174A (Both based on Fed. Std. 595).

Contact—Beryllium per QQ-C-533, Condition A. Finish—Gold plated per MIL-G-45204 Type II Class I (50 millionths).

Contact Sleeve—Brass, half hard per QQ-B-613, Composition 2. Finish—Under plate of .0002 min. silver per QQ-S-365 Type I or III with .00003 gold overplate.



RIGHT ANGLE

ENVIRONMENTAL AND MECHANICAL DATA

Thermal Shock—MIL-STD-202B, Method 107A Condition B (−65°C — +125°C)
Salt Spray—MIL-E-5272C, Procedure 1 (240 hours)
Humidity—MIL-STD-202B, Method 103A, Condition B (96 hours)
Fungus—MIL-E-5272C, Procedure 1
Solderability—Per MIL-S-6872
Withdrawal Force—8 oz. minimum (.080 ± .001 probe)
Mounting—.300 or .400 centers
Also applicable paragraphs of MIL-J-6751

ELECTRICAL CHARACTERISTICS

Rated Current—5 amperes max.
Operating Voltage—2000 volts RMS (sea level), 350 volts RMS (80,000 ft.)
Contact Resistance—Less than 2 milliohms
Capacitance—Less than 10 $\mu\mu$f at 1500 kc

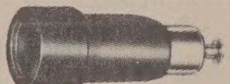
SNAP-IN MOUNTED/SUBMINIATURE

These subminiature jacks are suitable for use on standard, miniature, or subminiature electronic equipment. Designed for minimum size, they are ruggedly constructed and accept a standard .080 diameter test prod. They nylon insulator is available in any of nine brilliant colors to permit convenient visual coding of circuit check points. An outstanding feature of this jack is the ease and speed with which it may be mounted on a panel or chassis. This is done merely by inserting the insulator in a hole of suitable diameter and pressing the contact assembly into the insulator until it is firmly seated. (See dimension data for recommended insertion tool). The portion of the insulator extending behind the panel expands slightly, locking the unit firmly in place. The entire mounting operation is performed from the front of the panel.



ELECTRICAL SPECIFICATIONS

1. Contact Resistance (at room temperature, with standard .080 diameter test prod): Less than .0015 ohm.
2. Capacitance to ground (jack mounted on .052″ thick metal panel): 3mmfd.
3. Voltage breakdown: Arcing at 10 KVDC (front of jack to panel, mounted on .052″ thick panel.

PHYSICAL SPECIFICATIONS

1. Overall length: .655 max. ,
2. Insulator diameter: .286 max.
3. Insulator material: per MIL-M-20693.
4. Contact material: Beryllium-copper, per QQ-C-533, Cond. A., gold-plated.
5. Contact sleeve material: Brass per QQ-B-626, gold-plated.
6. Mounting hole diameter: .218 ± .001
7. Range of acceptable panel thickness: .031-.093
8. Weight: .002 lb. each

CIRCUIT BOARD MOUNTING BRACKETS

The Raytheon Circuit Board Mounting Bracket is a heavy duty component designed to mount terminals, printed circuits and resistor boards rigidly. Stacked assemblies need Fig. 1 style.

Each bracket will support a load of one-half pound when subjected to vibrational frequencies through 55 CPS with table excursions up to .060 inches or impact loads through 2000 foot-pounds.

- Four sizes for panels from 1-3/8″ to 3-7/16″ wide
- Provides Rigid Support under Shock or Vibration
- Mounts Single or Double Panels
- Meets Military Specifications MIL-E-16400A (Ships), MIL-E-5400, and MIL-P-11268B (Sig C.)
- Formed from .090″ Cold-Rolled Carbon Steel, Cadmium Plated

RDI barrier

NEW!
SERIES
3
QUARTER INCH

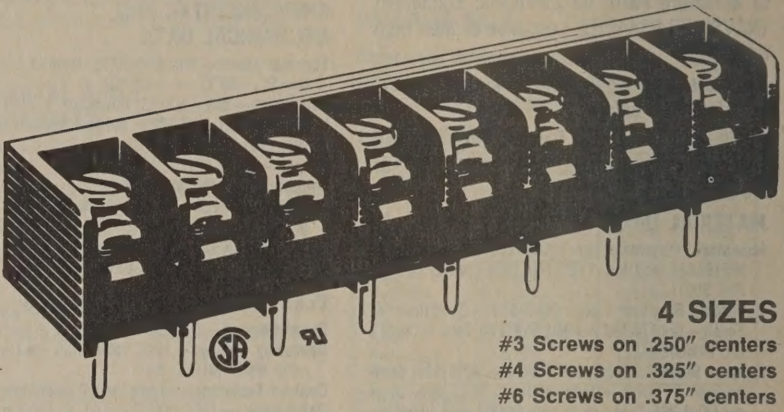
...a fresh approach to field wiring

.250″ ctr - ctr spacing featuring #3-56 screws.

New packaging design opportunities are yours as the new sub-miniature series 3 joins RDI's unique terminal blocks. All the popular terminal shapes & styles are available as featured in larger blocks.

RDI pioneered molding in resilient plastic, wire-ready (raised) screws, flat p.c. pins, back-barrier, integral stand-offs.

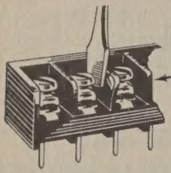
All RDI terminal blocks are available from local authorized distributors.



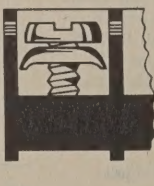
4 SIZES

#3 Screws on .250″ centers
#4 Screws on .325″ centers
#6 Screws on .375″ centers
#8 Screws on .4375″ centers

here's why RDI is the leader in terminal block design...

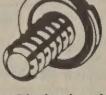


BREAK RESISTANT BARRIERS

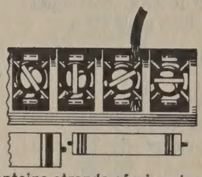


RAISED SCREWS... READY FOR WIRING

featuring wire-clamping screws... secures 2 different wires, eliminates need to lug wires.



Binder head screws also available

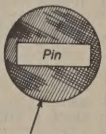


BACK BARRIER safeguards components from field wiring...

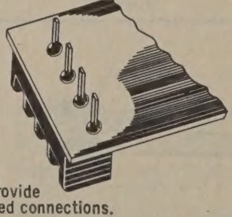
contains strands of wire-stops shorting with adjacent wire.

Stand-offs allow cleaning flux form the top side of pcb.

Integral Stand-offs



solder



Flat p.c. pins provide stronger soldered connections.

SPECIFICATIONS

BARRIER MATERIALS

Standard: Polypropylene, U.L. grade 94V-0, 105°C operating, black.
Premium: Polyester, U.L. grade 94V-0, 130°C operating, black.

TERMINALS

Standard: Steel, bright-acid-tin plated.
Premium: Brass, bright-acid-tin plated

SCREWS

Standard: Nickel plated steel binder head or with captive wire-clamping plate.
Premium: Nickel plated brass. Special order.
Sizes: #3-56, 4-40, 6-32, 8-32.

RATING

#3 Series: 5 Amperes, 300 Volts, 2500V. Dielectric
#4 Series: 10 Amperes, 300 Volts, 2500V. Dielectric
#6 Series: 15 Amperes, 600 Volts, 2500V. Dielectric
#8 Series: 20 Amperes, 600 Volts, 2500V. Dielectric

WIRE RANGE

#3 Series: 18 to 22 AWG, each side of screw
#4 Series: 14 to 20 AWG, each side of screw
#6 Series: 12 to 18 AWG each side of screw
#8 Series: 10 to 16 AWG each side of screw

APPROVALS

Underwriters Laboratories Inc. recognized under Component-Wire Connectors, File E54800, Guide ZMVV2.
Canadian Standards Association certified File #LR30811, Guide 184-N-90, Class 3211.

CATALOG NUMBER CODE

To specify standard and readily available premium materials and construction, use the codes listed below to develop the catalog number. For other variations, contact the factory.

6 PC V - 06 - 001

1. Size
2. Terminal Style
3. Terminal Orientation
4. Number of screw terminals
5. Modifier

1. Screw Size/Spacing

3 = #3-56 on .250″ centers.
4 = #4-40 on .325″ centers.
6 = #6-32 on .375″ centers.
8 = #8-32 on .4375″ centers.

2. Terminal Style

PC = Printed-circuit pin
QC = Quick-Connect tab[3]
ST = Solder turret
TB = Surface Mount (no feed-thru)
WW = Solderless-wrap pin[4]

3. Terminal Orientation

V = Vertical (regular)
R = Right angle

4. Number of Screw Terminals

(Do not include barrier positions)
For example:
02 = 2 Screw terminals
10 = 10 Screw terminals
#3 Series = 32 max.
#4 Series = 30 max.
#6 Series = 28 max.
#8 Series = 25 max.

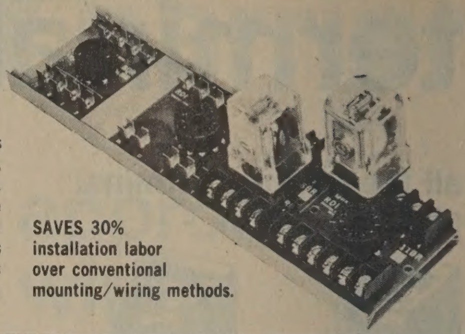
RDI/Reed Devices Inc.

SNAPTRACK™ MOUNTING SYSTEM

The SNAPTRACK™ mounting system provides a low cost convenient method for installing plug-in relays, timers and tubes in control equipment. Socket assemblies snap into position along continuous sections of SNAPTRACK, an extruded PVC, non-conductive mounting track, 3-5/32" (TK Series) wide and new 2-7/8" (2TK Series) wide. The track may be installed with rivets or screws. Socket assemblies consist of a socket mounted to an epoxy/glass P.C. board with choice of specially designed U.L. grade polypropylene barrier type screw terminal blocks or 1/4" quick-connect tabs. The assembly is then wave soldered for circuit reliability. Terminal points are clearly numbered with epoxy ink. Screws are in the raised position and feature captive wire clamps which eliminate need for bending of, or attaching hook or ring terminals to wires. Wired-in 120V, 240V neon lamp to indicate power at coil terminals available as option. Add "1" or "2" to Catalog Number.



SAVES 30% installation labor over conventional mounting/wiring methods.

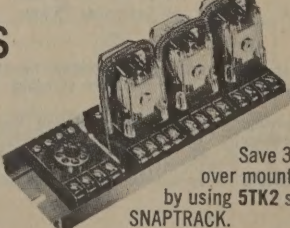
SNAPTRACK™ MOLDED SOCKET ASSEMBLIES

FEATURES

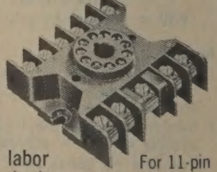
- **Rugged.** Molded of break and chip resistant U.L. recognized Lexan.
- **Positive Contact.** Phosphor bronze socket contacts.
- **Fast Wiring.** Screws feature captive wire-clamp plates, eliminate need for crimp-on terminals.
- **Versatile Mounting.** Mount singly or gang via optional 5TK2 series SNAPTRACK.

Rated 10 Amp., 300 Volts. Wire Range: 12 through 20 AWG.

For octal relays and timers. **SM8-C** (Screws w/wire-clamps) **SM8-A** w/binder head screws.



Save 30% labor over mounting singly by using **5TK2** series SNAPTRACK.



For 11-pin relays and timers. **SM11-C.** Screws have wire clamps.

THE ELECTRONIC DISTRIBUTORS MASTER CATALOG
'78
FORMERLY: OFF-THE-SHELF CATALOG
THE ONLY NATIONAL CATALOG OF ELECTRONIC PARTS, INSTRUMENTS AND EQUIPMENT DESIGNED EXCLUSIVELY FOR DISTRIBUTORS AND THEIR CUSTOMERS.

YESTERDAY'S RADIO MASTER IS TODAY'S

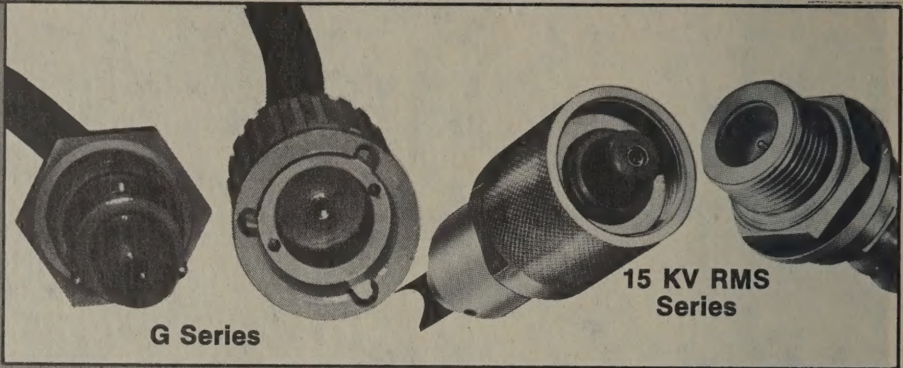
ELECTRONIC DISTRIBUTORS MASTER CATALOG

Known as O-T-S, OFF-THE-SHELF CATALOG until this edition, the MASTER CATALOG encompasses the following product areas: audio and communications equipment; electromechanical components; electronic circuit components and subassemblies; panel components and hardware; production equipment and tools; test instrumentation; power sources; wire and cable; and related materials and chemicals.

The MASTER CATALOG is broken down into four basic sections. **A GENERAL INDEX** which lists manufacturers and products alphabetically. **A MANUFACTURERS' CATALOG SECTION** which displays their respective product pages and lists their addresses and phone numbers. **A MANUFACTURERS' DIRECTORY,** where participating manufacturers, again listed alphabetically with addresses and phone numbers, highlight their distributors. And a **GEOGRAPHIC DISTRIBUTORS' DIRECTORY** which includes the names, addresses and phone numbers of the local distributors nationwide which stock the products of manufacturers whose data appears in the "Manufacturers' Catalog Section."

Rowe Coaxial Connectors and Cable Assemblies

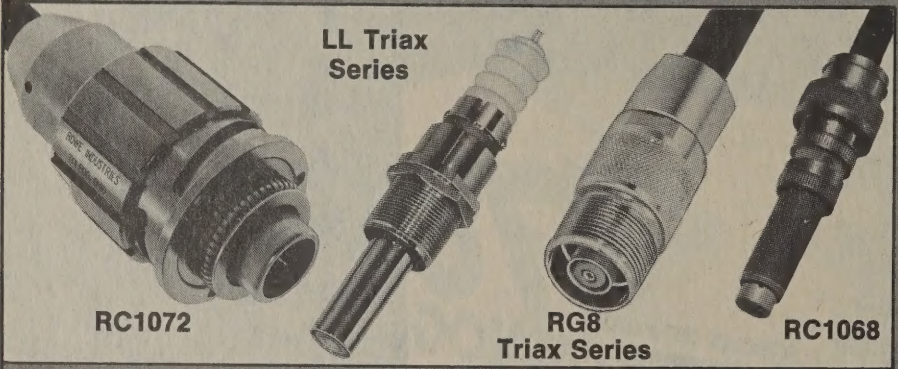
Employ high-voltage, corona-free design techniques. They are ideal for use in pulse as well as DC voltage applications, through 150 KV. A wide variety of molded-on or field assembly types are offered. Available in quick disconnect or screw couplings.



G Series
15 KV RMS Series

Rowe Triaxial Connectors and Cable Assemblies

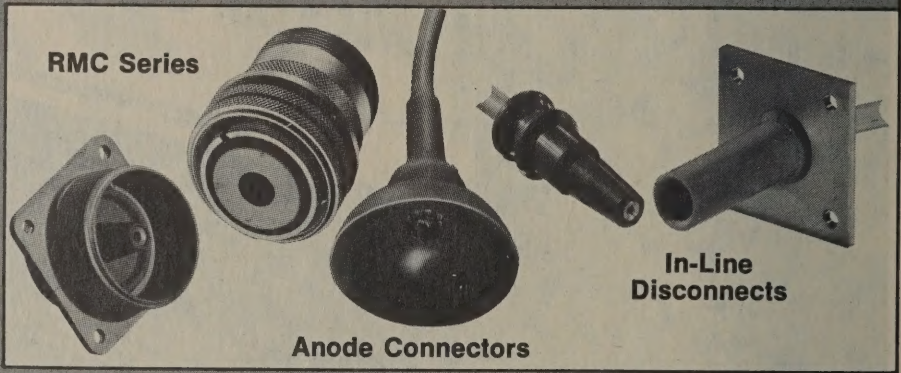
A full spectrum of both molded-on and field assembly types are available for a wide variety of cable types such as the triaxial version of RG-8, up through and including specialized construction for operation in excess of 100 KV.



LL Triax Series
RC1072
RG8 Triax Series
RC1068

Rowe Single Contact Connectors and Cable Assemblies

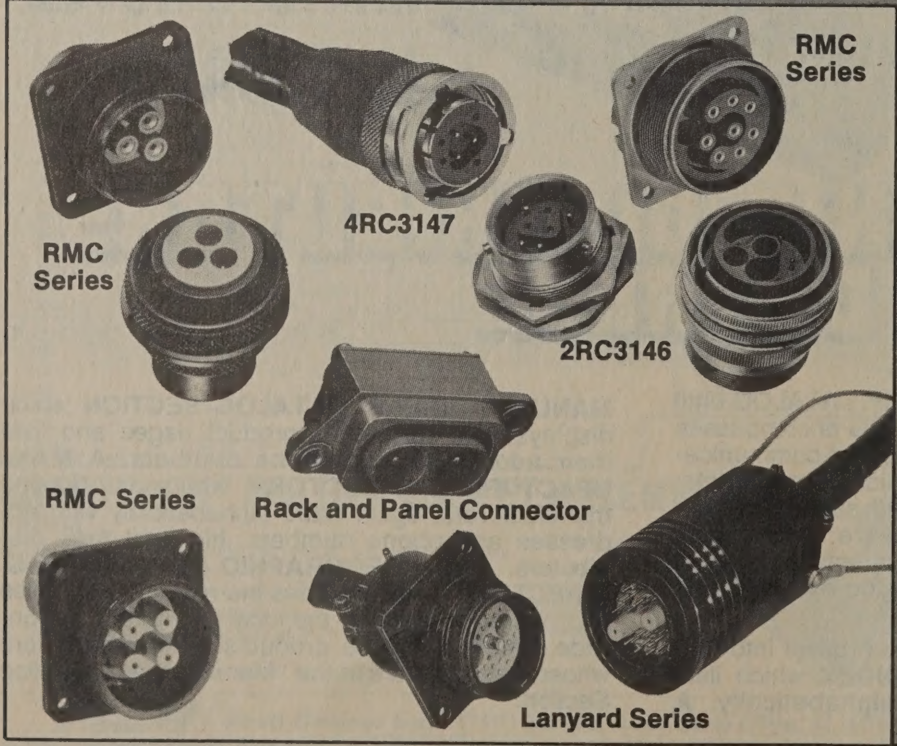
Offered is an extensive listing of single contact high-voltage assemblies, which include anode connectors, in-line disconnects and others which are used unshielded to solve your simple high-voltage interconnection problems.



RMC Series
In-Line Disconnects
Anode Connectors

Rowe Multiple Contact Connectors and Cable Assemblies

Offer contact arrangements from one to thirty contacts, panel receptacles, cable plugs, rack and panel combinations, in-line types and many others. Both field assemblies and molded-on types are standard in this line.



RMC Series
4RC3147
RMC Series
2RC3146
RMC Series

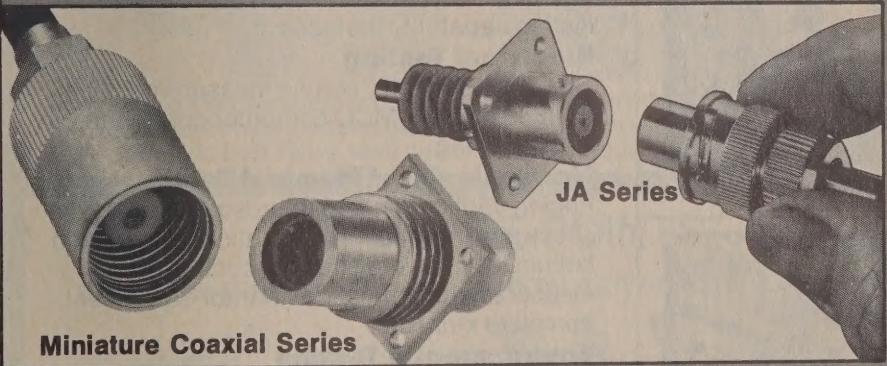
FOR YOUR COMMERCIAL, INDUSTRIAL OR MILITARY DESIGN NEEDS



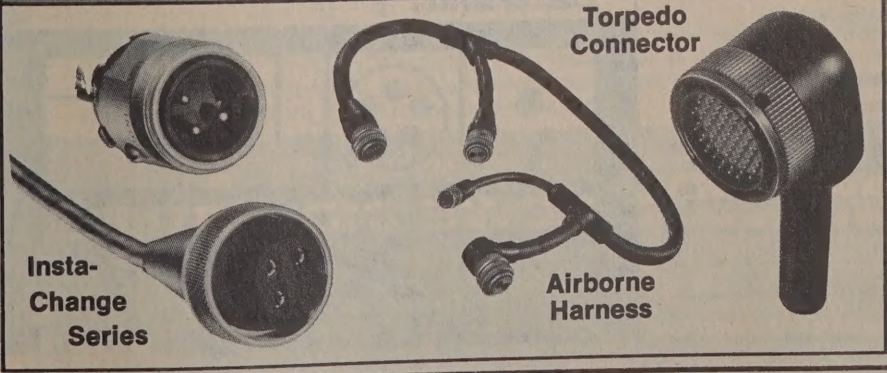
Rowe
Miniature Coaxial
Connectors and Cable Assemblies

Employ the same high-voltage design techniques as the coaxial series, but are much smaller in size for use in restricted spaces. Available in quick disconnect and screw couplings (the JA Series can be adapted to such standard type cables as RG 58 and RG 59).

Rowe
Subminiature Coaxial
Connectors and Cable Assemblies

Are ideally suited for use where space is at a premium. Employing the traditional Rowe high capability features, the subminiature sizes offer unusually high voltage operating capabilities, through 20 KV.

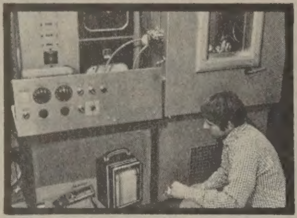
Subminiature Coaxial Series
Pancake Series



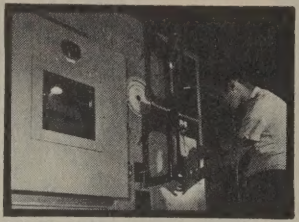
Rowe
Low-Voltage, Molded-On
Connectors and Cable Assemblies

For use in severe environments. We can mold your STD connectors to cable for an environmental seal and provide a molded strain relief. Our exclusive Insta-Change series was designed for factory, mining, nuclear and oil well use.

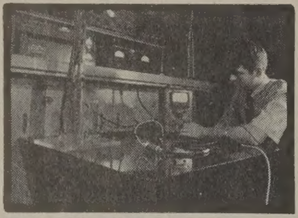
ROWE knows Specialized Interconnections



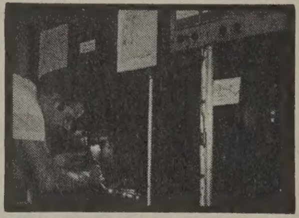
Life testing facilities.



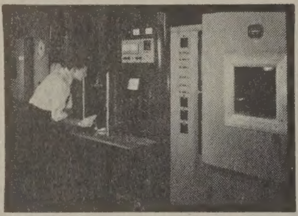
High altitude pressure chamber.



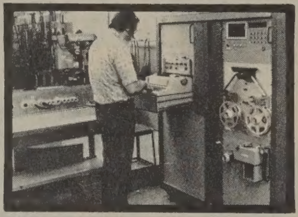
RFI-EMI-EMP test chamber.



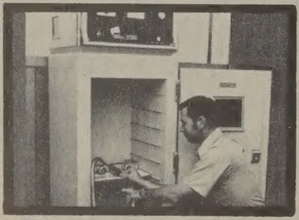
High voltage, corona and dielectric test chamber.



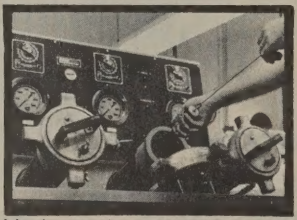
Humidity chamber.



DIT-MCO computerized random access testing.



X-Ray equipment.



Hydrostatic pressure testing.

Rowe Industries, 6100 Benore Road, Toledo, Ohio 43612

Gentlemen: Please send technical literature I've checked. Thank you.

- ☐ Corona: simple techniques to eliminate it
- ☐ H.V. In-Line Disconnects and Anode Connectors thru 60 KV
- ☐ Rowe multi-contact H.V. connectors
- ☐ Sub-Miniature H.V. coax connectors thru 15 KV
- ☐ RG cable H.V. connectors (JA Series)
- ☐ Miniature Coax Connectors thru 30 KV
- ☐ Corona-free coax connectors thru 20 KV
- ☐ Corona-free high pulse coax connectors thru 40 KV

City ______________________ Zip ____________

We're specialists in complete interconnection systems and, in particular, connectors and cable assemblies for extreme environments and unique applications. In fact, we've designed and manufactured hundreds of different connectors and cable assemblies for nuclear instrumentation and control, high voltage, corona-free thru 200 KV+, underwater instrumentation, geophysical, high and low temperatures, corrosive environments, high altitude and deep space, high and low pressures and other sophisticated military and industrial systems.

Rowe engineers design and specify custom products to meet exacting requirements and Rowe craftsmen produce them to the highest quality standards. In addition, we operate one of the most complete testing facilities in the industry. Our destructive and non-destructive testing capability includes:

Electrical Testing
Dielectric strength, corona measurement, RFI/EMI and DIT-MCO computer controlled circuit testing.

Mechanical and Physical Testing
Plating verification thru microscopic analysis, shock and vibration, hydrostatic pressure and helium leak, tensile strength, contact force measurement, optical comparitor equipment, complete x-ray lab.

Environmental Testing
Altitude thru 150,000 feet, temperature, humidity, corrosive atmospheres, accelerated life combining various conditions simultaneously.

Quality Control
Rowe's quality control and inspection systems meet or exceed MIL-Q-9858, ISR-1, NRC's 10CFR50 appendix B and standards of all aerospace and industrial firms.

With so many interconnections to choose from, chances are that we've already developed the one that meets your needs. If not, we'll custom design one for you.

INSULATED TIP PLUG
Solderless

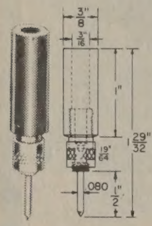
HANDLE: MOLDED NYLON, per MIL-P-20693. Red, Black, Yellow, Green, Blue, White. **SPECIFY COLOR**

PLUG: Brass, nickel plated.

RATING: 12 Amps AC for 10°C Temp. rise, continuous duty.

DESCR.: Solderless: wire fits through body of tip then wrapped around screw portion and tightened with knurled collar. Threaded type. Fits standard phone tip jacks. **Std. Pkg. 100**

No.	Type	NET Per C
200	Senior	$25.00



INSULATED TIP PLUG
Solderless

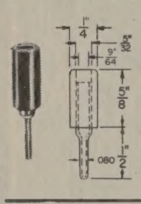
HANDLE: MOLDED NYLON, per MIL-P-20693. Red, Black, Yellow, Green, Blue, White. **SPECIFY COLOR**

PLUG: Brass, nickel plated.

RATING: 12 Amps AC for 10°C Temp. rise, continuous duty.

DESCR.: Solderless: wire fits through body of tip then wrapped around screw portion and tightened with knurled collar. Threaded type. Fits standard phone tip jacks. **Std. Pkg. 100**

No.	Type	NET Per C
201	Junior	$25.00



INSULATED TIP PLUG
Solder Type

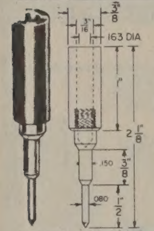
HANDLE: MOLDED BUTYRATE, per Fed. Spec. L-P349A, Type 3, Class MS. Red and Black. **SPECIFY COLOR**

PLUG: Brass, nickel plated our No. 158.

RATING: 12 Amps AC for 10°C Temp. rise, continuous duty.

DESCR.: Drawn hollow tip for easy soldering. Fits standard phone tip jack. **Std. Pkg. 100**

No.	NET Per C
237	$10.00



INSULATED TIP PLUG
Heavy Duty Type

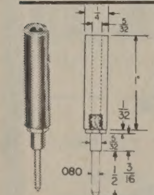
HANDLE: MOLDED NYLON, per MIL-P-20693. Red, Black, Yellow, Green, Blue, White. **SPECIFY COLOR**

PLUG: Brass, nickel plated.

RATING: 12 Amps AC for 10°C Temp. rise, continuous duty.

DESCR.: Large diameter well enables soldering of heavy duty wire directly into plug. Fits standard phone tip jacks. **Std. Pkg. 100**

No.	NET Per C
229	$26.00



SUB-MINIATURE TIP PLUG

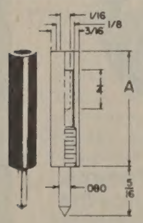
HANDLE: FIBRE, per MIL-F-1148A, Grade CH. Red, Black. **SPECIFY COLOR**

PLUG: Brass, nickel plated.

RATING: 12 Amps AC for 10°C Temp. rise, continuous duty.

DESCR.: Ideally suited for checking sub-miniature equipment. Fits standard phone tip jacks. **Std. Pkg. 100**

No.	NET Per C
270	$30.00



MINIATURE TIP PLUG AND TEST PROD

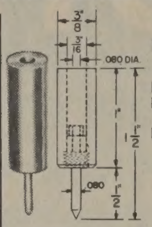
HANDLE: MACHINED BUTYRATE, per Mil-P-10408A, Type I, Class II. Red or Black. **SPECIFY COLOR**

PLUG: Brass, nickel plated.

RATING: 2 Amps AC for 10°C Temp. rise, continuous duty.

DESCR.: Ideally suited for checking sub-miniature equipment. Fits standard phone tip jacks.

No.	Length (A)	Std. Pkg.	NET Per C
244	3/4"	100	$20.00
666	3"	25	33.00



INSULATED SHORT TIP PLUG

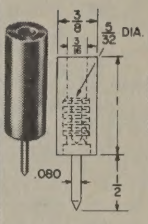
HANDLE: MOLDED NYLON, per MIL-P-20693. Red, Black, Yellow, Green, Blue, White. **SPECIFY COLOR**

PLUG: Brass, nickel plated.

RATING: 12 Amps AC for 10°C Temp. rise, continuous duty.

DESCR.: Inserts flush to insulated handle, no metal exposed; eliminates possibility of shock or grounding. Fits standard phone tip jacks. **Std. Pkg. 100**

No.	NET Per C
203	$22.00



INSULATED SHORT TIP PLUG
Solderless

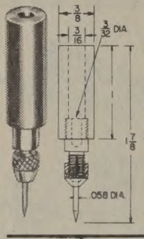
HANDLE: MOLDED NYLON, per MIL-P-20693. Red, Black, Yellow, Green, Blue, White. **SPECIFY COLOR**

PLUG: Brass, nickel plated.

RATING: 12 Amps AC for 10°C Temp. rise, continuous duty.

DESCR.: Solderless: wire fits through handle and body of tip then wrapped around screw portion. Inserts flush to insulated handle, no metal exposed, eliminates possibility of shock or grounding. Fits standard phone tip jacks. **Std. Pkg. 100**

No.	NET Per C
283	$22.00



INSULATED TIP PLUG
Phono Needle

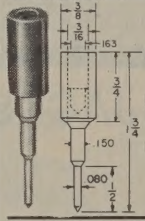
HANDLE: MOLDED NYLON, per MIL-P-20693. Red, Black, Yellow, Green, Blue, White. **SPECIFY COLOR**

PLUG: Brass, nickel plated.

RATING: 12 Amps AC for 10°C Temp. rise, continuous duty.

DESCR.: Removable chuck for easy replacement of broken needle. Needle pierces corrosion or plating for positive reading. **Std. Pkg. 100**

No.	NET Per C
216	$34.00



ADAPTER
Banana Plug to Tip Plug

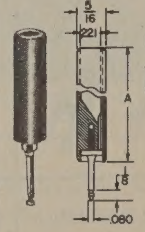
HANDLE: MOLDED BUTYRATE, per Fed. Spec. L-P349A, Type 3, Class MS. Red and Black. **SPECIFY COLOR**

PLUG: Brass, nickel plated.

RATING: 12 Amps AC for 10°C Temp. rise, continuous duty.

DESCR.: Accepts standard banana plugs, adapts to standard tip plug. **Std. Pkg. 100**

No.	NET Per C
215	$26.00



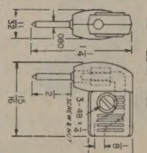
SUB-MINIATURE TIP PLUG AND TEST PROD

HANDLE: Molded Nylon, per MIL-P-20693A. Available in Red or Black. **SPECIFY COLOR**

TIP: Brass, Silver plated.

DESCR.: Solderless assembly. Ideal for use with sub-miniature printed-circuit tip jacks. Sharp tip breaks flux or oxide coating on printed-circuit pattern for positive contact when used as prod. Grooved head of prod makes positive contact when laid across wires. Fits all standard .080" tip jacks.

No.	Handle (A)	Overall (B)	Std. Pkg.	NET Per C
348	1 inch	1 5/16"	100	$40.00
349	4 inch	4 5/16"	25	50.00



METER TIP PLUG

HANDLE: MOLDED PHENOLIC plastic, Red and Black. **SPECIFY COLOR**

PLUG: Brass, nickel plated.

RATING: 12 Amps AC for 10°C Temp. rise, continuous duty.

DESCR.: Molded in two halves for easy assembly with screw and nut. Fits standard phone tip jacks. **Std. Pkg. 50**

No.	NET Per C
235	$35.00

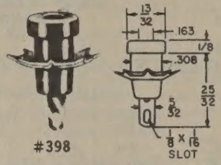
"SPEEDI-MOUNT" BANANA JACK



#398

BODY: MOLDED PHENOLIC plastic. Red, Black, Yellow, Green, Blue, White. **SPECIFY COLOR**

CONTACT: Brass, cadmium plated.

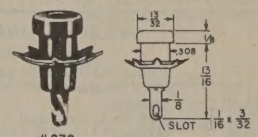
WASHER: Steel cadmium plated, internal and external tooth.

RATING: 12 Amps AC for 10°C Temp. rise, continuous duty. 3 K Volts 60 cycle AC continuous working voltage. CAPACITANCE 4.0 pf.

DESCR.: Unusual dished lockwasher permits fast assembly. Teeth embed into jack and panels, prevents pulling out and turning. Mounts in 5/16" hole in panels up to 3/16" thick. Accepts standard banana plugs. **Std. Pkg. 100**

No.	NET Per C
398	$10.00

"SPEEDI-MOUNT" TIP JACK



#279

BODY: MOLDED PHENOLIC plastic, Red, Black, Yellow, Green, Blue, White. **SPECIFY COLOR**

CONTACT: Phosphor bronze.

WASHER: Steel cadmium plated, internal and external tooth.

RATING: 12 Amps AC for 10°C Temp. rise, continuous duty. 3 K Volts 60 cycle AC continuous working voltage. CAPACITANCE 3.0 pf.

DESCR.: Unusual dished lockwasher permits fast assembly. Teeth embed into jack and panels, prevents pulling out and turning. Mounts in 5/16" hole in panels up to 3/16" thick. Accepts standard phone tip plugs. **Std. Pkg. 100**

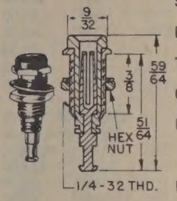
NYLON TIP JACK

With Metal Shell
Made to meet MIL-C-39024/10

COLOR CODE SUFFIX
(Add to Catalog Number as Required)

—101 WHITE	—105 BLUE	—108 BROWN
—102 RED	—106 ORANGE	—112 PURPLE
—103 BLACK	—107 YELLOW	—113 GREY
—104 GREEN		



BODY: MOLDED NYLON, per MIL-M-20693. Available in 10 colors as coded above. **SPECIFY COLOR**

SHELL & NUT: Brass, per QQ-B-626, nickel plated per QQ-N-290.

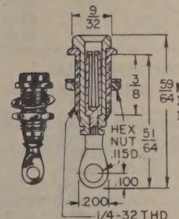
LOCKWASHER: Phospher bronze, per QQ-B-750, nickel plated per QQ-N-290.

TERMINAL: Brass, per QQ-B-626, gold plated per MIL-G-45204

CONTACT: Beryllium copper, per QQ-C-533, gold plated per MIL-G-45204.

RATINGS: *Operating voltage*: 2 KV, 60 Hz, at sea level. *Current*: 5 amps, AC, for 10°C temp. rise, continuous duty. *Contact resistance*: 2 milliohms max at rated current.

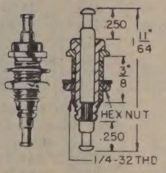
DESCR: Nylon tip jack accepts standard .080" tip plugs. Caged, closed entry contact assures maximum retention with minimum contact resistance. Metal shell eliminates possibility of stripping threads during assembly. Mounts in 1/4" hole in panels up to 1/4" thick.



No.	TYPE	DASH NO.	STD PKG.	Net per C
1501	Eyelet	-11 thru -20	100	$60.00
1502			50	$70.00

COMMERCIAL NYLON TIP JACK

With Metal Shell



BODY: MOLDED NYLON, per MIL-P-20693. Available in 10 colors as coded above **SPECIFY COLOR.**

SHELL & NUT: Brass, nickel plated.

LOCKWASHER: Phospher bronze, nickel plated.

CONTACT: Phospher bronze, bright tin plate.

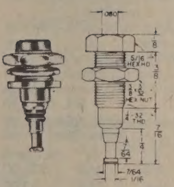
FEED THRU: Brass, bright tin plate.

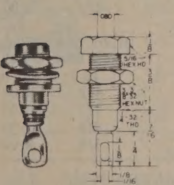
RATINGS: 2 KV, 60 Hz AC continuous working voltage. 10 amps AC for 10°C temp. rise, continuous duty. Capacitance 10 pf.

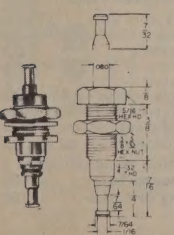
DESCR: Nylon tip jack accepts standard .080" tip plugs. Split contact provides low contact resistance. Metal shell eliminates possibility of stripping threads during assembly. Mounts in 1/4" hole in panels up to 1/4" thick.

No.	TYPE	STD. PKG.	Net per C
3501	Turret	100	$ .30
3502	Eyelet	50	$ .45
1503	Feed-Thru	50	$ .35

ALL NYLON TIP JACK







Completely Molded Nylon Jack.

Fits, all standard phone tip plugs. Contact recessed in head for safe contact. Hexagon head for grip in tightening. Mounts in 1/4" hole in panels up to 1/4" thick. Meets following requirements:

1. Salt Spray Test—Withstands 100 hours.
2. Rating—15 Amps AC for 10°C Temp rise, continuous duty. 5 K Volts 60 cycle AC continuous working voltage. CAPACITANCE 3.0 pf.
3. Insulation Resistance—5,000 megohms.
4. Operating Temperature— —55 to +85°C.
5. Material Specifications—
   - A. Body: Molded Nylon, per MIL-P-20693A. Specify Color as coded above.
   - B. Center contact: Heat treated Phosphor Bronze, Silver plated per QQ-S-365, Gold plated overall No. 1507 Brass, per QQ-B-626, Comp. 22. plated as above.
   - C. Hex Nut: Brass Nickel Plated.

COLORS: Available in White, Red, Black, Green, Blue, Orange, Yellow, Brown, Purple and Grey. Specify color as coded above.

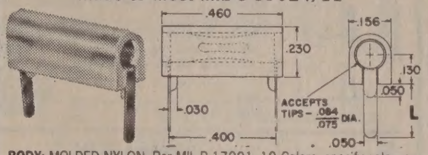
1507	Feed Through	50	34.00

RIGHT ANGLE PRINTED CIRCUIT TEST JACK

MILITARY TYPE
Made to Meet MIL-C-39024/11



BODY: MOLDED NYLON, Per MIL-P-17091. 10 Colors, specify color, as coded.

SPRING: Beryllium Copper, Per QQ-C-533.

FINISH: Gold Plate, per MIL-G-45204, CLASS I. Type 2. Nickel underplate, per QQ-N-290, Class I Type 7, .0002" thick.

MOUNTING: Mounts in .052" dia. holes on .400" centers. Board thickness as specified below. Can be spaced side-by-side .160" on centers minimum.

MECHANICAL DATA: Thermal shock, vibration, humidity, insulation resistance, salt spray per MIL-STD-202B. All mechanical Tests per applicable section of MIL-C-39024. Insertion force 30 oz. max., withdrawal force 3 oz. min., with .080" (.001") probe.

RATINGS: Operating voltage 1500 volts, 60 cps RMS, sea level. 350 volts, 60 cps RMS at 50,000 feet. 5 amps. AC max. current rating. Contact resistance 20 millivolt drop max. At specified current, at 25° C.

DESCR.: Double entry design, probe inserts from either end of jack. Closed entry construction will not accept probes larger than .084", will contact probes down to .074". Closed bottom design keeps jack from fouling with solder of flux. Locking ears keep jack firmly in board until soldered. Precise dimensions allow for automated assembly on boards.

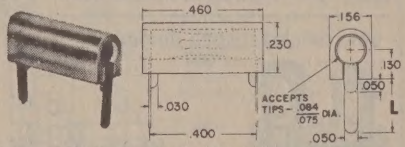
MILITARY TYPE
Made to Meet MIL-C-39024/11



BODY: MOLDED NYLON, Per MIL-P-17091. 10 Colors, specify.

SPRING: Beryllium Copper, Per QQ-C-533.

FINISH: Gold Plate, per MIL-G-45204, CLASS I. Type 2. Nickel underplate, per QQ-N-290, Class I Type 7, .0002" thick.

MOUNTING: Mounts in .052" dia. holes on .400" centers. Board thickness as specified below. Spaced side-by-side. 160" on centers minimum.

MECHANICAL DATA: Thermal shock, vibration, humidity, insulation resistance, salt spray per MIL-STD-202B. All mechanical Tests per applicable section of MIL-C-39024. Insertion force 30 oz. max., withdrawal force 3 oz. min., with .080" (.001") probe.

RATINGS: Operating voltage 1500 volts, 60 cps RMS, sea level. 350 volts, 60 cps RMS at 50,000 feet. 5 amps. AC max. current rating. Contact resistance 20 mV drop max. At specified current, at 25° C.

DESCR.: Double entry design, probe inserts from either end of jack. Closed entry construction will not accept probes larger than .084", will contact probes down to .074". Closed bottom design keeps jack from fouling with solder of flux. Locking ears keep jack firmly in board until soldered. Precise dimensions allow for automated assembly on boards.

BODY: MOLDED NYLON, Per MIL-P-20693A. 10 Colors, specify color, as coded.
SPRING: Beryllium Copper, Per QQ-C-533.
FINISH: Silver underplate, .0002" min., per QQ-S-365, Type I, with .00003" Gold overplate; per MIL-F-14072, M-310.
RATING: 15 Amps AC for 10°C Temp. rise, continuous duty. 1.5 KV. 60 cycle AC continuous working voltage. Contact resistance 5 milliohms max. at rated current. Capacitance less than 5 MHz at 1 pf.
MOUNTING: Mounts in .052" dia. holes on .400" centers, in boards up to 3/16" thick. Can be spaced side-by-side .160" on centers min.
MECHANICAL DATA: Thermal shock, vibration, humidity, insulation resistance, and salt spray tests per MIL-STD-202B. Solderability per MIL-S-6872. Insertion and withdrawal force: 8 oz. min., 5 lbs. max. with .080" (±.001") dia. probe.
DESCR.: Double-entry design, probe inserts from either, end of jack. Closed entry construction will not accept probes larger than .084", will contact probes down to .074". Closed bottom construction keeps jack from fouling with solder or flux. Locking ears hold jack firmly in board until soldered. Precise dimensions allow for automated assembly on boards.

MADE TO MEET MS-16107 SPEC.

Heavy molded nylon body and cup washer prevent high-voltage flashover to panel. Meets following requirements:

1. Salt Spray Test—Withstands 100 hours.
2. Electrical Rating—15 Amps AC for 10°C Temp. rise, continuous duty. 5 KV 60 cycle AC continuous working voltage. Millivolt drop per MIL-J-6751. CAPACITANCE 2.0 pf.
3. Material Specifications.
    - A. Insulator and Washer:—Molded Nylon, per MIL-P-20693A. Colors to Fed. Std. 595. Specify color as coded above.
    - B. Insert Shell and Nut: Brass, Nickel plated per QQ-N-290, type V (FC).
    - C. Contact: Phosphor bronze, Silver plated .0002" per QQ-S-365, Gold plated overall.

Specify color as coded above, 10 colors.

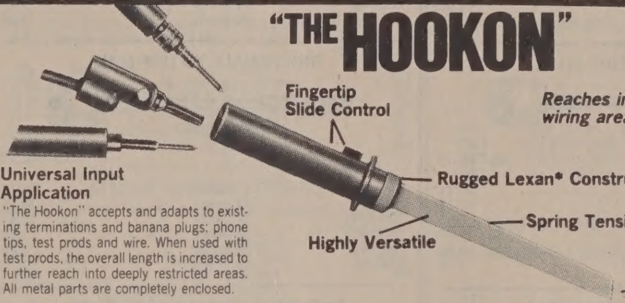
"THE HOOKON"

Easy to use...
Versatile...

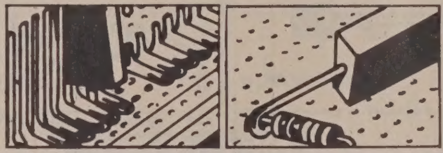
Reaches into the densest wiring areas, quickly



Fingertip Slide Control
Rugged Lexan* Construction
Spring Tension Sensitivity
Highly Versatile
Self-Locking "Open" Position

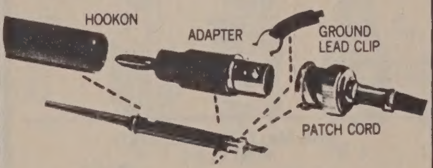
Universal Input Application
"The Hookon" accepts and adapts to existing terminations and banana plugs: phone tips, test prods and wire. When used with test prods, the overall length is increased to further reach into deeply restricted areas. All metal parts are completely enclosed.

Test Point Capability...
connects to bare wires — 26-14 gauge; .025" square; and .025" x 050" wire wrap terminations. It simplifies "touch" contact to P.C. pads, terminals, solder junctions, etc., with contact wire extended and locked. Fits between I.C. terminals on .100" centers; front slot accepts tails without extending contact.



Use Vertically or Laterally...
"The Hookon" reaches through the densest wire jungles and hooks onto leads, pins, square wire wraps for safe, sure connections. The fingertip slide control includes a self-locking open postion and a "no hands spring grip" upon trigger release.

NEW HOOKON *ACCESSORIES*



COAX CABLE ADAPTER FOR HOOKON BNC Plug to BNC Female

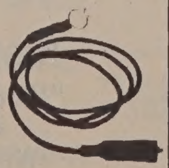
Adapts Hookon for use with scopes, generators and other equip't requiring shielded or coaxial inputs. **Std. pkg. 6**

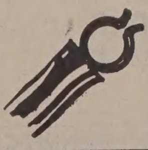
No.	
3071	Net. ea. $2.00

GROUND LEAD CLIP EXTENSION

Clips between shell and BNC to extend ground lead — 18"L. with insulated "mini" alligator clip. **Std. pkg. 6**

No.	
3072	Net ea. .60





RF PATCH CORD

Ideal for connecting Hookon with #3071 adapter to equip't using BNC or UHF inputs.

See eem page 15 for RF Patch Cord listing.

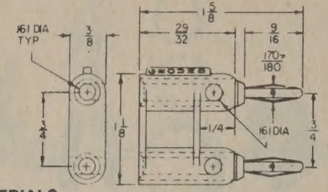
THE SMITH ORGANIZATION
has been a major supplier of electronic components to the industry for 25 years. Today, with its modern plant facilities and capabilities we are in a position to convert your ideas and needs, whether they be one or a million, and deliver what you want, when you want it!

Smith - *A Company Dedicated to Excellence in the Manufacture and Distribution of Electronic Components*

SPECIFY SMITH ELECTRONIC COMPONENTS

STOCKED BY LEADING DISTRIBUTORS NATIONWIDE

STANDARD (3/4" CENTERS) DUAL TEST ADAPTERS



MATERIALS

BODY: Molded BUTYRATE, PER Fed Spec. L-P439A, Type 3, Class MS. Color BLACK unless otherwise specified.
CONDUCTOR: Brass, per QQ-B-626, Comp. 22, 1/2 hard.
SPRING: Four-leaved beryllium copper, heat treated.
HEAD: Molded nylon, per MIL-P-20693A.
SHIELD: Drawn aluminum.
SCREWS: Steel, cadmium plated.

COLOR CODE SUFFIX

Add to Catalog Number as required

—102 RED —103 BLACK

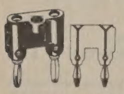
FINISHES

CONDUCTOR: Nickel plate, per QQ-N-290, Class I, Type VII.
SPRING: Nickel plate, as above.
TERMINAL: Gold washed.
CONNECTOR: Non-tarnish.
SHIELD: Black anodized.

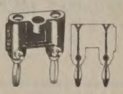
RATINGS

CURRENT: 15 Amps AC for 10° Temp. Rise, continuous duty, except where limited by co-axial connectors.
VOLTAGE: 5 KV, 60 cycle AC continuous working voltage, except where limited by co-axial connectors.
CAPACITY: 1.0 mmfd nominal between 3/4" spaced conductors.
RESISTANCE: 1 milliohm or less per conductor.

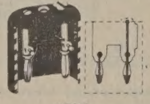
CABLE MOUNTED DUAL BANANA PLUGS



1675



1676



1787

SET-SCREW TYPE

REAR: 7/32 Dia. cable guide. Dual banana jacks on 3/4" centers.
FRONT: Dual banana plugs on 3/4" centers. Set-screws secure leads to conductors.
COLORS: Available in Red and Black. SPECIFY COLOR

No.	Std. Pkg. 10	NET Ea.
1675		$110.00C

TURRET-TERMINAL TYPE

REAR: 7/32 Dia. cable guide. Dual banana jacks on 3/4" centers.
FRONT: Dual banana plugs on 3/4" centers. Turret terminals for permanent solder connection of leads.
COLORS: Available in Red and Black. (Specify color)

No.	Std. Pkg. 10	NET Ea.
1676		$120.00C

SHIELDED TYPE

REAR: Mounting screw and locating boss. Inline cable entry with flush cable guide.
FRONT: Dual banana plugs 3/4" centers. Turret terminals for permanent solder connection of leads.
SHIELD: Aluminum shield electrically connected to GND conductor fully enclosed plug and mating binding posts to reduce noise pickup.

No.	Std. Pkg. 1	NET Ea.
1787		$2.25

PRINTED CIRCUIT PREPUNCH BOARDS

SPECIFICATIONS

All boards are precision-punched and pre-cut to size with various spacings to accommodate and provide economical mounting of components in Electronic circuitry. They are ideal for production and prototype uses. They can be etched as required, drilled, punched or sawed. The following specifications apply:

XXXP—Phenolic unclad, Type PBE-P per MIL-P-3115, 250° F Max.
EXXXP—Epoxy Paper, Type PEE per MIL-P-22324, 250° F Max.
XXXPC—Phenolic, Copper Clad, Type PP per MIL-P-13949, 250° F Max.
G-10—Epoxy Glass, unclad, Type GEE per MIL-P-18177, 300° F Max.
G-10—Epoxy Glass, Copper Clad, Type GE per MIL-P-13949B, 300° Max.

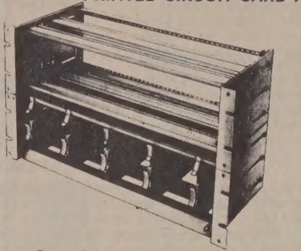
A UNIVERSALLY ADJUSTABLE PRINTED CIRCUIT CARD RACK



CARD RACK CAT. NO 3050 NET $30.00Each

Complete and Economical Support System for Printed Circuit Cards

ADJUSTABLE UP-AND-DOWN
For Card Widths 2⅜" to 4¾"

ADJUSTABLE FRONT-TO-BACK
For Card Lengths 3½" to 7¼"

ADJUSTABLE
For P.C. Connector Sizes

ADJUSTABLE LOCKING BAR
Holds Cards Securely against Rear Connectors

ADJUSTABLE CARD SPACING
Variable in .400" Increments

ADJUSTABLE CALIBRATED SIDE PANELS
For Fast, Precise Adjustment to Any Card Size

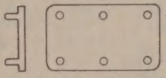
The above illustration demonstrates the simple, easy method of stacking the 3050 Card Rack with the use of catalog 3057 Stacking Plates listed below. Removal of the Guide Rails (3050-1) provides a Card Rack to accommodate larger sized P.C. Boards. (See illustration below.)

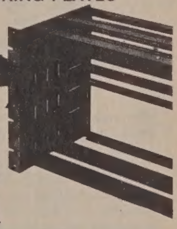
FEATURES

- CARD CAPACITY UP TO 39 CARDS,1/16" THICK
- CARD SIZES WITH LOCKING BAR, 2⅜" to 4¾" MAXIMUM WIDTH, 4⅜" TO 6½" MAXIMUM LENGTH. WITHOUT LOCKING BAR, 3½" TO 7½" MAXIMUM LENGTH.
- CARD SPACING .400" MINIMUM CENTERS, ADJUSTABLE IN .400" INCREMENTS.
- ACCOMMODATES CARD EDGE CONNECTORS WITH MOUNTING CENTERS FROM 0.936" MINIMUM TO 4.437" MAXIMUM.

Made of heavy gauge Anodized aluminum, guide and alignment members are extrusions. Supplied knock-down, all hardware, plastic card guides, step and assembly instructions. Complete with plastic board guides for 1/16" thick cards.

P.C. CARD RACK STACKING PLATES

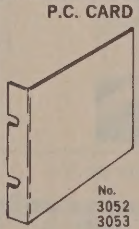




Designed to stack one or more No. 3050 card racks. Can also be used to create a double size card rack to accommodate larger size cards. Made of anodized aluminum, supplied with mounting hardware, available in pairs. **Std. Pkge. 1 Pair**

No.	Net Pair
3057	$3.50

P.C. CARD RACK BLANK END PLATES



Anodized aluminum blank-end plates for P.C. card racks. Designed for use with the standard No. 3050 hardware, to design custom rack sizes. Flanged and notched for RETMA mounting. Drill templates furnished with each pair of end plates to facilitate drilling within the P.C. card size limitations. Available in pairs. **Std. Pkge. 1 Pair**

HEAT SINKS FOR SEMI-CONDUCTOR CIRCUITRY

LIGHTWEIGHT — ECONOMICAL — VERSATILE

SMITH HEAT SINKS can be depended upon for economical and efficient cooling of semi-conductor devices under individual environmental operating conditions. Designed with pre-punched transistor hole patterns of pre-painted aluminum with louver design for more efficient heat transfer, and of silver-bearing copper, also louvered, for constant retention under severe shock and vibration environments. Ideal for printed circuit boards and metal surfaces where minimum space and weight are important considerations.

THERMAL RESISTANCE

Thermal Resistance θca is the measure of the effectiveness of a heat dissipator in keeping down the temperature of a semi-conductor while heat is being developed. The thermal resistance is multiplied by the number of watts dissipated; the result is a rise in temperature above ambient air. The lower the θca figure, the cooler the semi-conductor. The θca figures represent natural convection situations in a sea level atmosphere. Actual performance in individual situations depends upon air flow, proximity of interfering objects, thermal conductive effects of the chassis, and heat radiated or convected from other components.

1319	$12.00

RADIO CHASSIS PUNCHES

A complete line of chassis hole punches for swiftly cutting clean, accurately located holes in chassis and panels. An assortment of round, square, "D," and Keyed holes can be punched by inserting in drilled pilot hole, and turning with wrench. Finished hole is smooth, accurately sized without burrs. Round punches are provided with center-line markings for enlarging holes larger than pilot hole. Individually packed. **Std. Pkg. 1**

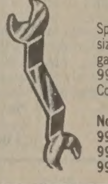
FIBRE WASHER KIT

Each kit contains about 1,000 Flat and Shoulder Washers, packed in an 18-compartment plastic box, in the following approximate quantities of SMITH standard washers:

100 each #2151, 2161, 2153, 2160; 75 each #2150, 2162; 60 each #2155, 2163; 50 each #2156, 2164, 2154, 2165; 35 each #2159, 2167; 25 each #2158, 2168; 10 each #2157, 2169.

No.	Std. Pkg. 1	NET Each
2173	Kit of 1,000 Washers	$20.00



SHAFT WRENCHES

Specially designed offset, double-end wrenches for most hex sizes encountered in electronic construction. Made of heavy gauge, cadmium plated steel, clearly marked with size. No. 999 is especially useful for Toggle Switch and Volume Control mounting nuts.

Std. Pkg. 25

No.	For Nut Sizes	NET per C
998	5/16" - 3/8"	$30.00
999	½ - 9/16"	30.00
997	Set of 2 above	60.00

SPECIAL REQUIREMENTS?

Use our Engineering and Production Facilities to design and develop new products or modify existing components to meet your specific needs.

"Specials are Standard with SMITH!"

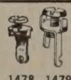
LOCKING TERMINAL LUG ASSORTMENT

A complete assortment of the most widely used Locking Terminal Lug styles, with hole sizes from #4 thru #10. Packed in a re-usuable clear plastic compartmented box. **Std. Pkg. 1**

No.	Approx. Quantity of Terminals	Net Ea.
1547	900	$20.00

TERMINAL LUGS & SCREWS



Recommended for heavy duty terminal strips. Lugs are tapped with screw inserted. Brass hot tinned.

Std. Pkg. 100

No.	Screw	NET Per C
1478	6-32	$6.00
1479	8-32	10.00

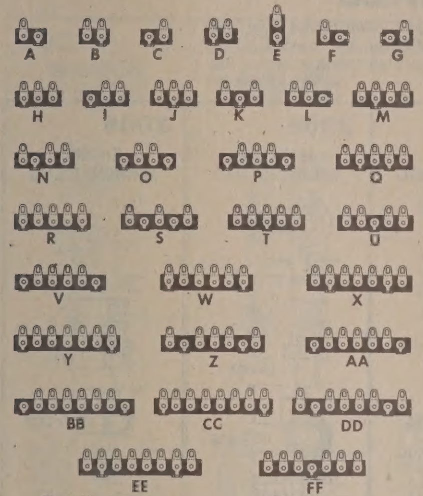
TOOLS

Std. Pkg. 1

Made of heavy gauge heat treated tool steel with insulated handles. Adjustable tension screw, cuts and crimps wire and all types of terminals 10-22 AWG, also 7 MM.

No.		NET Ea.
4980	Less Bolt Cutter	$5.50
5050	With Bolt Cutter	7.00

TIE DOWN TERMINAL STRIPS



Standard Type

LUG: STEEL cadmium plated, spaced 3/8"
STRIP: XP Phenolic 3/8" wide x .062 thick.
MOUNT.: .140 I.D. for No. 6 screw.
Std. Pkg. 100

Miniature Type

LUG: STEEL cadmium plated, spaced 1/4" centers.
STRIP: XP Phenolic 5/16" wide x .062 thick.
MOUNT.: .096 I.D. for No. 3 screw or 3/32 rivet. **Std. Pkg. 100**

EQUIPMENT HANDLES

MATERIAL AND FINISH SPECIFICATIONS

The following specifications are met by all panel handles, ferrules, and hardware where applicable:

Materials:

BRASS: In accordance with Federal spec. QQ-B-626, Composition 22, ½ Hard.

ALUMINUM: In accordance with Federal Spec. QQ-A-365, Composition A, Type '3.

Finishes:

NICKEL PLATE: Polished Nickel Plate. In accordance with Federal Spec. QQ-N-290, Class I, Type VI.

BLACK OXIDE: In accordance with MIL-F-495A.

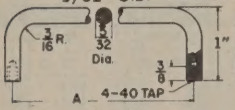
SATIN ETCH: Commercial finish.

BLACK ANODIZE: In accordance with MIL-A-5625A.

Note:

Aluminum Handles, either round or oval, and matching ferrules, can be supplied anodized in colors per MIL-A-8625A on special order.

5/32" O.D. PANEL HANDLES



5/32" Diameter panel handles. Brass and Aluminum finished as shown, with internal 4-40 thread. Individually packaged.

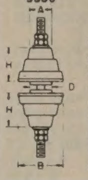
STEATITE AND PORCELAIN INSULATORS

9550



STEATITE INSULATED THRU-PANEL BUSHINGS

Consists of a pair of identical steatite insulators along with cushion washers and hardware. The 9555 assembly has interlocking insulators which are self-centering in mounting hole and may be used on very thin panels.

No.	Std. Pkg.	H	B	D	A	Hdwre	Net Ea.

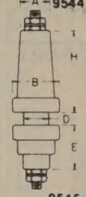
9552	10	1⅛"	1¾"	1 7/32	⅞"	¼"-20	1.50

9544



THRU-PANEL INSULATORS

Compression mounted by means of a stud throughout the entire length of the unit. Extrusion of insulator base extends thru mounting hole, increasing the breakdown rating. Units have flat mounting surfaces and are furnished with cushion washer. Types with jacks have terminal permitting connection above, as well as below, panel.

Norelco® MINIATURE LAMPS

Exclusively Distributed by

HERMAN H. SMITH, INC.

A NORTH AMERICAN PHILIPS COMPANY

Through Electronic Distributors

A wide variety of miniature, subminiature incandescent lamps, neon glow and telephone types.

Many types to choose for applications in Aircraft, Telephone equipment, Annunciators, Appliances, Flashlights, Automotive, Marine, Game equipment, Medical, Radio, TV, Toys etc.

The lamps offer a long life reliability and high output when used under manufacturers ratings.

NEW! JUST ARRIVED! HOOKON JUNIOR PROBE/PATCH CORDS

HOOKON JUNIOR PROBE/PATCH CORDS

Hooks on to bare wire, component leads, wire-wrap terminals, etc. Slides directly onto 1025 square Wire-Wraps down to .100" centers. Locking feature allows hook to be used as a probe on P.C. pads, terminals, solder junctions. Easily repaired in the field. Made of super tough nylon. On patch cord and/or attachments, all plugs and buttons are of molded Butyrate, per Fed. Spec. LP-349A, Type 3, Class MS with nickel plated brass bodues. Springs are nickel plated Beryllium copper with lead wire. Wire is 24AWG, extra-flexible test lead wire, 5KV, PVC, .090 O.D. Cable is RG-58/U Co-axial, Black. Nominal 50 Ohms impedance. Brass connectors have anti-tarnish plating. In red or black.

IT'S SOUND PLANNING TO "SPECIFY SMITH" WHEN DESIGNING OR PURCHASING

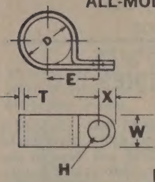
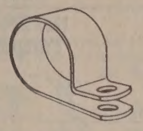
ALL-MOLDED CABLE CLAMPS





POLYPROPYLENE

Marked for easy identification. Polypropylene cable clamps feature excellent support at low cost. Manufactured entirely from propylene, they exhibit no environmental stress cracking and have excellent heat resistance at prolonged periods of time. Propylene clamps are impervious to most acids, alkalines, organic solvents and detergents. Conforms to applicable Mil. Specs. **Std. Pkg. 100**

T = .060 X = 7/32" W = 1/2" H = 13/64"

8922	1"	.908	3.00

CELLULOSE

Marked for easy identification. Cellulose Cable Clamps feature excellent support at low cost. Made entirely from cellulose, they are ultra-violet stabilized for extreme weather resistance. Tough and lightweight, they provide exceptional service in both outdoor and indoor applications. Conforms to applicable Mil. Specs. **Std. Pkg. 100**

NYLON

Marked for easy identification. Black Nylon Cable Clamps feature excellent support. Manufactured from the best material available they exhibit a tough rigidity at elevated temperatures. Nylon is insoluble in common solvents, alkalies, dilute mineral acids and most organic acids. Made to meet these Military Specifications: Mil-Std-24E; MS-30914 (ord.) Mil-C-21565(NAS); Mil-P-17091-B; Mil-P-20693. **Std. Pkg. 100**

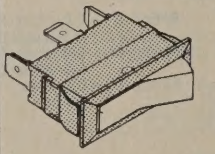
Low cost switch and indicator combination. Self-mounting, snaps into a rectangular opening 1.281" x .395", panel thickness to .080". SPST switch rated at 6 Amps AC 125 V. Terminates with three quick disconnect .250" tabs. Available only for 115 V operation. UL and CSA approved.

Std. Pkg. 10

No.	Voltage	NET Per C
1920	115 V	$270.00

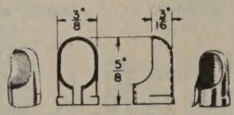


Self-mounting, snaps into a rectangular opening 1.281" x .395" panel thickness .032"—.125". SPST switch rated 10 Amps AC 125 V. Illuminated rocker, lights in the "on" position. Terminates with two quick-disconnect .250" male tabs. Available for 115 V only. UL and CSA approved.

Std. Pkg. 10

No.	Voltage	Per C NET
1921	115 V	$270.00

PILOT LIGHT SHIELD



1963 1969

Prevents glare when used in radio receiver meters, etc. Ribbed bottom holds shield securely in place on bulb.

Std. Pkg. 100

No.	Type	Per C
1963	Brass Cad Plate	$5.50
1968	Plain Brass	5.00
1969	Flared Brass Cad. Plate	6.00

"UNIVERSAL" FOREIGN ADAPTER PLUGS

1991

1992

1993

1994

852

856

Permits operation of American, British or Continental electric shavers, radios, record players and other small appliances from any electrical outlet anywhere in the world, supplying the required voltage. All plugs are rated at 15 amps/117 V; 7½ Amps/220 V.

Std. Pkg. 25

No.	Male Plug	NET Per C
1991	Continental	$ 70.00
1992	American	75.00
1993	Bayonet	$ 140.00
1994	Screw	3.60 Ea
1995	Kit of 4 Adapters, 1 each of above Std. Pkg. 1	3.00 each

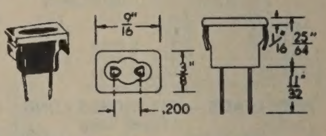
Streamlined bakelite plug adapters. Adapts from American to Foreign type.

RATING: 125 VAC — 15 AMP
220 VAC — 7.5 AMP

Std. Pkg. 25

No.	Female End	Male End	NET per C
852	American	Continental	$ 60.00
856	American	British	80.00

SNAP-IN BULB CONNECTOR



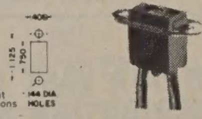
Designed for use with the new Twin Pin Baseless Miniature Lamps (G.E. #10-25 volts, #12-6.3 volts, or #15-7.0 volts). Easily assembled to any unit for indicating purposes. Withstands excessive temperatures. Snaps into a .500 x.296 rectangular hole in panels .032 to .062 thick. Bezel — brass, cad. plated: contacts — brass, silver plated.

Std. Pkg. 25

No. 1504 **NET Per C $25.00**

CONVENIENCE OUTLETS

BRACKET TYPE
Top or Bottom Mount



Flat steel bracket mounts with two #6 screws or equivalent size eyelets. Black only.

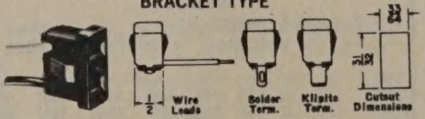
RATING: 15 Amps, 125 Volts AC or DC.

LEADS: No. 1279 has two leads, plastic wire #16 gauge, 8" long. UL approved.

Std. Pkg. 50

No.	Type	Terminals	NET Per C
1299	Top or Bottom Mount	Solder	18.00

PUSH-IN SNAP-LOCK BRACKET TYPE



Carbon Steel spring clips lock unit securely in place when pushed into opening. UL approved.

RATING: 15 Amps, 125 Volts AC or DC.

LEADS: Plastic wire #14 gauge, 6" long.

Std. Pkg. 50

No.	Terminals	Color	Per C
1283-103	Wire Leads	Black	$30.00

FOR RAPID SELECTION: terminals are listed (within figure groups) in ascending order of the MOST PERTINENT DIMENSION:

A = MIN. DIA.
B = MAJ. DIA.
N = LGTH. OF MIN. DIA.
O = LGTH. OF MAJ. DIA.
M = LGTH. OF PIN
C = DIA. OF PIN
L = OVERALL LGTH.

FOR RAPID SELECTION:

terminals are listed (within figure groups) in ascending order of the MOST PERTINENT DIMENSION:

A = MIN. DIA.
B = MAJ. DIA.
N = LGTH. OF MIN. DIA.
O = LGTH. OF MAJ. DIA.
M = LGTH. OF PIN
C = DIA. OF PIN
L = OVERALL LGTH.

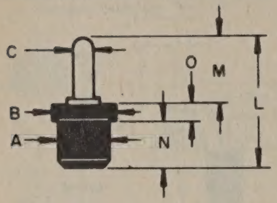

FIG. 1

FOR RAPID SELECTION:

terminals are listed (within figure groups) in ascending order of the MOST PERTINENT DIMENSION:

A = MIN. DIA.
B = MAJ. DIA.
N = LGTH. OF MIN. DIA.
O = LGTH. OF MAJ. DIA.
M = LGTH. OF PIN
C = DIA. OF PIN
L = OVERALL LGTH.

COLORS: Supplied in White (-101) unless otherwise specified. Ten colors available. **PLATING:** Standard (P-12) unless otherwise specified.
For COLOR CODE, PLATING SUFFIXES and QUANTITY DISCOUNT SCHEDULE see LAST SMITH PAGE in this Directory

TEFLON* TRANSISTOR HOLDERS

These holders provide insulated top and botton chassis mounting support of transistors. They have thru-holes and turreted solder terminals for wiring transistor leads and passive components, eliminating the need of a pad and providing total insulation and strain relief.

Holders shown represent the basic configurations available for JEDEC Packages TO-5 (.200" Dia. Pitch Circle) and TO-18 (.100" Dia. Pitch Circle.) Other styles and variations are constantly being added. Consult our ENGINEERING Dept for special requirements.

IT'S SOUND PLANNING TO "SPECIFY SMITH" WHEN DESIGNING OR PURCHASING

INTRODUCTION

Stanford Applied Engineering is a broad-based manufacturer of electronic packaging hardware and systems. Our catalog provides technical information on most of the products in the SAE line. Many other custom designed products are also available. Information on these products is available through your nearest SAE sales office or authorized representative.

SAE is one of the fastest growing electronic packaging companies in the world. This growth is the result of our ability to design and produce a wide spectrum of high quality products in almost any area of electronic packaging. We have four manufacturing plants, strategically located throughout the country. We do our own high speed contact stamping and high capacity injection molding, make our own PC boards and automatically assemble these components into the highest quality interconnection devices available.

Almost all these products are available through a world-wide network of representatives and distributors. Our representatives are supported by an organization of experienced application engineers who can help solve the most difficult electronic packaging problems.

Whenever you need interconnection components, whether it's connectors, IC sockets or a complete integrated packaging system, look to SAE. You'll see why we're called the OEM connection.

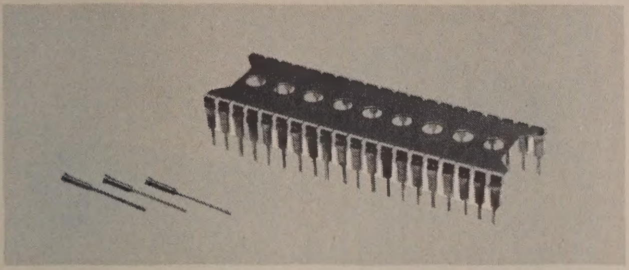
CONTACTS AND CARRIERS
SERIES 4000



- Low profile
- High temperature resistance — ideal for burn-in
- Extra large lead-in of .060″ dia.
- Available in carrier assemblies for ease of assembly
- Shorter clip to accommodate short IC leads
- Terminals
- Wire-Wrap™ or Dip solder

SPECIFICATIONS

Operating Temperature:
Dip Solder or Wire-Wrap Contact: −65°C to +175°C

Contact Body: Brass, ½ hard, per QQ-B-626

Contact Spring:
Beryllium copper with choice of several thicknesses of gold over .000050 nickel.

Accepts TO-116 standard lead configuration.

Contact accepts .016″ to .020″ dia. pin with a minimum withdrawal force of one ounce.

Mounts in PC boards of .062″ minimum thickness.

Mounting Hole Diameter: .005″ ±.002″

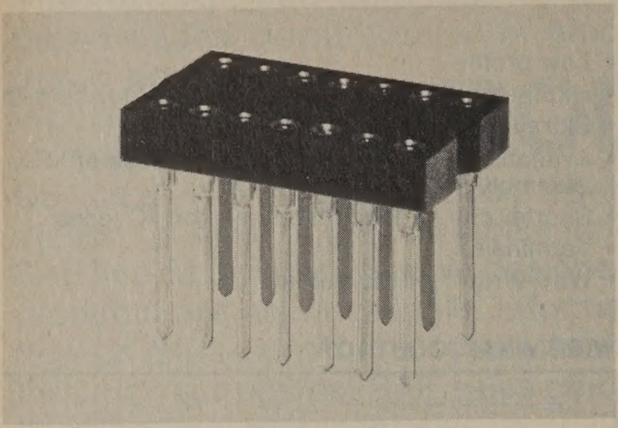
DISCRETE ASSEMBLIES
SERIES 4000



Contact Spacing: .100 centers
Terminals: Dip solder or Wire-Wrap
Contacts: 14-, 16-, 28-, 40-pin

SPECIFICATIONS

Materials:

Molded Insulator Header: Thermoplastic glass-filled polyester (color, black), or nylon, glass-filled type (color, blue).

Contact Body: Brass per QQ-B-626. Composition 22.

Contact Spring: Beryllium copper per QQ-C-533, heat-treated.

Operating Temperatures: −55°C to +150°C.

Contact Current Rating: 3.0 amp. maximum.

Dielectric Withstanding Voltage: 500 VRMS, minimum.

Insulation Resistance: 5000 megohms, minimum at 500 VDC

Contact Resistance:
7.0 milliohms, maximum. Gold plating per MIL-G-45204, Type II over .000050 thick minimum nickel per QQ-N-290.

Stanford Applied Engineering

IC Sockets

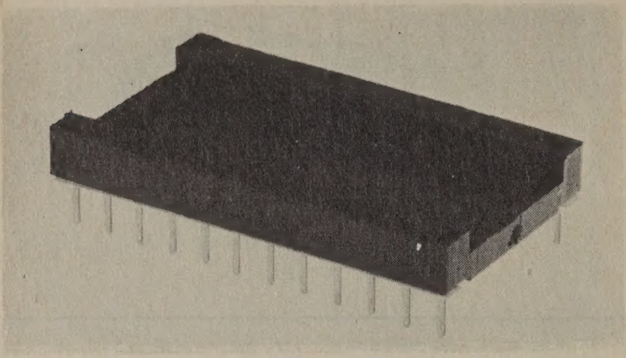
LOW-PROFILE, EDGE WIPE, SIDE WIPE
SERIES EW3700 and SW3800



Contact Spacing: .100 centers
Terminals: Dip solder
Contacts: 8 through 40 pins

- Double-beam contact construction for increased reliability.
- Closed entry type insulator restricts over-stressing of contact beam.
- Only .150″ high above the circuit board, low-profile edge wipe sockets maintain their .100″ contact centers when butted end-to-end.
- Special spring design accepts leads as large as .016″ x .023″. Closed entry insulator design protects spring members and guides component leads.
- Body construction permits flux-flushing and subsequent visual inspection. Pins are completely visible for inspection after soldering.

SPECIFICATIONS

Contact Resistance: 15 milliohms (max.) at 1 amp.
Insulation Resistance: 5000 megohms (min.) at 500 VDC.
Operating Temperature: −55°C to +140°C.
Materials:
Insulator: Thermoplastic glass-filled polyester. Color, black.
Contacts: Meets UL 94V-2 or better. Nickel silver alloy standard. Optional material beryllium copper, heat treated. Call out base Part No. 3750.
Design Option: Self-retaining terminal design eliminates contact clinching for wave-soldering. Plated thru hole dia. .035/.040 (see "How to Order").

Operating Temperature: −55°C to +150°C.

Materials:

Insulator: Thermoplastic glass-filled polyester (all IC sockets).

Contacts: (Standard Profile) Phosphor bronze per QQ-B-750.

Contacts: (Low Profile) Beryllium copper, heat-treated. Gold or tin plated. (see "How to Order").

Wafer: (Low Profile) Non-flammable polyester.

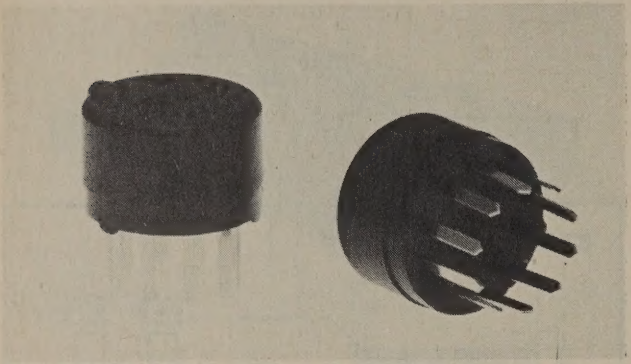
IC Sockets

LOW PROFILE
SERIES CA3500



- These SAE miniature sockets are designed especially for integrated circuits mounted in 8- or 10-lead TO-5 cases.
- Interconnections can be made without bending the leads, which substantially reduces the possibility of breaking leads or destroying the hermetic seal of the cases.

SPECIFICATIONS

Current Rating: 1.0 amp.

Contact Resistance: 0.05 ohms (max.).

Withstanding Voltage Between Adjacent Contacts:

VAC RMS	DC
1020	1560 (at sea level)
350	465 (at 50,000 ft.)

Insulation Resistance: 50,000 megohms (min.)

Mechanical: Shock: 50 g per MIL-STD-202.

Temperature Range: −55°C to +140°C.

Recommended Mounting Method: Solder in PC Board.

Recommended TO-5 Lead Dia.: .012 to .019.

Materials:

Insulator: Thermoplastic Polyester, 30% glass filled, UL rating 94V-2 or better.

Contacts: Phosphor bronze, per QQ-B-750.

Contact Plating: Gold plate per MIL-G-45204 Type II, .000010 min. over .000050 min. nickel plate per QQ-N-29.

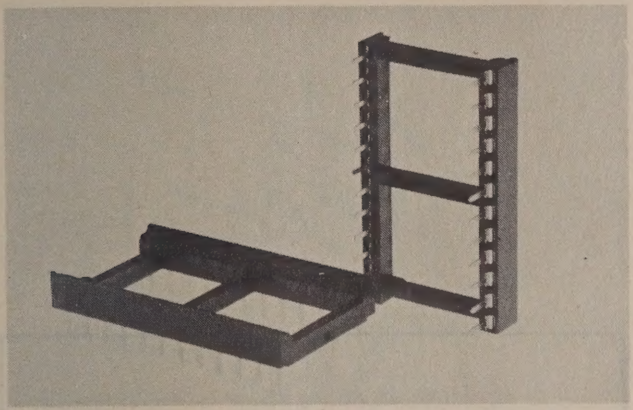
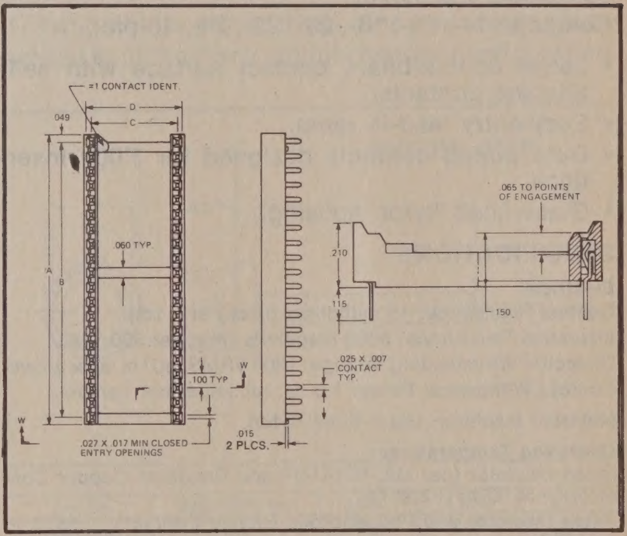
IC Sockets

LOW PROFILE
SERIES 3600



Contact Spacing: .100 Centers
Terminals: Dip solder
Contacts: 14-, 16-, 22-, 24-, 40-pin

- Large contact surface area.
- Easy entry lead-in ramp.
- Only .150″ high above the circuit board, these low-profile sockets maintain their 0.100″ contact centers when butted end-to-end. This provides continuous rows of contacts for universal applications and high-density packaging.
- Special spring design accepts leads as large as 0.027″ x 0.017″. Closed entry insulator design protects spring members and guides component leads.
- Solder-wicking eliminated by unique anti-wicking contact design. Body construction permits flux-flushing and subsequent visual inspection.



Part No.	Number of Contacts	A (max.)	B	C	D (max.)

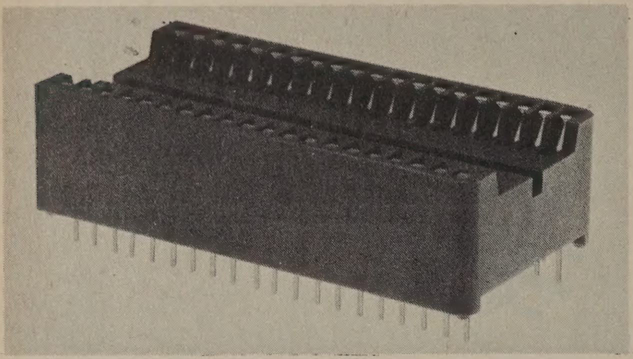
HIGH TEMPERATURE
SERIES IS3900



Contact Spacing: .100 centers
Terminals: Dip solder
Contacts: 14-, 16-, 18-, 20-, 22-, 24-, 40-pin

- Large double-beam contact surface with self-aligning contacts.
- Easy-entry lead-in ramp.
- Gold plated contacts designed for 5,000 insertions.
- Glass-filled Ryton housing.

SPECIFICATIONS

Electrical

Contact Resistance: 15 milliohms (max.) at 1 amp.
Insulation Resistance: 5000 megohms (min.) at 500 VDC.
Dielectric Withstanding Voltage: 1200 VRMS, 60 Hz, at sea level.
Contact Withdrawal Force: 1.0 oz. minimum per contact.

Material: Insulator: Glass-filled Ryton.

Operating Temperatures:

Ryton Insulator (per MIL-M-1414F) and Beryllium Copper Contacts: −55°C to +200°C.

Ryton Insulator and Phosphorous Bronze Contacts: −55°C to +150°C.

Contact Plating:

Phosphor Bronze: .000010. Gold plating per MIL-G-45204, Type II, over 0.000050 thick minimum nickel per QQ-N-290.

Beryllium Copper: Selective gold plating .000050 at contact point plus .000010 gold all over on 0.000050 minimum nickel per QQ-N-29.

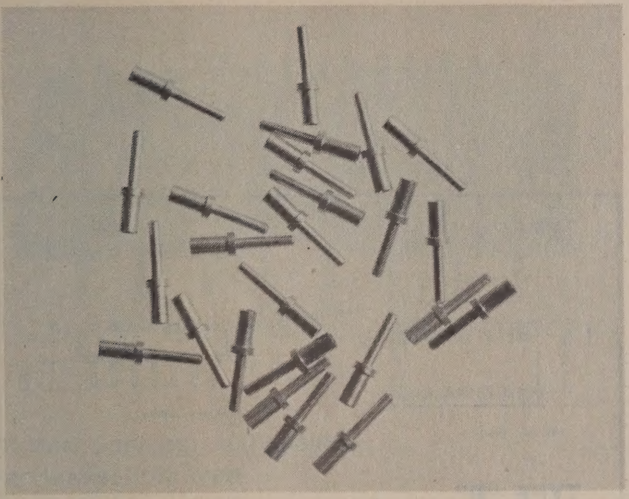
Cirkut Sockets

MODULE PIN
SERIES 5000/5225



Series 5000/5225 Module Pins are a complete family of close tolerance pins specifically engineered to provide optimum mating with Cirkut Sockets. Readily swaged into place, these pins can easily be arranged to fit most any module header configuration.

Component Mounting Boards

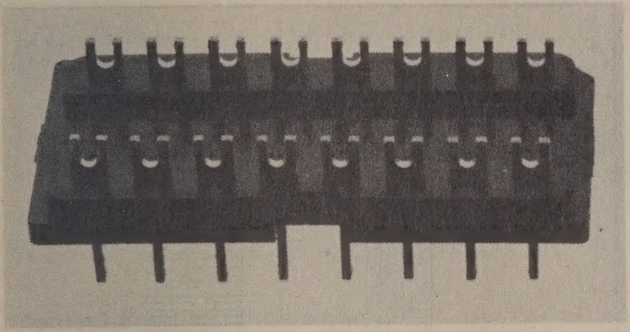
DUAL-IN-LINE SERIES H6170/C6170



Contact Spacing: .100 centers
Terminals: Fork type
Contacts: 14-, 16-pin

- Ideal for mounting discrete components
- High temperature phenolic insulator resists soldering iron damage.
- Optional cover available.

SPECIFICATIONS

Contact Resistance: 5 milliohms (max.).

Insulation Resistance: 5000 megohms (min.) at 500 VDC.

Operating Temperature: −55°C to +150°C.

Materials: (Mounting Boards)

Insulator: Glass phenolic per MIL-M-14, MHF. Color, black.

Contacts: Phosphor bronze per QQ-B-750.

Plating:

Gold plated per MIL-G-45204, Type II. Tin plated per MIL-T-10727, Type I. (See "How to Order.")

Material: (Cover)

Thermoplastic glass-filled polyester. Color, black.

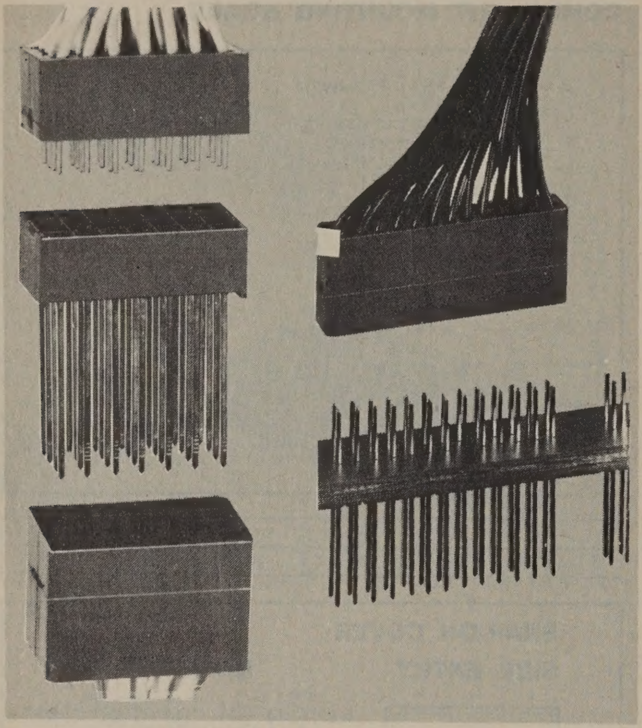
I/O Connectors

.100 GRID CENTERS
SERIES 2100, 2500 and 2700



Contact Spacing: .100 centers grid
Terminals: Wire-Wrap .025″ square
Contacts: 28, or 14, 26, 7
For PC Boards: Up to .125″ thick

- For high-density packaging applications.
- I/O Connectors have crimp removable contacts that may terminate with 24 to 30 gauge standard wire.

SPECIFICATIONS

2100 SERIES — Part Number:
Insulator Assembly: CFP2100-28B-390
Contacts: CFP2100 (For replacement only).

Materials:
Insulator: Glass-filled nylon, Type 6/6. Color, black.
Contacts: Phosphor bronze per QQ-B-750. Gold plated per MIL-G-45204. Type II, Class 1.

2500 SERIES — 28 OR 14 CONTACTS — Part Number:
Insulator: IJ2500-28
Contact: MP2500 (Accepts 24 to 30 gauge wire).
Crimp Tool: MC2500 Extraction Tool: ME2500

Materials:
Insulator: Glass-filled nylon, Type 6. Color, black.
Contacts: Phosphor bronze per QQ-B-750. Gold plated per MIL-G-45204. Type II, Class 1.

2500 SERIES — 7 OR 26 CONTACTS — Part Number:
Insulator: IJ2500-7S

2700 SERIES — Part Number:
Insulator: MP2700-28 or -14.
Contact: PMP2700 (Accepts 24 to 30 gauge wire).
Crimp Tool: MS3198-1 Extraction Tool: 2700

Materials:
Insulator: Glass-filled nylon, Type 6. Color, black.
Contacts: Leaded copper. Gold plated per MIL-G-45204. Type II, Class 1.

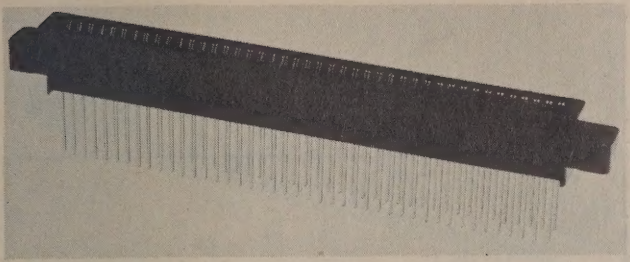
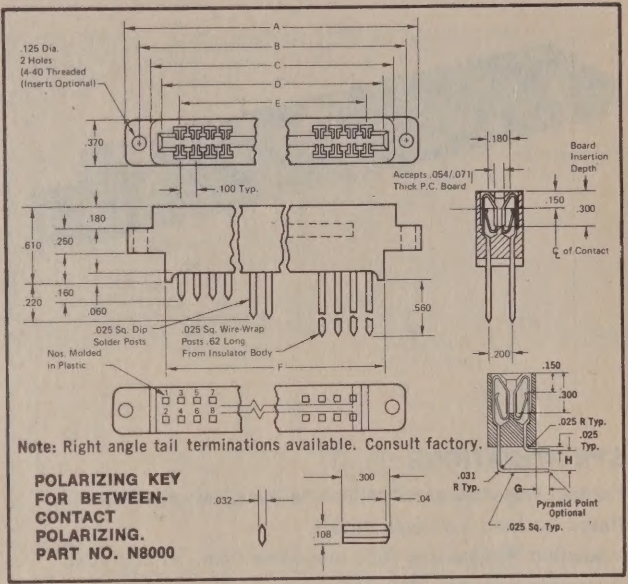
PC Connectors

.100 CONTACT CENTERS
SERIES 7000/7001





Note: Right angle tail terminations available. Consult factory.

POLARIZING KEY FOR BETWEEN-CONTACT POLARIZING. PART NO. N8000

Contact Spacing: .100 centers
Terminals:
Wire-Wrap: .025″ sq. x .62″
Dip Solder: .025″ sq. x .220″ or .018″ sq. x .160″
Pairs/Contacts: 10/20 thru 70/140
For PC Boards: .062 thick

- Bifurcated bellows contacts.
- Extra-large chamfer board entry.
- Replaceable contacts.
- In-between contact polarizing.
- Insulator stand-off for solder flux flushing.
- Increased contact wiping length on PC board.

SPECIFICATIONS

Contact Resistance: 30 mV (max.) at rated current.
Rated Current: 3 amps.
Insulation Resistance: 5000 megohms, minimum.
Operating Voltage: 600 VDC at sea level.
Operating Temperature: −55°C to +150°C.
Materials:
Insulator: Phenolic. Color, black.
Alternate Material: Diallyl phthalate. Color, green.
Contacts: Phosphor bronze per QQ-B-750. Gold plated per MIL-G-45204 Type II.
Polarizing Key: Glass-filled nylon, type 6/6.
Threaded Insert (optional): Stainless steel, passivated.

Note: Two dimensional configurations of this connector series are available for design flexibility. Comparison between tables for 7000 and 7001 Series Connectors reflects the difference between the two basic units. Dimensions affected are: A — overall length, B — center-to-center mounting, C — shoulder dimension, and F — base dimension, terminal side. Two charts are shown for easier reference.

SPECIFICATIONS

Contact Resistance: 6.0 milliohms (max.) at rated current.

Rated Current: 5.0 amps (max.).

Insulation Resistance; 5000 megohms (min.) at 500 VDC.

Operating Voltage: 1800 VAC at sea level.

Operating Temperature: −55°C to +150°C.

Materials:

Insulator: Diallyl phthalate per MIL-M-14, Type SDG. Color, Green.

Contact: Phosphor bronze per QQ-B-750.

Contact Plating: Gold plate per MIL-G-45204, Type II over 0.000050 min. nickel.

Polarizing Key: Glass filled nylon polyamide, natural.

Thread Insert (Optional): Stainless steel.

Contact Spacing: .125 centers
Terminals:
Wire-Wrap: .025″ sq. x .62″
Dip Solder: .025″ sq. x .160″ or .220″
Pairs/Contacts: 15/30 thru 50/100
For PC Boards: .062 thick

- Bifurcated bellows contacts.
- Extra-large chamfer board entry.
- Stand-off for solder flux flushing.
- Increased contact wiping length on PC board.
- Replaceable contact.

SPECIFICATIONS

Contact Resistance: 30 MV (max.) at rated current.
Rated Current: 3 amps.
Insulation Resistance: 5000 megohms, minimum.
Operating Voltage: 600 VDC at sea level.
Operating Temperature: −55°C to +150°C.

Materials:
Insulator: Phenolic. Color, black.
Alternate Material: Diallyl phthalate. Color, green.
Contacts: Phosphor bronze per QQ-B-750. Gold plated per MIL-G-45204, Type II.
Polarizing Key: Glass-filled nylon Type 6/6.

- Bifurcated bellows contacts.
- Large chamfer board entry.
- Replaceable contacts.
- Molded contact identification between and in-between contact polarizing keys.
- Insulator stand-off for solder flux flushing.

SPECIFICATIONS

Contact Resistance: 30 millivolts (max.) at rated current.

Rated Current: 5.0 amps (max.).

Insulation Resistance: 5000 megohms (min.) at 500 VDC.

Operating Voltage: 1800 VAC at sea level.

Operating Temperature: −55°C to +150°C.

Materials:

Insulator: Glass-filled diallyl phthalate per MIL-M-14, Type SDG-F. Color, green.

Contact: Phosphor bronze per QQ-B-750. Beryllium-copper available. Consult factory.

Contact Plating:

Gold plate per MIL-G-45204, Type II over .000050 nickel min. (see "How to Order").

Polarizing Key: Glass-filled nylon polyamide, natural.

Threaded Insert (optional): Stainless steel.

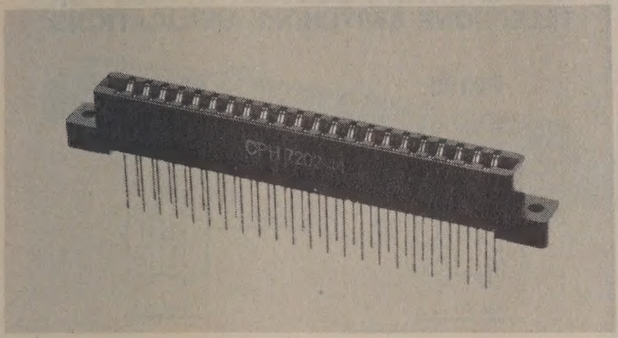
.156 CONTACT CENTERS
SERIES 7202



SPECIFICATIONS

Contact Resistance: 30 millivolts (max.) at rated current.

Rated Current: 3 amps.

Insulation Resistance: 5000 megohms, min.

Operating Voltage: 600 VDC at sea level.

Operating Temperature: −55°C to +150°C.

Materials:

Insulator: Phenolic. Color, black.

Alternate Material: Diallyl phthalate. Color, green.

Contacts: Phosphor bronze per QQ-B-750. Gold plated per MIL-G-45204, Type II.

Polarizing Key: Glass-filled nylon, Type 6/6.

Threaded Insert (optional): Stainless steel, passivated.

PC Connectors

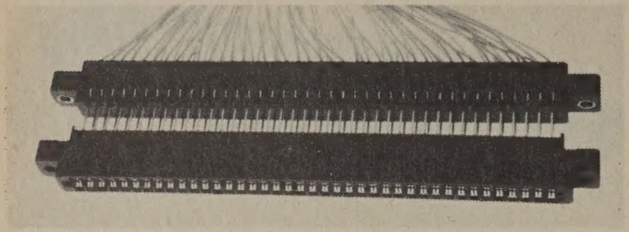
TRANSITION CONNECTOR SERIES IJ2250-80
BACK PLANE TRANSITION CONNECTOR SERIES 2501



SERIES IJ2250-80

Contact Spacing: .125 centers
Terminals: Crimp-Type
Pairs/Contacts: 40/80
For PC Boards: N/A

The IJ2250 engages the 3rd level of the .025" square Wire-Wrap posts on the P8100-80 Connector. It permits bringing stranded wire into Wire-Wrapped back panels for input/output or interconnect applications.

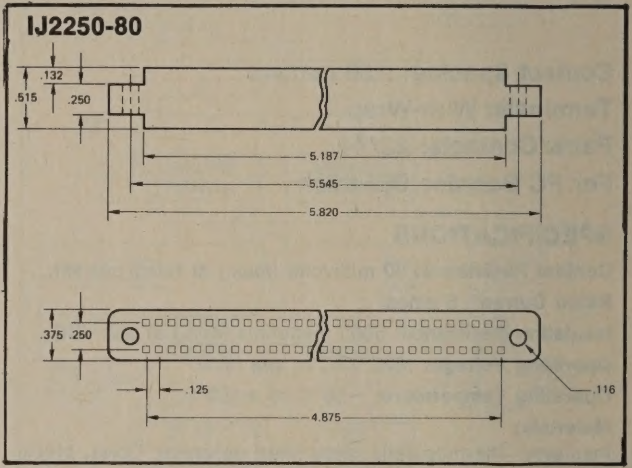
The insulator body (Part No. IJ2250-80 is green diallyl phthalate per MIL-M-19833, Type GDI-30). Crimp type removable contact is designed for 24 to 30 gauge wire.

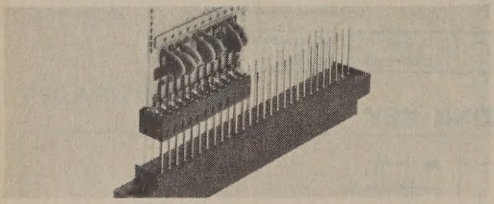
Contacts with "commercial plating" bronze per QQ-B-750 with .000010 gold plating per MIL-G-45204, Type II. (P/N CP2500-2.)

Contacts with "Military Plating" (Part No. MP2500-2) are identical, but with .000050 gold plating.

HOW TO ORDER SERIES IJ2250-80

When ordering, specify number of insulator bodies (IJ2250-80) and number and type of contacts (CP2500-2 or MP2500-2). Crimp tools (Part No. MC2500) and contact extraction tools (Part No. ME2500) may also be ordered.





SERIES 2501

Contact Spacing: .125 centers
Terminals: Solder tab
Pairs/Contacts: 12/24
For PC Boards: .032 and .062 thick

The 2501-24 is a 24-pin device designed to interface with Wire-Wrap back planes. Pin-to-pin compatible with standard IBM equipment, it will plug directly onto any .025" x .250" pin spacing.

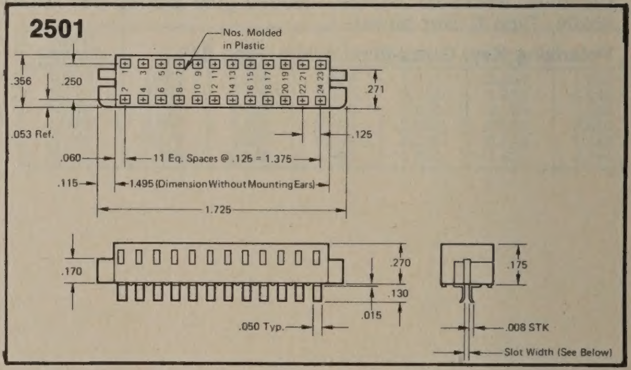
With solder tabs it will accept any .031" or .062" thick board with .125" contact centers. Tabs may be welded or gang soldered to PC boards or to flat wire cables using standard equipment.

Available without polarizing "ears" for end-to-end mounting on .125" centers.

SPECIFICATIONS

Contact Resistance: 30 millivolts (max.) at rated current.
Rated Current: 3 amps.
Insulation Resistance: 5000 megohms (min.) at 500 VDC.
Operating Voltage: 800 VDC at sea level.
Operating Temperature: −55°C to +150°C.

Materials:
Insulator: Green diallyl phthalate per MIL-M-14, Type SDG-F.
Contacts: (Solder Tabs) Phosphor bronze, per QQ-B-750. .000010 gold plating over .000050 nickel per MIL-G-45204, Type II, Class 2. Conforms to MIL-E-5400K for metal-to-metal contact in airborne/avionic equipment.



HOW TO ORDER (Select One from Each Category) SERIES 2501

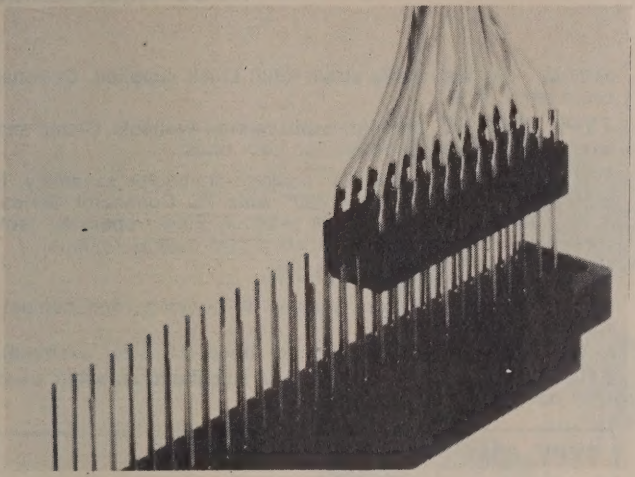
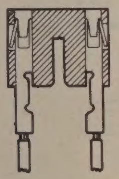
PC Connectors

CABLE CONNECTOR SERIES 2501
WIRE-WRAP POSTS SERIES B250





Typical cross section showing contacts installed. Dimensions and specifications for insulator with crimp contacts are the same as for solder tab Model PC2501-24.

SERIES 2501

The 2501 Series is also available with crimp contacts (shown at left) for use as a cable connector or input/output connector. It permits bringing stranded wire into Wire-Wrapped back panels by engaging with the .025″ square posts of any .125″ x .250″ grid connector. (See 8100 Series Connector.)

The crimp type contacts accept 24 to 30 gauge stranded wire. The insulator comes without polarizing ears for end-to-end mounting on .125″ centers.

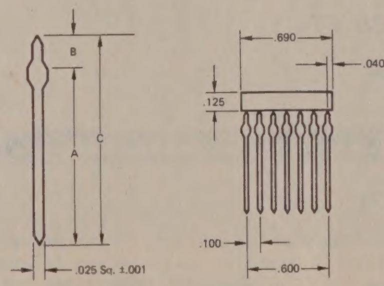
ORDERING INFORMATION

For 2501-24 with crimp removable contacts specify number of insulator bodies (IJ2501-24), and number contacts (MP2500). For hand crimp tool, order MC2500.

SERIES B250

INDIVIDUAL PINS FOR AUTOMATIC LOAD INSERTION

Supplied as individual contacts or in 7-pin strip form on .100″ centers for speedy installation. Carrier strips may be broken off after installation of pins or left intact to provide Vcc or ground bussing.



Terminals	A	B	C	Terminals	A	B	C

PC Connectors

PC CONNECTOR HOOD ASSEMBLIES

COMPACT SMART STYLING, CLEAN DESIGN

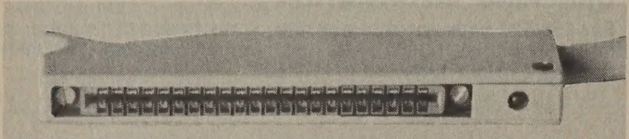
Hoods, clamp and strain-relief blocks are molded, high-impact, self-extinguishing, light-blue ABS plastic.

Simplified assembly/disassembly. All hardware furnished.

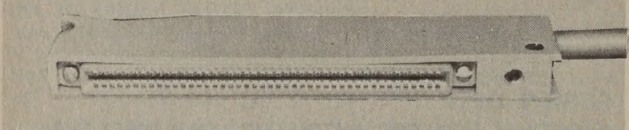
TYPE 8018 Accommodates standard 0.380″ width PC Connector Series from 6 pin to a maximum connector length of 4.36″. Modified to connector designated. Cable entry nominally ⅜″, two adjustable strain-relief blocks supplied. Optional cable entry to ½″.

8018-15; -18; 22 — Stock parts made to fit SAE's SAC 15D, 18D or 22D (respectively) connector or those with like overall and center to center dimensions.

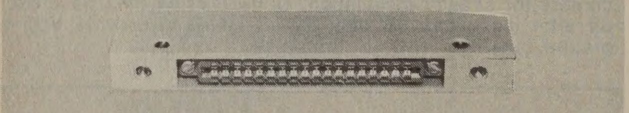
TYPE 8030 Accommodates standard 0.470″ width PC Connector Series from 6 pin to a maximum connector length of 6.220″. Modified to connector designated. Cable entry nominally 7/16″, one adjustable strain-relief block supplied. Optional cable entry of ½″.



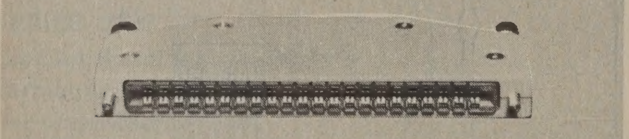
TYPE 8018



TYPE 8030



TYPE 8030 FT



TYPE 8031

TYPE 8030 FT Through-cable version available. Clamp and strain-relief blocks supplied for both ends.

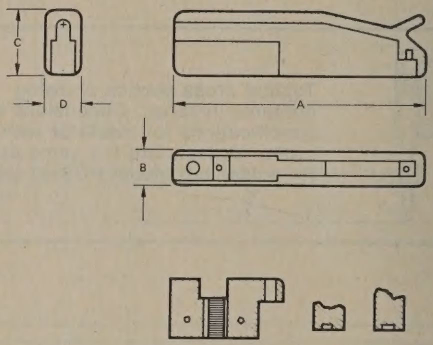
TYPE 8031 Perpendicular cable-to-connector assembly. It is designed for 22-pin, in 0.350″ wide PC Connector Series. Accommodates dual or single readout. Finger-operated jack screws on 4.031 centers included. Cable clamps optional.

ORDERING INFORMATION

Order desired connectors, number of contacts, and contact-spacing as follows:

a. Give basic 4 figure number for hood (8018 for example).
b. List connector part number and manufacturer being used in hood.

TYPE 8031



Type	No. of In-Line Contacts	Hood Dimensions			
		A	B	C	D
8018	6-22	†	0.380	1.250	0.600
8030	6-30	†	0.470	1.300	0.640
8030FT	6-30	†	0.470	1.300	0.640
8031	22	4.385	0.350	1.500	0.460

†Tailored to connector length.

All hood assemblies available with or without corresponding PC Connectors. When ordering from above table, specify overall length and mounting hole dimensions.

Cylindrical Connectors

FRONT AND REAR RELEASE CONNECTORS MIL-C-5015G

The MS Connector Series manufactured by Stanford Applied Engineering to MIL-C-5015G is a cylindrical, threaded-coupling connector available in the MS3450 removable, **rear-release,** crimp contact series. It features high-strength plastic retention fingers for lightweight and increased dielectric strength. The connector is also available in the MS3400 removable, **front release,** crimp contact series with rugged metal clips for positive contact retention. Both series are intermatable with existing MIL-C-5015G and threaded MIL-C-83723 (USAF) connectors.

These MS Connectors are designed in shell sizes 10 thru 48 and are available in all classes for use in aerospace as well as industrial applications. The series includes the Class D Connector which meets the very rigorous shock and vibration requirements defined in MIL-C-5015G — perhaps the most demanding of the military specifications. Also available in the Class DS Stainless Steel Connector, the only stainless steel Connector specified by a military specification.

All tvpes of rear hardware is available for both the MS3400 and MS3450 Connector Series. Some hardware is available as complete connector-accessory assemblies.

The plastic contact retention fingers offered in the MS3450 Series (rear release contacts) allows the unique advantage of accepting a wide range of wire sizes unacceptable in the front release type connectors. Special metal tools have been designed by Stanford Applied Engineering to accommodate oversize wire, eliminating plastic tools that can break off tips and leave chips in the contact retention area.

Complete details are outlined in a new 80-page catalog available upon request.

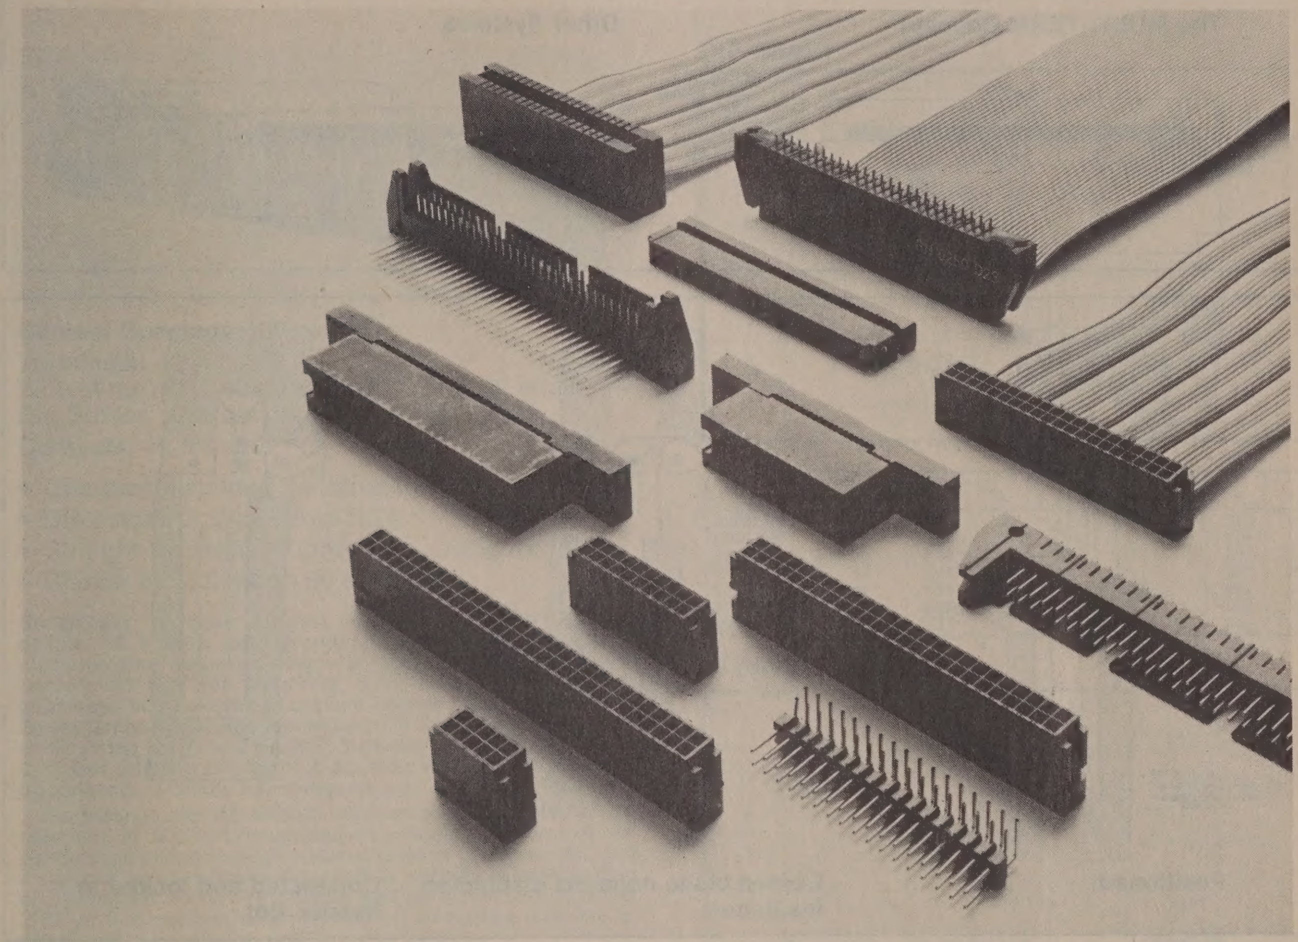
Multi-Term™

FLAT CABLE INTERCONNECTION SYSTEM



TM-Stanford Applied Engineering, Inc.

FOR SPEED, ECONOMY AND RELIABILITY

The benefits of flat cable over conventional wiring have been widely recognized throughout the industry. They include: reduced weight; increased volumetric efficiency; simplified assembly; preplanned, reproducible and uniformly wired assemblies; elimination of wiring errors; test, trouble-shooting and rework time reduced; improved reliability; consistent electrical characteristics; and lower installation costs.

The advantages of SAE's MULTI-TERM line of interconnection components is equally numerous and significant. Our unique contact, for example, features a smooth, coined edge that penetrates the cable jacket through insulation displacement and compresses the conductors, resulting in a strong, gas-tight connection. This coined edge, rather than a sheared or sheared offset edge, eliminates any possibility of conductor scoring or nicking.

Additionally, our exclusive, locking barb on every **individual** contact engages the mating header slot to assure positive retention across the **entire** width of the cable. By eliminating any possibility of header warpage, a highly reliable connection is achieved, even under conditions of shock, vibration or cable strain. On the other end, connectors will mate with several male terminations, e.g., .025″ square or round tails, as well as MIL-approved blade types, utilizing a tuning fork-style female contact for greater reliability.

You can choose between PC Connectors, Header Connectors, I/O Headers, and Socket Connectors with or without strain relief clamps — all on .100″ contact centers with your choice of 10 through 60 pins; and 14- or 16-pin Dip Connectors on .100″ x .300″ grid spacings. Contact configurations offer your choice of 1, 2 or 3 level wrap tails in a straight-through or right angle terminations, as well as Dip solder styles.

Another feature of the MULTI-TERM line is an improved, pre-assembled PC, socket and Dip Connector that allows the termination of up to 60 conductors in one quick and error-free operation. Accepting either 26, 28 or 30 AWG flat ribbon cable or discrete wire, connector housings are molded of black thermoplastic polyester. Cables are offered in either all gray with one red edge or in ten color-coded ribbons, encapsulated in a self-extinguishing PVC film.

These new components have been specifically designed to be completely compatible with all present industry standards, to provide a competitive and readily available second source.

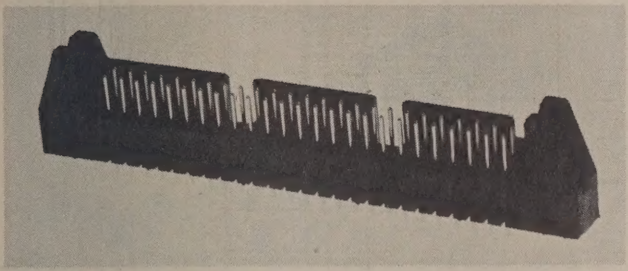
Multi-Term™ INTERCONNECT SYSTEM

HEADER CONNECTORS
.100 CONTACT CENTERS
SERIES 6200



Contact Spacing: .100 centers

Terminals:

Wire-Wrap: .025 square, straight or right angle

Dip Solder: .025 dia. straight or right angle

Contacts: 10 thru 60

- One-piece, molded construction.
- Dip solder or Wire-Wrap tails.
- Straight-through or right angle configurations.
- Choice of 10 through 60 contacts.

Specifically designed for fast, simple installation on logic panels, PC boards, back planes, etc. A high-precision, one-piece molded header includes a shroud that provides pin protection; nut and bolt mounting; positive cable to connector alignment; and is keyed to prevent reversed mating. The 6200 Series Connectors come with either .025″ square posts for automatic wiring equipment or .025″ diameter Dip solder pins, each in proper grid and alignment to accept a wide variety of female disconnects, whether board-mounted or cable-type terminals.

Pin features include smooth, flat contact surfaces with corners held to .003″ maximum radius; a tapered lead-in that will not damage plated through-holes; a uniform cross-section, and a conical tip specifically designed to simplify Wire-Wrapping or disconnect. Posts are straight and perpendicular to within .010″ of true position, and they will accommodate one, two or three wraps, depending upon pin selected.

Dip solder pins are designed to accommodate PC boards up to .125″ thick, and both style of terminations are available in either straight or right-angle configurations.

SPECIFICATIONS

Electrical:

Current Rating: 1 amp.

Dielectric Withstanding Voltage: 500 volts at sea level (min.).

- Accepts 26, 28 or 30 AWG flat ribbon cable or discrete wire.
- Available with or without strain relief clamps.
- Choice of 10 through 60 contacts

Designed to interface between the cable and the board, Series 6300 Socket Connectors feature an improved **pre-assembled** construction, resulting in excellent cable alignment; easier and more efficient handling during the assembly operation, thereby reducing labor. The 6300 Series of connectors is completely compatible with existing assembly tooling.

This connector will mate with several male terminations, e.g., .025″ square or round tails, Series 6600 and 6200. Additionally, the connectors feature an extra-large chamfer entry that compensates for misaligned pins.

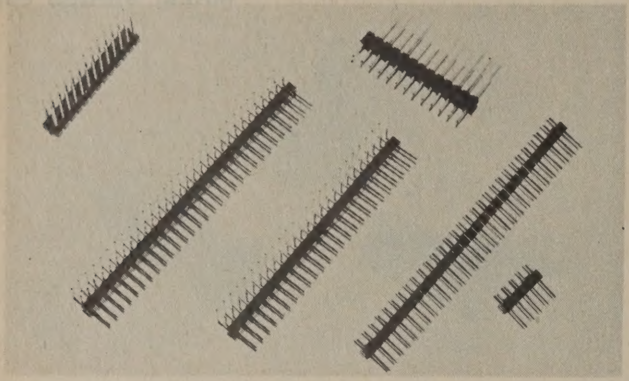
I/O HEADERS
.100 CONTACT CENTERS
SERIES 6600



Contact Spacing: .100 centers

Terminals:
Wire-Wrap: .025 square, straight or right angle
Dip Solder: .025 dia. straight or right angle.

Contacts: 10 thru 60

- One-piece, molded construction.
- Dip solder or Wire-Wrap tails.
- Straight-through or right angle configurations.
- Choice of 10 thru 60 contacts.

Specifically designed for fast, simple installation on logic panels, PC boards, back planes, etc. A high-precision, one-piece molded header features either .025″ square posts for automatic wiring equipment or .025″ diameter Dip solder pins. Each are in proper grid and alignment to accept a wide variety of female disconnects, whether board-mounted or cable-type terminals.

Pin features include smooth, flat contact surfaces with corners held to .003″ maximum radius; a tapered lead-in that will not damage plated through-holes; a uniform cross section, and a conical tip specifically designed to simplify Wire-Wrapping or disconnect. Posts are straight and perpendicular to within .010″ of true position, and they will accommodate one, two or three wraps, depending upon pin selected.

Dip solder pins are designed to accommodate PC boards up to .125″ thick, and both styles of terminals are available in either straight or right-angle configurations.

Mates with 6300 Series.

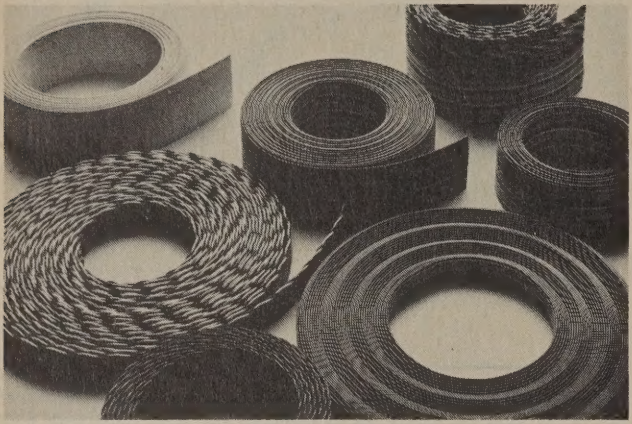
Multi-Strip™/Multi-Twist™

BONDED RIBBON CABLE



SAE's Multi-Strip and Multi-Twist bonded ribbon cables are available in a variety of sizes and configurations. Multi-Strip consists of parallel wires in a horizontal plane. Multi-Twist cables use twisted pairs. Both types are constructed with a special bonding process that provides exceptionally uniform separation force. Multi-Strip and Multi-Twist cables are offered in a variety of constructions and colors. They are designed and manufactured to conform to a number of military and commercial specifications and are suitable for use in a wide range of applications.

Constructions:
Flat bonded cable.
Bonded twisted pairs.
Bonded triads with jacket.
Mixed bonded wires and twisted pairs.

Colors:
All standard colors and stripes.
Special colors available.

Gauge Sizes:
30 thru 10 AWG.

Insulations:
PVC.
Crosslinked PVC.

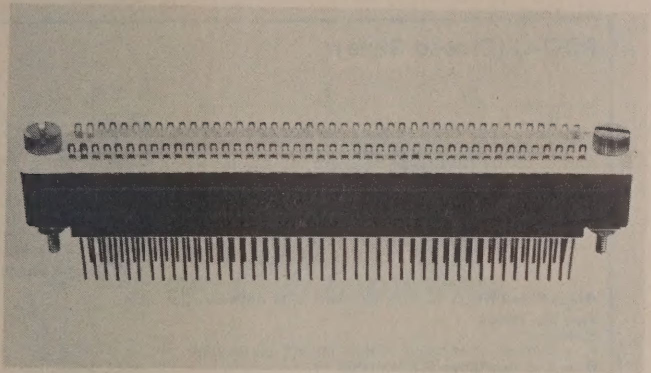
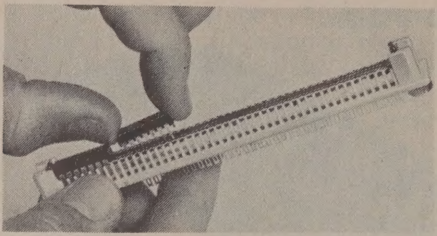
DipStik™

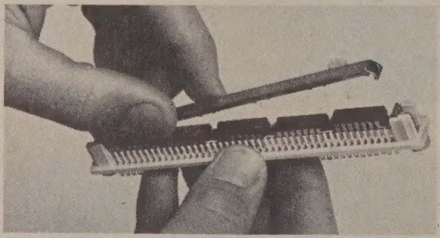
HIGH DENSITY ELECTRONIC PACKAGING SYSTEM



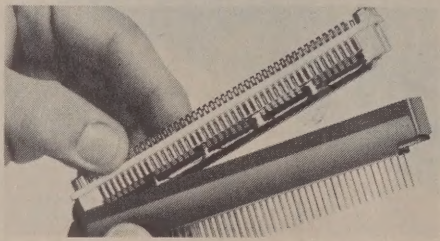
DipStik is a unique new method for mounting dual-in-lines. The DipStik System has been specifically designed to eliminate many of the problems and costs associated with printed circuit boards and sockets. It brings electronic packaging up to the level of integrated circuits by providing high capacitance, low impedance ground and power planes not found in current mounting systems.



Drop In: Up to 5 dual-in-line assemblies (up to 88 pins total) in the cartridge.



Snap In: The loaded DipStik cartridge into the DipStik receptacle and give the coupling screws a twist.



Clamp In: The dual-in-lines with the special clamp and spring assembly which holds them firmly in place.

THIS IS THE DipStik SYSTEM

The DipStik System consists of four basic parts.

1. **Cartridge Assembly:** This unit, fabricated of Diallyl Phthalate, holds the dual-in-lines in place.
2. **Receptacle Assembly:** When mated with the cartridge assembly, circuitry terminating is completed with Wire-Wrapable .025 square pins.
3. **Bus System:** This system, fabricated of copper alloys, provides power and ground to the dual-in-lines . . . without the use of solder.
4. **Mounting Hardware:** Mounting hardware and a variety of chassis designed specifically for use with the DipStik System.

HERE'S HOW DipStik SAVES YOU TIME AND MONEY OVER THE USE OF PRINTED CIRCUIT BOARDS AND SOCKETS

Printed Circuit Boards for Mounting Dual-in-lines Eliminated:
DipStik eliminates the need for PC boards, connectors, associated hardware, extractors and extenders.

100% Test Point Capability:
The DipStik System provides a test point for each dual-in-line lead through the use of terminals with eyelets in the DipStik cartridge.

System Maintenance Enhanced:
Defective dual-in-lines are easily replaced in the system simply by removing the cartridge assembly from the receptacle assembly, an operation which takes only a few seconds and may be accomplished with a minimum of equipment disassembly and downtime.

System Updating and Modification Facilitated:
Obsolete dual-in-lines are replaced in the same manner as defective ones. Re-Wire-Wrapping to meet new design requirements is also relatively simple since the Wire-Wrap terminals are easily accessible.

Increased Protection for Dual-in-lines:
The dual-in-lines are protected from external objects by the DipStik which completely surrounds them. Damage from shock and vibration is also minimized.

Versatility:
14- and 16-pin dual-in-lines, as well as non-discrete dual-in-lines, may be mixed in the same DipStik.

Low Insertion Forces:
Special straightening of dual-in-line lead leads prior to insertion is unnecessary. The fragile dual-in-line leads and internal bonds are protected during assembly since leads are not shoved into a socket or clearance holes in PC boards.

Ease of Assembly and Testing:
No special tools are required for the assembly of dual-in-lines into the DipStik. Terminals with eyelets for each dual-in-line lead are provided in the cartridge which may be used both as test points and for the mounting of non dual-in-line discrete components.

Packaging Density Increased:
The DipStik System increases packaging density of dual-in-lines as much as 100% over printed circuit mounting methods.

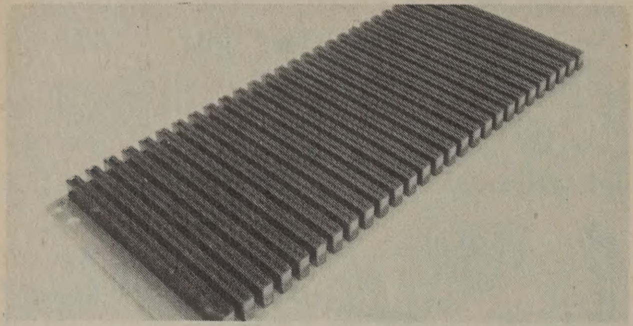
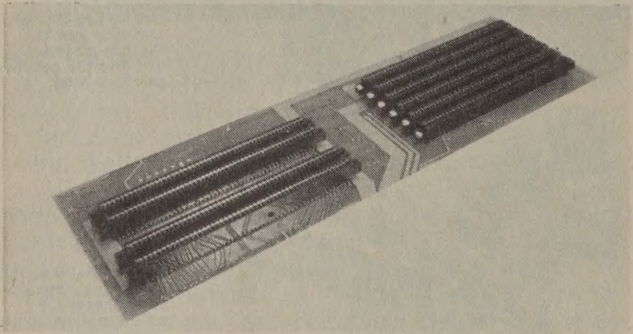
Back Panels

PDQ™ BACK PANEL CONNECTOR ASSEMBLIES

PIN-IN-BOARD (PDQ)



DISCRETE



SAE supports its back plane product line with:

- Full engineering staff — ability to take customer schematic to finished product.
- PCB manufacturing capability — double sided and multilayer.
- Complete Wire-Wrap services.
- Complete test capabilities.

SPECIFICATIONS

Materials:

Contacts: Phosphor bronze per QQ-B-750, Composition A.

Contact Plating: 10, 30 or 50 microinches of gold per MIL-G-45204, Type II over 50 microinches of nickel.

Insulator: Thermoplastic glass-filled polyester.

Mechanical:

Contact and Row Spacing: (See tables on this page.)

Contact Engagement Force: 4 to 9 oz. average per contact pair.

Contact Separation Force: 2 oz. minimum per contact pair.

Electrical:

Contact Current Rating — Continuous at 30°C Temperature Rise: 3.0 amps.

Contact Current Rating — Surge at 40°C Temperature Rise: 4.0 amps.

Contact Current Rating — Pulse at 40°C Temperature Rise: 9.0 amps.

Contact Resistance — Contact to PC Board: 7.0 milliohms max.

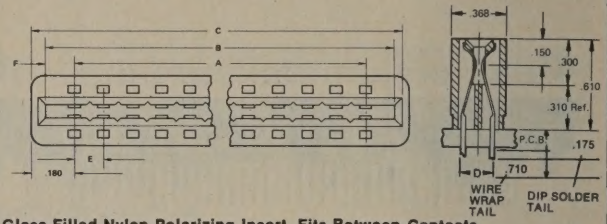
Contact Resistance — PC Board to Mother Board: 7.0 milliohms max.

Contact Resistance — Contact to Plated Thru-Hole: 1.0 milliohm max.

Low-Level Circuit Resistance at 1 Milliamp: 5.5 milliohms.

Insulation Resistance: 5000 megohms min.

PDQ-C (Closed Style)



Glass Filled Nylon Polarizing Insert. Fits Between Contacts.

Part No. N8000

Notes:

F	.100	.125	.100	.125	.160

SAE Connector back planes are available in two forms — Discrete and Pin in board (PDQ™).

DISCRETE

I. **Application:** Primarily used where all communicating is being done through the printed circuit board.

II. **Process:** Being vertically integrated the manufacture of a discrete back plane would consist of the marriage by wave solder of an SAE printed circuit board and a Dip solder edge board connector (i.e. SACXXD/2-2, SCCXXD/2-2, SBCXXD/2-2, SECXXD/2-2, CPH7000-XXST or CST, CPH7207-XXST and CPH8100-XXST or SST).

PDQ™ (PRESS FIT OR PIN IN BOARD)

I. **Application:** Most advantageous where communicating is being done through the printed circuit board and through the use of Wire-Wrap.

II. **Process:** PDQ™ is manufactured by pressing contact pins through the use of automatic insertion equipment into a plated through hole to form a gastight joint. After the pins are inserted the connector housing is placed over pins to form a connector.

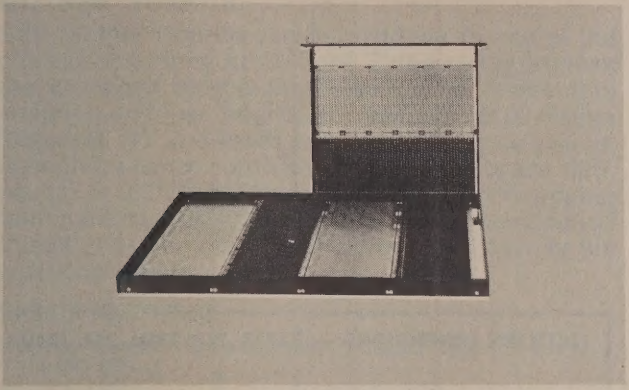
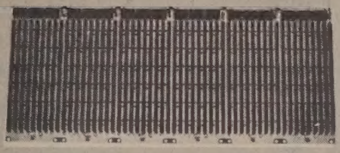
Logic Panels

SERIES EX700



- Modular — 14, 16 universal patterns.
- Total ground plane — provides a lower ground characteristic impedance resulting in excellent noise immunity; and the structure of the lattice ground pattern results in a shorter electrical path to enhance high frequency performance.
- I/O options to fit designers needs.
- Power distribution by bus-bar interconnection and/or through direct power and ground input terminals.
- Decoupling Capacitors — one RF decoupling capacitor for every three devices in the system. In addition a full size panel contains twelve tantalum bypass capacitors to limit power supply ground line noise.

EX700



EX714

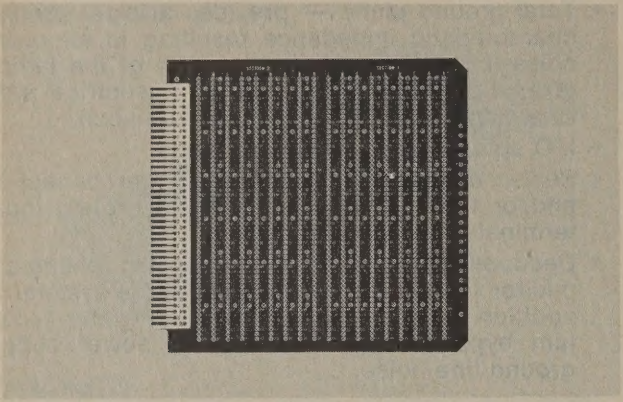
Logic Panels

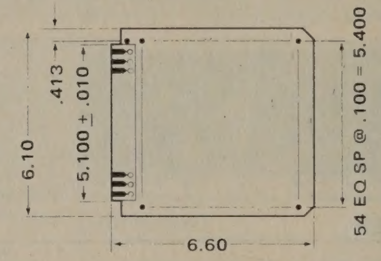
PLUG-IN MODULES



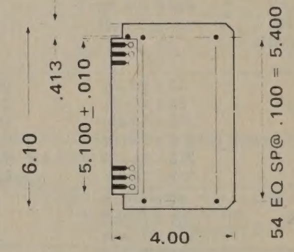
A variety of plug-in modules is available, and feature the same patterns as for the standard panels. For convenience, 18 numbered wrap posts are provided which can be used as test points.

Two standard sizes are available as described in the table below. Both have 80 contact fingers which can mate to a discrete connector or onto an EX500 Series Mother Board. Off-the-shelf mounting hardware to accommodate either configuration is described on page 38.

OUTLINE DIMENSIONS — EX718, 772, 772U, 784, 784U



OUTLINE DIMENSIONS — EX709, 736, 736U, 742, 742U



SPECIFICATIONS

Material: Copper-clad, glass-base laminate, Type GF per MIL-P-13949D (FR-4).

Board Thickness: .062″, 2 ounces copper on both sides.

Color: Blue.

Contacts:
Gold-plated in accordance with MIL-G-45204, 0.000050″ thick. Gold over low-stress nickel in accordance with QQ-N-290, 0.0003″ minimum.

Logic Panels

MOTHER BOARDS
CHASSIS AND CARD FILES

MOTHER BOARDS

SAE Mother Boards can be installed in any of the chassis described to the right. Three configurations are standard off-the-shelf items. The connectors supplied on these boards are SAE CPH8100 Series featuring 80 pre-loaded bifurcated, gold-plated, phosphor bronze contacts. These contacts are .025″ square x .62″ long for solderless Wire-Wrapping terminations. Custom requirements can be supplied to suit your particular application. Just specify the positions desired.

SPECIFICATIONS

Material: Copper-clad glass-base laminate, Type GF per MIL-P-13949D (FR-4).

Board Thickness: 0.125″, 2 ounces copper on both sides.

Color: Blue.

Connector:

Body: Green, glass-filled diallyl phthalate per MIL-M-14, Type SDG-F.

Contacts: Phosphor bronze per QQ-B-750. Gold-plated per MIL-G-45204, Type II.

Contact Current Rating: 3 amps.

Insulation Resistance: 5000 megohms.

Operating Temperature: −65°C to +150°C.

CHASSIS AND CARD FILES

Mounting hardware for all logic panels and plug-in modules is manufactured by Stanford Applied Engineering, Inc., and dimensionally conforms to industry established standards.

EX520-1: Horizontal drawer. Mounts in a standard 19″ rack and holds 2 each EX700 Series panels or EX500 Mother Boards. Supplied with 1¾″ front and rear panels and straight slides. For tilt slides order EX520-1T.

EX520-3: Same as EX520-1 except supplied with 3½″ front and rear panels. For tilt slides order EX520-3T.

EX520-5: Same as EX520-1 except supplied with 5¼″ front and rear panels. For tilt slides order EX520-5T.

EX530-7: One-section vertical frame. Mounts in a standard 19″ rack and holds one EX700 Series panel. Comes with or without 2 left or 2 right hinges. When ordering specify:

EX530-7 — without hinges.
EX530-7L — with left hinges.
EX530-7R — with right hinges.

EX530-14: Two-section vertical frame, as above.

EX530-21: Three-section vertical frame, as above.

EX530-28: Four-section vertical frame, as above.

EX540-1: Card file for small plug-in modules. Supplied with rear panel and is fully assembled to hold 30 discrete CPH8100-80 SAE Connectors.

EX540-2: Same as EX540-1 but assembled to hold one EX500 Mother Board.

EX550-1: Card file for large plug-in modules. Supplied with rear panel and is fully assembled to hold 30 discrete CPH8100-80 SAE Connectors.

EX550-2: Same as EX550-1 but assembled to hold one EX500 Mother Board.

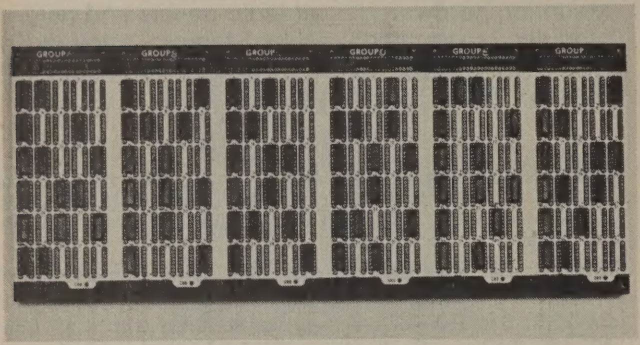
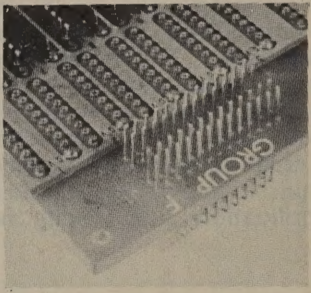
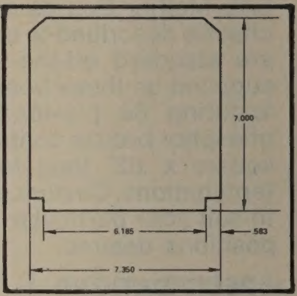
Logic Panels

SERIES 8186-PG
14- AND 16-LEAD DUAL-IN-LINE IC's







7.000
6.185
.583
7.350

8186 LOGIC PANEL

Modular construction. Available in any multiple of 30 IC device patterns, up to 180 patterns. Each 30 pattern section accepts up to 3 interfacing plugs for input-output connections.

Machined beryllium copper socket terminals with closed entry contacts assure positive retention of IC leads.

Double sided 0.125″ thick board with power and ground planes connected to 2 contacts in each pattern.

Pin spacing on 0.100″ centers.

For Wire-Wrap Service — see page 42.

8186 PLUG-IN BOARD

The 8186 PG-60 is a 0.062″ thick double-sided PC packaging panel designed to hold 60 x 14- or 16-pin IC devices. Each pin is numbered for easy reference. Additionally, each pattern has 2 extra Wire-Wrap dummy pins connected to Ground and Power, respectively. Standard board has 3-level Wire-Wrap pins.

As a special feature, the panel has mounting provisions for 20 decoupling capacitors; 1 for every 3 devices, and 2 filter capacitors. Ten test points, marked TP1 through TP10, add to the versatility of this packaging panel.

The I/O Connector Section contains 122 contacts and is compatible with other industry supplied plug-in logic modules.

Materials:

PC Board: .125″ thick glass epoxy, 2 oz. copper circuitry, both sides, tin plated.

Contacts: Gold over nickel per MIL-G-45204.

Logic Panels

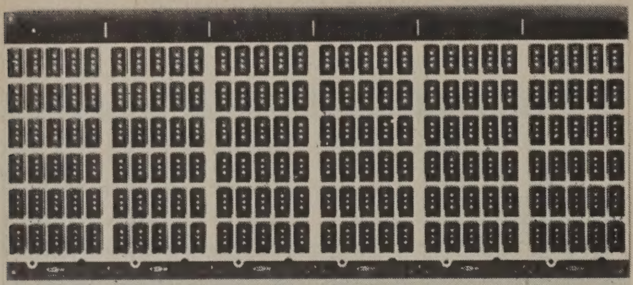
HIGH DENSITY, MODULAR LOGIC PANELS **SERIES 10,000**
LOGIC PLUG-IN BOARD **SERIES 10,020**



SERIES 10,000

This modular off-the-shelf SAE logic panel is fabricated from 0.125" glass epoxy laminate. Modular construction permits use in any multiple of 30 patterns up to 180 in the 10,000 Series. Each 30-pattern section offers a unique SAE feature of 84 input/output connections. Also available in a universal configuration as PN 10015 with 9 rows of 53 contacts per section. Up to 54 rows.

SAE offers four optional pin patterns for all logic panels. The -14 panels are equipped with 14-pin sockets. Panels suffixed with -142 are fitted with 14-pin sockets plus two dummy Wire-Wrap posts. Dummy posts are soldered to Vcc and ground planes. The third option -16, accepts 16-pin sockets. The last option, -162, is fitted with 16-pin sockets plus two dummy Wire-Wrap posts. Patterns are illustrated as seen from the bottom (Vcc) side.

Example of Ordering Number:

10010-14-180: Panel with 180 patterns of 14-pins per pattern.

10010-162-150: Panel with 150 patterns of 16-pins and 2 dummies per pattern.

10015-18: Panel with 18 rows of 53 contacts per row. Rows are on 0.300" centers.

SERIES 10,020

UL-Approved High Density Logic Panels with Optional Connector Take-offs

SAE standard logic panels are fabricated from 0.062" FR-4 glass epoxy laminate and are plated with 60-40 solder. Voltage and ground planes are on opposite sides except for PN 10024. Holes are plated through. Panels have a capacity of 50 dual-in-line IC packages.

The 10024 universal board has 18 rows on 0.300" centers. There are 64 contacts per row. Power and ground are interleaved on both sides of the board.

Extender Cards:

Order Extender Card PN 10810-4 for use with 44-Pin Connector and Extender Card PN 10190-1 for use with 80-Pin Connector.

Card files are available on request.

Example of Ordering Number:

10020-14: Configuration "A" with 14-pin option.

Computer-Aided Wiring Services

Give SAE a system design, pin list, logic diagram, or wire list and we'll deliver the finished hardware; or if you prefer, have us just do the wiring on your own assemblies. Either way, you get the economy and reliability that computer-directed wrapping offers over soldering, with no set-up or tooling charges for standard panels and cages.

We have the equipment, plant facilities, and trained people to provide you with all your wiring needs, as our computer-directed Wire-Wrapping services is available for either standard or custom designed panels.

We can start with your logic diagram and end up with wired hardware and documentation. Give us your wire lists or signal string lists in SAE's format or your own. Our wiring services will process your inputs and based upon these our program will perform an error analysis designed to flag or eliminate wiring or assembly problems.

Some of the checks performed include:

1. Geometry errors — improper use of pin callout for the hardware to be wired.
2. Overloads.
3. Multiple sources in a string.
4. Signal strings with a source, but no loads or vise-versa.
5. Duplicate pin callout within a string.
6. Single-pin errors.
7. Z-level errors.

Prior to final assembly, the documentation is submitted to customer for approval and update.

A typical panel will be point-to-point randomly dressed, however both right angle and critical path routing can be provided. In addition, we can terminate twisted pairs, and twisted trios as well as single conductor wires.

Wire-routing optimization is a feature of SAE's program and is accomplished whether the requested wiring format is point-to-point or restricted.

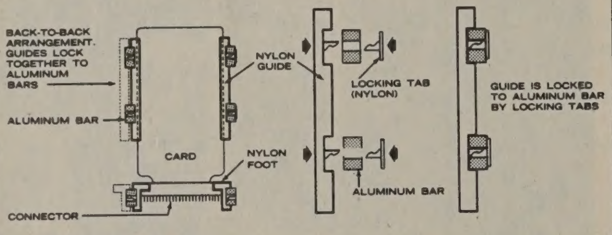
“SNAP-TOGETHER” CONSTRUCTION



BACK-TO-BACK ARRANGEMENT. GUIDES LOCK TOGETHER TO ALUMINUM BARS
ALUMINUM BAR
CARD
CONNECTOR
NYLON GUIDE
NYLON FOOT
LOCKING TAB (NYLON)
ALUMINUM BAR
GUIDE IS LOCKED TO ALUMINUM BAR BY LOCKING TABS

TO MAKE A DRAWING

1. Accumulate ordering information at bottom of page.
2. Card guide support bar spacing is the sum of nominal circuit board height plus .375″.
3. Connector mounting foot support bar spacing is determined by adding the connector mounting holes center to center dimension to the connector foot offset x dimension (see page 44 —x dimension is from center line of the foot mounting hole to center line of the support bar) e.g., 4.031 + 2 x .422 = 4.875.
4. Overall end plate length is determined by card length and connector depth plus space required behind connector for termination.
5. Custom sheet metal end plates: Any flange or slot dimension available. Standard RETMA flanges are 1″ with .563″ deep x .250″ wide slots.

SUBASSEMBLIES

Because SAE's packaging system is modular — a building block of standard parts — any combination is possible which best fits the need. These basic parts are complimented by a complete line of accessories including identification tabs, card pullers, circuit card ejectors, circuit card ejector/retainers, and cable connector hoods.

SAE's modular construction is expandable in three dimensions. Any depth — width — length, single or multi-bay, combination is available . . . any card size can be accommodated.

The structure consists of aluminum end plates and support bars. Card guides and connector mounting feet are snapped on to the bars on centers to meet the customer's packaging density requirements. The Snap-Together feature allows removal of an individual guide or mounting foot without removing adjacent parts.

5 BASIC PARTS

Even though the package configuration may involve custom sheet metal end plates flanged for horizontal or vertical mounting, the card file will consist of 5 basic parts.

1. Support bar (aluminum)
2. End plate (aluminum)
3. Locking tab (nylon)
4. Connector mounting foot (nylon)
5. Card guide (nylon)

HOW TO ORDER

A part number example is indicated below. If you wish to design a custom file using standard parts please see below for assistance in preparing your drawing. SAE's sheet metal capability can accommodate any end plate or enclosure configuration you may wish to incorporate.

If you intend to use number 6100 or 6101 card ejectors, please specify when ordering. End plates: Unless otherwise specified, end plate height will be the closest RETMA standard dimension greater than the circuit card height.

Plate length will be sufficient to accommodate connector depth plus space behind connector for termination.

If you wish SAE connectors installed in your card file, please specify when ordering.

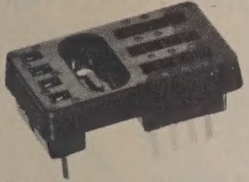
RELAY SOCKETS

GENERAL PURPOSE — 2, 4, 6 POLE



All Contacts are Beryllium Copper, Gold Plated.

Sockets are Molded of General Purpose, or Mica Filled Phenolic.

Other Materials Upon Application.

OPTIONAL RETAINER WIRE

.024 Dia. Tinned Spring Tempered Wire. Supplied as Separate Part.

To be Inserted into Recess on Narrow Sides of Socket.

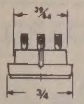
Part No.	Poles
21-1730	2
21-1730-1	4
21-1730-2	6

OPTIONAL GROUND WIRE 21-1729

.022 Dia. Nickel Silver Wire 18°, Spring Tempered.

To be Inserted into Socket Recess Under Mounting Screw Head.

Supplied as Separate Part.



Note: Solder hole applicable to hand wired type only.

2 POLE — PART NO. 51-1002 (SOLDER) 51-10002-2 (PC)

SPECIFICATIONS

ALCON Terminal Strips are made of 1/16" thick by 3/8" wide NEMA grade XP laminated phenolic with lugs assembled in position on either 3/8" or 1/2" centers. Other insulating materials can be specified with waxing or varnish impregnation.

TO ORDER

To order terminal strips to your specifications use the chart and designate position letters in sequence from left to right. For example: F2, A, A, F, A, A would be ALCON Part No. 4-1243. If "R" or "T" type lugs are desired add "R" or "T" to part number when ordering. Add "W" to part number if wax impregnation is desired. The most common terminals are shown. Many other styles are available.

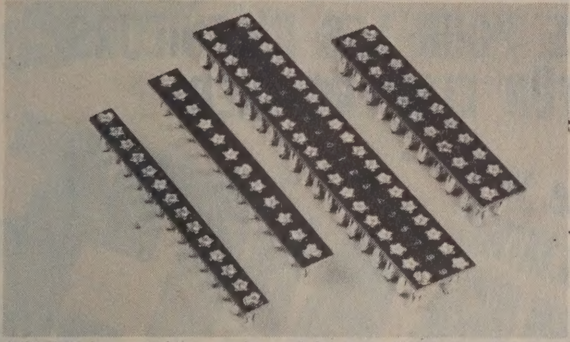
ASSEMBLIES

GRIP TYPE CONICAL LUG ASSEMBLIES



GRIP-TYPE lug assemblies can be used for conventional wire chassis or dip soldering process. One or more wires can be inserted into each lug and soldered individually or with multiple dip soldering process. Inserting leads into the GRIP-TYPE lugs eliminate the necessity of Wire-Wrapping.

Laminated material is XP phenolic and lugs are brass cadmium plated. Other types of laminated material available on request.

Note: Orientation of Conical Lugs is Optional.

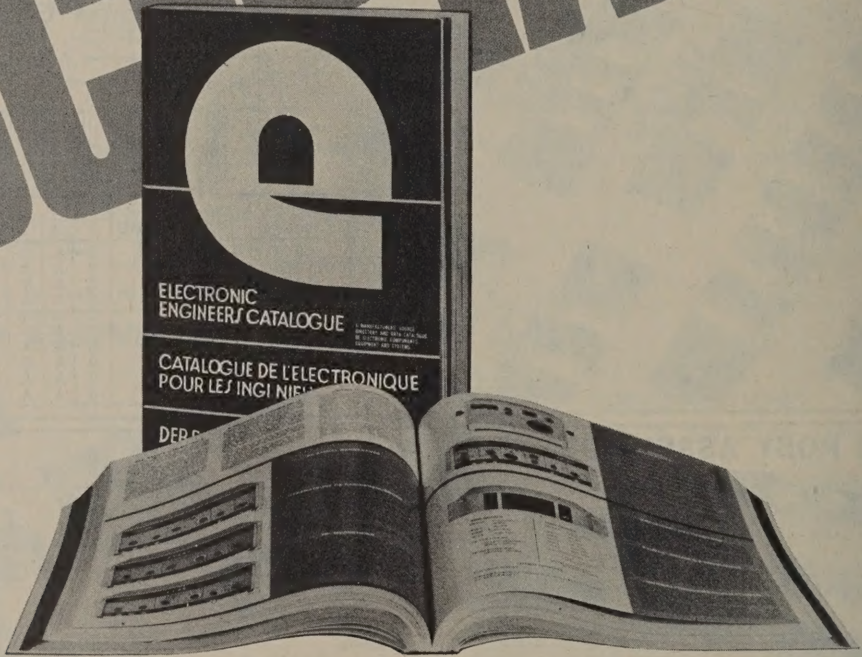
For Manufacturers Sales Offices refer to MANUFACTURERS, SALES OFFICES AND TRADE MARKS DIRECTORY

ELECTRONIC ENGINEERS CATALOGUE
CATALOGUE DE L'ELECTRONIQUE POUR LES INGENIEURS
DER PRODUKTKATALOG FÜR ELEKTRONIKER

The book is out...and the response is in...

IMMEDIATE AND OVERWHELMING

ACCEPTANCE



The ELECTRONIC ENGINEERS CATALOGUE is the only comprehensive, trilingual catalogue/ source-directory of electronic products available to - and from - Western Europe and the United Kingdom.

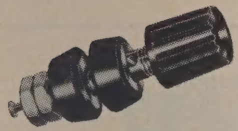
It is divided into three distinct sections: 1. **The Product Index and Directory,** which lists more than 3,000 products alphabetically in English with their French and German equivalents. 2. **The Manufacturers' Catalogue Section,** which is a compilation of Manufacturers' Catalogues in alphabetical order. 3. **The Manufacturers' Sales Offices and Trade Marks Directory,** which alphabetically includes country, address, telex or TWX numbers of the Manufacturers' main and local sales offices and/or agents.

The ELECTRONIC ENGINEERS CATALOGUE offers U.S. manufacturers the most cost-efficient method of distributing their catalogue data to **25,000** electronic engineers and buyers throughout Western Europe and the United Kingdom. It represents the carefully conceived application of the time-proven **eem** "cataloging" concept to the elusive European marketplace.

United Technical Publications, Inc., Div. of Cox Broadcasting Corp. 645 Stewart Avenue, Garden City, New York 11530 / 516 222-2500

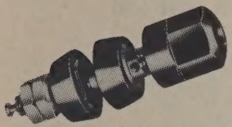
5-way® BINDING POSTS

5 WAYS TO CONNECT ● GOLD-PLATED BRASS PARTS ● RANGE OF COLORS



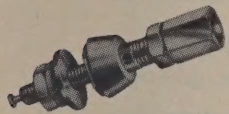
FLUTED NUT TYPES

Plastic parts of standard (not miniature) size types molded of Lexan polycarbonate resin; brass parts are gold-plated. Rated for 30 amperes, 1000 volts working. Nickel-plated brass types available on special order.



HEX NUT TYPES

Rated for 30 amperes, 1000 volts working. Brass parts are gold-plated; plastic parts are of nylon compounded to meet military specifications MIL-P-20693A, Type IV. Nickel-plated brass types available on order.

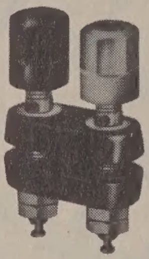


GROUNDING TYPE

For making rapid connections to ground. Made of finely machined brass nickel-plated and polished. Panel grounding collar frozen to shaft has "D" type shoulder for locking in keyed panel hole.

MINIATURE TYPES

Fluted nut design only. Rated for 15 amperes, 1000 volts working. Gold-plated brass parts; nylon plastic parts compounded to meet military specification MIL-P-20693A, Type IV. Types with nickel-plated brass available also.



DOUBLE ASSEMBLY TYPES

For instrument and equipment panels requiring binding posts mounted on ¾" centers. Rated for a current capacity of 30 amperes and a working voltage of 1000 volts. Brass parts are gold-plated; panel insulators in black only. Rugged, self-contained assembly makes mounting more accurate, faster and easier than two individual binding posts and gives maximum strength where connections are frequently made.

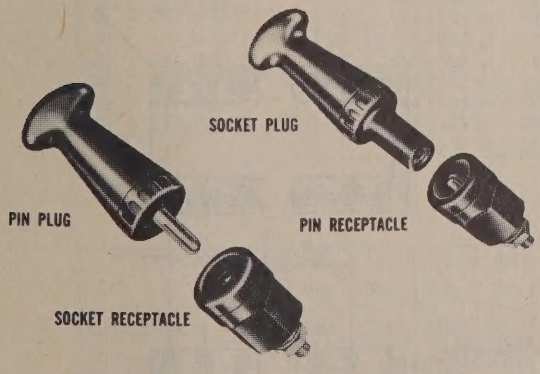
YC (yellow), GNC (green). For example: DF21BLC.

SUPERCON®

ELECTRICAL CONNECTORS



Nylon plastic parts; gold-plated brass current-carrying parts. Wiring connections to the same plug can be either soldered or solderless. Plug cable-fastening screws permit a wide range of cable sizes. Plug grips are of a simple, two-piece threaded construction for quick assembly. All receptacle plastic parts are molded of the same color to permit more rapid and accurate circuit identification front and back of panel when installed. The 25, 50 and 100 ampere types are listed by Underwriters' Laboratories, Inc.

- Low Insertion, high retention forces
- Anti-wicking design
- Inlay in contact area cuts cost and improves performance

SPECIFICATIONS

Material:

A. Body — glass reinforced polyester UL rated 94V-O

B. Contact — copper nickel alloy

C. Finish — 75 micro-inch min. gold inlay (C95 only)
200 micro-inch min. tin inlay (C85 only)

Notes:

A. Operating Temperature
-65°C to +125°C (C95 only)
-10°C to +100°C (C85 only)

B. Accommodates standard IC leads up to 0.014 in. thick and 0.025 in. wide

C. Sockets may be mounted end to end on 0.100" centers continuous line

D. Closed entry and ramp features provided to facilitate automatic IC insertion

E. Large opening and high standoff features provide improved heat dissipation and cleaning

F. Contacts have redundant spring elements

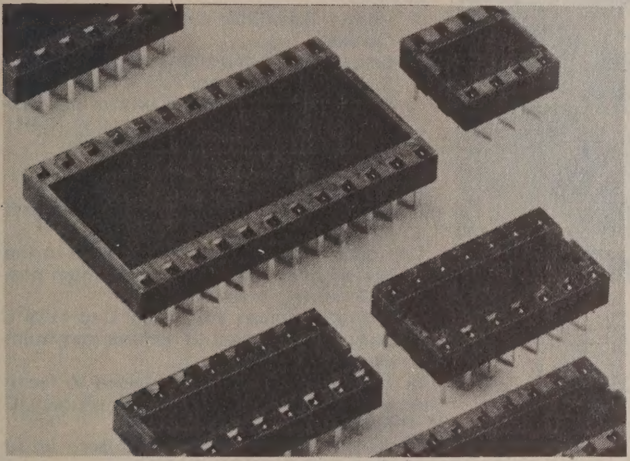
Low Profile DIP Sockets Edge Grip



- **Universal mounting and packaging**
- **Anti-wicking**
- **Solder standoffs for easy cleaning**
- **Redundant contact points for low contact resistance, higher reliability and repetitive insertion**

Here's the line of low profile solder tail sockets that makes wrought gold contact surfaces available at a price competitive with tin. And finally makes low price *and* high performance available by using a new, durable tin inlay. Only you know your performance requirements. But now, using gold or tin inlay, you can pick your own kind of savings — with TI sockets.

Notes:

A. Sockets meet requirements of Texas Instruments test specifications TS-0005 and test report TR-0003

B. Operating temperature -65°C to +125°C

C. Contacts have redundant spring elements

D. Accommodates standard IC leads up to .011 ± .003 x .018 ± .003

E. Contact is designed and oriented in the plastic body to generate maximum possible contact pressure

F. Socket is designed to achieve maximum density on boards

G. Sockets may be mounted end to end on .100" centers continuous line

H. Socket is designed to prevent IC leads from contacting P/C board

I. Closed entry feature provided to facilitate automatic IC insertion and protects the IC leads against damage.

J. Waferless design will become standard during the second half of 1977.

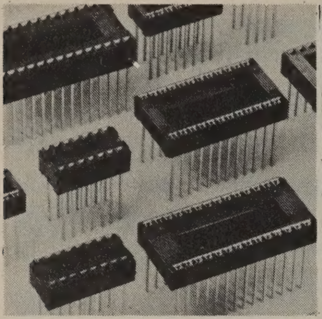
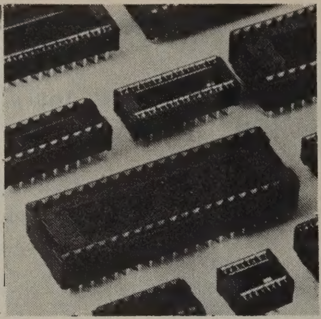
Standard Profile DIP Sockets Edgeboard Connectors





SPECIFICATIONS FOR DIP SOCKETS

Material:

A. Body — glass filled nylon (GFN)
B. Contact:
Solder tail — phosphor bronze per QQ-B-750 (C-82), copper nickel alloy (C-92)
Wire Wrap — phosphor bronze per QQ-B-750 (C-81), copper nickel alloy (C-91)
C. Finish — see part number schedule

Notes:

A. Contacts are replaceable
B. Contacts have redundant spring elements
C. Cover is removable
D. Contact is designed and oriented in the plastic body to generate maximum possible contact pressure
E. Operating temperature −65° C to +125° C
F. Socket is designed to achieve maximum density on boards
G. Closed entry cover is provided to facilitate automatic insertion and protect IC leads against damage
H. Accommodates standard IC leads up to .011 ± .003 x .018 ± .003
I. Contact retention 7 lbs. min.
J. Sockets are capable of being automatically or semiautomatically wire wrapped
K. Open entry, coverless version available. Order by specifying C9X-XX-50 for gold inlay or C8X-XX-54 for tin plate. N/A in 36 and 40 pins.

EDGEBOARD CONNECTOR SPECIFICATIONS

Material:

A. Body — glass filled nylon
B. Contact — copper nickel alloy
C. Finish:
Solder Tail — 75 micro-inch gold inlay
Wire Wrap — 50 micro-inch gold inlay

Notes:

A. Gang mating force — number of positions x 0.65 lbs.
B. Separation force (individual) — 0.5 oz. min.
C. Contact Resistance — 15 milliohms max.
D. Constriction resistance — 5 milliohms max.
E. Insulation resistance — 10,000 megohms min.
F. Dielectric withstanding voltage — 650 vacrms
G. Contact retention:
Wire Wrap — 7 lbs. min.
Solder Tail — 2 lbs. min.
H. Normal (contact) force — 50 grams min.
I. Contacts are replaceable
J. Contacts are bifurcated
K. Operating temperature: −65° C to +125° C
L. Wire wrap connectors are capable of semi or automatically wire wrapped
M. For further test information, refer to TI test report TR-0009

- **Wrought gold inlay 50-75 micro-inch thick**
- **Wire wrap or solder tail, 6 to 50 positions**
- **Choice of .100 or .125 centers**

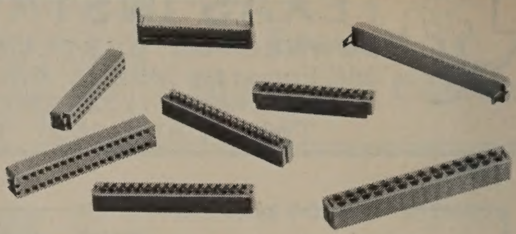
TI Part No. for Polarizing Key is R1079-01.
A key will be included with each connector.

*Parts indicated are in distributor stock. All other sizes contact factory.

Scotchflex® BRAND SOCKET CONNECTORS



INTRODUCTION

"Scotchflex" Brand socket connectors are available in all of the sizes and center spacings required to fit standard wrap panels, including most custom configurations. Where quick disconnect/reconnect capability is required, "Scotchflex" socket connectors may be used in conjunction with mating "Scotchflex" headers. Optional strain reliefs are available for the entire line of socket connectors should design needs require them.

TYPICAL PROPERTIES OF Scotchflex® BRAND SOCKET CONNECTORS

ELECTRICAL PROPERTIES	
CURRENT RATING	1 AMP
INSULATION RESISTANCE	$>1 \times 10^{9}$ Ohms
DIELECTRIC WITHSTANDING VOLTAGE	>1,000 Volts at Sea Level
ENVIRONMENTAL PROPERTIES	
TEMPERATURE RATING	-67°F to +221°F (-55°C to +105°C)
PHYSICAL PROPERTIES	
INSULATION MATERIAL	Glass Reinforced Polyester; U.L. Flammability Rating 94V-0
COLOR	All except 3327 Series: Gray 3327 Series: Red
CONTACT MATERIAL	Beryllium Copper
CONTACT PLATING	0.000030" (.762 μm) Min. Gold* Per Mil-G-45204 Type II over 0.000050" (1.27 μm) Min. Nickel
MARKING	Raised Figures; 3M Logo, Part Identification Numbers, Contact Position Numbers, Orientation Triangle
WIRE ACCOMMODATION	All except 3450 and 3441 Series: 26 AWG Solid; 28 AWG Solid or Stranded; 30 AWG Solid 3450 Series: 26 AWG Solid; 24 AWG Stranded 3441 Series: 24 AWG Stranded
CONTACT INSERTION FORCE	All except 3450, 3441 and 3307 Series: .50 lb. (2.2N) per Contact 3450 Series: .20 lb. (.89N) per Contact 3441 Series: .16 lb. (.71N) per Contact 3307 Series: .30 lb. (1.33N) per Contact
CONTACT WITHDRAWAL FORCE	All except 3450, 3441 and 3307 Series: .50 lb. (2.2N) per Contact 3450 Series: .10 lb. (.44N) per Contact 3441 Series: .11 lb. (.49N) per Contact 3307 Series: .26 lb. (1.16N) per Contact

*0.000050" (1.27 μm) Min. Gold on 3450 Series

Most "Scotchflex" Brand products are identified by an eight-digit 3M Part Number. When ordering, be sure to include the complete series/suffix number (i.e., 3471-0000).

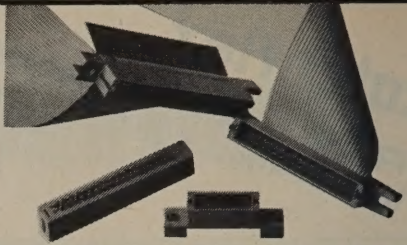
Scotchflex® BRAND PLUG CONNECTORS



Featuring .025" (0.64 mm) square pins, this new family of connectors provides plug compatibility to SCOTCHFLEX socket connectors. Increased versatility is achieved since the connector is offered in two different configurations. For rack and panel type applications, the connector is designed with mounting flanges. When mid-spanning the plug connector is available without mounting flanges.

Design applications for the SCTOCHFLEX plug connector include use as a T-tap from a cable buss; a splice connector, or as an I/O interface.

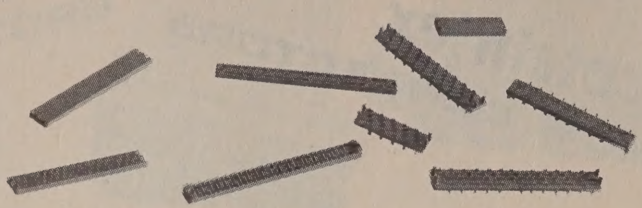
Scotchflex® BRAND P.C.B. CONNECTORS



INTRODUCTION

Flat cable may be terminated at the circuit card by hand or flow solderable SCOTCHFLEX connectors. The contacts which are positioned in the connector body are soldered to the board as a unit. The flat cable terminates in the connector to the "U" form end of the contacts. As with other SCOTCHFLEX connectors, no stripping or soldering of conductors is required. SCOTCHFLEX P.C.B. Connectors come in a variety of configurations to mate with SCOTCHFLEX flat cable.

	3426-0001T	.094-.125 (2.39-3.18)			

**3378-1000 denotes individual wire cover.

NOTE: All connectors listed use the 3442-1 standard platen, except the 3378-____T connector, which utilizes the 3442-2 platen. While the above data was correct at the time of publication, it is recommended that for specification purposes a current Spec Data Sheet on the particular connector be requested. These sheets contain full dimensional details and are available from the Scotchflex sales representative in your area.

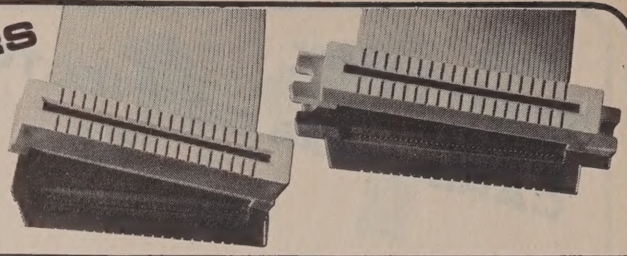
Scotchflex® BRAND CARD-EDGE CONNECTORS



Dual-readout "Scotchflex" Card-Edge Connectors let you make up to 50 terminations in a single step. All styles are offered with or without mounting ears; both versions have bifurcated, gold-plated beryllium copper contacts insuring dependable electrical interface through repeated insertions and withdrawals. Insulation-piercing "U" contacts are on .050" (1.27mm) centers, staggered to accept .100" (2.54mm) spacing on card-edge.

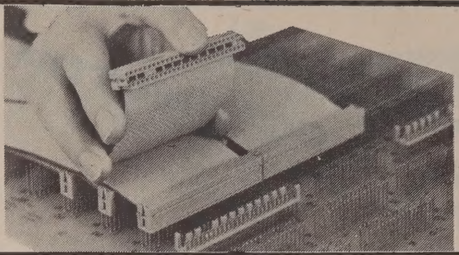
Scotchflex® BRAND SOCKET CONNECTOR AND KEYING HEADER SYSTEM



Unique polarizing, keying and backplane interconnection capabilities have been added to the Scotchflex Cable/Connector line with the introduction of a new mass terminating Socket Connector and Keying Header.

The 50 position Socket Connector will directly interface with .025" square backplane wrap pins. This Connector mates with 50 conductor Scotchflex Brand Flat Cables in 26 AWG or 30 AWG solid conductor and 28 AWG solid or stranded conductor versions.

Polarizing is accomplished with the Keying Header which is placed directly over 54, .025" square pins.

Its design includes posts on opposite corners for alignment of the header over the wrap pins. These posts also serve as a depth guide for .237" engagement, eliminating the need to cut pins, and allowing for two layers of wrap below the header.

Rectangular keying posts in the center of the header break away to allow positive keying of the Socket Connector. A polarizing key is inserted into the keying holes on the Connector for mistakeproof polarization.

A wire form strain relief handle is available which minimizes stress to the contact/conductor interconnection and provides an area for identification.

All Connector housings and polarizing keys are constructed of glass-reinforced thermoplastic with a flammability rating of 94 V-0.

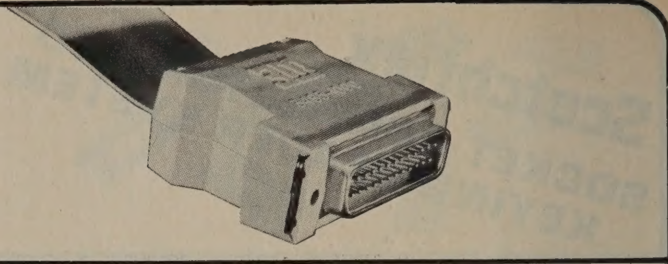
Scotchflex® BRAND DELTA CONNECTOR SYSTEM



Here is the first system in the industry to permit mass connection of "D" subminiature connectors without the time-consuming stripping, soldering, crimping and individual positioning of discrete wires required by other systems. The "Scotchflex" Delta Connector System offers simultaneous stripping and terminating using the proven "U" contact principle pioneered by 3M. To provide instant interfacing of equipment having two different center spacings, the "Scotchflex" Delta System offers cables with unique variable patterns of center spacing (see page 00). The "Scotchflex" Delta System provides unequaled versatility, since its connectors are cable-compatible with all other "Scotchflex" connectors (Socket, P.C.B., D.I.P., Plug and Card-Edge) and also mate with all other "D" subminiature connectors in the industry. A complete line of accessory components is available.

TYPICAL PROPERTIES OF THE SCOTCHFLEX DELTA CONNECTOR

ELECTRICAL	
Current Rating	1 Amp
Insulation Resistance	>1 x 10⁹ ohms
Dielectric Strength	>1,000 volts at sea level

Scotchflex® BRAND DELTA CONNECTOR SYSTEM

Instant interfacing of equipment having two different center spacings is made possible with these "Scotchflex" vari-spaced cables. As shown below, conductor spacing areas with .054" (1.37mm) and .050" (1.27mm) spacing are alternated in roughly 18" overall patterns, with each .050" (1.27mm) segment identified by a red or black stripe on the cable. Transition or "no assembly" zones separating the active conductor areas are identified by a series of ridges running perpendicular to the cable conductors; this buffer area is not to be used for termination purposes.

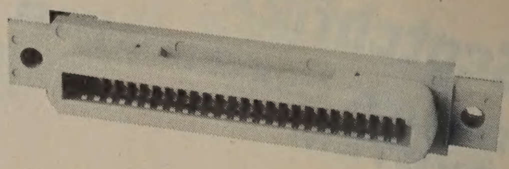
Scotchflex® BRAND DELTA RIBBON CONNECTOR SYSTEM



Now you can mass-terminate ribbon connectors without the expensive wire preparation and assembly costs required by other systems. The "Scotchflex" Delta Ribbon Connector System eliminates all stripping, soldering, crimping and individual positioning of discrete wires; using 3M's proven "U" contact principle you strip and terminate 50 conductors (25 pairs) simultaneously. To provide instant interfacing of equipment having two different center spacings, the "Scotchflex" Delta Ribbon System offers cables with unique variable patterns of center spacing (see page 00). Unequaled versatility is provided by the system, since all Delta Ribbon connectors are cable-compatible with other connectors in the "Scotchflex" line (Socket, P.C.B., D.I.P., Plug and Card-Edge, and also mate with all other "D" subminiature connectors in the industry. A complete line of accessory components is available.

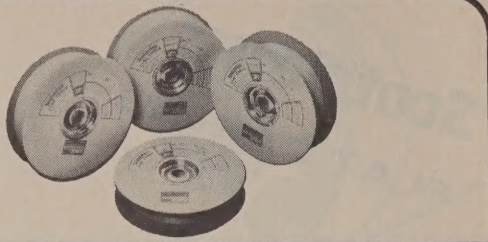
Scotchflex® BRAND FLAT CABLES



INTRODUCTION

3M Company's lightweight, low-profile flat cables are designed to mate with all standard industry connectors. They are offered in standard round conductor, ground plane, ground plane with drain wire, and color-coded versions. Being flexible, these flat cables can be bent or folded without damaging either conductors or insulation. Conductors are joined in one-piece construction with a ribbed top side for positioning in mating connectors; there is a red, black or green coding stripe along one edge of the cable to simplify orientation. Insulation is polyvinyl chloride, U.L. listed at 300 VRMS, 221°F (105°C), with an FR-1 rating. Using "Scotchflex" connectors, 3M flat cables are also suitable for bussing operations. The 3M Company's high production standards assure close center-spacing tolerances to give predictable and consistent electrical characteristics. Using the 3M flat cable and connector system, jumper assembly labor costs are appreciably reduced, since hand wiring and soldering are eliminated. For assistance with special design problems, contact your local 3M sales representative or "Scotchflex" distributor.

ROUND CONDUCTOR FLAT CABLE

The 3M Company supplies 7 standard round conductor flat cables. They come in wire sizes #30 AWG Solid, #28 AWG Stranded, #26 AWG Solid, and #24 AWG Stranded with up to 64 conductor widths. Depending on the particular cable, there are three center spacings to choose from — .050", .0625" and .075". Being zippable, breakouts can be made when more than one connector is required on an end. With this wide selection, 3M has the right cable to meet your needs.

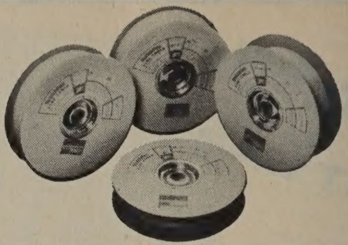
Most "Scotchflex" Brand products are identified by a multiple-digit 3M Part Number. When ordering, be sure to include the complete series/suffix number (i.e., 3350/10).

Scotchflex® BRAND FLAT CABLES



Color-coding adds the convenience of individual wire identification to the proven advantages of the "Scotchflex" mass termination system. Similar to our familiar gray cable, these new additions to the "Scotchflex" line are fully zippable, permitting conductors to be either mass terminated or separated for multiple discrete connections. Depending on the particular cable, they are available with 28 AWG stranded and 26 AWG solid conductors on .0425", .050" or .054" centers, in cable sizes up to 64 conductors.

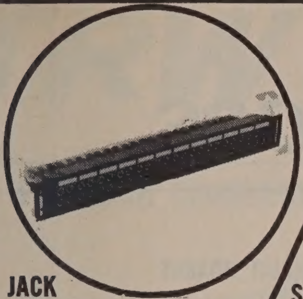
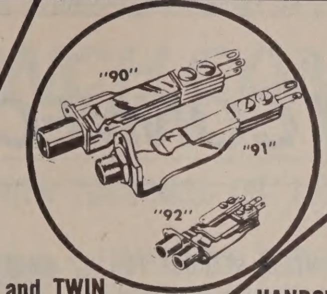
Most "Scotchflex" Brand products are identified by an eight-digit 3M Part Number. When ordering, be sure to include the complete series/suffix number (i.e., 3302/10).

Electronic Products Division 3M COMPANY
3M CENTER • SAINT PAUL, MINNESOTA 55101



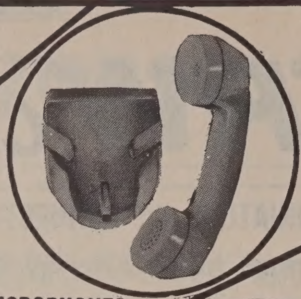
JACK MOUNTING PANELS

Used for mounting standard and miniature telephone and coaxial jacks, keys, lamp sockets, etc. Equivalents of W.E. and many others available. Request bulletins on Product Family 70.



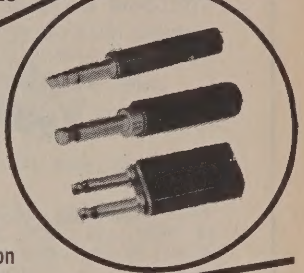
SINGLE and TWIN TELEPHONE JACKS

Standard and miniature size jacks. All circuit configurations. Panels for these provided by Product Family 70. Request bulletin on Product Family 51 53, and 55 on jacks.



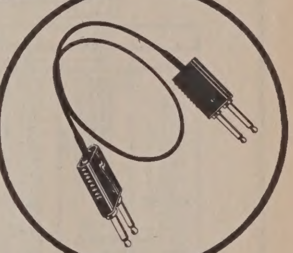
HANDSETS—HEADSET-MICROPHONES and ACCESSORIES

Types for all telecommunication, telephone operators, broadcast station, intercomm, etc. applications. Includes sound powered and carbon microphones, a variety of push-to-talk switches, cords, and accessories, such as cradles for hanging handsets. Request bulletins on Product Family 20.



TELEPHONE PLUGS

Nearly all types, W.E. Kellogg, A.E., etc. both single and twin in two and three circuit forms. All have molded in place nylon insulation. Request bulletins on Product Family 80.



AUDIO PATCH, SWITCHBOARD, and TEST CORDS

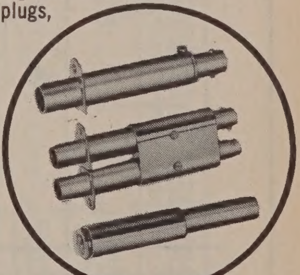
With standard and miniature size single and twin telephone plugs. Nylon braided tinsel conductor cords. Request bulletin on Product Family 30.

TRIMM'S Full Line

Available from our industrial distributor in your area

COAX JACKS — PLUGS — PATCH CORDS — and RELATED COMPONENTS

Standard sized single and twin jacks including normal through and terminating types, W.E. and RCA compatible, fitting wide assortment of coax cables and other connectors. Twin looping plugs, single plugs, plug adapters, patch cords, etc. Also specialized triax and twinax concentric series jacks and plugs as well as miniaturized type. Request bulletin on Product Family 60.



HEADSETS

Many types in all cost ranges, applicable to wide variety of applications. Request bulletin on Product Family 01 through 19.

AUDIO PLUGS and JACKS

Numerous low cost plugs and jacks for hi-fi, tape recorders, sound equipment, etc. Request bulletin on Product Family 40.

TERMINAL BLOCKS

Originally used by the telephone industry (often called Christmas Tree type) now also widely used in other system work. Up to 14 rows per block; 10, 20, and 26 terminals per row. Lug types — solder, wire-wrap, and hybrid solder, wire-wrap. Request bulletin on Product Family 35.

FEATURES AND SPECIFICATIONS

SPECIAL FEATURES: High density (.050" centers) miniature edge connector with special ribbon-type contacts.

Potential applications include standard and thin film memory planes, diodes on insulating substrates and virtually any type of modular plug-in unit.

Available in wide range of sizes with variety of terminations and mounting styles.

SIZES: Available in 6, 10, 15, 20 and 25 contact position sizes with intermediate sizes available on special order.

TERMINATIONS: Available with conventional ribbon-type wiring tails; dip solder or wire wrap versions also available.

MOUNTING STYLES: Conventional wiring tail types available with special mounting clips for snap-in removable semi-flush panel mounting or without clips and using plain .093" dia. holes for standard mounting.

INSULATOR MATERIAL: Green glass-filled diallyl phthalate, type SDG-F per MIL-M-14.

CONTACT MATERIAL & PLATING: Beryllium copper with 30 micro-inches gold finish over 50 micro-inches copper.

MOUNTING CLIP MATERIAL & PLATING: Carbon steel with cadmium plate plus yellow chromate finish.

POLARIZING KEY MATERIALS: Made of cellulose acetate and must be ordered separately.

PERFORMANCE SPECIFICATIONS: Contact factory.

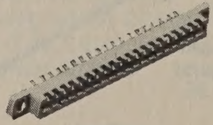
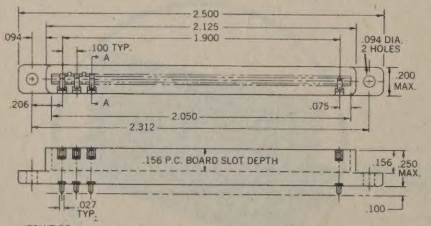
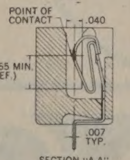
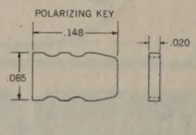
"MINI-TYKE" EDGE CONNECTOR/.100" SPACING - SINGLE READOUT FOR 1/32" PRINTED CIRCUIT BOARDS







SECTION "A-A"



FEATURES AND SPECIFICATIONS

SPECIAL FEATURES: Extremely low profile connector for compact packaging — overall ¼" height of connector less than half that of standard PC connectors.

Preloaded contact construction provides uniformity of gap and assures adequate contact pressure. Ideally suited for a wide range of miniature PC board plug-in applications including airborne equipment, test equipment and digital components.

SIZE: Available in 20 contact position size only.

TERMINATION: Dip solder tails for insertion and wave soldering in PC mother board.

MOUNTING STYLE: Plain .094" Dia. holes for standard mounting.

INSULATOR MATERIAL: Green glass-filled diallyl phthalate, type SDG-F per MIL-M-14.

CONTACT MATERIAL & PLATING: Beryllium copper with 50 micro-inches gold finish over 50 micro-inches copper.

POLARIZING KEY MATERIAL: Made of nylon and must be ordered separately.

PERFORMANCE SPECIFICATIONS: Contact factory.

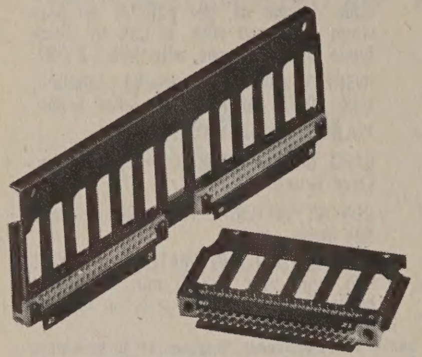
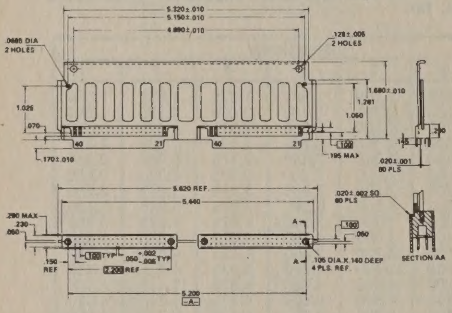
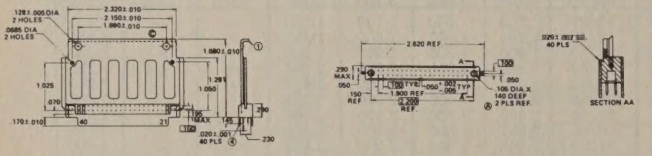
NAFI 40 & 80 CONTACT PC CONNECTOR & MODULES







This miniature connector assembly can be quickly and easily disassembled and reassembled for wave solder installation of PC boards as well as for field servicing and retrofit.

These 40 and 80 pin connectors are designed to meet, or exceed, the requirements of NavOrd specification number WS-6116, and associated profile drawing number 2672600. Specifically, they comply with the design configurations delineated by NavOrd drawings 0102-655 and 0102-660, respectively.

These assemblies function as headers for the support of a printed circuit board measuring approximately $2\frac{5}{16}$", or $5\frac{5}{16}$" x $1\frac{3}{32}$". They provide for the assembly of dual-in-line packages, the leads of which will extend through the cutouts in the metal frame portion, into the printed circuit board allowing for their interconnection by wave soldering. The metal frame acts as a heat sink to carry away the heat generated by the dual-in-line devices.

The connector contains 40 contacts, 2 rows of 20 each arranged in .100" x .100" centers, which are gold plated brass.

These assemblies may be mated to back panel assemblies with insulated or grounded mini-mod receptacles described on this page, or with any receptacle arrangement conforming to NavOrd specification WS6157.

ELECTRICAL SPECIFICATIONS

Current Rating: 3.0 amps.
Contact Resistance: 6.0 milliohms max.
Dielectric Strength: 1000V RMS, 1200V DC.
Insulation Resistance: 100,000 megohms min.

MATERIALS AND FINISHES

Contact Strip: Glass filled diallyl phthalate per MIL-M-14F, Type SDG.

Contact Pins: Brass alloy per QQ-B-613, 50 microinches gold minimum over nickel.
Frame: Black anodized aluminum per QQ-A-250.

MECHANICAL SPECIFICATIONS

Molded-in pins will withstand 20 oz. pull.
Guide ribs will withstand 10 in.-lbs. torque.
Extractor fin withstands 6 in.-lbs. torque.
Pin shield withstands 6 lbs. pull.

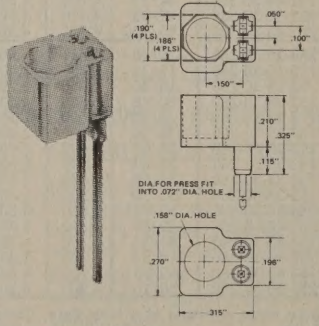
ORDERING INFORMATION

Cinch Part No.	NavOrd No.	Description
299 99 00 004	0102-655	Single Span
299 99 00 005	0102-660	Double Span

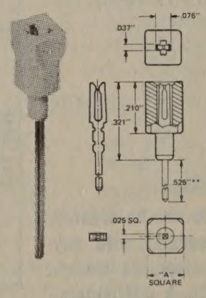
Consult the factory for other frame cutout configurations.

RECEPTACLE HARDWARE

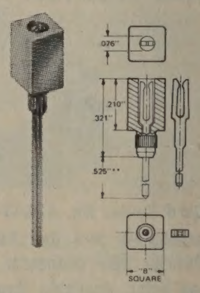
POLARIZING MODULE



SIGNAL MODULE



GROUND MODULE



Grid	Dim. "A"	Dim. "B"
.100" x .100"	.095"	.095"
.125" x .125"	.120"	.120"
.150" x .150"	.145"	.145"

**Other tail lengths available upon request.

MINI-MOD MODULES

FEATURES

- Modular construction for wide latitude of configurations on .100" x .100", 125" x .125" and .150" x .150" grid.
- Meet stringent requirements for military airborne applications.
- Meet NAFI's standard packaging concept per WS-6157A.
- Nylon modules serve as both contact retention devices and as a dielectric.
- Available in colors for easy color coding and identification.
- Automatic assembly operations offer low overall costs.

PHYSICAL CHARACTERISTICS

Insulator Material: White nylon per MIL-M-20693A. Other colors available on request.

Ground Material: Aluminum per QQ-A-225.

Contact Material: Phosphor bronze per QQ-B-750. Comp. A or Beryllium copper per QQ-C-533.

Contact Plating: 30 microinches gold per MIL-G-45204B over copper flash. Other finishes available on request.

ELECTRICAL CHARACTERISTICS

Current Rating: 3 amps.

Withstanding Voltage: 1800V AC tested per EIA std. RS-364.

Operating Voltage: 600V AC — ⅓ withstanding voltage per EIA std. RS-364.

Contact Resistance: 8 milliohms max.

Insulation Resistance: 5000 megohms min.

MECHANICAL DATA

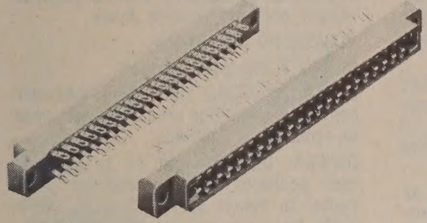
Individual contact insertion and withdrawal with an .020 blade — 2-10 oz.
Individual contact retention — 8 lbs. min.

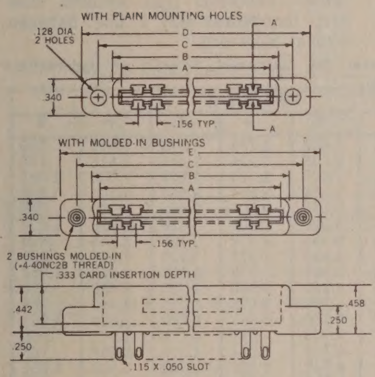
TRW CINCH CONNECTORS, AN ELECTRONIC COMPONENTS DIV. OF TRW INC. / 1501 MORSE AVE. / ELK GROVE VILLAGE, ILL. 60007

TRW CINCH CONNECTORS

STANDARD PC CONNECTORS

STANDARD EDGE CONNECTORS WITH SOLDER TAB CONTACTS/ .156″ SPACING - SINGLE OR DOUBLE READOUT FOR 1/16″ PRINTED CIRCUIT BOARDS





FEATURES AND SPECIFICATIONS

SPECIAL FEATURES: Patented bifurcated bellows contacts Pat. No. 3274532 provide added contact reliability especially in applications where vibration and board irregularities are involved.

SIZES: Both single and double readout versions are available in 6, 10, 12, 15, 18, 20, 22 and 25-contact position sizes.

TERMINATION: Bifurcated contacts with conventional .115″ x .050″ slot solder tabs.

MOUNTING STYLES: Available with either .128″ diameter holes for standard mounting molded-in bushings or floating bushings. .142″ diameter plain holes also available on special order.

INSULATOR MATERIAL: Green glass-filled diallyl phthalate, type SDG-F per MIL-M-14.

CONTACT MATERIALS & PLATING: Contacts are available in either phosphor bronze or beryllium copper. Standard finish is 30 micro-inches gold in the contacting area and 10 micro-inches gold on the remainder of the contact. Beryllium copper contacts can also be supplied with special finish of 50 micro-inches gold over 100 micro-inches copper to meet MIL-C-21079 C.

POLARIZING KEY MATERIALS: Two types of polarizing keys are available, and must be ordered separately as follows: Part No. 456-07-35-003 (for between-contact polarization) is made of glass epoxy; Part No. 474-11-54-200 (for in-contact polarization) is made of diallyl phthalate.

PERFORMANCE SPECIFICATIONS: Contact factory.

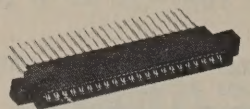
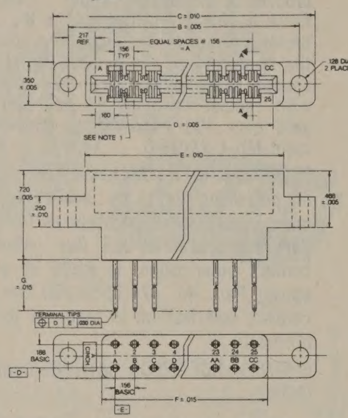
TRW CINCH CONNECTORS

PC BOARD CONNECTORS WITH TERMINALS ON .156 CENTERS

PRINTED CIRCUIT BOARD CONNECTORS/WITH WIRE WRAP .031 x .062 TERMINALS ON .156 CENTERS





FEATURES AND SPECIFICATIONS

CURRENT RATING: 3 amperes. Based upon all contacts carrying specified current and a temperature rise of 30°C above ambient.

RATED VOLTAGE (Sea Level): 900 V AC RMS 1200 V DC. (Based on ⅓ voltage breakdown)

TEST VOLTAGE (Sea Level): 2000 V AC RMS 2700 V DC. (Based on 75% voltage breakdown)

CONTACT RESISTANCE (Millivolt Drop @ 3 Amp): 16 millivolt max.

TOTAL INSERTION FORCE: 20 lbs. max. Performed in accordance with Paragraph 4.6.6.2 of MIL-C-21097 using .070 inch thick blade.

INDIVIDUAL CONTACT ENGAGING AND SEPARATION FORCE: 2-16 oz. Performed in accordance with Paragraph 4.6.6.1.1 of MIL-C-21097B using .062 inch thick blade.

INDIVIDUAL SEPARATION FORCE: 1 oz. min. Performed in accordance with Paragraph 4.6.6.1.2 of MIL-C-21097 using .054 inch thick blade.

DURABILITY: 100 cycles with steel blade .070 inch thick. Contact resistance and individual contact separation force requirements met after test.

INSULATOR MATERIALS: General purpose impact phenolic — color black.

POLARIZING KEY: Nylon

CONTACT: Phosphor bronze

CONTACT PLATING: .00006 min. gold over copper in contacting area .0001 min. gold on remainder of contact.

GENERAL DESCRIPTION: 10 to 30 contact positions double read-out .156 center to center spacing. For 1/16 (.054-.070) thick printed circuit card. Bifurcated — cantilever type contacts. Wire wrap termination .031 x .062. Between contact polarizing.

FEATURES AND SPECIFICATIONS

SPECIAL FEATURES. Patented bifurcated bellows contacts Pat. No. 374532 provide added contact reliability especially in applications where vibration and board irregularities are involved.

SIZES: Both single and double readout versions are available in 6, 10, 12, 15, 18, 20, 22 and 25-contact position sizes.

TERMINATIONS: Bifurcated contacts with tails designed for dip soldering 5/32″ long. Other lengths available on special order.

MOUNTING STYLE: Plain .128″ diameter holes for standard mounting.

INSULATOR MATERIAL: Green glass-filled diallyl phthalate, type SDG-F per MIL-M-14.

CONTACT MATERIALS & PLATING: Contacts are available in either phosphor bronze or beryllium copper. Standard finish is 30 micro-inches gold in contacting area and 10 micro-inches on remainder of contact. Connectors can also be supplied with a contact finish of 50 micro-inches gold over 100 micro-inches copper to meet MIL-C-21097C.

POLARIZING KEY MATERIALS: Two types of polarizing keys are available, and must be ordered separately as follows: Part No. 456-07-35-003 (for between-contact polarization) is made of glass epoxy; Part No. 474-11-54-200 (for in-contact polarization) is made of diallyl phthalate.

PERFORMANCE SPECIFICATIONS: Contact factory.

FEATURES AND SPECIFICATIONS

SPECIAL FEATURES: Center bridge construction utilized in insulator to minimize warpage. Available with both solder tab and wrap post termination.

SIZE: Available in 30-position size only.

TERMINATIONS: Available with conventional solder tab tails or .060″ x .030″ wrap post contacts.

MOUNTING STYLE: Plain .178″ diameter holes for standard mounting.

INSULATOR MATERIAL: Green glass-filled diallyl phthalate, type SDG-F per MIL-M-14.

CONTACT MATERIALS & PLATING: Contacts are available in either phosphor bronze or beryllium copper with 30 micro-inches gold on the contacting area and 10 micro-inches gold on the remainder of contact.

POLARIZING KEY MATERIALS: Available with "in-contact" polarization only; polarizing key is made of diallyl phthalate and must be ordered separately. (Part No. 474-11-54-200).

PERFORMANCE SPECIFICATIONS: Contact factory.

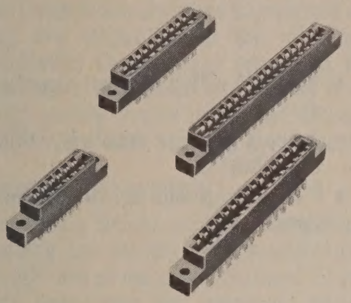
* Plated 30 micro-inches gold. Not selective.

TRW CINCH CONNECTORS

SERIES 90 ECONO-LINE LOW-COST P.C. EDGE CONNECTORS ON .156″ CENTERS FOR 1/16″ BOARDS —.333 DEEP CARD SLOT



Most of the performance features of TRW/Cinch Connectors standard printed circuit edge connectors are found in this low-cost version for commercial applications. Except for the reduced amount of gold-plating, the Series 90 Econo-Line connectors meet all the latest requirements of MIL-C-21097, Std. 202.

The Series 90 incorporates a newly developed high tensile brass, Alcoloy* 688, in its bifurcated bellow contacts. Tne contact area is selectively plated with 20 microinches of gold over 30 microinches of nickel that provides a non-migrating base. A green, glass-filled thermoplastic polyester replaces the more expensive diallyl phthalate used in the standard connector insulator.

Econo-Line connectors are supplied in 6, 10, 12, 15, 18, 22 and 25 positions, with either single or double readout in either conventional solder eyelet or dip solder tails.

*T.M. Olin Corporation.

PERFORMANCE DATA

MECHANICAL

Contact Insertion Force: 16 oz. max. per contact position.

Individual Separation Force: 1 oz. min. Performed in accordance with Para. 4.6.6.1.2 of MIL-C-21097 using .054-in. thick blade.

Durability: 100 cycles with steel blade .070-in. thick. Contact resistance and individual contact separation force requirements met after test.

ELECTRICAL

Voltage Rating (AC RMS, adjacent terminals): 830V (sea level); 300V (3.4″ Hg, 50,000 feet); 450V (1.3″ Hg, 70,000 feet).

Test Voltage (AC RMS, adjacent terminals): 1870V (sea level); 675V (3.4″ Hg, 50,000 feet); 450V (1.3″ Hg, 70,000 feet).

Current Rating: 5 amperes.

(Based upon all contacts carrying specified current and a temperature rise of 30°C. above ambient.)

Contact Resistance (at rated current): .005 ohms.

Insulation Resistance: 5000 Megohms.

ENVIRONMENTAL SPECIFICATIONS

(Per MIL-C-21097 and MIL-STD-202, latest versions)

Shock: 3 blows at 50G, Method 202B.

Temperature Cycling: 5 continuous cycles per Method 107B.

Test Condition B: −65°C to +125°C.

Salt Spray: 48 hours per Method 101B, Condition B.

Vibration: Per Method 204A, Condition B for bifurcated contacts.

Humidity: Per Method 103B, Condition B.

MATERIALS & FINISHES

Contacts: Alcoloy 688 high tensile brass.

Plating: Contact surface selectively plated with 20 microinches gold over 30 microinches nickel overall; solder-coated terminals.

Insulator: 30% glass-filled green polyester, SEO-rated.

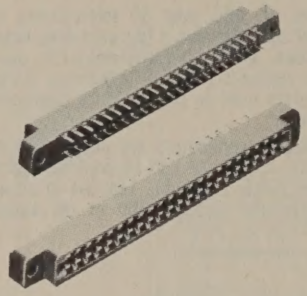
TRW CINCH CONNECTORS

DIP SOLDER TERMINAL PC CONNECTORS
0.140″ SPACING BETWEEN ROWS 0.156″ CONTACT CENTERS



- Patented bifurcated bellows contacts for added contact reliability.
- Ideal for applications involving vibration or board irregularities.
- 6, 10, 12, 15, 18, 22 and 25-contact sizes, double readout.
- Available with or without mounting ears.
- Accepts single or double 1/16″ thick sided boards.
- 0.125″ long dip solder terminations.

MATERIALS

Insulator Material: Green glass-filled diallyl phthalate, type SDG-F per MIL-M-14.

Contact Material: Contacts are available in phosphor bronze. Standard finish is 30 micro-inches gold in contacting area and 10 micro-inches gold on remainder of contact.

Polarizing Key Materials: Two types of polarizing keys are available, and must be ordered separately as follows: Part No. 456-07-35-003 (for between contact polarization) is made of glass epoxy; Part No. 474-11-54-200 (for in-contact polarization) is made of diallyl phthalate.

ENVIRONMENTAL SPECIFICATIONS

Shock: 3 blows of 50G per MIL-STD-202C, Method 202B.

Temperature Cycling: 5 continuous cycles (−65°C to +105°C) per MIL-STD-202C, Method 107B, Test Condition B.

Salt Spray: 48 hours per MIL-STD-202C, Method 101B, Condition B.

Vibration: Per MIL-STD-202C, Method 204A, Test Condition B.

Humidity: Per MIL-STD-202C, Method 103B, Condition B.

ELECTRICAL SPECIFICATIONS

Test Voltage (AC RMS, adjacent terminals): 830V (sea level); 300V (3.4″ Hg, 50,000 feet); 200V (1.3″ Hg, 70,000 feet).

Current Rating: 5.0 amperes.

Contact Resistance at Rated Current: .005 ohms.

Insulation Resistance: 5000 megohms.

TRW CINCH CONNECTORS

CINCH D-SUBMINIATURE CONNECTORS†

All Cinch D-Subminiature Connectors undergo final assembly and inspection in the ultra-modern, temperature controlled Cinch "clean room." In this room, contacts, insulators and shells are stored and assembled under tight quality control inspection. Ultrasonic cleaning capabilities are also available on request.

GENERAL DESCRIPTION

The Cinch D-Subminiature Connectors described in this catalog are designed for applications where space and weight are prime considerations. These high contact density connectors are especially well-suited for aircraft, missile and ground support installations. Although designed essentially for rack-and-panel installations, D series connectors may be adapted for cable attachment by means of accessory junction shells with integral clamps.

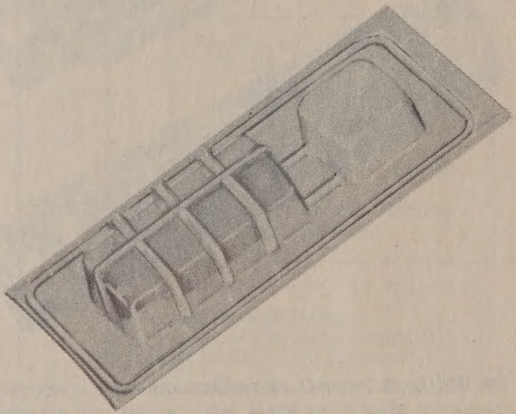
In addition to the original D series with solder pot contacts in a two piece insulator, Cinch now offers Golden D, Mark I Connectors with solder pot contacts in a monobloc insulator for improved moisture resistance; Royal D, Mark III connectors with crimp snap-in contacts in the Little Caesar assembly for high performance, high reliability applications, and the Burgun-D with insertable and removable stamped or machine contacts for commercial applications.

All D-Subminiature Connectors will inter-mate if insert arrangements correspond. Mark I and Mark III connectors are designed to meet or exceed the requirements of MIL-C-24308 Rev. A.

A wide range of insert arrangements is offered accommodating up to 50 contacts accepting standard AWG wire as indicated in the individual specifications. Combination layouts are available, with provisions for coaxial and/or high voltage contacts. Printed circuit and wire wrap terminations are also available. The versatility of the D series is further enhanced by the variety of insulating materials and finishes, as well as a complete line of accessories.

The D-Subminiature series is handled by leading electronic distributors throughout the country. Questions regarding modifications of these designs or any connector requirement should be addressed to your local Cinch representative and will receive his immediate attention.

CONNECTORS INDIVIDUALLY PACKED IN HEAT-SEALED CONTAINERS TO ASSURE EXTENDED SHELF-LIFE



To protect D-Subminiature Connectors from contamination and other corrosive elements in the air, Cinch individually packs each connector in heat-sealed polyvinylchloride containers (as shown). This assures every customer of an extended shelf life. A separate compartment is also provided in each container for the loose crimp-type contacts supplied with the Royal D Mark III Connectors. Connectors can also be packed in individual polyethylene bags if desired.

INDEX CONNECTORS

Type	Description	Common Name	Insulator Type	Contact Termination	Page
D*C	D connectors with crimp snap-in contacts in two-piece insulators, with integral retension system	Burgun D	Two-piece, Nylon	Crimp Snap-in Screw machine and stamped contacts	4-8
D*MA	D connectors with crimp snap-in contacts in monoblock insulators utilizing Little Caesar rear release contact assembly	Royal D, Mark III	Monobloc, diallyl phthalate	Crimp Snap-in	20-21
D*M	D connectors with monoblock insulators for more critical application requirements	Golden D, Mark I	Monobloc, diallyl phthalate	Solder Pot	15-19
		Golden D, Mark I Combination	Monobloc, diallyl phthalate	Solder Pot with coaxial and/or HV and/or power	
D*	Original D connector with two-piece insulators	Original D	Two-piece, Nylon	Solder Pot	13-14

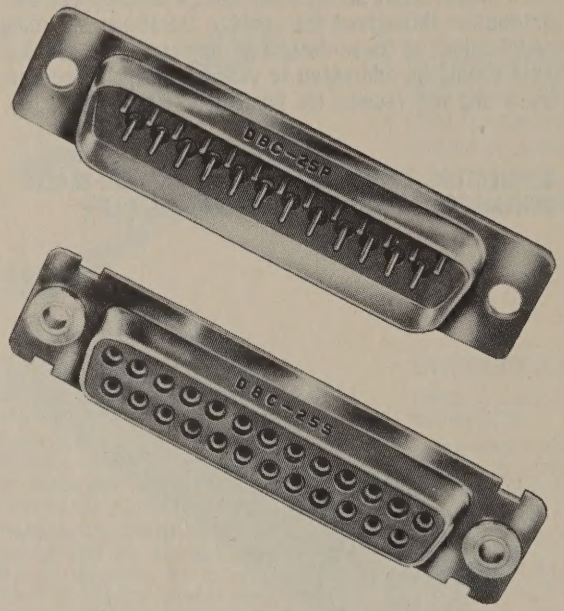
TRW CINCH CONNECTORS

BURGUN-D MARK IV CONNECTORS



The TRW/Cinch Burgun-D subminiature connector is designed for commercial applications where space, weight, and economy are important considerations.

It is especially suited to plug-in module, cable to panel and cable to cable installations, in computers and peripherals, test equipment, communications equipment and a wide range of other applications.

The Burgun-D (Mark IV) Series utilizes rear-release crimp snap-in contacts, that are readily inserted and removed by means of a simple, expendable insertion/extraction tool.

It offers these important features:

- Mates with existing original D and Mark I, Mark II and Mark III connectors.
- Operates at temperatures to 250°F (120°C).
- Size 20 contacts accommodate wire size #18 through #30 AWG stranded wire. (Screw machine only.)
- Closed-entry sockets automatically corrects misaligned pins.
- Rated at 5 amperes for #20 wire.
- Available in 9, 15, 25, 37, and 50 contact arrangements.
- Variety of contacts for hand and machine assembly and PC board insertion.

A COMPLETE LINE OF HARDWARE and accessories including junction shells, hoods, dust caps and lock assemblies is available and listed in TRW/Cinch Catalogs CD-12, and C-46.

FOR IMMEDIATE DELIVERY from stock, contact your TRW/Cinch D-subminiature industrial distributor.

CONDENSED DATA

STANDARD MATERIALS & FINISHES

Shell: Steel, yellow chromate over cadmium plate.

Insulator: Glass-filled burgundy nylon (per Fed. Spec. L-P-395B).

Contacts:

Machined — Copper alloy.

Stamped — Cadmium copper.

Contact Plating:

Selective Stamped — 30 microinches of gold (min.) over 50 microinches of nickel (min.) at contacting area, with gold flash overall.

Overall Stamped — 20 microinches of gold (min.) over 60 microinches of nickel (min.).

Machined — 20 microinches of gold over 60 microinches nickel (min.).

Rivets and Washers: Stainless steel (float mounting).

MECHANICAL FEATURES

Coupling: Friction and lock accessories.

Polarization: Keystone-shaped shells.

Contact Type: Crimp snap-in.

ELECTRICAL DATA

Contact Termination: Crimp.

Wire Size:

Size 20 Contacts — #20, #22, and #24 AWG stranded wire.

Size 20-18 Contacts — One #18 or two #22 AWG stranded wires.

Current Rating: Size 20 Contacts — 5 amps.

VOLTAGE RATING

	Sea Level	20,000 ft.	70,000 ft.	120,000 ft.
Average Flashover:	1500V AC	1000V AC	500V AC	255V AC
Test:	1000V AC	650V AC	325V AC	175V AC

Voltage Drop: Size 20 Contacts — 2.67 millivolts max. per amp when tested in accordance with MIL-STD-202, Method 307.

HOW TO ORDER BURGUN-D CONNECTORS

D B C F 15 P A * FO

- D — Series Prefix
- B — Shell Sizes: A, B, C, D, E
- C — C — BURGUN-D Series with core retention, rear release removable contacts
- F — No Designation: Standard .120 dia. hole
  - R: Reverse float mount for front panel mounting
  - F: Float mounts for rear panel mounting
- 15 — Contact Arrangement
- P — P — Pin
S — Socket
- A — Printed Circuit Terminal Modifier:
  - A: Right angle printed circuit connector
  - B: Straight printed circuit connector
- * — Modification:
  - D: .026/.022 dia. right angle machined contacts with bracket
  - F: .026/.022 dia. straight machined contacts
  - K: .026/.022 dia. right angle less bracket
  - Note: For additional modifiers contact factory.
- FO — Connector less contacts (FO not stamped on connector)

TRW CINCH CONNECTORS, AN ELECTRONIC COMPONENTS DIV. OF TRW INC. / 1501 MORSE AVE. / ELK GROVE VILLAGE, ILL. 60007

TRW CINCH CONNECTORS

REAR RELEASE CONTACT RETENTION SYSTEM

The BURGUN-D connector features a rear insulator with integral, molded contact retaining tines. These plastic tines permit the insertion and extraction of contacts from the rear of the connector with a simple, expendable plastic insertion/extraction tool. During contact insertion, the retaining tines expand as the contact passes thru. These rugged tines snap into place behind the contact shoulder when the contact is fully inserted. The tool is inserted to expand the tines, allowing easy extraction of the wired contact.

The retention system and the integral contact retaining tines guarantee functional reliability in many environments.

- Mates with existing D types.
- Operates in temperatures to +250°F.
- Crimp snap-in contacts.
- Highly reliable socket contacts.
- Insertion/extraction with expendable tool.
- Corrects misaligned contacts.

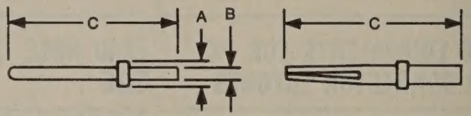
MACHINED CONTACTS

Machined contacts are supplied loose for use with hand crimp tools or in vibration hopper feeder crimp machines. A vibrator-feed, semi-automatic tool, 599-11-11-225 is available. These contacts are supplied in three wire cup sizes.



Description	Part No.	Cannon Reference	Wire Accommodation	A ±.002(.051)	B ±.002(.051)	C Max.

STAMPED CONTACTS

Stamped contacts are supplied loose for use with hand crimp tools, or on reels for use with the semiautomatic machines, selectively gold plated or with gold plate overall. These contacts will accommodate wire sizes #20 through #28 AWG by adjusting or changing the crimp die set. (For other wire sizes consult factory.)

HOW TO ORDER — TYPES D*MA, D*M & D CONNECTORS

D B MA M R 15 P A * FO

D — Series Prefix

B — Shell Sizes A, B, C, D, E

MA —
No designator — 2 pc. nylon Insulator — solder type Contacts — original "D" series
M: Monobloc insert — solder type contacts Mark I series
MA: Monobloc insert — crimp type contacts Mark III series

M — M: For connectors having .00005 gold plate over .0001 min. copper plate on contacts — omit for standard Mark I and Mark III only.

R —
No designator — standard .120 diameter hole
E — 4-40 clinch nut for rear panel mounting
F — float mounts for rear panel mounting
R — reverse float mount for front panel mounting

15 — Contact Arrangement, See page 12.

P —
P — Pin
S — Socket

A —
Printed circuit terminal modifier — applicable to the Mark I Series (monobloc, solder type).

A — Right-angle printed circuit connector with .040 diameter terminals; with bracket assembly and accommodates printed circuit boards up to 1/16 maximum thickness. (Plug only.)

B — Straight printed circuit connector with .040 diameter terminals; accommodates printed circuit boards up to 3/32 maximum thickness.

H — Straight printed circuit connector with .040 diameter terminals; accommodates printed circuit boards up to 1/8 maximum thickness.

L — Right-angle printed circuit connector with .030 diameter terminals with bracket assembly and accommodates printed circuit boards up to 3/32 maximum thickness. (Plug only.)

Printed Circuit Terminal Modifier — Applicable to the original "D" series.

V — Straight printed circuit connector with .040 diameter terminals; accommodates printed circuit boards up to 1/16 maximum thickness.

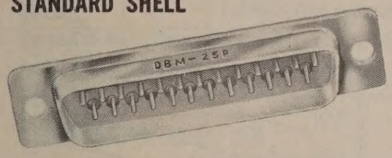
***** — Modification — consult factory

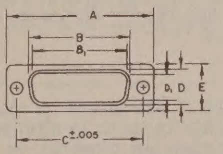
FO — Connector less contacts (FO not stamped on connector)

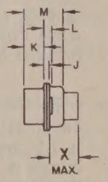
STANDARD DIMENSIONS

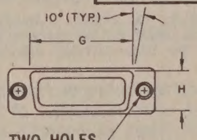
	Dim. X	mm
Original "D"	.312	7.92
Mark I	.390	9.91
Mark III	.375	9.50

STANDARD SHELL



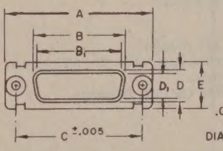


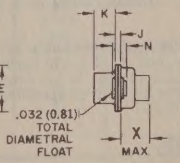


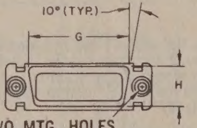


TWO HOLES .120 ± .005 (3.05 ± 0.13) DIA.

SHELL WITH FLOAT MOUNTS







TWO MTG. HOLES .086 $^{+.005}_{-.000}$ (2.18 $^{+0.13}_{-0.00}$) DIA.

It is recommended that only one assembly, either pin or socket, be float mounted. For front panel mounting use reverse float mount.

TRW CINCH CONNECTORS

GENERAL RATINGS AND SPECIFICATIONS

VOLTAGE RATINGS

All voltage figures are AC (rms), 60 cps. measured at approximately 77°F., 50% RH.

Connectors with Basic Arrangements
AWG #20 wire contacts only

All voltages are measured from contact to contact, and contact to shell, in unmated condition.

Connector Type		Altitude (feet) Sea Level	20,000	50,000	70,000
D*MA	Average Flashover	1500	1000	500	500
	Test	1000	650	325	325
D*M D*	Average Flashover	1700	1000	650	500
	Test	1250	750	475	375

Connectors with Combination Arrangements
AWG #20 wire contacts with coaxial, high power, and/or high voltage contacts
All voltages are for plugs and receptacles in both mated and unmated conditions.

Altitude (feet)		Sea Level		20,000		Sea Level		20,000	
Type of Contact		90°	Straight	90°	Straight	90°	Straight	90°	Straight
Center Conductor to Coaxial Shell	Average Flashover	1200	1500	900	1000	600	700	400	500
	Test	800	1000	600	650	400	475	275	325
High Power Contact and/or Coaxial Shell to Plug Shell	Average Flashover	1500	1500	1000	1000	500	500	500	500
	Test	1000	1000	650	650	325	325	325	325
Coaxial Shell to Nearest Standard Solder Pot Contact	Average Flashover	•	1500	•	1500	•	900	•	650
	Test	•	1000	•	1000	•	600	•	425
HV Contact to Nearest #20 Contact or to Shell	Average Flashover	3800	3800	2300	2300	500	900	650	650
	Test	2800	2800	1700	1700	675	675	475	475

• Not applicable due to variable rotation.

CURRENT RATINGS

Cinch vs. Military.

The Cinch rating for #20 contacts is 5 amps, which means 5 amps for all contacts simultaneously. MIL-W-5088 rates #20 contacts at 7.5 amps maximum. The explanation is as follows:

MIL-W-5088B, Paragraph 3-9-2-1-2 specifies:

"Table I current ratings for cables in bundles are based upon 15 or more cables carrying no more than 20% of the total carrying capacity of the bundle."

Table I specifies a current rating of 7.5 amps maximum for single wires in bundles of 15 or more wires. NOTE: Wires and contacts are both considered to be in the category of conductors.

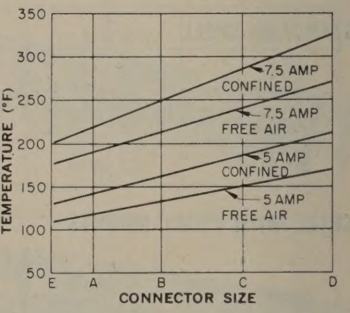
Explanation

If 15 wires (normally rated at 7.5 amps per wire maximum, or at a total bundle current of 112.5 amps) are not to carry more than 20% of the total 112.5 amps, the average current rating per wire is 20% of 112.5 amps (total bundle capacity) divided by 15 (number of wires).

Conclusion

The Military rating of #20 contacts or wires is 1.5 amps average (based on 15 wires per bundle or 15 contacts per connector) vs. a Cinch rating of 5 amps.

Average Maximum Temperature vs. Connector Size for various current ratings of mated pairs of D Subminiature Connectors.



Notes:

1. Free air condition. Connectors not shielded from ambient condition in any manner.
2. Confined condition. Connectors placed in insulated box (1 x 2 x 3.5) during test, with no moving air.
3. Average maximum temperature stabilization: 1 hour or less in all cases.
4. All contacts in each mated pair tested were wired in series with specified current flowing.
5. Ambient conditions 77°F. 50% rh.

TRW CINCH CONNECTORS

ORIGINAL D CONNECTORS

GENERAL INFORMATION

The Cinch Original D Plug utilizes a two-piece nylon insulator housed in a variety of five basic shell sizes: E, A, B, C, and D. These shell sizes contain 9, 15, 25, 37, and 50 #20 solder pot contacts respectively. Standard contact terminations accommodate up to #20 AWG stranded wire. Current rating is 5 amperes.*

The keystone shape of the shell assures proper polarization. Coupling is by means of friction; locking accessories are available. Also available are shells with float mounts. Connectors with #4-40 or #2-56 clinch nut mounts may be provided.

With standard nylon insulators, operating temperatures range from −65°F to +250°F (the limiting factor being the insulator material). When diallyl phthalate insulator is substituted, the operating temperature range is from −65°F to +275°F.

*Military rating of #20 contacts or wires is 1.5 amps average, and 7.5 amps maximum. See explanation on page 12.

MATERIALS AND FINISHES

Shells:	Steel, cadmium plated with yellow chromate supplementary coating.
Pin Contacts:	Brass, gold plated (.00002 min.) over nickel plate (.000060 min.).
Socket Contacts:	Phosphor bronze, gold plated (.00002 min.) over nickel plate (.000060 min.).
Insulators:	Nylon, two-piece.
Float Mounting Rivets and Washers:	Stainless steel.

For listing of applicable specifications see page 12.

PERFORMANCE DATA

Voltage Rating:	See tabulation on page 12.
Insulation Resistance:	Greater than 5,000 megohms, determined in accordance with MIL-STD-202D, Method 302, Condition B.
Contact Resistance:	2.7 milliohms maximum @ 7.5 amps.
Individual Contact Separation Force:	1 to 8 ounces.
Moisture Resistance:	Exceeds test requirements of MIL-STD-202D, Method 106.†
Vibration:	Exceeds test requirements of MIL-STD-202D, Method 204, Condition B.†
Shock:	Exceeds test requirements of MIL-STD-202D, Method 213, Condition G.†
Corrosion Resistance:	Exceeds requirements of 48 hr. exposure to salt spray in accordance with MIL-STD-202D, Method 101C, Condition B.†

†As referenced in MIL-C-24308.

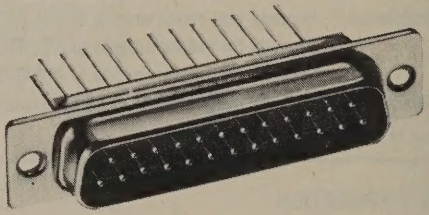
WIRE WRAP TERMINALS

RACK AND PANEL CONNECTORS WITH 0.025″ SQUARE WIRE WRAP* TAILS

Cinch D-Subminiature Connectors are designed for applications where space and weight considerations are prime considerations. These high contact density connectors are especially well-suited for aircraft, missile and ground support installations. They are designed to meet or exceed most of the requirements of MIL-C-24308.

These wire-wrap versions are available in 9, 15, 25, 37 and 50 contact sizes in both plug and socket types. Two tail lengths are available: 3/8″ long to accommodate two wires, and 37/64″ long to accommodate three wires. Socket contacts and plug pins are copper alloy gold plated over silver. Insulators are two-piece nylon, and the outer shells are yellow chromate finished, cadmium-plated steel.



These D-Subminiature Connectors will intermate with any other D-Subminiature Connector of the same insert configuration. Mating connectors with standard termination may be adapted for cable attachment by means of accessory junction shells with integral clamps.

IMMEDIATE DELIVERY FROM CINCH DISTRIBUTORS can be provided on the 3/8″ long termination types.

TRW CINCH CONNECTORS

GOLDEN D MARK I CONNECTORS

GENERAL INFORMATION

Cinch D*M Connectors feature solder pot contacts in a monobloc insulator for improved temperature characteristics and increased moisture resistance. Two insulator types are available: (a) combination layouts with coaxial and/or high voltage contacts plus standard AWG wire contacts, and (b) layouts with standard AWG wire contacts only. The five amp* solder pot contacts accommodate wire sizes up to #20 AWG stranded wire. Socket contacts are of the closed entry type. Operating temperatures range from −65°F to +300°F.

Combination layouts are supplied with unfilled coaxial and/or HV contact cavities. Coaxial and HV contacts must be ordered separately, and may be used interchangeably in any of the layouts listed. HV contacts accommodate wire sizes up to #20. In both, coaxial and HV contacts, the center contacts have solder type termination. Braid, on coaxial contacts, may be soldered or crimped to the outer conductor. Both of the above contacts are snap-in, removable type.

Standard coaxial and HV plugs contain female center contacts; receptacles contain male center contacts. Special reversed versions are available. Pin connector assemblies accommodate coaxial and HV plugs only; socket assemblies accommodate receptacles. Connector assemblies and contact inserts are matched and color coded to ease assembly. Pins and plugs are coded red, sockets and receptacles are coded blue. No insertion tool is required. Coaxial and HV inserts may be removed with Cinch Tool CET-C6B.

Five basic shell sizes are available. Polarization is by means of the keystone cornered shell. Coupling is by friction; locking accessories are available. Shells with float mounts are also available.

Printed circuit plugs are listed on page 9 with other popular modifications. For additional modifications and special plugs, consult factory. Accessories such as junction shells are shown on pages 24 and 25.

*Military rating of #20 contacts or wires is 1.5 amps average, and 7.5 amps maximum. See explanation on page 12.

MATERIALS AND FINISHES

Shells: Steel, cadmium plated with yellow chromate supplementary coating.

Insulators: Diallyl phthalate, glass fibre filled, med. green color, monobloc construction.

#20 Contacts (Standard): Pins and sockets: brass, gold plated (.00002 min.) over nickel (.00006 min.).

Coaxial Contacts (Standard):

- **Outer Contact —** Plug: Brass, gold plated (.00003) over silver plate (.0001). Receptacle: Beryllium copper, gold plated (.00003) over silver plate (.0001).
- **Center Female Contact —** Phosphor bronze, gold plated (.00003) over silver plate (.0001).
- **Center Male Contact —** Brass, gold plated (.00003) over silver plate (.0001).
- **Insulator —** Teflon.

High Voltage Contacts (Standard):

- **Socket Contact —** Phosphor bronze, gold plated (.00003) over silver plate (.0002).
- **Pin Contact —** Brass, gold plated (.00003) over silver plate (.0002).
- **Insulator —** Nylon (temperature range: −65°F to +250°F).

For listing of applicable specifications see page 12.

PERFORMANCE DATA

VOLTAGE RATING:

Insulation Resistance Ref. MIL-C-24308 — Greater than 5000 megohms in accordance with MIL-STD-202D, Method 302, Condition B

Contact Resistance Ref. MIL-C-24308 — (#20 contacts) 2.67 milliohms max. exceeds requirements of Para 3.53

Contact Engagement Force Ref. MIL-C-24308 — .7 to 12 oz. when tested with MS3197 test pin

Contact Separation Force Ref. MIL-C-24308 — .7 to 8 oz. when tested with MS3197 test pin

Moisture Resistance Ref. MIL-C-24308 — Exceeds test requirements of MIL-STD-202D, Method 106

Vibration Ref. MIL-C-24308 — Exceeds test requirements of MIL-STD-202D, Method 204, Condition B

Shock Ref. MIL-C-24308 — Exceeds test requirements of MIL-STD-202D, Method 213, Condition G

Corrosion Resistance Ref. MIL-C-24308 — Exceeds requirements of 48-hour exposure to salt spray in accordance with MIL-STD-202D, Method 101C, Condition B

High Potential Test Voltage Ref. MIL-C-24308 — MIL-STD-202D, Method 301

Temperature Cycling Ref. MIL-C-24308 — MIL-STD-202D, Method 102A, Condition D

See tabulation on page 12.

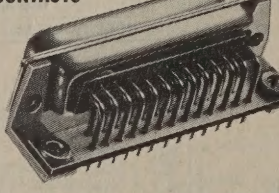
RIGHT ANGLE PC CONTACTS



These right-angle plugs are available in 9, 15, 25, and 37 contact configurations. The standard units listed herein are supplied with 0.040″ or 0.030″ nominal diameter pins that extend 0.093″ below the 90° bracket for 1/16″ boards and .135 for 3/32″ boards, other pin diameters and lengths may be obtained on special order.

Design and construction of these connectors meets or exceeds many of the requirements of MIL-C-24308.

These right-angle D-Subminiature connectors will mate with any other D-Subminiature connector of the same insert configuration. Mating connectors may be adapted for cable attachment by means of accessory junction shells.

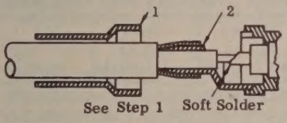
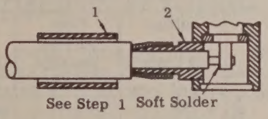
COAXIAL CABLE INSTALLATION INSTRUCTIONS

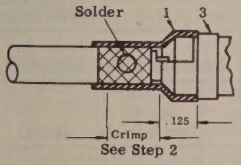
STRAIGHT COAXIAL

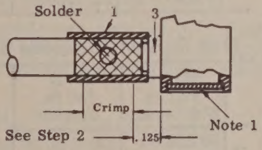


90° COAXIAL

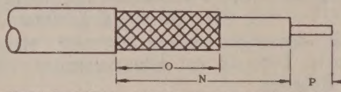


STEP 1. Slide outer ring (1) over cable jacket. Trim cable. Insert cable dielectric and center conductor into inside diameter of inner sleeve (2) solder center conductor to coaxial center contact.





STEP 2. Slide outer ring (1) forward until flush with coaxial shell, (3) confining braid between outer ring and inner sleeve. For solder type coaxials, soft solder outer ring to assembly through cross-drilled solder hole. For crimp type coaxials, crimp with tool indicated being sure to crimp in area defined.



TRIM COAXIAL CABLE TO THESE DIMENSIONS FOR INSTALLATION TO D*M COAXIAL CONTACTS

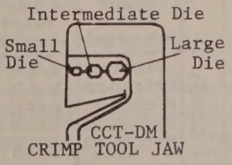
NOTES

1. Soft solder or stake access cap into shell after cable assembly on 90° type coaxials.

2. Crimp tool description — Cannon CCT-DM (to crimp outer sleeve only).
   A. Use small die.
   B. Use intermediate die.
   C. Use large die.



3. Pin assemblies will accommodate high voltage and coaxial plugs only. Socket assemblies will accommodate high voltage and coaxial receptacles only.

TRW CINCH CONNECTORS

ROYAL D MARK III CONNECTORS

GENERAL INFORMATION

The D*MA connector is a D-Subminiature Connector that utilizes the "Little Caesar" rear release contact assembly. This contact assembly allows rear insertion, release and extraction of crimp snap-in contacts. The simplified contact design with no undercuts offers greater bend resistance and a hard, closed entry socket insulator insures positive contact alignment. Crimp terminations accommodate #20, #22 and #24 AWG stranded wire and are rated for 5 amps.* ROYAL D-connectors are intermateable and interchangeable with all other D-Subminiature Connectors having compatible contact arrangement.

Polarization is by keystone shape of shell; coupling is by friction. Accessories are shown on pages 24 and 25. An extraction tool is supplied with ROYAL D-connectors. Extra contacts may be ordered for replacement purposes. See page 21 for ordering information.

MATERIALS, FINISHES AND TYPES

Shell:	Steel, cadmium plated with yellow chromate supplementary coating.
Insulator:	Diallyl phthalate, glass fibre filled, per MIL-P-19833, Type GDI-30F, royal purple color, monobloc construction.
Contacts:	Pin—leaded copper, gold plate over nickel plate. Socket—copper alloy, gold plate over nickel plate with stainless steel sleeves.
Current Rating:	(#20 Contacts) 5 amps.*
Contact Termination:	Crimp, accommodating #20, #22 or #24 AWG stranded wire. The 20-18 contacts accommodate one #18 or two #22 AWG stranded wires.
Contact Type:	Snap-in, removable, crimp, with rear release assembly. Contacts not interchangeable with other D Series.
Socket Type:	Closed entry.
Float Mounting	
Rivets & Washers:	Stainless steel.

For listing of applicable specifications, see page 12.

*Military rating of #20 contacts or wires is 1.5 amps average, and 7.5 amps maximum. See explanation on page 12.

PERFORMANCE DATA

VOLTAGE RATING:

Insulation Resistance Ref. MIL-C-24308	— Greater than 5000 megohms in accordance with MIL-STD-202D, Method 302, Condition B
Contact Resistance Exceeds Req'ts of MIL-C-24308	— (#20 contacts) 20 milliohms max. in accordance with Para 3.5.8
Contact Engagement Force Ref. MIL-C-24308	— .7 to 12 oz. when tested with MS3197 test pin
Contact Separation Force Ref. MIL-C-24308	— .7 to 8 oz. when tested with MS3197 test pin
Moisture Resistance Ref. MIL-C-24308	— Exceeds test requirements of MIL-STD-202D, Method 106
Vibration Ref. MIL-C-24308	— Meets test requirements of MIL-STD-202D, Method 204, Condition B
Shock Ref. MIL-C-24308	— Meets test requirements of MIL-STD-202D, Method 213, Condition G
Corrosion Resistance Ref. MIL-C-24308	— Exceeds requirements of 48-hour exposure to salt spray in accordance with MIL-STD-202D, Method 101A, Condition B
High Potential Test Voltage Ref. MIL-C-24308	— MIL-STD-202D, Method 301
Temperature Cycling Ref. MIL-C-24308	— MIL-STD-202D, Method 102A, Condition B

See tabulation on page 12.

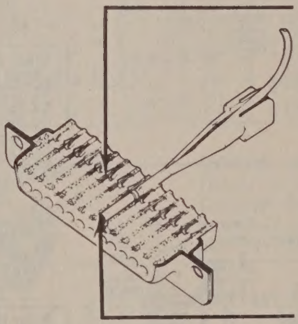
FOR DIMENSIONS SEE PAGE 11

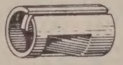
"LITTLE CAESAR" REAR RELEASE CONTACT ASSEMBLY

The "Little Caesar" rear release contact assembly permits contacts to be inserted by hand and to be released and extracted from the rear of the connector with a simple, expendable plastic tool.

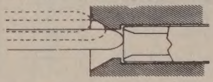
The contact is inserted from the rear of the connector thru a cylindrical clip in the insulator until the indented tines of the clip snap securely behind the contact shoulder. The contact is released as the plastic tool is inserted into the rear of the connector, expanding the tines beyond the contact shoulder and permitting contact extraction. The simplified contact design improves bend resistance through a single holding shoulder with no undercuts.

The "Little Caesar" contact assembly was selected by the National Aerospace Standards Committee for use in a major industry connector specification for vital programs demanding great operational reliability.

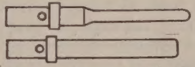




Contact retaining clip.

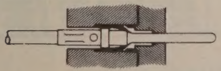


Hard dielectric, closed-entry socket inserts realigns bent or misaligned pin contacts.

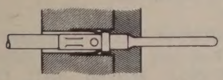


Simple stronger contact without undercuts for greater bend resistance.

CONTACT INSERTION

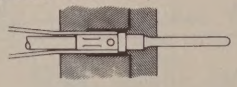


Contact partially inserted.



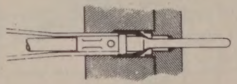
Tines snap behind contact shoulder when contact is fully inserted.

CONTACT EXTRACTION



Insert extraction tool to fully bottomed condition.

Tines expanded beyond contact shoulder.



Remove contact by pulling on wire.

Contact partially removed.

ORDERING INFORMATION FOR ADDITIONAL CONTACTS

All D*MA connectors are supplied with the proper number of crimp type contacts. Additional contacts may be ordered for replacement purposes as indicated.

TRW CINCH CONNECTORS

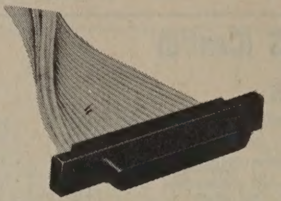
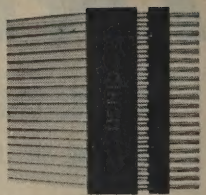
MICROMINIATURE CONNECTORS





DURA-CON*SERIES CONNECTORS ON .050" CENTERS

- High contact density with up to 266 contacts per square inch
- Lightweight
- Rugged, reliable contacts
- Shock and vibration resistant

The Cinch Dura-Con Series of Microminiature Strip and Rectangular connectors are ideally suited for space and weight reduction in miniaturized airborne electronics and for shorter signal paths in electronic data processing equipment. Both Cinch Dura-Con Series have rugged, high-performance contacts capable of providing shock and vibration proof continuity from dry circuit to three amperes current.

This is accomplished by making the pin the spring member. The Cinch Dura-Con is made from a precision miniature spring cable with a welded tip. The expanded cable provides seven spring members peripherally around the pin so that no matter what radial forces are applied, contact is maintained with the mating socket wall. Furthermore, this flexible spring pin can be bent many times without evidencing any metal fatigue. By protecting this pin in a recessed tolerance cavity, reliable mating is assured. Hence, despite its small size, the Cinch Dura-Con provides superior performance.

* Trade name TRW Inc.
Licensed by New Twist Connector Corporation.

DURA-CON D RECTANGULAR MICROMINIATURE CONNECTORS

This series of microminiature rectangular connectors is available in contact layouts with 9, 15, 21, 25, 37, and 51 positions. In addition to the ½" long #24 AWG solid copper leads and 18" long #26 AWG stranded Type E insulated wire terminations, this connector series can be supplied with custom terminations.

Contacts: 24 size; copper alloy, gold plated.
Insulator: Glass-filled polyester 94V-0.

PERFORMANCE DATA

ELECTRICAL

Current Rating: 3 amperes.
Contact Resistance: Nominal 4 milliohms, maximum 8 milliohms.
Dielectric Withstanding Voltage:
Sea Level: 900V RMS 60 Hz. **70,000 Ft.:** 300V RMS 60 Hz.
Insulation Resistance: 5,000 megohms minimum.

MECHANICAL

Contact Engaging Force: 6 oz. per contact maximum.
Contact Separation Force: ½ oz. per contact minimum.

ENVIRONMENTAL

Temperature: −65°F to 300°F.
Vibration and Shock: No discontinuity detected (equipment sensitivity 6 nanoseconds) during 10 to 2,000 cps at .06" double amplitude or 50 g. 20 shocks 500 g.
Durability: Contact resistance still within specification after 500 cycles mating and unmating.
Salt Spray: No damage — Contact resistance still within specification after mated sample exposed 48 hours per MIL-STD-202B, Method 101A, Condition B.

DURA-CON STRIP CONNECTORS

For maximum flexibility of application, Cinch Dura-Con contacts are available in strips on .050″ centers. By cutting, adding, or stacking, a variety of contact arrangements can be achieved. These versatile connector strips are available with up to 120 contact positions on special order. Moreover, guide pins that engage prior to the contact in the mating cycle, can be provided to assist in mating and polarization.

Contacts: 24 gage copper alloy, gold plated.

Insulator: Glass-filled polyester 94V-O.

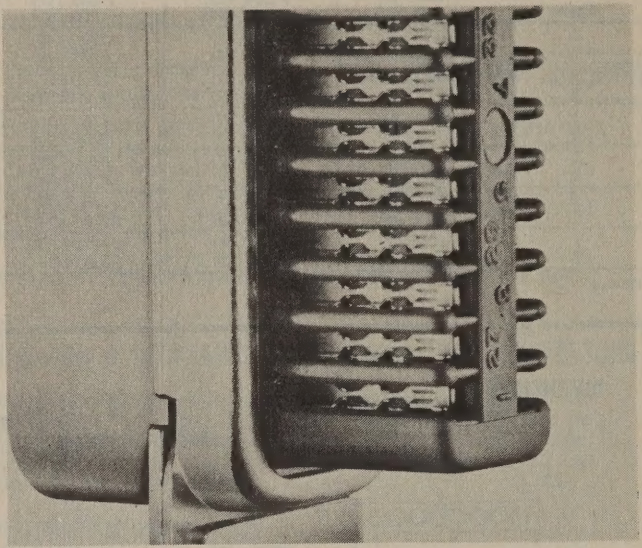
TRW CINCH CONNECTORS

CINCH SOLDERLESS RIBBON CONNECTORS

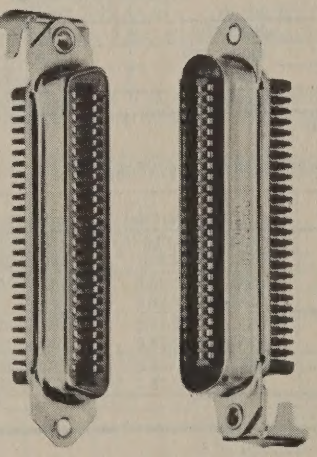


The Solderless Cinch Ribbon Connector has all the quality features of the solder type Cinch Ribbon Connectors, are intermateable and utilize all the same hardware.

The solderless Cinch Ribbon Series can be terminated with automatic, semi-automatic or field hand tools. Each contact provides four gas-tight connections for both 24 and 26 gauge solid wire*. Termination speeds far exceed soldering techniques.

This newly designed connector incorporates a built-in strain relief in each contact to prevent any inadvertant removal of the wires; however, contacts can be reused without physical damage or electrical degradation.

CABLE-TO-CABLE PLUG & RECEPTACLE



Miniaturized rack and panel connectors utilizing "ribbon" contact feature. Smooth, easy insertion/extraction action plus the double-sided self-cleaning flexing action of both mated contact members provide added reliability. Shell polarization and float-mounted receptacle assure proper alignment. Insulator material is 30% glass-filled polyester. Plug and receptacle contacts are of cadium bronze, ASTM-B-105, with a finish of .00002 gold per MIL-G-45204 Type II over copper flash. Shells are steel with a finish of .0002 to .0004 zinc. No stripping of wires required for perfect connections when terminated with Cinch Auto-Clinch, Certi-Clinch, or Mini-Clinch tools.

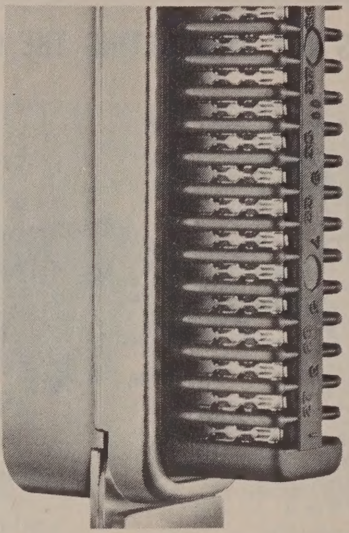
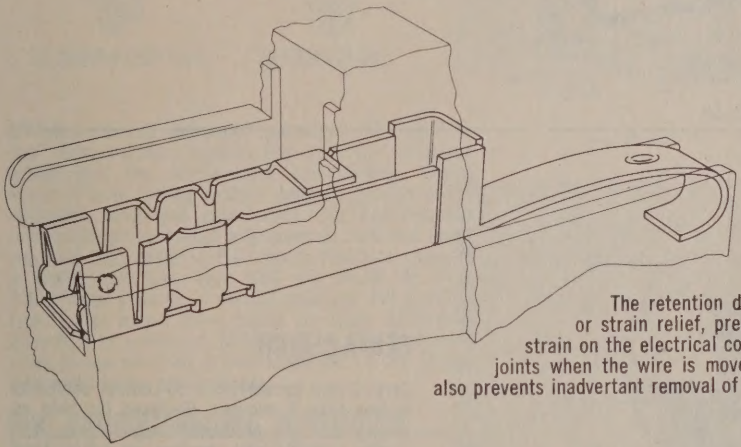
TRW CINCH CONNECTORS

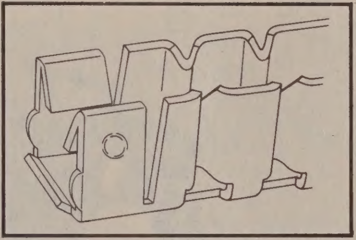
CINCH SOLDERLESS RIBBON CONNECTORS

FEATURES

- Identical mating to standard solder type connector.
- Same contact material.
- Same mating and mounting dimensions.
- Will handle 22, 24 and 26 gauge solid wire* (with .040 max. insulation dia.)
- Built-in wire restraint.
- 4 points of contact provide redundancy.
- Exactly same mounting and auxiliary hardware.
- Rapid field wiring.
- Totally interchangeable with existing Cinch Ribbon Connectors and hardware.

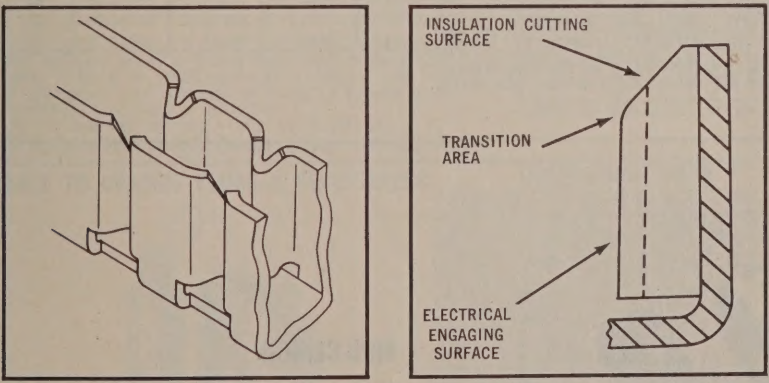




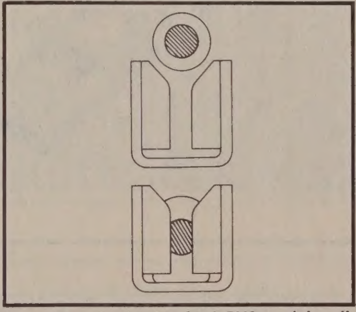


The retention device or strain relief, prevents strain on the electrical contact joints when the wire is moved. It also prevents inadvertant removal of wire.

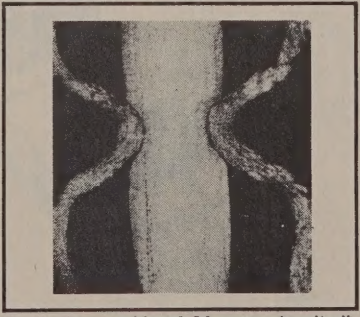
* For stranded wire applications consult factory.



The shape of the wire terminating end of the contact is arranged with four indents. These indents are so constructed and shaped as to peel the insulation off the wire at these points. The step-by-step progression is as follows. As the wire enters, the insulation is peeled off by the ramp shape of the contact indents. This leads into a coined, relatively sharp area. As the wire, after the insulation is removed, progresses into the remaining contact pocket, the transition area permits the conductor to be deformed and held between each set of the two opposing indented sections. The result is four gas tight connections on each conductor.



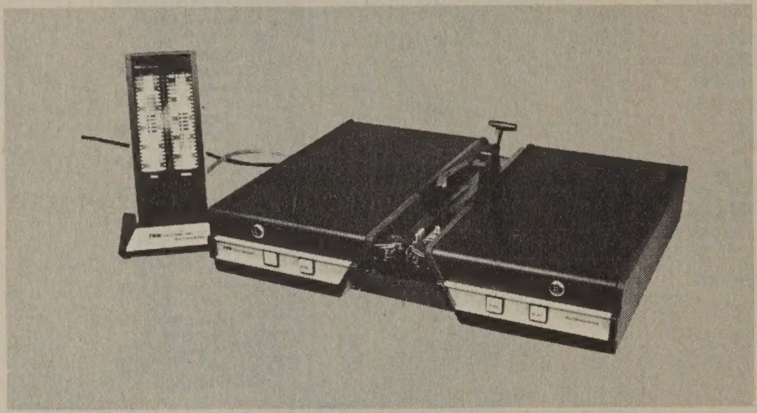
Insulation, both standard PVC and irradiated PVC is pierced sufficiently to facilitate electrical connection.



Photomicrographic of 24 gauge longitudinal cross section of prime electrical contact area.

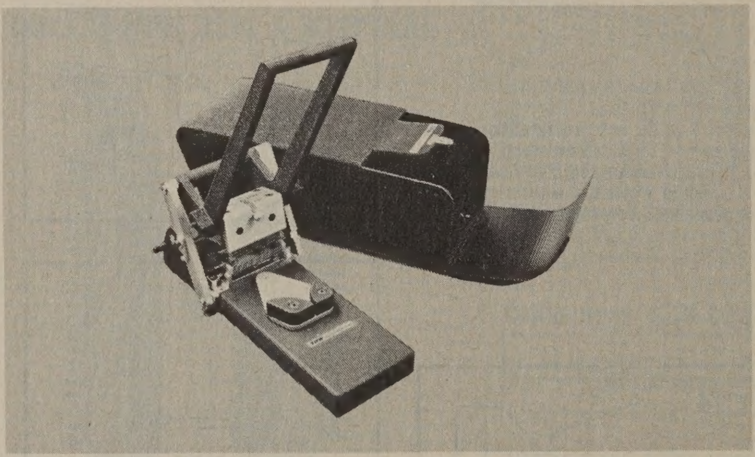
TRW CINCH CONNECTORS

SYSTEMS FOR TERMINATING THE CINCH SOLDERLESS RIBBON CONNECTOR



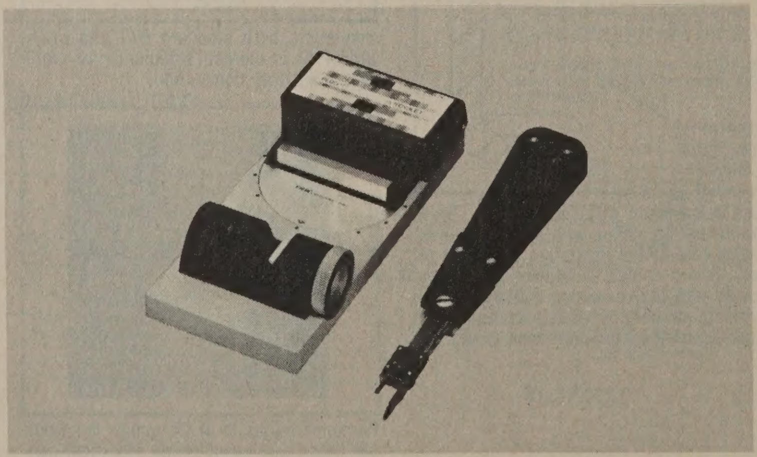
AUTO-CLINCH

Auto-Clinch for rapid factory wiring. Completely terminates a 50-contact connector in less than 2 minutes. Has provision for omission of wires, inspection check during wiring and correction of errors. Options include Color Code display and selective programmer.



CERTA-CLINCH

Certa-Clinch terminates a 50-contact connector in less than 4 minutes. Designed for field assembly and low production applications, it is readily portable and requires no set-up time.



MINI-CLINCH (CD)

Mini-Clinch is a lightweight belt-mounted unit that enables a serviceman in the field to terminate a 50-contact connector in less than 5 minutes. It can be used with 90° or 180° connectors. Wires are automatically cut as they are inserted into the terminals.

(CD) Indicates items normally available through Cinch distributors.

57-20240 RECEPTACLE **57-10240 PLUG**

Miniaturized rack and panel connectors utilizing "ribbon" contact feature. Smooth, easy insertion/extraction action plus the double-sided, self-cleaning, flexing action of both mating contact members provide added reliability. Shell-type polarization and float-mounted receptacle assure proper alignment on rack and panel only, not applicable to P.C. types. Insulator material is diallyl phthalate, type MDG per MIL-M-14F. Plug B-105, with a finish of .00002 gold per MIL-G-45204 type II over copper flash. Shells are brass, ASTM-B-36 Alloy 6, with a finish of .0002 to .0004 zinc. Pretinning wires before soldering is recommended. 14, 24, 36 and 50-contact sizes are available.

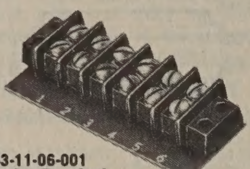
140 SERIES (UL RECOGNIZED)

BARRIER TERMINAL BLOCKS AND MARKER STRIPS



353-11-06-001 Barrier Terminal Block with 363-11-06-011 Marker Strip (Imprinted)

Available in 1 to 25 terminal sizes with standard, "W," "¾W" and "Y" type terminals. Has 5-40 binder head screws. Accommodates up to #14 solid wire. Terminal centers are ⅜". Creepage distance from terminal to terminal and terminal to ground is ¼". Materials and finishes designated below. Electrical ratings are shown on the inside front cover.

Marker strips are available to mount beneath barrier block and afford additional insulation for metal mounting surface. "Single" marker strips that extend out on only one side are shown in listing below; "double" marker strips extending out on both sides are also available. Marker strips can be imprinted with terminal designations as described on page 12.

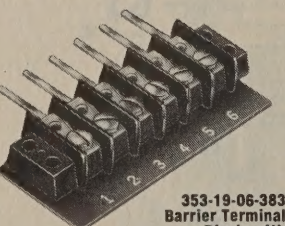
WITH WRAPOST TERMINALS (UL RECOGNIZED)



353-19-06-383 Barrier Terminal Block with 363-11-06-011 Marker Strip (Imprinted)

"Jones" Barrier Blocks with wrapost terminals on one side permit faster connections — four times faster than standard screw terminals. There are three terminal angles presently available — parallel to, at a 45° angle to, and perpendicular to the mounting surface. Choose the angle that best suits your application.

Available in 1 to 25-terminal sizes with each of the terminal angles. Has 5-40 binder head screw opposite terminal. Terminal centers are ⅜". Creepage distance is ¼". Materials and finishes designated below. Electrical ratings are shown on the inside front cover.

Standard 140 Series marker strips are available to mount beneath the barrier block and insulate against the metal mounting surface. "Single" or "double" marker strips are available. Marker strips can be imprinted with terminal designations as shown on page 12.

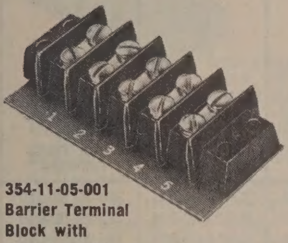
141 SERIES (UL RECOGNIZED)

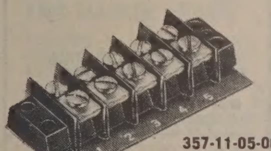
BARRIER TERMINAL BLOCKS AND MARKER STRIPS



354-11-05-001 Barrier Terminal Block with 364-11-05-011 Marker Strip (Imprinted)

Available in 1 to 20-terminal sizes with standard, "W," "¾W" and "Y" type terminals. Has 6-32 binder head screws. Accommodates up to #12 solid wire. Terminal centers are 7/16". Creepage distance from terminal to terminal is 3/8" and terminal to ground is 5/16". Materials and finishes described below. Electrical ratings shown on inside front cover. Marker strips are available to mount beneath barrier block and provide insulation for metal mounting surface. "Single" or "double" marker strips are available. Marker strips can be imprinted with terminal designations as described on page 12.

WITH QUICK-CLAMP* TERMINALS (UL RECOGNIZED)



357-11-05-001 Barrier Terminal Block with 364-11-05-011 Marker Strip (Imprinted)

141 Series Barrier Blocks with Quick-Clamp Terminals permit efficient rapid assembly without costly wire terminals and without bending conductors around screws. Just insert the conductors and tighten screws to make positive contact.

Available in 1 to 20-terminal sizes for one side only, both sides, with "¾W" connection on one side and with "Y" connection through the panel. Uses 6-32 binder head screws. Terminal centers are 7/16". See page 12 for more complete description on the terminal itself and wire gauges accommodated. Materials and finishes described below. Electrical ratings are shown on the inside front cover.

141 Series marker strips are available to mount beneath the barrier block and provide insulation from the metal mounting surface. "Single" or "double" marker strips are available. Terminal designations can be imprinted on marker strips as shown on page 12.

* Patent Pending

142 SERIES (UL RECOGNIZED)

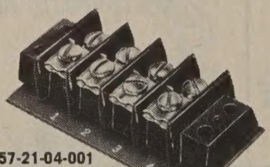
BARRIER TERMINAL BLOCKS AND MARKER STRIPS

355-11-04-001 Barrier Terminal Block with 365-11-04-011 Marker Strip (Imprinted)

Available in 1 to 17-terminal sizes with standard, "W," "¾W" and "Y" type terminals. Has 8-32 binder head screws. Accommodates up to #10 solid wire. Terminal centers are 9/16". Creepage distance from terminal to terminal is 5/16" and terminal to ground is ⅜". Materials and finishes described below. Electrical ratings shown on inside front cover.

Marker strips are available to mount beneath barrier block and provide insulation for metal mounting surface. "Single" or "double" marker strips are available. Terminal designations can be imprinted on marker strips as described on page 12.

WITH QUICK-CLAMP* TERMINALS (UL RECOGNIZED)



357-21-04-001 Barrier Terminal Block with 365-11-04-011 Marker Strip (Imprinted)

142 Series Barrier Blocks with Quick-Clamp Terminals permit fast, efficient assembly without costly wire terminals and without bending conductors around screws. Insert the conductors, tighten the screws and positive contact is made.

Available in 1 to 17-terminal sizes for one side only, both sides, with "¾W" connection on one side and with "Y" connection through the panel. 8-32 binder head screws are used. 9/16" terminal centers. Refer to page 12 for more complete description on the terminal itself and wire gauges accommodated. Materials and finishes described below. Electrical ratings are shown on the inside front cover.

142 Series marker strips are available to mount beneath the barrier block and afford insulation from the metal mounting surface. "Single" or "double" marker strips are available. Marker strips can be imprinted with terminal designations as shown on page 12.

*Patent Pending

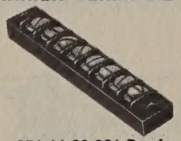
171 SERIES (UL RECOGNIZED)

BARRIER TERMINAL BLOCKS



351-11-08-001 Barrier Terminal Block

A miniature barrier terminal block with single screw terminals. Available in 1 to 8 terminal sizes with standard type terminal only. Has 2-56 x 3/16" binder head screws. Terminal centers are ¼". Insulator material is general purpose black phenolic. Eyelets are brass with nickel-plated finish. Marker strips are not available for use with the 171 Series. Screws are steel, nickel-plated.

171 SERIES PART NUMBER ORDERING INFORMATION

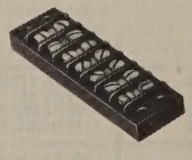
172 SERIES (UL RECOGNIZED)

BARRIER TERMINAL BLOCKS



351-21-08-001 Barrier Terminal Block

Miniature barrier terminal block with double screw terminals. Available in 1 to 14-terminal sizes with standard, "W," "¾W" and "Y" type terminals. 2-56 binder head screws. ¼" terminal centers. Insulator molded of general purpose black phenolic. Eyelets and screws are nickel-plated brass. "W," "¾W" and "Y" terminals are made of brass, hot solder dipped. Marker strips are available; write for details.

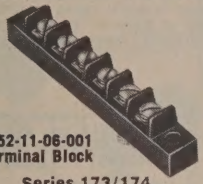
BARRIER TERMINAL BLOCKS



352-11-06-001
Barrier Terminal Block
Series 173/174

353-51-07-001

Series 176

173/174 SERIES BARRIER TERMINAL BLOCKS

Single screw terminal barrier blocks. Terminals centers are 3/8". 173 Series has 4-4 x 5/16" Sems type binder head screws. 174 Series has 4-40 x 1/4" plain binder head screws. Both types have general purpose black phenolic insulators. Nickel-plated brass eyelets and steel screws, both nickel-plated.

176 SERIES FEED-THRU TERMINALS

Same dimensions and materials as 173/174 except 5-40 x 3/16" binder head screws. Feed-thru terminals are molded-in electro-tin plated brass. Available with or without mounting tabs, with 1/8" leads for 1/16" boards or 3/16" leads for 1/8" boards. Terminals are 0.093" diameter, for insertion in 9/64" hole.

240/241/242 SERIES
BARRIER TERMINAL BLOCKS AND MARKER STRIPS

359-14-06-001
240 Series
Barrier Terminal Block with
363-11-06-011 Marker Strip
(Imprinted)

Similar to the 140, 141 and 142 Series except that solder terminals are used instead of screw terminals. These solder terminals are designed to accommodate one or more wires, which can be brought through slot into hole, simplifying soldering. Terminal sizes available are: 1-25 for the 240 Series, 1-20 for the 241 and 1-17 for the 242. Terminal centers are shown in the dimensional drawings. Materials and finishes are described below. Electrical ratings are shown on the inside front cover. Marker strips that mount beneath barrier block and afford insulation from metal mounting surfaces are available in either "single" or "double" type. See page 12 for information on imprinting terminal designations in these marker strips.

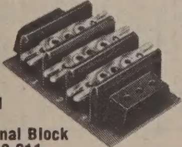
250/251/252 SERIES
BARRIER TERMINAL BLOCKS AND MARKER STRIPS



359-44-03-001
250 Series
Barrier Terminal Block
with 366-11-03-011
Marker Strip (Imprinted)

Similar to the 150, 151 and 152 Series except for use of solder terminals instead of screw terminals. Solder terminals accommodate one or more wires that can be brought through slot into hole, simplifying solder operation. Terminal sizes available include: 1-10 for the 250 Series, 1-8 for the 251 and 1-6 for the 252. Refer to dimensional drawings for terminal centers. Materials and finishes are described below. Electrical ratings are shown on inside front cover. "Single" or "double" marker strips are available to mount beneath barrier block and provide insulation from metal mounting surface. Terminal designations can be imprinted on marker strips as described on page 12.

INSULATOR MATERIAL: General Purpose Black Phenolic; Other Materials Available.

TERMINAL MATERIAL and FINISH: Brass, Hot Solder Dipped.

MARKER STRIP MATERIAL: 1/32" NEMA Grade XPC, UL Rated 94V-0.

* Marker strip part numbers shown are "single sided" not imprinted type that extend out on only one side; equivalent "double" type strips extending out on both sides also available. To order change second field to 14.

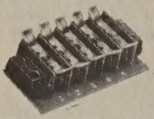
To order imprinted marker strips change fourth field from 010 to 011.

Indicates items normally available through Cinch Distributors.

TRW CINCH CONNECTORS

341/342 SERIES (UL RECOGNIZED)

BARRIER TERMINAL BLOCKS AND MARKER STRIPS



354-32-05-001 341 Series Barrier Terminal Block with 364-11-05-011 Marker Strip (Imprinted)

Similar to 141 and 142 Series except equipped with solderless-type terminals to accommodate either AMP tab receptacles or Ark-Les quick connects. (Contact manufacturer for exact part number.) Terminal sizes available are 1-20 for the 341 Series and 1-17 for the 342. A variety of terminal types are available for each series as shown. Refer to dimensional drawings for terminal centers. Materials and finishes are described below. Electrical ratings are shown on inside front cover.

"Single" or "double" type marker strips can be supplied to mount beneath barrier block and afford insulation from metal mounting surfaces. Terminal designations can be imprinted on marker strips as described on page 12.

9 different types of terminals can be supplied with any of the 341 or 342 Series barrier blocks. Identify these types by changing the **second field** of the part number to match the 341 or 342 series number opposite the desired terminal drawing below. For example, to order a 5-terminal 341 Series with both terminals at right angles (Type C), signify part no. 354-33-05-001. In addition, there are 4 more terminal types as shown which can be ordered in combination with the 9 regular terminal types. To order any of these 4 "combination" types, write direct to the factory for more further information, enclosing detailed drawings where possible.

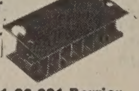
Drive Pin 463-10-22-015

353-21-06-001 Barrier Terminal Block with 363-21-06-071 Marker Strip (Imprinted)



353-21-06-001 Barrier Terminal Block with 363-31-06-020 "Cover"

Available in 1 to 31 terminal sizes with standard, "W," "¾W" and "Y" type terminals. Particularly recommended when electrical and mechanical performance requirements are especially critical. Same terminal centers (⅜″) as 140 Series. Also uses same 5-40 binder head screws. Otherwise, has higher and wider barriers. Extra material between barriers at the base strengthens construction and maintains same ½″ creepage distance between terminal to terminal and terminal to ground. Terminal designations can be imprinted on this base. Materials and finishes are described below. Electrical ratings are shown on inside front cover.

Bottoms are closed so that insulating strips are not required. However, knockouts are molded into the base so that "Y" terminals can be accommodated if desired. A top-mounted marker strip, ¼″ wide is available and can be imprinted with ⅛″ numbers or a "double" marker strip can be used as a "cover" with one end position slotted to facilitate swinging the cover clear for quick inspection. Character designations can be imprinted on one or both sides of the cover if desired as described on page 12.

INSULATOR MATERIAL: General Purpose Black Phenolic; Other Materials Available.

TERMINAL MATERIAL and FINISH: Brass, Nickel-Plated.

"W," "¾W" and "Y" TERMINAL MATERIAL and FINISH: Brass, Hot Solder Dipped.

* Marker strip part numbers shown are "single sided" not imprinted type that extend out on only one side; equivalent "double" type strips extending out on both sides also available. To order change second field to 14. To order imprinted marker strips change fourth field from 010 to 011.

† See information on "341 and 342 Series Terminals" on how to signify desired terminal type by changing second field part numbers above. "31" and "21" are given as examples.

341 and 342 SERIES TERMINAL MATERIAL and FINISH: Brass, Cadmium-Plated.

341 and 342 SERIES MARKER STRIP MATERIAL: 1/32″ NEMA Grade XPC, UL Rated 94V-0.

‡ 17/64″ spacers should be used with 540 Series cover available on special request.

§ TOP-MOUNTED MARKER STRIP MATERIAL: 1/16″ NEMA Grade XPC, UL Rated 94V-0.

¶ COVER (DOUBLE MARKER STRIP) MATERIAL: 1/32″ NEMA Grade XPC, UL Rated 94V-0.

SCREW MATERIAL and FINISH: Steel, Nickel-Plated.

(CD) Indicates items normally available through Cinch Distributors.

354-61-05-001 Barrier Terminal Block with 364-61-05-071 Marker Strip (Imprinted)

354-61-05-001 Barrier Terminal Block with 364-71-05-020 "Cover"

Available in 1 to 30 terminal sizes with standard, "W," "¾W" and "Y" type terminals. Ideal for higher voltage requirements. Same terminal centers (⁷⁄₁₆″) as 141 Series. 6-32 binder head screws. Has higher and wider barriers with extra material between barriers at the base. Creepage distance is ⅝″ between terminal to terminal and terminal to ground. Terminal designations can be imprinted on base. Materials and finishes are described below. Electrical ratings are shown on inside front cover.

Insulating strips are not required because of closed bottoms on barrier block. However, "Y" terminals can still be accommodated if desired through use of knockouts molded into base. Top-mounted ¼″ wide marker strip is available and can be imprinted with ⅛″ numbers or a "double" marker strip can be used as a "cover" with one end position slotted to facilitate swinging clear. Cover can be imprinted with character designations on one or both sides as described on page 12.

355-31-04-001 Barrier Terminal Block with 365-31-04-071 Marker Strip (Imprinted)

355-31-04-001 Barrier Terminal Block with 365-41-04-020 "Cover"

Available in 1-26 terminal sizes with standard, "W," "¾W" and "Y" type terminals. Higher and wider barriers increase voltage ratings. Same ⁵⁄₁₆″ terminal centers as 142 Series. Also uses 8-32 x ⁵⁄₁₆″ binder head screws. Extra material between barriers at base adds strength and maintains same ¾″ creepage distance between terminal to terminal and terminal to ground. Terminal designations can be imprinted on base. Materials and finishes described below. Electrical ratings shown on inside front cover.

Bottoms are closed, eliminating need for insulating strips. Knockouts are molded into base to accommodate "Y" terminals if desired. Top mounted ¼″ wide marker strip is available and can be imprinted with ⅛″ numbers or a "double" marker strip can be used as a "cover" with one end position slotted to facilitate swinging clear for fast inspection. Character designations can be imprinted on one or both side of the cover if desired.

TRW CINCH CONNECTORS

FANNING STRIPS

FOR CONNECTING TO BARRIER TERMINAL BLOCKS

161 Series Fanning Strip with Cable Clamp and 141 Series Barrier Terminal Block

Fanning strips serve as a convenient means for rapidly making and removing connections from barrier terminal blocks. They facilitate cable or harness wiring and minimize the possibility of subsequent wiring errors. Both straight and angle type fanning strips are available. Terminals are made of .032″ brass, cadmium-plated. The 3/32″ thick, 1/2″ wide XP black phenolic mounts are furnished with a hole, in either the right or left side, for securing the cable with lacing twine. For larger sizes, use of a cable clamp as shown on page 12 is recommended.

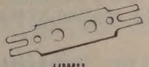
TRW CINCH CONNECTORS

OPTIONAL TERMINALS, JUMPERS AND CABLE CLAMPS

SOLDER TERMINALS



"W"

"¾W"

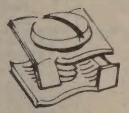
"Y"

"W," "¾W" and "Y" terminals are available optionally as separate terminals for use with 140, 141 and 142 Series barrier blocks as indicated below. Also specify hot solder dipped finish when ordering. Material is brass.

SOLDER TERMINALS PART NUMBER ORDERING INFORMATION

FOR:	"W" TYPE	"¾W" TYPE	"Y" TYPE
140 Series	495-11-11-017	495-11-11-019	495-12-11-016
141 Series	495-11-11-020	495-11-11-022	495-12-11-012
142 Series	495-11-11-023	495-11-11-025	495-12-11-011

QUICK-CLAMP* TERMINALS



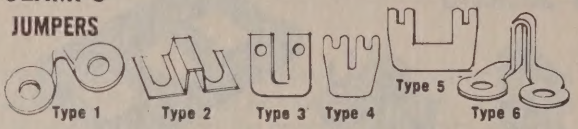
Simplifies engaging of wires to barrier blocks. Wire is inserted into flared opening and screw is tightened. Screws are nickel-plated brass, binder head type. Terminals are electro-tinned brass. Set includes two mating clamps and one screw. For use with 141 and 142 Series barrier blocks as shown below.

* Patent Pending

QUICK-CLAMP* TERMINALS PART NUMBER ORDERING INFORMATION

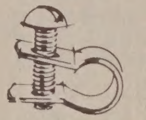
FOR:	PART NO.	WIRE GAUGES	SCREW SIZE
141 Series	422-14-11-143	14 thru 22	6-32 x ⁵⁄₁₆"
142 Series	422-14-11-144	8 thru 16	8-32 x ⅜"

JUMPERS



Used for making permanent connections between adjacent barrier block terminals, except for type 5, which connects two alternate terminals bridging the intermediate terminal. Six types for use with 140, 141, 142, 540, 541 and 542 Series barrier blocks as shown. All jumpers are brass with nickel-plated satin finish.

CABLE CLAMPS



For use with "Jones" Fanning Strips shown on page 20. Recommended for securing the cable where at least several conductors are to be terminated with fanning strips. As indicated, six different inner diameter sizes are available. Clamps and 6-32 x ½" round head screws are stainless steel, passivated. For convenience cable clamps are supplied unassembled.

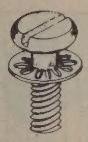
SEMS SCREW TERMINALS



The Sems screw termination, with integral lockwasher, permits rapid, permanent attachment of solid or stranded wire leads or spade lug terminations to the barrier terminal block. The lockwasher teeth cut into the termination material, assuring excellent electrical contact and the ability to withstand substantial strain and vibration.

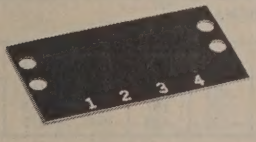
The Sems screws are nickel plated steel and the lockwasher is nickel plated phosphor bronze.

When ordering by ten digit manufacturing part number, change second digit from 11 to 12. (Example: 355-12-02-001)

When ordering by distributor part number, add letter (E). (Example: 2-140-E)

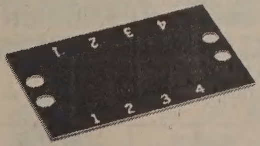
IMPRINTING INFORMATION ON MARKER STRIPS (UL RECOGNIZED)

"SINGLE" MARKER STRIPS



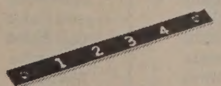
All "single" marker strips, extending out on only one side, as shown in this catalog, can be supplied at extra cost with terminal designations as desired, imprinted directly on the strips. Either ³⁄₃₂" or ⅛" high letters, number, words or symbols can be imprinted in white. If no preference is given, the size best suited for the particular order will be used. Each imprinting order necessitates a set-up charge in addition to regular imprinting charges based on the number of characters and panels. Please make sure all imprinting instructions are clear and concise.

"DOUBLE" MARKER STRIPS



"Double" marker strips, extending out on both sides, can also have terminal designations imprinted at extra cost on one or two sides, if desired ⅛" high letters, numbers, words or symbols can be imprinted in white and if no preference is given, the best suited size for the particular order will be used. When used as a "cover" for the 540, 541 or 542 Series, "double" marker strips can also be imprinted on either side, as specified. Regular imprinting and set-up charges apply. Please indicate whether the marker strip is being used as "double" or "cover."

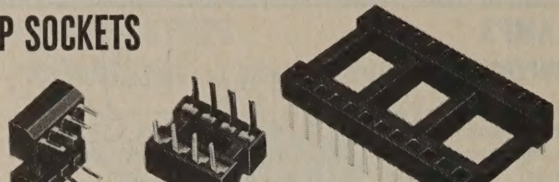
SPECIAL TOP-MOUNTED MARKER STRIPS



Special marker strips used on top of 540, 541 and 542 Series barrier blocks can be imprinted with terminal designations at extra cost. ⅛" letters, numbers, words or symbols can be imprinted in white. Each imprinting order requires both set-up and regular imprinting charges. Please make sure all necessary instructions are included.

TRW CINCH CONNECTORS

DIP SOCKETS



These low profile DIP sockets are extremely economical. The unique design permits substantial reduction in assembly costs and, at the same time, incorporates many features that were previously available only in more expensive sockets. TRW/Cinch DIP sockets are produced in 8, 14, 16 and 24 contact sizes as standard items. Other sizes can be developed by the addition of insulator tooling.

LOW PROFILE SOCKETS with P. C. BOARD TERMINALS

MATERIALS INSULATOR: Glass fiber polyester 94V-O (U.L. rated); CONTACTS: Brass Alloy (Olin 688); PLATING: 0.001 electroplated solder (60/40) over 0.0005 electroplated copper or .00003 gold inlay on phosphor bronze.

ELECTRICAL/ENVIRONMENTAL SPECIFICATIONS CURRENT RATING: 1 Amp; INSULATION RESISTANCE: 20 x 10^6 megohms (EIARS-364-TP21); WITHSTANDING VOLTAGE: 1000 Volts AC RMS (EIARS-364-TP20); CONTACT RESISTANCE: 12 milliohms @ 1 Amp, 10 milliohms @ 1 milliampere and 20 millivolts; INTERLEAD CAPACITANCE: 0.35 pf at 1 MHz (MIL-STD-202, Method 305); VIBRATION: No interruption of current when tested per EIARS-364-TP28; SHOCK: No mechanical failure or disengagement when tested per EIA-TP27, RS-364; HUMIDITY: Insulation resistance exceeded 20 x 10^6 megohms after 96 hours @ 40°C and 95% R.H. per EIA-TP21, Method II, Condition A, RS-364.

MECHANICAL SPECIFICATIONS CONTACT INSERTION FORCE: 3.0 oz. minimum, 4.0 oz. maximum; CONTACT WITHDRAWAL FORCE: 3.5 oz. minimum, 4.5 oz. maximum; CONTACT RETENTION: 12 oz. minimum, 15 oz. average.

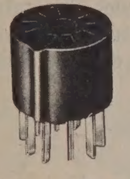
IC SOCKETS

TO-5 CASE SOCKETS



These Cinch miniature sockets are designed especially for integrated circuits mounted in 6, 8 or 10-lead TO-5 cases. They provide a convenient, dependable means of installing or removing IC's from the printed circuit board. Interconnections can be made without bending the leads, which substantially reduces the possibility of breaking leads or destroying the hermetic seal of the cases. Insulation material is diallyl phthalate Type SDG, contacts are beryllium copper with 30 micro-inches of gold over a copper flash.

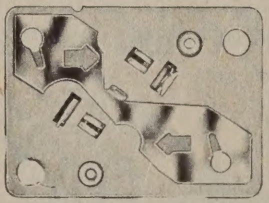
POWER TRANSISTOR SOCKETS



TYPE 14

Type 14 and 15 power transistor sockets with laminated top and bottom plates are used under the most severe vibration conditions because of high initial withdrawal force. Transistor can be grounded to collector plate and at the same time be completely insulated from the chassis. Type 14 and 15 top and bottom plates are made of Valox 310. Collector plates are cadmium-plated steel and contacts are made of cadmium-plated brass. Type 16 power transistor socket with molded insulator body is designed for mobile communication receivers. Type 16 socket has an insulating body of general purpose black phenolic (also available in mica and diallyl) and contacts are phosphor bronze, cadmium plated.

GENERAL PURPOSE TRANSISTOR SOCKETS TYPE 13

Multi-purpose all-molded sockets designed to the triangular base layout (.2″ x .1″ JETEC-30 contact centers) as well as the 3-contact in-line layout (.048″ x .192″ contact centers). Insulator material is either general purpose black phenolic or mica-filled low loss phenolic (Type MFE per MIL-M-14). Contacts are made of phosphor bronze, cadmium plated. Sockets may be used with E3-14, E3-15, E3-25, E3-32, E3-43, E3-44 and E3-51 EIA base designations.

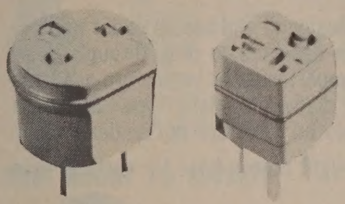
MINIATURE SEMICONDUCTOR SOCKETS

TO-5 AND TO-18 CASE DEVICES



This group of semiconductor sockets, for printed circuit board insertion, covers the standard configurations in most common use today.

Their low profile (.250″) makes them especially applicable in high density applications. All units are made of MFE, mica-filled phenolic, and the six position TO-5 socket, is also available in FEP fluoro-carbon resin.

These Cinch sockets have low contact resistance, low capacitance and insulation resistance of over 1000 megohms. They are rated at 1.0 amperes and 750 volts A.C.

RECOMMENDED MOUNTING HOLE CUT-OUT

MECHANICAL CRIMP MOUNTING TYPE

This type socket is fastened to the chassis by two tabs, which are an integral part of the metal saddle retaining the insulator body. These tabs are rolled against the underneath side of the chassis. Insulator material is mica-filled low loss phenolic (Type MFE), glass-filled diallyl phthalate (Type SDG-F per MIL-M-14). Contacts are made of brass, phosphor bronze or beryllium copper with finishes as shown below. Saddles are made of cold rolled steel or brass, with finishes as shown below.

Part No.	Insulator Material*	Contact Material	Contact Finish	Saddle Material	Saddle Finish
‡133-65-10-001	Mica	Brass	.0001 Cadmium	C.R. Steel	Copper Flash plus .0001 Cadmium

Two types of subminiature stand-off sockets designed and tooled under military contract to meet MIL specifications. They are designed to drop through clearance holes arranged on a .050″x.050″ grid layout. Insulator bodies are available in either mica-filled low loss phenolic (MFE) or diallyl phthalate (Type SDG). Both types have beryllium copper contacts, silver-plated, with tips hot solder dipped.

The Type S-1 subminiature socket has an eight button base for vertical tube position and has no center shield.

The Type S-3 socket is a seven-contact in-line subminiature right angle socket for horizontal tube position. A nickel-plated brass mounting bracket provides additional support when mounted to the printed circuit board.

TYPE 3

The first subminiature sockets ever produced. Type 1 and 2 three-contact sockets can be used with 3-prong transistors. Type 1, 3 and 4 sockets can be swaged or cemented into chassis or mounted with rings shown below. Type 2 is a stand-off style socket used primarily in printed circuitry but also suitable for conventional wiring. Insulating bodies are either general purpose black phenolic or mica-filled low loss phenolic (Type MFE per MIL-M-14). Contacts are of beryllium copper, either silver or cadmium plated as indicated.

MOUNTING SPRING AND MOUNTING RINGS

No. 441-00-23-094 spring is designed for use with Type 1 and 2 three-contact sockets having a .093″ deep slot in the side of the insulator. Tempered spring steel material ensures positive retention of socket in chassis.

No. 441-00-11-082 ring is for use with Type 1, 2 and 3 sockets. No. 441-00-11-084 is for use with Type 4 and 5 sockets. Sharp teeth bite into side of insulator when ring is pressed on. Both rings are made of brass.

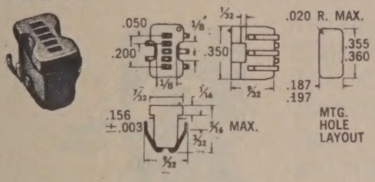
SUBMINIATURE TUBE SOCKETS (CONT'D)

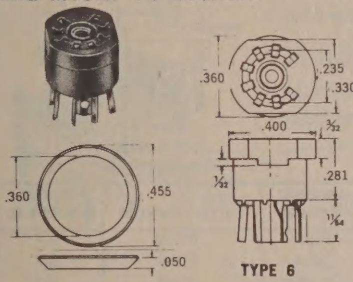
TYPE S-5



Type S-5 is a commercial 5-contact socket that presses into a non-polarized chassis cutout. For use on 1/16" thick boards. Insulator body is mica-filled low loss phenolic (MFE). Contacts are beryllium copper, silver-plated.

Part No.	No. of Contacts	Insulator Material	Contact Material
131-75-12-045	5	Mica	Beryllium Copper

RING MOUNT T-3 SOCKETS

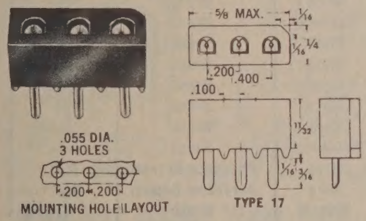


These 8-contact sockets can be swaged or cemented into chassis or mounted with mounting ring No. 441-00-11-099. Insulator material is mica-filled low loss phenolic (Type MFE per MIL-M-14). Contacts have twisted tails and are made of beryllium copper with silver plated finish. Center shield is brass, cadmium plated. Mounting ring is .010 brass.

Part No.	Type	Insulator Material	Contact Finish	Contact Finish	Center Shield Material	Center Shield Finish
132-18-12-011	6	Mica	Beryllium Copper	Silver	Brass	Cadmium
132-18-12-017	6	Mica	Beryllium Copper	Silver*	Brass	Cadmium

*Contact tails and center shield hot solder coated.

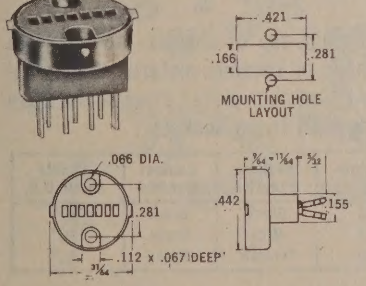
DOUBLE DIODE SOCKET



Special 3-contact socket used for mounting a diode in printed circuit applications. Used in horizontal phase detector. Insulator material is general purpose black phenolic. Contacts are made of brass with electro-tinned over copper flash finish.

Part No.	Type	Insulator Material	Contact Material	Contact Finish
203-91-03-029	17	Black	Brass	Electro-Tinned over Copper Flash

IN-LINE TYPE MILITARY SOCKETS



These in-line sockets are designed and tooled under military contact to meet MIL specifications. Available with or without nickel-plated brass mounting base. Either type can be mounted with No. 422-11-11-098 nickel-plated brass nut and No. 460-14-19-106 0-80 NF-2 stainless steel filister head type screws, which must be ordered separately. Insulator material is diallyl phthalate (Type SDG per MIL-M-14). Silver-plated beryllium copper contacts available with twisted tails as shown.

Part No.	Insulator Material	Contact Material	Contact Finish	Tail Type	Military Standard
131-27-92-011	Diallyl	Beryllium Copper	Silver*	Twisted	MS-35408-1

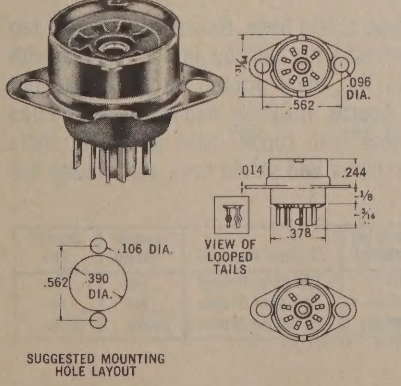
131-17-92-034	Diallyl	Beryllium Copper	Silver	Looped	—

*Contact tails hot solder coated.

T-3 TYPE MILITARY SOCKETS



These sockets, utilizing the T-3 pin layout, are designed for military use in equipment subject to humidity or vibration conditions. Available with or without nickel-plated shield base type mounting saddle as shown. Insulator material is either diallyl phthalate (Type SDG per MIL-M-14) or mica-filled low loss phenolic (Type MFE per MIL-M-14). Contacts are beryllium copper, silver-plated. Sockets available with twisted or looped contact tails as indicated. Sockets also available with keyway rotated 90°. Center shields, when supplied, are brass, hot solder coated.

7-PIN MINIATURE TUBE SOCKETS

MOLDED MINIATURE SOCKETS WITH MOUNTING SADDLES

Securely holds all standard 7-pin miniature tubes. Available in top-mount, bottom-mount with ground lugs or bottom-mount with integral eyelets. Molded of high dielectric black phenolic, mica-filled low loss phenolic or ceramic material. Copper flash and electrolytic tin steel saddle with ⅞″ mounting centers and .098 or .125 diameter mounting holes. Designed for mounting through chassis in ⅝″ diameter hole. Center ground shield is brass. Positive grip contacts of spring temper brass alloy are cadmium-plated. Phosphor bronze and beryllium copper contacts are silver-plated. Standard contact length is 11/32″, as shown in drawings; 3/16″ and ¼″ contact lengths are also available on special order.

MINIATURE SHIELD BASE STAND-OFF SOCKETS TYPE MSB-1

These miniature sockets have an attached bayonet type shield base. Bases have ground tab where specified in listings below. May also be obtained with heli-coil insert for use with No. 4-40 NC-2 screw. Sockets listed are for use in 1/16″ thick printed circuit board, but others may also be obtained for use in 3/32″ and ⅛″ boards. Insulator bodies are mica-filled low loss phenolic (MFE). Contacts are phosphor bronze with copper flash and electrolytic tin. Center shield is copper flash and electrolytic tin brass and shield base and ground tab are nickel-plated brass.

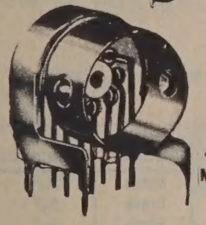
7-PIN MINIATURE TUBE SOCKETS (CONT'D)

MILITARY CONTRACT PC SOCKETS

TYPE MSB-2



TYPE MSB-3

Two types of miniature shield base sockets designed for military use to meet rigid MIL specifications. Both types drop through clearance holes arranged on a .1″ x .1″ grid layout. The Type MSB-2 socket has a mica-filled low loss phenolic (MFE) insulator body. Contacts are phosphor bronze, silver-plated with hot solder dipped tails. Center shield is brass, hot solder dipped, and shield base is brass, nickel-plated. Hot solder dipped ground tab is an integral part of the base. The Type MSB-3 socket, for right angle tube position, also has a mica-filled low loss phenolic (MFE) insulator body. Contacts are made of beryllium copper, silver-plated with hot solder dipped tails. Shield base is brass, copper flash and electrolytic tin.

IMPORTANT

All of the sockets shown on this panel can **only** be purchased with a Government contract number. No exceptions can be made.

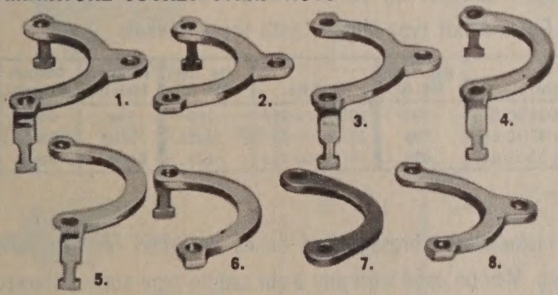
MINIATURE SOCKET STRAP NUTS



A Cinch development for ease and simplicity in mounting miniature sockets. One strap nut takes the place of two conventional type nuts. Generally used in assembling shield base sockets. 8 types are available, with hot tin dipped ground lugs attached for convenience in wiring. All are made of 1/16″ brass. Three finishes are available with each type: .0005 cadmium-plated, .0005 cadmium-plated plus yellow chromate or .0003 electro-tin. Desired finish must be specified. Strap nuts with .104 diameter rivet hole can be used for mounting or for grounding to aluminum chassis. All mounting holes are tapped to accept No. 4-40 screws.

TRW CINCH CONNECTORS

300 SERIES WITH STANDARD TERMINATION

The "Jones" 300 Series plugs and sockets, designed for light and medium duty applications, are small in size with good separation between contacts. This series is available in sizes from 2 to 33 contacts, arranged for either cap or panel mounting. All plugs and sockets are polarized so that plugs of one size cannot fit with sockets of another size. 24 to 33-contact plugs with standard termination also have a special polarizing pin to facilitate faster positioning of the mating plug and socket.

The insulating material is general purpose black phenolic. Phosphor bronze "knife-switch" type socket contacts engage both sides of flat brass plug contacts, providing double contact area. All contacts are cadmium-plated. Plug prongs are 5/32" wide and 5/64" thick. All solder lugs provided with size .093" x .062" wiring hole. Formed metal caps have black wrinkle finish with insulating liners. Other finishes and material available. Consult factory.

The 300 Series plugs and sockets feature MONOBLOCK (one-piece) construction. MONOBLOCK eliminates internal moisture traps. 300, 400 and 2400 Series UL recognized.

Note: All 2-contact plugs and sockets are round; all other sizes are rectangular. *U.S. Pat. Nos. 2688123 & 2980881

TRW CINCH CONNECTORS

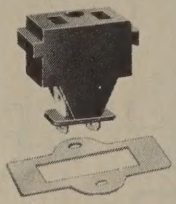
400 SERIES WITH STANDARD TERMINATION

The "400" Series plugs and sockets from the famous "Jones" line of quality components are rated for duty beyond the range of the 300 Series. Maximum rating is 1200 volts r.m.s. at 15 amperes.

400 Series plugs and sockets are available in sizes of 2, 4, 6, 8, 10 and 12 contacts, each size being polarized and suitable for either cap or panel mounting. "Knife-switch" type socket contacts are made of cadmium-plated phosphor bronze. These contacts engage both sides of the flat plug contacts, providing double the contact area.

Plug prongs are made of cadmium-plated brass ¼" wide by 1/16" thick. Caps are finished in black wrinkle and equipped with insulating lining. Other finishes and material available. Consult factory.

Should a connector be required which is rated for higher voltages, the "Jones" 2400 Series plugs and sockets are similar to the 400 Series except that the 2400 Series has a higher voltage rating.



Note: The 2-contact angle bracket (AB) type socket will not accept the standard angle bracket as shown in the S-406-AB illustration below. Instead, a special bracket is supplied for mounting to a panel or chassis. The illustration at the left shows the S-402-AB socket with the special bracket.

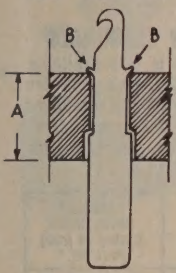
TRW CINCH CONNECTORS

400 SERIES WITH STANDARD TERMINATION (cont'd)



NOTE REGARDING LOOSE CONTACTS ON 400 SERIES PLUGS

This illustration shows the method of staking 400 Series plug contacts in the phenolic body. Manufacturing tolerances permit a slight variation in the "A" dimension during the molding process. Thus, in some instances the fit between the contact and the body at points "B" may not be perfectly snug. When this condition occurs, the contact appears to be "loose" in the connector body. However, the security of the contact is in no way jeopardized and the performance of the connector is not impaired.

It is recommended that personnel responsible for inspection and installation of the connectors be informed of this condition to avoid unnecessary delays and correspondence arising from a mistaken conclusion that the connectors are faulty. In case of doubt, however, it is advisable to check with the local Cinch representative or contact the factory before any action is taken.

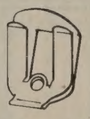
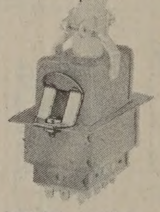
AUXILIARY LOCKING ARRANGEMENTS

Capped Connector Member Showing Extrusion for Engaged Auxiliary Lock



Auxiliary Lock 63A Factory No. 422-12-14-012



Complete Auxiliary Locking Assembly

AUXILIARY LOCK 63A—FACTORY NO. 422-1214012

Where connectors are subject to shock or vibration, the Auxiliary Locking Arrangement (No. 63A) is recommended. It can be used with the 300 Series end bracket (EB), shallow bracket (SB) or deep bracket (DB) types. It consists of a set of spring locks secured by the mounted bolts which engage extrusions on the cap creating a secure, shakeproof mating condition.

The No. 63A locks must be ordered separately, one pair for each plug and socket. The part numbers for the plugs and sockets with the special extrusions on the caps are found in the table below. Note that there are two types of caps, one with extrusions placed for end bracket or shallow bracket mates (S-type) and the other for deep bracket mates (D-type). **IMPORTANT:** As indicated below, the caps with the S-type mates are the only ones which can be used with FHE and CCE plugs and sockets.

PLUGS AND SOCKETS WITH D-TYPE EXTRUSIONS

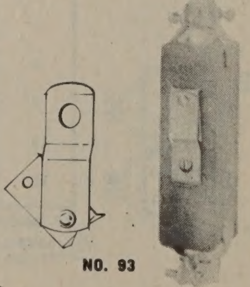
NO. 63



NO. 93

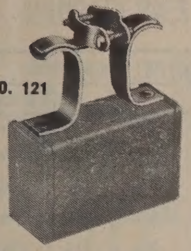
AUXILIARY LOCK NO. 63—FACTORY NO. 422-12-14-011

Spring Lock For Use With 400 Series Panel-Mounted Plugs and Sockets: Can be used with Type AB or SB. Proper operation requires that the mounted plug or socket body be flush with the top of the panel. The standard binder head screws furnished for fastening the mating connector body to a cap must be replaced by filister head screws.

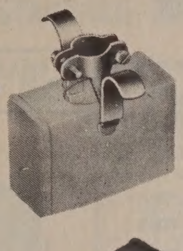
AUXILIARY LOCK NO. 93—FACTORY NO. 319-01-99-003

Extension-Cable Lock For Use With 400 Series: Can be used with any 400 Series unmounted (cap-type) plug or socket when both mating units are attached to cables. The lock is attached to the plug cap with the screw which holds the cap to the connector body. The binder head screws in the socket cap must be replaced with filister head screws and the opening in the lock snaps over the filister head screws, completing the lock.

TRW CINCH CONNECTORS



NO. 121



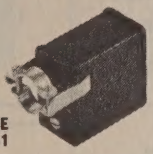
NO. 120

COMBINATION CABLE CLAMPS AND HANDLES

These units provide relief from strain on connector wiring and also facilitate connector separation in close quarters. Can be used for both plugs and sockets. Cap is not included.

No. 120 fits all Type CCT plugs and sockets of the 400 and 2400 Series and 15-33 contact plugs and sockets of the 300 Series.

No. 121 fits the following Type FHT plugs and sockets of the 300, 400 and 2400 Series: 300 Series — 24, 27, 30 and 33 contact; 400 Series — 10 and 12 contact; 2400 Series — 10 and 12 contact.

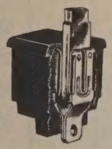


No. S-2408-CCE with #21851

CABLE CLAMP FOR CCE CAPS — When Used with Deep Bracket

When ordering CCE caps for 315-333, 402-412, 2402-2412 Series plugs or sockets that are to be mated with DB plugs or sockets specify cable clamp No. 21851. (For example, P-2408-CCE with No. 2185.) There is no difference in price. Standard cable clamps normally furnished with all CCE will mate with SB plugs and sockets only.

2400 SERIES WITH STANDARD TERMINATION



Cross-section of 2400 Series socket showing four-surfaced contact with plug prong.

IMPORTANT NOTICE

All 2400 Series plugs and sockets are available with "early mate" grounding connections that engage before contacts mate. To order, simply add letter "G" to part number desired.

Example:

Plug without grounding pin P-2402-LAB
Plug with grounding pin PG-2402-LAB
Socket without grounding terminal S-2402-LAB
Socket with grounding terminal SG-2402-LAB

The "Jones" 2400 Series plugs and sockets are designed for excellent electrical and mechanical performance. Ratings for the 2400 Series **voltage** (for which the 2400 Series carries a 50% higher rating). Note the electrical rating chart on the inside front cover.

A unique socket contact designed is utilized in the 2400 Series as shown in the above illustration. Four individual flexing surfaces make contact make contact over practically their entire length. Note in the illustration how they exert maximum pressure at every point. Also note the unique method of anchoring terminals in the block — they cannot be moved up or down.

The contact-to-contact and contact-to-ground distance has been considerably increased by mounting the contacts into recessed pockets with a phenolic barrier surrounding and extending above. This method is used on both the top and bottom side of both plugs and sockets, greatly increasing the leakage path.

All units of the 2400 Series are interchangeable with corresponding units of the 400 Series. The same 2, 4, 6, 8, 10 and 12-contact plug and socket sizes are available, each size being polarized and suitable for either cap or panel mounting.

Plug and socket bodies are molded of general purpose black phenolic. Socket prongs are of heavy brass 1/4" x 1/16", cadmium-plated. The formed metal caps have a black wrinkle finish with insulating liners.

A shoulder extends around the mating side of the 2400 Series plug and socket presenting a finished appearance when mounted in bracket or cap. Because of this shoulder, when angle brackets are used, they must first be removed from the plug or socket. The unit is then inserted into the chassis with the brackets replaced underneath the panel.

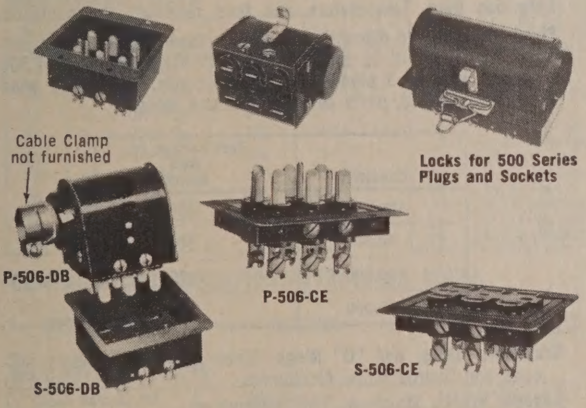
500 SERIES — WITH STANDARD SCREW TERMINALS / MOUNTING DATA



Locks for 500 Series Plugs and Sockets

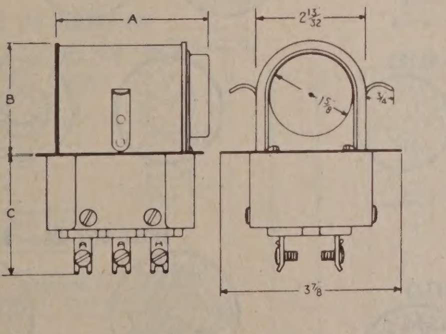
No. 500-L Lock fits any deep bracket and cap combination. It holds securely, but can be released instantly. The lock is fastened by the same screw or rivet that holds the deep bracket to the panel. Two locks are required. Cannot be used on shallow brackets.

The "Jones" 500 Series plugs and sockets are designed for use in extremely heavy-duty applications. Ratings are somewhat dependent on the parameters of the associated circuitry, but maximum voltage is nominally 3000 volts and maximum current is nominally 25 amperes per contact. Wattage per contact should not exceed 5000 watts.

500 Series plugs and sockets are available in sizes of 2, 4, 6, 8, 10 and 12 contacts, each size being polarized so as to prevent accidental mismating with any other size. The units have been designed to allow maximum accessibility under plug caps for making terminal connections and also subsequent inspection. Plug and socket blocks will accept all appropriately-sized caps and brackets interchangeably.

Male contacts are brass and female contacts are phosphor bronze, cadmium-plated. Metal parts of caps and brackets are steel and made rustproof by parkerizing. All caps are insulated with canvas bakelite. Plug prong cross section is 5/16" by 3/32".

IMPORTANT: When used with high voltages present, it is recommended that a deep bracket type (DB) be used as one plug or socket and that its mate has a cap. Shallow brackets (Type SB) are for use only in connecting to mates of the same type.



For Type DB connectors, dimension B is 2 1/4" and Dimension C is 2 5/8" reference on the socket and 2 7/16" reference on the plug. For Type SB connectors, dimension C is 1 9/16", cap height is 2 57/64".

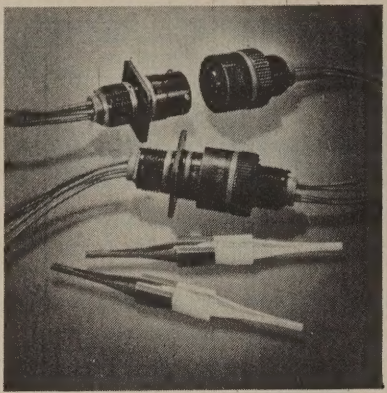
TRW CINCH CONNECTORS

NUCON MIL-C-83723 SERIES III CYLINDRICAL CONNECTORS



The TRW Cinch Nucon Series of cylindrical connectors are built to exceed the specifications of MIL-C-83723 Series III. The design combines the exacting high reliability miniature connector specifications of MIL-C-26500 with a rear-release contact retention system.

The series features an all-plastic retention disc, thus eliminating the metal clips that shorten the insulation resistance path. The user therefore obtains maximum insulation protection in a miniature connector design. The shells are totally machined from aluminum bar stock to ensure close tolerances and uniformity.

The closed entry-socket side insulator has a lead-in chamfer that will not accept a pin contact that is bent beyond a pre-established limit. The interfacial seal on the pin side has raised barriers around each pin. When the connector is mated, barriers displace into the socket chamfers to provide a positive moisture seal.

The Nucon Series utilizes the same plastic tool specified for use with most qualified rear-release connectors. The tool is designed to break before damaging the connector if it is misused by the assembler.

The Nucon Series is made in a full range of shell sizes from 8 through 24 and both square flange and single hole mounting are available.

PERFORMANCE CHARACTERISTICS

Durability: No detrimental damage after 500 mating-unmating cycles.

Corrosion: Salt spray test per method 1001, condition B, MIL-STD-1344: no exposure of basis metal affecting performance.

Moisture Resistance: 100 megohms or greater at 25°C when tested per MIL-STD-1344, Method 1002.

Dielectric Withstanding Voltage: Sea level test per Method 3001 of MIL-STD-1344.

Altitude Immersion: 1000 megohms or greater when tested per MIL-STD-1344, Method 1004. Temperature Cycling: Tested per Condition C, Method 102, MIL-STD-202.

Vibration: No discontinuity longer than 1 microsecond per Method 214, MIL-STD-202.

MATERIALS AND FINISHES

Pin and Socket Contacts: Copper base alloy gold plated per MIL-G-45204 over suitable underplate.

Shells: Aluminum Alloy.

Finish: Conductive (Electroless Nickel); Non-conductive (Anodized).

Retention Disc: Temperature and fluid resistant thermoplastic.

Physical Shock: No discontinuity greater than 1 microsecond during application of ½ sinewave transient shock impulses of 300 gravity units to 3 planes for 3 milliseconds. Connectors shall not be damaged, parts shall not become loose.

Condition	Test Voltage AC, RMS Mated
Sea Level	1500
50,000	500
70,000	375
110,000	200

Grommets, Seals, and "O" Rings: Cinch Nuline Proprietary silicone and fluorosilicone elastomers.

Bayonet Rivets: Stainless Steel, passivated.

Inserts: Temperature and fluid resistant thermoplastic.

TRW CINCH CONNECTORS

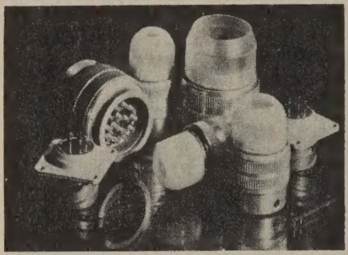
CINCH NULINE 904 SERIES COMMERCIAL INPUT/OUTPUT CONNECTORS



FEATURES

Meets or exceeds appropriate MIL-C-5015 requirements for:

- Moisture resistance (when potted).
- Insulation resistance.
- Environmental resistance.
- Temperature cycling.

Additional features of the 904 Series:

- Lightweight.
- Visual engagement ring.
- Positive locking.
- Hooded female contacts.
- Three pin coupling.
- Stainless steel pins and bayonet slots.

PERFORMANCE CHARACTERISTICS

Durability: Connectors do not show any damage detrimental to the operation of the connector after 100 mating-unmating cycles at a rate of 300 cycles per hour.

Corrosion Resistance: After salt-spray testing per MIL-STD-202, Method 101C, Test Condition B connectors show no exposure of base metal which will affect performance.

Dielectric Withstanding Voltage: Connectors show no evidence of breakdown or flash over between adjacent contacts and from contacts to outer shell when subjected to the conditions specified in table below. (Tests performed per Method 3001 of MIL-STD-1344.)

	Condition*	Test V RMS	Recommended Working Voltage DC	Recommended Working Voltage AC
Sea Level	Unsealed	1500	700	500
	Sealed	2000	700	500
70,000 Ft.	Unsealed	375	175	125
	Sealed	1500	700	500

*(Unsealed) Refers to connectors with no provisions made for sealing front or rear areas.
(Sealed) Refers to connectors that are potted or pressurized in mounting, having front and rear areas sealed.

Insulation Resistance: Minimum insulation resistance of 5000 megohms between adjacent contacts and from contacts to outer shell when tested in accordance with MIL-STD-202, Method 302, Test Condition B.

Vibration: There are no circuit descontinuities longer than one microsecond when subjected to vibration testing in accordance with MIL-STD-1344, Method 2005, Test Condition III.

Physical Shock: Connectors are not damaged when subjected to 1500 G's for 0.5 milliseconds in each of three mutually perpendicular planes per MIL-STD-202, Method 213A, Test Condition F.

Temperature Cycling: Mated connectors perform satisfactorily after being subjected to temperature cycling from −55°C to +85°C per MIL-STD-202, Method 102A, Test Condition D.

Humidity: Connectors remain completely functional after being subjected to humidity testing per MIL-STD-202, Method 103B, Test Condition A.

Contact Resistance: Contact resistance through each mated contact pair doesn't exceed the requirements specified in the following table when tested in accordance with MIL-STD-1344, Method 3004.

Contact Mating End Size	Wire Size	Test Current (Amp)	Millivolt Drop (Max.) Initial	Millivolt Drop (Max.) After Corrosion
#20	20	7.5	55	65
	22	5.0	45	55
	24	3.0	45	55
#16	16	13.0	50	60
	18	10.0	45	55
	20	7.5	45	55

MATERIALS & FINISHES

Contacts: Copper Base Alloy Gold Plated per MIL-G-45204, Type II, Grade C, Class 0 over Nickel Underplate.

Shells: Aluminum Alloy 6262 per QQ-A-225/10 Gray Anodized per MIL-A-8625.

Inserts: Diallyl Phthalate per MIL-M-14F, Type MDG.

Face Seals: Neoprene Rubber per MIL-R-3065.

Bayonet Pins: Stainless Steel Type 303 Passivated.

Component Parts: Anodized Aluminum conforming to QQ-A-225 or Passivated Stainless Steel in accordance with QQ-S-764.

CAP & CHAIN ASSEMBLIES

Cap and chain assemblies for 904 Series Receptacles are waterproof and include a sealing gasket. They provide protection against live circuits and contamination when receptacles are unmated.

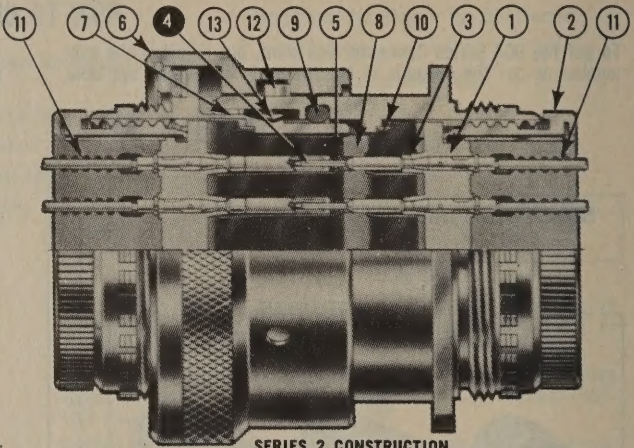
TRW CINCH CONNECTORS

CINCH-NULINE ASTRO/348® MIL-C-81511 HIGH DENSITY CONNECTORS



SERIES 2 CONSTRUCTION

DESIGN FEATURES

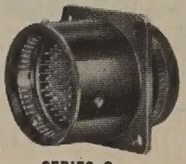
1. Molded One-Piece Contact Retention Disc.
2. Captivated Rear-Locking Nut (Metal to Metal Bottoming).
3. Individual Contact Risers.
4. Anti-Scoop Recessed Pin Contacts (in receptacle).
5. Closed Entry Socket Insert and Contacts.
6. Captivated Triple Bayonet Coupling System.
7. 5 Key Shell Polarization. (Series 2, Size 8 has 2 keys.)
8. Interfacial Mating Seal.
9. Dynamic "O" Ring Peripheral Shell Ring.
10. Monoblock Construction — Inserts Bonded to Shells.
11. Self-Sealing Rear Grommets.
12. Visual Mating Indicator.
13. Shell to Shell Grounding Fingers.

Astro/348 has been designed to eliminate the costly space-wasters in removable contacts. Problem-causing metal retention clips for each contact are gone. Instead, a single one-piece molded dielectric retention system locks Poke-Home contacts in place. Designed as a high density subminiature, Astro/348 is the best high density miniature and standard connector ever made. It packs more contacts of every size into standard shells than any other design. MIL-C-81511* has established the standard connector family for the next decade.

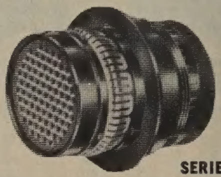
The single-piece retention disc gives other excellent advantages in addition to density. Dielectric wall thicknesses in the subminiature #23-22 contact arrangements **are equal to standard miniatures.** With greater density, #20's, #16's and #12's provide dielectric separation comparable to standard miniature and power connectors.

*MIL-C-81511 is a Military Specification for Connectors, Electric, Circular, High Density, Quick Disconnect, Environment Resistant.

**Astro/348 and Poke-Home are Trade Marks of the Bunker-Ramo Corp.



SERIES 2



SERIES 1

GROUNDING FINGERS

Shell-to-shell grounding is established by beryllium spring fingers permanently fixed to the Series 2 receptacle shell and permanently fixed to the Series 1 plug shell. These spring fingers, spaced at a minimum of 6 per inch (except at key-ways in Series 2 construction), make contact at least .090″ before pin-socket electrical engagement occurs during mating and maintain contact at least .090″ after pin-socket disengagement during unmating.

MIL-STD PART NO. FORMAT FOR REV. "C" CONNECTORS

Note: Under Rev. "C" of MIL-C-81511, the part numbering system has been revised to a 15 digit system to be in conformance with Defense Standardization Manual 4120-3-M.
The connector part number is put together as per the following example:

M81511 / 01 E F 01 P 1

Specification No.

Shell Style
Series 2 Connectors
/01 Sq. Flange Recept.
/02 Solder Flange Recept., Hermetic
/03 Single Hole Mtg. Recept.
/04 Single Hole Mtg. Recept., Hermetic

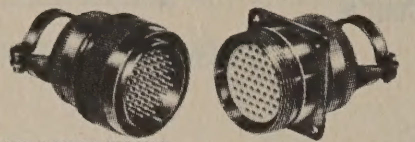
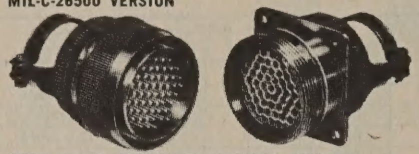
TRW CINCH CONNECTORS

CINCH-NULINE "OMEGA" SERIES — HIGH EFFICIENCY CIRCULAR CONNECTORS



MIL-C-26500 VERSION



MIL-C-38300 VERSION OR "GOLDEN OMEGA"

MORE CONTACTS IN LESS SPACE

When it becomes necessary to provide connections for a large number of circuits in a limited amount of space, a CINCH-NULINE "Omega" Series High Environmental Circular Connector is your best choice. CINCH-NULINE offers a wide selection of these miniature connectors that meet and exceed the requirements of MIL-C-26500 and MIL-C-38300. They are available in a variety of constructions, including those which can be potted. Most connectors feature MIL-C-26636 Crim-Lok contacts. Many others are available also with coaxial or shielded or thermocouple contacts.

SIGNIFICANT ADVANCE IN STATE-OF-THE-ART

On the ground or in space, wherever there is a requirement for superior environmental protection, high reliability and minimum weight and bulk, CINCH-NULINE "Omega" Series Connectors are the answer. To produce this series requires the satisfaction of many exacting requirements on reliability, logistics and present and anticipated environmental conditions. To meet these requirements, it was necessary to develop advanced design concepts, formulate materials for specific connector usage and work out new production techniques. The resulting connectors exceed the stringent requirements of MIL-C-26500 (USAF) and MIL-C-38300 (USAF) for performance and reliability.

THE "GOLDEN OMEGA" — CLOSED ENTRY & FRONT SERVICING

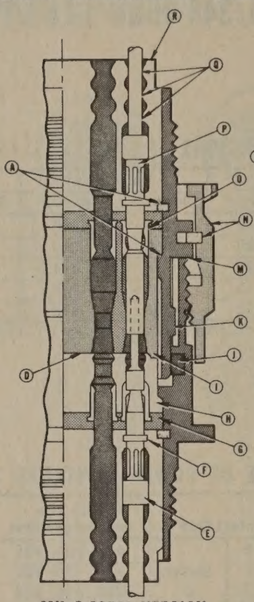
"Golden Omega" Connectors are identical to the other connectors in the "Omega" Series, except the socket inserts have a hard face of glass-filled epoxy. They are the first connectors to combine the positive reliability of closed entry with the speed and convenience of front servicing. In addition, the MIL-C-26636 contacts are tamper proof. Wrong-size contacts or oversize test prods cannot be inserted in the hard dielectric contact entry-ways on the socket inserts.

COMPLETE ENVIRONMENTAL SEALING

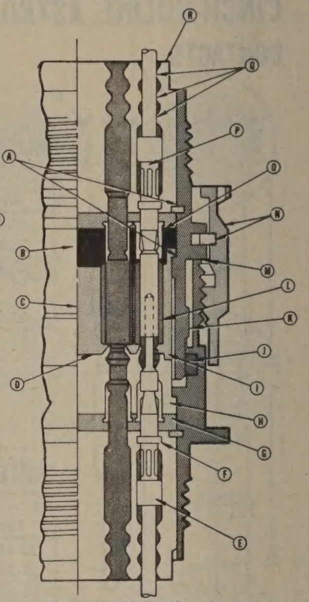
CINCH-NULINE "Omega" Series Connectors are fully sealed against extreme environmental conditions. Silicone rubber dielectric provides resilience and unsurpassed resistance to tear, compression set, fluids and high temperatures.

When the connectors are mated, insert faces compress to form a resilient dielectric seal around each individual contact. A continuous barrier on the periphery of the socket insert mates with a recess around the pin insert to form an additional compression seal. A dynamic "O" ring seal between mated shells constitutes still another barrier to dirt and moisture, and protects the integrity of the face seals. Together with monoblock construction, this puts void-free, continuous dielectric around each contact through the entire connector length.

Monoblock construction, with bonded interfaces between the dielectric components (insert, anti-deflection disc, and grommet) eliminates air voids and protects connectors from degrading moisture and altitude conditions. A pressurizing seal around each contact at the major O.D. prevents the passage of air or moisture through the contact hole, and triple sealing riser design at each wire hole in the grommet seals each individual wire.



MIL-C-26500 VERSION



MIL-C-38300/Golden Omega

A. Positive Location Captivated Insert (Mechanical Interlock)
B. Resilient Rear Insert (Only on MIL-C-38300 Version)
C. Closed Entry Hard Dielectric Front Insert (Only on MIL-C-38300 Version)
D. Insert Static Face Seal
E. Pin Contact, MIL-C-26636
F. Contact Pressurizing Seal
G. Anti-Deflection Disc
H. Resilient Pin Insert
I. Insert Rim Seal
J. Dynamic "O" Ring Shell Seal
K. Five Key Shell Polarization
L. Releasing Sleeve
M. Metal to Metal Shoulder
N. Bayonet or Threaded Coupling, Permanent Captivation
O. Contact Retention Clip
P. Socket Contact, MIL-C-26636
Q. Wire Sealing Risers
R. Grommet

WIDE VARIETY OF CONFIGURATIONS

Detailed information on configurations available, shell sizes, dimensions and data on how to order are given on the following pages.

GO/NO-GO RELIABILITY

When a "Golden Omega" connector is mated, you can be sure there is proper contact. The socket contacts are closely surrounded by hard dielectric with a chamfered entry to guide in the pins accurately. However, if the pins are bent, the hard dielectric presents a closed entry and prevents mating.

LIGHTWEIGHT & HIGH CONTACT DENSITY

Connector shells are impact-extruded aluminum forgings with a high strength-to-weight ratio. The insert arrangement is designed for the maximum number of contacts within the area available.

CRIM-LOK CONTACTS

Crim-Lok contacts (front release, rear insertable) provide for easy servicing of connector circuits without disassembling the connector from its mounting, or disturbing adjacent contacts. MIL-C-26636 contacts are crimped quickly, consistently, and reliably with either hand or power tools. They have high electrical conductivity, present a smooth configuration, and completely protect electrical contact pressure-members from environmental and handling damage. The contacts come in sizes 20, 16, 12, and shielded coaxial, with rhodium-over-silver plating. (Other platings such as gold are available; write factory for details.)

* MIL-C-38300 Connectors are furnished without cable clamp. If a cable support is desired, it must be ordered separately.

MIL STANDARD PART NUMBERS

You can use MS as well as CINCH-NULINE part numbers in ordering "Omega" Series Connectors. The MS part numbers for MIL-C-26500 Connectors are worked out on the basis shown in the table below. Whether you order by the MS or the "Omega" Series Number, all qualified connectors are shipped with the MS marking.

The part numbers for MIL-C-38300 Connectors start off with the identification M38300/ and take the form M38300/XXXX-XX. To determine the specific M numbers, refer to military specifications MIL-C-38300.

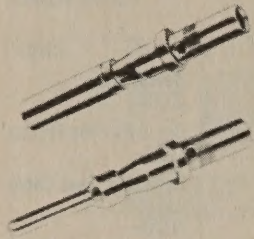
CRIM-LOK CONTACTS & SEALING PLUGS



MIL-C-26636 CONTACTS

When you order "Omega" Series Connectors with contacts, the contact package contains 20% spares. The package also includes seal plugs for at least 15% of the contact holes (or at least 3 sealing plugs).

To order contacts and sealing plugs separately use the part numbers in the table at right. (The contacts, of course, are MIL-C-26636 contacts.) Contacts may also be ordered in reels for use with automatic crimping tools.

CONTACTS

When you order connectors with contacts, the contact package contains enough contacts to complete the insert arrangement and have 2 spares left. The package also includes enough sealing plugs for at least 15% of the contacts in the insert, in any case a minimum of 3 sealing plugs. To provide proper sealing, insert unwired contacts and sealing plugs in all unused holes. (Use a #12 contact for a #1 shielded hole.) To order contacts and sealing plugs separately use the part numbers in the table at right. Contacts may also be ordered in reels for use with automatic crimping tools.

• The convenience of bayonet coupling. • The rigidity of screw type coupling

Severe vibration, such as that which occasionally occurs in airborne equipment, can cause a high rate of early failure in connectors. This is especially true of the bayonet type of coupling connectors. To overcome this problem, aircraft manufacturers put out a call for connector manufacturers to design a more vibration-proof model, within definite limits.

Realizing that a new type of connector could cost more per unit than the failure-prone type, the aircraft companies stipulated that the increased costs should be justified by reduced maintenance cost and lower air traffic revenue losses caused by excessive downtime. Also, to prevent a complete re-engineering of the present connection systems used in airplanes, the new design would have to:

1. Mate with the standard MIL-C-26500 and MIL-C-83723 bayonet receptacle presently used on the aircraft.
2. Use standard contacts.
3. Use standard crimping, insertion and removal tools.
4. Withstand vibration and shock equivalent to the capability of thread-coupled connectors locked up metal-to-metal.

To meet the challenging conditions imposed by the aircraft manufacturers, TRW/Cinch NuLine engineers decided to approach the development of a new design based on an analysis of the failure-modes of the present connector system.

Critical analysis of the connector needing improvement revealed that a vibration envelope induced forces on the connector that resulted in a wear producing relative motion between the plug and its mating receptacle.

Further analysis of the connector design disclosed that the "relative motion" was due to the unloading effect on the clamping force when the bayonet dropped into its detent in the coupling ring ramp.

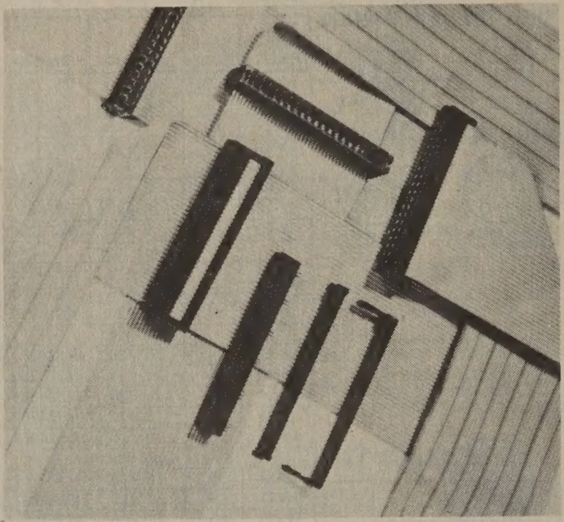
NOTES:
1. The C0909A-XX-XXXX-XXX complies with the requirements of TRW/Cinch Nuline PS-C0909 product specification.
2. The last three digits of the part number in Table IV are optional and denote deviations to the Standard Connector.

TRW CINCH CONNECTORS

SERIES 299 FLAT CABLE CONNECTORS



- Available in six sizes
- Optional strain relief
- Cable accurately positioned automatically by cover
- Integral molded locking tabs for added retention
- Two wire contact points for extra reliability
- Ultra-compact design saves board space

TRW Cinch flat cable connectors, either with strain relief or without, are available in six sizes — 10, 20, 26, 34, 40 and 50 positions. All accept flat cable with .05 inch (1,27mm) spacing in wire gauges #24 through #30. Gold plated bifurcated contacts provide two wire contact points for added reliability. Strain relief is provided through the use of a three-piece assembly.

With TRW Cinch flat cable connectors, the cable is automatically positioned for termination by means of grooves on the cover rather than by the terminating tool. TRW Cinch terminating tool fixtures are interchangeable with a customer's existing tools.

Flat ribbon cable manufactured by TRW Holyoke Wire & Cable is available through TRW Cinch Connectors distributors.

MATERIALS AND FINISHES

Contacts: Beryllium Copper

Contact Plating: 30 microinches gold over 50 microinches nickel per MIL-G-45204

Insulator: Glass-filled polyester (black), 94 V-0 rating

Wire Accommodation: 24 to 30 AWG, solid; 26 to 30 AWG, stranded

Contact Insertion Force (Individual): 6 oz. max.

Contact Withdrawal Force (Individual): 1 oz. min.

PERFORMANCE DATA

ELECTRICAL

Voltage Rating (AC RMS, Adjacent Terminals): 300 volts (sea level)

Test Voltage (AC RMS, Adjacent Terminals): 1500 volts (sea level)

Rated Current: 1 ampere

Insulation Resistance: 5000 Megohms Min.

ENVIRONMENTAL

Temperature Rating: 105°C

SPECIFICATIONS

Configuration: Conductors on .050 spacing

Conductor: #28 AWG stranded (7/36) soft annealed copper

Insulation: Flame Retardant PVC

Temperature: 105°C UL Style 2678

Voltage Rating: 150 VAC

Insulation Resistance: 10^{10} ohms min. per 10 feet

Impedance: 105 ohms balanced; 73 ohms unbalanced

Capacitance: 9.6 pf per foot — pair 17.0 pf per foot — triplet

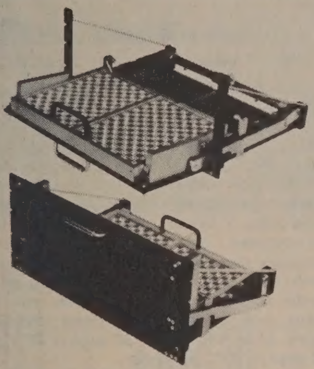
Wall Thickness: .009″ average; .006″ minimum

Polarization: Color Band for #1 position

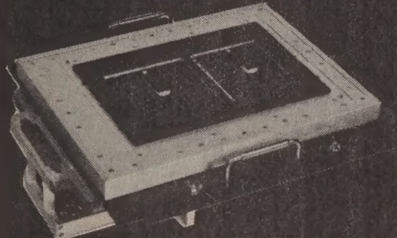
Standard Put-up: 100 foot spools

TRW CINCH CONNECTORS, AN ELECTRONIC COMPONENTS DIV. OF TRW INC. / 1501 MORSE AVE. / ELK GROVE VILLAGE, ILL. 60007

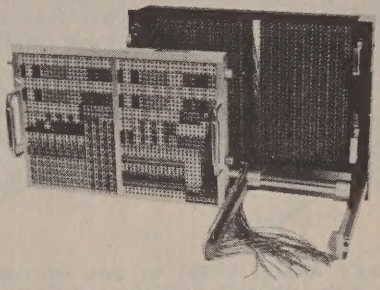
Patchboard Programming Systems and Accessories



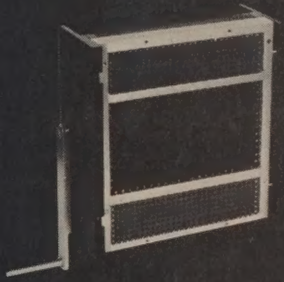
Drawer Type Systems—a roll cam designed for horizontal mounting to save up to 50% in panel areas. Also provides R.F. shielding. Five standard sizes range from 480 to 1870 contacts. All fit 19" wide racks.



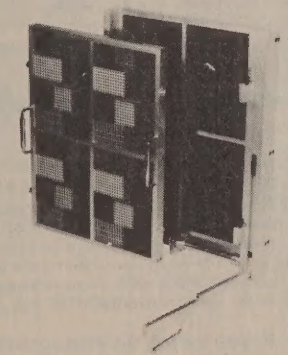
TEST FIXTURE — VPC has available two sizes of fixtures: Large fixture will accept P.C. boards up to 10" x 14" Small fixture accepts PBC up to 7" x 10.500. Fixtures for larger boards are available upon request; contact factory. Fixtures are available in Kit form or Wired to customer specifications.



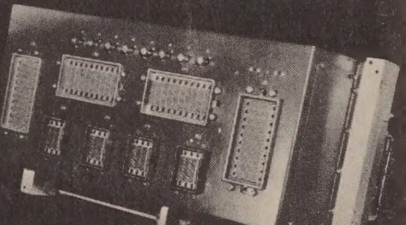
Roll Cam Modular Systems. This system is the same as Virginia Panel Corporation standard Roll Cam system except being Modular. Printed circuit boards can be attached to rear of Module or can be wired with Virginia Panel Corporation .093 Locktite Terminals, 1632 contacts.



True Thru-Shielded Systems—offer individual shielding, matched impedance, VSWR of 1.01 from 100 MHz to 500 MHz. These advanced programming systems can be manufactured to virtually any specifications.

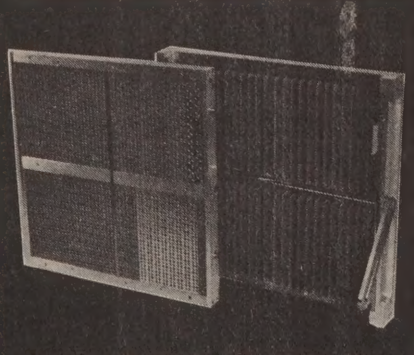


Roll Cam Systems—offer greatest capability and reliability, large number of contacts (24 sizes from 48 to 5120 contacts). Camming action engages full patchboard gently and accurately.



Pre-Wired Systems—can be standard panel boards wired to special quick connectors to eliminate hours of wiring and permit instantaneous re-circuiting. The 2560-contact roll cam system shown terminates in only 13 connectors.

Plating—Nickel or Gold
Board Material—Phenolic or Diallyl Phthalate
Contact Diameters—.093 and .053
Connections—Solder, wire wrap or Locktite
Finish—clear polish or black anodized
Silk Screen—Alpha/ numeric grid or special designs
Patchcords—Manual or fixed; single tip to nine-prong tip; squids; splits; shunts.
All unconditionally guaranteed.
Tools—a variety of 27 tools for crimping, extraction, insertion, and paddle contact.
Send for complete 40-page catalog today.



Modular Systems offer true thru shielded matched impedance. Regular shielded and digital modules. Printed circuit boards can be flow soldered to rear of module or wired with Virginia Panel Corporation .093 Locktite Terminals, 2400 front removable contacts.

We have salesmen in 42 U.S. Cities. Please refer to the proper section in this catalog for the one nearest you, or contact our factory in Waynesboro, Va.

Besides our 75 standard models of programming systems, some of which are described on this page, VPC also produces a wide variety of custom products.

We invite your inquiries and will appreciate your business.

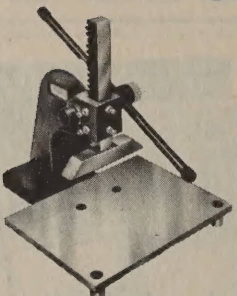
VECTOR TOOLS FOR WIRING AND RIBBON CABLE TERMINATING



P186-1 ARBOR PRESS for gang inserting terminals. Use with P187 Universal Ribbon Cable Plug Terminating Fixture. Can also be used generally for assembling, bending, blanking, forming, marking, piercing, punching, riveting, and trimming.

The press is die cast high strength Zamak zinc with a ground steel mechanism. A large work area 6" x 8 3/8" (152.4mm x 212.7mm) and a 12" (304.8mm) lever arm coupled with a 2.3" (58.4mm) and 3.6" (91.44mm) vertical capacity make this an ideal addition to any laboratory. Press includes removable pressure bar 4.4" x .75" (111.76mm x 19.05mm) installed on ram for use with terminal installation tools and ribbon cable terminating fixture.

GANG TERMINAL INSTALLING TOOLS

P187 UNIVERSAL RIBBON CABLE IDC (Insulation Displacement Connector Terminating Device)

This low cost fixture terminates female IDC plugs made by Vector, Alpha, Amp, Ansley, Berg, CW, JAE, 3M, SAE in seconds. (Excluding Alpha and CW strain relief cover type plugs); Berg Female Quickie Connector Type 65484 with strain relief requires P187-1 pressure bar which must be ordered separately. For best results, use in listed P186-1 press. Alternately, may be used with ordinary arbor press, vise, or "C" clamp.

ACCESSORIES

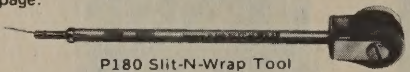
Female I.D.C. Plugs—Use on ribbon cable and terminate, using P187 fixture above to make pluggable interconnections between p.c. cards, remote equipment, etc. Vector IDC plugs are compatible with others made by Alpha, Amp Ansley, Berg, CW, JAE, 3M, SAE, and Spectra Strip, and will mate with "headers" created with Vector T46-5 0.025" (.64mm) square pins. Contacts are phosphor bronze gold over nickel plating, located on .1" x .1" (2.54 mm x 2.54 mm) grid, housed in glass filled U.L. listed polyester and have 1 Amp current rating, temperature rating of -55°C to 105°C.

RIBBON CABLE FOR IDC CONNECTORS

Vector ribbon cable is color coded U.L. Style 1061, 28 gage stranded tinned copper, encapsulated in self-extinguishing PVC film. Conductors are precisely spaced 0.050 inches (1.27 mm) apart to provide proper control of electrical characteristics. User may make IDC interconnect cables any required length from the 10 foot (3.05 meters) rolls.

Cat. no.	No. of conductors	Length feet	meters	Use with Vector IDC plug no.*
KW2-20-10	20	10	3.05	KS2-20
KW2-40-10	40	10	3.05	KS2-40

*May also be used with other manufacturers' IDC plugs as listed in IDC plug listing on this page.



P180 Slit-N-Wrap Tool

SLIT-N-WRAP WIRE WRAPPING TOOLS AND WIRE FOR .025(.64mm) SQUARE TERMINALS

Slit-N-Wrap wiring is 3 times faster than conventional manual wrapping because it eliminates measuring, cutting and separate wire stripping. Slit-N-Wrap wired joints are gas tight, low resistance—under .005 ohms resistance, and exceed W.W. specification pull-off test requirements.

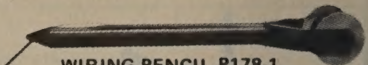
Slit-N-Wrap wiring tools are patented and have a special tip which makes a slit in the thin but tough polyurethane nylon insulation coating of the 28 gage wire furnished and used with the tool. The slitting occurs as posts are wrapped and **not** between wrap posts when directions are followed. The technique is suitable for production as well as laboratory use, and is readily mastered by anyone.

Two one hundred foot (30.5 meters) spools of Slit-N-Wrap wire are included with each Slit-N-Wrap tool, as well as a P183 wire cutoff chisel and wire forming tool.

Replacement wire is available with insulation colors of red, green, blue, and clear.

All tools listed will also make wrapped connections using prestripped 28 gage wires placed in the tip end.

P160-4T1	110V 60hz Slit-N-Wrap tool with transformer for production use.
P160-4T	Battery powered Slit-N-Wrap tool with batteries, recharger.
P160-8	110 V 60 hz heavy duty charger, bench type. Use on "quick charge" for fast recharge; use on "regular" for overnight or intermittant recharging, of battery powered P180 or P160 series tools.
P180	Manual Slit-N-Wrap tool.
P180A	Replacement bit for all Slit-N-Wrap tools listed.
P181	Quick Clipper for wire.
28 ga replacement wire	Slit-N-Wrap wire supplied in packages of 3.
W28-2A	Pkg 3, green; W28-2B pkg 3, red; W28-2C pkg 3 clear; W28-2D pkg 3, blue.



WIRING PENCIL P178-1

Pencil wiring makes for fast wiring of circuits because spool-fed 36 or 32 gage wire with "solder thru" insulation can quickly be guided and twisted around component leads, I.C. socket tails, etc. and followed by soldering with a 750°F iron (398°C). The insulation "melts" when touched with the iron and solder, quickly producing a solder joint. Minimum technique is involved, and breadboard or production circuitry can be built fast. Tools are furnished with two spools (400' per spool) of 36 gage solder thru wire (one green, one red). Replacement wire is available in color choices of red, green, blue, and clear. 36 gage is 400' per spool; 32 gage is 200' per spool.

Ordering Information

P178-1 wiring pencil with one spool of wire

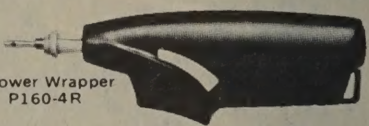
Replacement wire—36 gage

W36-4A pkg 2 green; W36-4B pkg 2 red; W36-4C pkg 2 clear; W36-4D pkg 2 blue. For 32 gage, order W32-4A, B, C, or D, pkg 2.

WIRING SPACERS

Accessory item keeps wire runs neat and out of way. .080 inch (2.03 mm) high by 3.6 inches long with wire slots and "feet" to fit 0.042 holes at 0.1 inch multiples. Supplied in packages of 20—pin P179WS-3.6, pkg. 20.

Manual Wrapper P160-2A



Power Wrapper P160-4R

WRAP-N-STRAP WIRE WRAPPING TOOLS

Vector tools for wrapping 0.025 square, .045 square, or .031 by .062 posts provide high quality at minimum price, with the added value of single bit/sleeve construction. Manual models and battery powered drivers for wrapping and unwrapping are listed below.

P160-2A	Manual wrapping tool for 0.025 (.64 mm) square posts, No. 26-30 gage wire.
P160-1A	Manual unwrapping tool for 0.025 (.64 mm) square posts, No. 26-30 gage wire.
P160-9	Combination wrapping/unwrapping tool for 0.025 (.64 mm) square posts and 26-30 gage wire. Use manually or in P160-4R battery powered wrapper.
P160-4R (AC version is P160-4R1)	Battery powered driver for P160-2A wrapper and P160-9 wrapper/unwrapper, above (110 V. 60 hz recharger included).
P160-6	Manual wrapping tool for .045 (1.14 mm) square posts, for No. 22-26 gage wire.
P160-7	Manual unwrapping tool for wrapping .045 inch (1.14 mm) square posts.
P160-2A-1	Bus strapping tool for 0.025 inch (.64 mm) square posts. Wraps solid 26-30 gage bus wire.
P160-6-1	Bus strapping tool for .045 inch (1.14 mm) square posts. Wraps solid 22-26 gage bus wire.

VECTOR DIP SOCKETS, SOCKET PINS & RECEPTACLES

SOCKETS FOR DUAL-IN-LINE DEVICES

DIP sockets available from Vector, accommodate most of the currently used DIP I.C. packages. The best features are incorporated into these sockets:

- Tapered entry helps guide DIP leads into the socket receptacles.
- Gold inlay contact springs firmly hold the DIP leads and accommodate rectangular DIP leads 0.010 inch (0.254 mm) x 0.020 inch (5.08 mm), and up to 0.024 inch (0.609 mm) diameter round pins.
- Individual contacts are accurately spaced 0.1 inch (2.54 mm) side to side for insertion into perforated circuit boards such as Vector "P" pattern.
- Polarizing notch or chamfer on body.

P157-1 DIP INSERTION TOOL

This is a "must" if one wishes to avoid bent leads in the insertion process, since it holds and aligns DIP leads for faster and more accurate assembly into sockets. P157-1 accommodates 14- and 16-pin DIPS.

P150 DIP EXTRACTION TOOL

Removal tool for DIPs assures easy pull-out of DIPs without bending leads. P150 extracts 8-, 14-, 16-, and 24-lead DIPs.

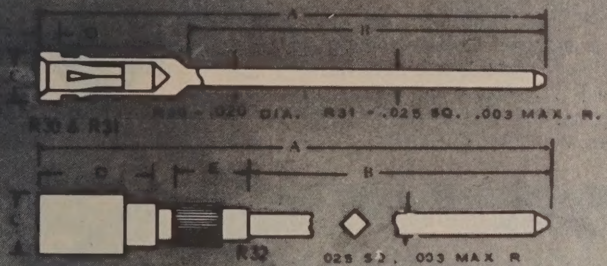
*ST = Solder Tail; WP = Wrap Post .025 inch (.64 mm sq.)

P150 is DIP Hand Extraction Tool; P157-1 is DIP Hand Insertion Tool—installs all 14- & 16-pin DIPs



SOCKET PINS

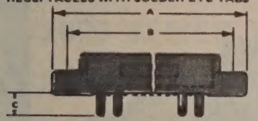
High quality copper alloy gold plated four-fingered contacts are housed inside gold plated brass screw machine terminals with solderable or 0.025" sq. wire wrappable tails for installing wherever required in 1/16" thick circuit boards. Models R30 and R31 have lower profile than low-profile DIP sockets, and press fit into 0.055" dia. holes. Model R32 fits 0.042" dia. holes in "P" Pattern Micro-Vectorbord® or DIP Plugbords.

		Dimensions					
Part No.	Tail Type	A	B	C	D	E	Supplied in Pkg.:
R30	Solder	.29	.11	.072	.030	--	25, 100, or 1000
R31	WW	.703	.500	.072	.030	--	25, 100, or 1000
R32	WW	.745	.500	.072	.155	.075	25, 100, or 1000

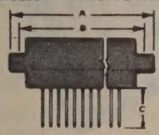
P158 Impact Insert. Tool w/D10 Die Point inserts R30, R31; w/D9 Die Point inserts R32. P158-1 Holder adapts Tool to drill or arbor press.

VECTOR RECEPTACLES FOR 0.062 THICK CIRCUIT CARDS

RECEPTACLES WITH SOLDER EYE TABS



RECEPTACLES WITH 0.025 SQ. WRAP POST TAILS



Vector receptacles are designed to accept printed circuit cards made by Vector or other manufacturers. Quality material and construction are used throughout to insure reliable performance. All wire wrappable contact tails (wrap post type) are 0.025 inch (0.64 mm) square.

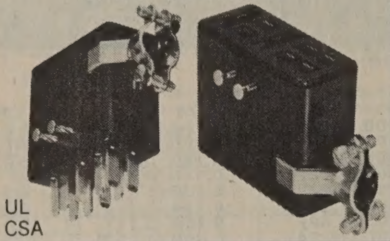
BEAU®

Plug & Socket Connectors

3300 SERIES

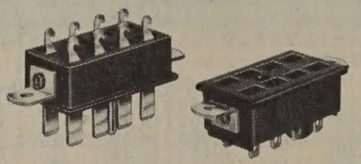
10 amps, 250 volts
2-33 contacts



UL
CSA

5400 SERIES

15 amps, 250 volts
4-16 contacts

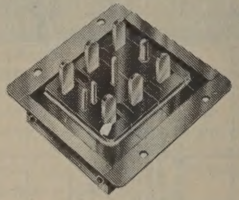


UL
CSA

Also, 4400 Series—for mounting from back of panel.

5500 SERIES

50 amps, 250 volts
2-16 contacts



Shallow-bracket mounting

SEVEN EXCLUSIVE INNOVATIONS

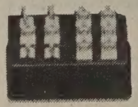
1. PRE-GROUNDING—see next page.

2. THERMOPLASTIC BACKSHELLS.

(Metal also.) Resilient thermoplastic backshells provide greater dielectric strength and greater safety. They're also non-rusting and acid resistant. UL; CSA.

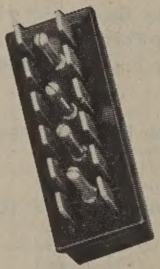
3. WAVE SOLDERABLE CONTACT TAILS.

Special tail design (S_6 and P_7) allows for mounting directly to PC boards and flexible circuits — and gives you the economy of automatic wave soldering. 3300 Series. UL; CSA.



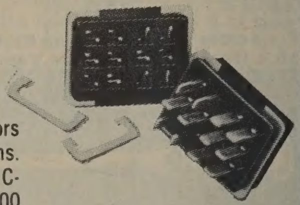
4. 16 CONTACTS IN THE SPACE OF 12.

Our 15 amp connectors can have up to 16 contacts—4 more than other 15 amp makes. That's 33% more contacts in the same amount of space. UL; CSA.



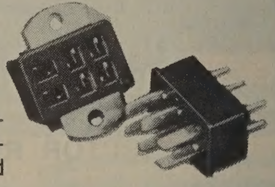
5. PANEL MOUNTED IN ONE-FOURTH THE TIME.

C-clip mounting of Beau connectors cuts panel mounting time by 3/4ths. No drilling. No screws. Just slide on C-clips and it's secure. 3300, 5400 Series. UL; CSA.



6. SELF-POLARIZING 6-CONTACT CONNECTOR.

With contacts set in opposing directions, even a heavy hand can't mismate our 6-contact 10 amp plugs and sockets. UL; CSA.



7. HERMAPHRODITIC SELF-POLARIZING.

With male and female contacts in both halves, or with conventional polarization. Can gang in building block fashion. 50 amp.

TEL: (603) 524-5101 TWX: 710-364-1843
Also available in Canada, England and Europe

BEAU®

Pre-Grounding Connectors

3300 SERIES: 10 amps per contact
5400 SERIES: 15 amps per contact

PRE-GROUNDING FOR GREATER SAFETY

Beau gives you the greater safety of U.L. recognized pre-grounding plug and socket connectors. The extra long grounding contact engages before any other active contacts are mated. Available for chassis and cable mounting.

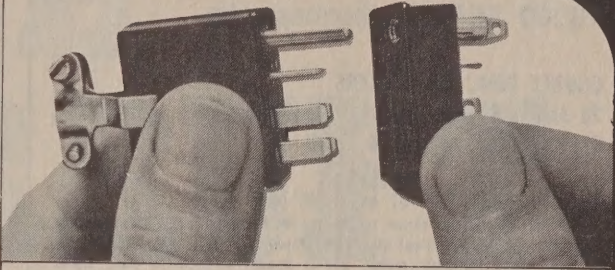
LOWEST INSTALLED COST

Only Beau offers the longer pre-grounding contact. Thus, you will never have to cut any contacts to a shorter length to achieve a safer connection. No more costly, time-consuming hand cutting operations.

CONTACT POSITION

In the 3300 Series, the grounding contact takes the place of a regular contact. Connector sizes 3324 through 3333 are already of the pre-grounding type, and there is no need to specify the grounding contact.

In the 5400 Series, the grounding contact is an additional contact position rather than taking the place of a standard contact.



SPECIFICATIONS

For other specifications and data, see previous page.

Rating: 3300 Series, 10 amps per contact at 250 v,
5400 Series, 15 amps per contact at 250 v

Grounding contact rating: 30 amps at rated voltages.

No. of contacts: 3300 Series, 3 to 33 (incl. grounding contact),
5400 Series, 5 to 13 (incl. grounding contact)

Grounding contact: Extra long, heavy-duty plated brass.

Grounding contact tail: 5400 Series, mounted on an elevated creep path barrier that puts required distance between ground and active contacts.

U.L. RECOGNIZED. CSA CERTIFIED.

Single-Row High-Barrier Resilient Terminal Strips

72000 SERIES: thermoplastic

SINGLE ROW; 3/8" CENTERS
20 AMPS, 600 VOLTS
FEED THRU AND CLOSED BACK

BEND BARRIERS WITHOUT BREAKING

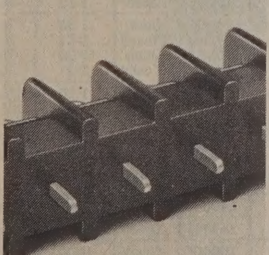
Beau's flexible barrier strips reduce breakage dramatically because they are made of highly resilient glass-filled thermoplastic materials. Impact strength is many times greater than phenolics. Production line and infield damage (and time-consuming re-wiring) are virtually eliminated.

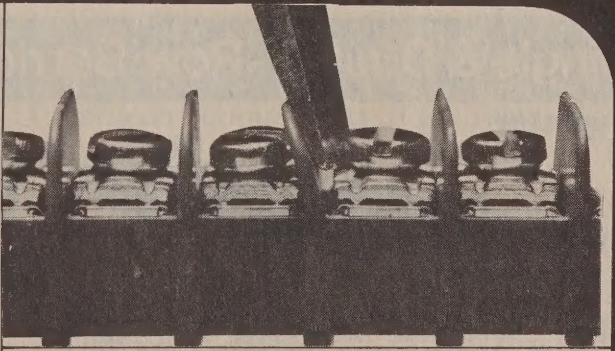
PROTECTS SOLDER JOINTS FROM DAMAGE

Exclusive from Beau — terminals are ultrasonically imbedded in the base. This eliminates solder joint damage from torqueing screws, or from strain in dressing down wire bundles. Also, pull-out strength is double the other makes.

TERMINAL TAILS ENCLOSED

Cavities are eliminated around dip solder terminal tails. This allows mounting directly on PC board without affecting circuit isolation. It eliminates entrapment of foreign matter, reduces solder wicking.





SPECIFICATIONS

Size: 5/8" w x 21/32" h

No. of terminals: 1 to 26

Terminal styles (bottom):

- Printed circuit, straight or right angle
- Wire wrap with long extended tail
- Quick connect tab (insulated feed thru)
- Solder turret (insulated feed thru)
- Closed back

Terminal styles (screw side):

- #6-32 x 1/4" binding head screw
- Wire clamp plate, self rising
- Quick connect tab (1 to 6 terminations per circuit)
- Solder terminal, single or double ended

Colors: Black (standard), others available.

U.L. RECOGNIZED. CSA CERTIFIED.

Beau Products
DIVISION OF VERNITRON CORPORATION

BOX 10, LACONIA, NEW HAMPSHIRE 03246
TEL: (603) 524-5101 TWX: 710-364-1843
Also available in Canada, England and Europe.

BEAU®

Double-Row High-Barrier Resilient Terminal Strips

76000 SERIES: thermoplastic

DOUBLE ROW; 3/8" CENTERS
20 AMPS, 600 VOLTS
CLOSED BACK AND FEED THRU

BEND BARRIERS WITHOUT BREAKING

Beau's flexible barrier strips reduce breakage dramatically because they are made of highly resilient glass-filled thermoplastic materials with highest U.L. flame retardant rating, 94V-0. Impact strength is many times greater than phenolics. Production line and in-field damage and time-consuming re-wiring are virtually eliminated.

GET 20 AMPS IN THE SAME SPACE AS 15

These 20-ampere strips are designed to take the same panel space as any double-row 15-ampere barrier terminal strip. They are 7/8-inches wide and have screw terminals 3/8-inches on centers.

SCREW TERMINALS WON'T PULL OUT

The 76000 Series eliminates the problem of insecure terminal retention commonly found in closed back double-row barrier terminal strips. Eyelets and nails have been eliminated. Instead, screw terminals are ultrasonically welded (imbedded) into the barrier strip. It's more rugged, and has a greater creep path. With a closed back, you get the electrical rating you want — without insulating strips.

FEED THRU STYLES HAVE ENCLOSED CONTACT TAILS

Unlike the typical thru-hole in feed thru styles, ours is virtually the same size as the contact tail. This maximizes circuit isolation, eliminates entrapment of foreign matter, reduces solder wicking.

SPECIFICATIONS

Size: 7/8" W x 5/8" H

No. of terminals: 1 to 30 (molded to length; no rough cut ends)

Base style: Closed back or feed thru

Mounting: With or without mounting ends

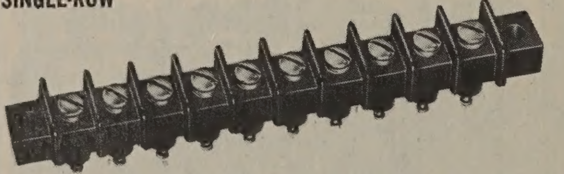
Terminal styles:
- #6-32 x 1/4" binding head screw (standard)
- Wire clamp plate, self rising
- Quick connect tab (1 to 6 terminations per circuit)
- Solder terminal, single or double
- Feed-thru solder, long and short
- Feed-thru PC, long and short
- Feed-thru wire wrap
- Z terminal, over-the-side PC

Colors: Black (standard) others available

U.L. RECOGNIZED. CSA CERTIFIED.

Single & Double-Row Barrier Terminal Strips

SINGLE-ROW



Available in 15 and 20 amp models, both have high-impact glass-filled phenolic bases with excellent breakage resistance. They are furnished in green, with or without mounting ends. Nickel-plated brass screws. Cadmium or tin plated terminals. Imprinting on barrier strip body available.

U.L. RECOGNIZED. CSA CERTIFIED.

DESIGNER KITS

The MINIATURE SERIES No. WM-72 (using .062″ pin terminals) Designer Kit contains parts to assemble male and female connector housing from SINGLE-CIRCUIT to 36-CIRCUIT COMPLETE CONNECTORS. (Total of 56 Connectors.) Includes crimping tool and pin terminal ejector tool. WM-72 Kit Each $34.95.

A must for every creative designer, repairman and experimenter . . . as modern as today's circuitry. Eliminates need of searching for proper connectors or tools — everything is under one lid. This polarized Nylon Connector Designers Kit comes with all circuit capacities, complete with Male and Female housings, terminals and crimp tool. Separated in individual compartments, each connector element is numbered and described, enabling you to re-order when running low.

This light-weight, unbreakable kit closes with a snap-lock to avoid spills and mix-ups. Each kit contains a prototype hand crimping tool, specially balanced and weighted for ease of operation. Machined from hardened-steel, this tool provides excellent, uniform crimps every time. It also cuts and strips wire. Each kit also contains a special terminal ejector tool, and detailed crimping instructions permanently affixed and mar-proof.

WALDOM also produces a Designer Kit in the STANDARD SERIES No. WM-50 (using .093″ pin terminals). Similarly, it has all the elements and tools necessary to make up standard connectors in all sizes. (Single circuit to 15 circuits in the standard series.) Total of 45 complete connectors.

WM-50 KIT EACH $29.95

These items are manufactured by Molex Incorporated

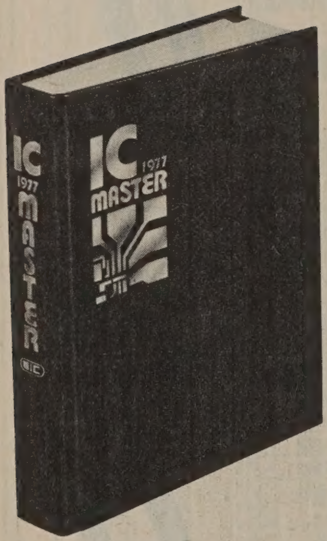
WHEN THE CHIPS ARE DOWN...

THE NEW 1977 IC MASTER PAYS OFF!



The new IC MASTER is the ultimate IC source book.

It lists virtually every IC device manufactured in the United States.

The IC MASTER is the easy, sensible means of narrowing down your IC choices quickly, accurately and systematically. All information is cross-referenced and indexed for rapid problem solving and device selection. And, additionally, the MASTER is updated three times yearly by accumulative supplements.

THE FORMAT OUTLINED:

- **FIVE MASTER SELECTION GUIDES** — 84 companies' IC's organized by type, function, key parameters
- **OVER 1,000 PAGES OF TECHNICAL INFORMATION** — Provided directly by manufacturers covering 17,000 IC's
- **ALTERNATE SOURCE DIRECTORY** — The only industry-wide, pin-for-pin version available
- **MILITARY PARTS INDEX AND CROSS REFERENCE CHART** — Identifies all IC's with JAN qualification
- **MILITARY DEVICE TESTING TABLE** — List companies that screen to Mil. Std. 883
- **MILITARY PARTS INDEX** — The first functional guide to JAN qualified parts
- **PART NUMBER INDEX** — Parts from 84 manufacturers, in numerical sequence
- **APPLICATION NOTE DIRECTORY** — Digest of currently active application note material
- **PRODUCT INDEX** — Provides alphanumeric listing of 84 manufacturers' lines
- **PART NUMBER GUIDE** — Instantly decodes each company's part numbering system
- **MANUFACTURERS AND DISTRIBUTORS DIRECTORY**

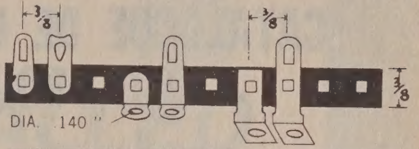
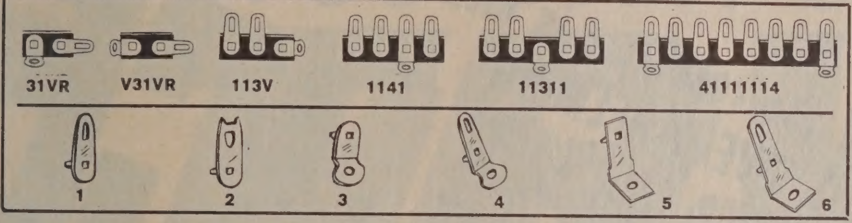
STANDARD TERMINAL STRIPS

Our new automatic machinery is equipped to meet every terminal strip need. Some of the most popular numbers are shown below. Other combinations are available upon request. Brass or steel cadmium plated lugs are firmly locked into a 1/16″ thick bakelite. Spacing between lug centers is 3/8″.





Where layouts or blue prints are not readily available, orders can be filled by simple use of our Part Numbers.

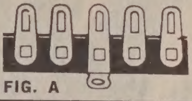


FIG. A

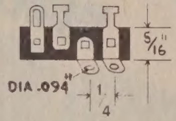
Example — Fig. A contains Lug No. 1 and Bracket No. 4. Specify Item No. 11411.

MINIATURE INSULATED TERMINAL STRIPS

Miniature terminal strips are recommended for all applications where space is a factor. These strips are made of the same materials as the standard terminal strips described above except smaller. Strips are 1/16″ by 5/16″ wide grade XP laminated phenolic with brass lugs securely eyeletted in position. Lugs are supplied in any of the finishes used on the standard series with the insulation likewise available in a choice of materials and finishes.



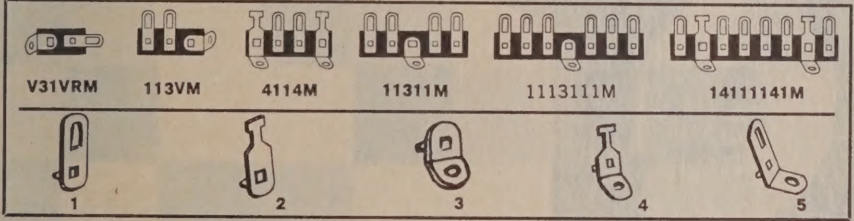


FIG. B

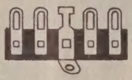
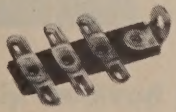


Example — Fig. B contains Lug No. 1 and Bracket No. 4 Specify Item No. 11411M.

"T" TYPE TERMINAL STRIPS



Lugs: Steel cadmium plated spaced 3/8″ centers.

Strips: XP Bakelite — 3/8″ wide x .062″ thick.

Mount: 140 I.D. for No. 6 screw.

Can be supplied in any length or to any specification.

ALSO AVAILABLE IN MINIATURE

Lugs: Brass cadmium plated 1/4″ centers.

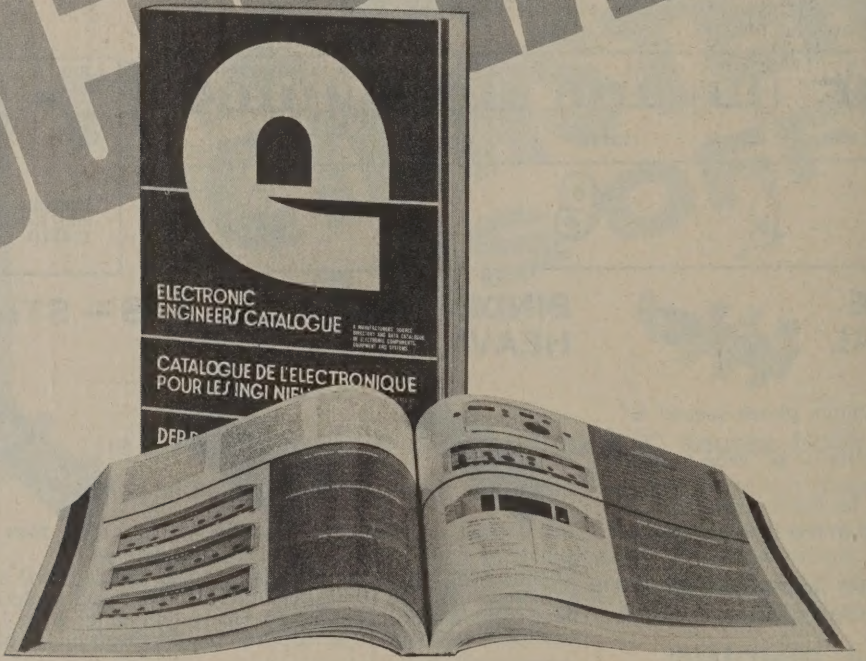
ELECTRONIC ENGINEERS CATALOGUE
CATALOGUE DE L'ELECTRONIQUE POUR LES INGENIEURS
DER PRODUKTKATALOG FÜR ELEKTRONIKER

The book is out...and the response is in...

IMMEDIATE AND OVERWHELMING

ACCEPTANCE



ELECTRONIC ENGINEERS CATALOGUE
CATALOGUE DE L'ELECTRONIQUE POUR LES INGENIEURS
DER

The ELECTRONIC ENGINEERS CATALOGUE is the only comprehensive, trilingual catalogue/ source-directory of electronic products available to - and from - Western Europe and the United Kingdom.

It is divided into three distinct sections: 1. **The Product Index and Directory,** which lists more than 3,000 products alphabetically in English with their French and German equivalents. 2. **The Manufacturers' Catalogue Section,** which is a compilation of Manufacturers' Catalogues in alphabetical order. 3. **The Manufacturers' Sales Offices and Trade Marks Directory,** which alphabetically includes country, address, telex or TWX numbers of the Manufacturers' main and local sales offices and/or agents.

The ELECTRONIC ENGINEERS CATALOGUE offers U.S. manufacturers the most cost-efficient method of distributing their catalogue data to **25,000** electronic engineers and buyers throughout Western Europe and the United Kingdom. It represents the carefully conceived application of the time-proven **eem** "cataloging" concept to the elusive European marketplace.

...more actively involved in more electronic components than you probably realize.

as the next two pages will prove... Maybe you know we make connectors — or resistors — or semi-conductors — but we suspect you might not be aware that there are 13 electronic components divisions of TRW Inc. and that among us we make over 300 different kinds of products! We can hardly keep track of them all ourselves!

That's why we've provided a special index on the following two pages to make it easy for you to locate them among the 161 pages of TRW product specifications in this edition of **eem.** No matter what you need in electronic components, you can probably get it from TRW or its distributors . . . and you can be sure it will be manufactured with the high TRW standards of quality, reliability and service.

TRW CINCH CONNECTORS

Printed Circuit Connectors (Catalog C-24)

Miniature PC Connectors 2282
PC Connectors on .100 Centers 2283
NAFI PC Connectors 2284
PC Connectors on .156 Centers 2285-2290

D-Subminiature Connectors (Catalog C-46)

General Information 2291
Burgon-D Mark IV Connectors 2292-2296
Original D Connectors 2297-2300
Golden D Mark I Connectors 2301-2305
Royal D Mark III Connectors 2306, 2307
Accessories 2308, 2309

Micro-Miniature Connectors

Dura-Con Series 2310, 2311

Rack and Panel Connectors (Catalog C-36)

Solderless Ribbon Connectors 2312-2314
Cinch Ribbon Connectors 2315-2317

Barrier Terminal Blocks (Catalog C-44)

Barrier Terminal Blocks 2318-2325
Fanning Strips 2326
Optional Terminals and Clamps 2327

Sockets and Accessories (Catalog C-2)

DIP Sockets 2328
IC and Transistor Sockets 2329, 2330
Novistor Sockets 2331
Subminiature Tube Sockets 2332, 2333
7 Pin Tube Sockets 2334, 2335
9 Pin Tube Sockets 2336

Jones Plugs and Sockets (Catalog C-1)

300 Series 2337-2341
400 Series 2342-2344
2400 Series 2345-2347

Cinch Nuline

Nucon MIL-C-83723 Connectors 2348, 2349
904 Series Commercial Connectors 2350, 2351
"Astro" High Density MIL-81511 Connectors 2352-2355
"Omega" Series MIL-26500 2356-2360
MMB Series 2361

Flat Cable Connectors

299 Flat Cable Connectors 2362

Fans and Blowers 2716, 2717
DC Permanent Magnet Motors and Planetary Gearmotors 3110-3119
AC Hysteresis Synchronous and Induction Motors and Planetary Gearmotors 3120-3124
Schematic Wiring 3125

TRW HOLYOKE WIRE & CABLE

Precision Cable Assemblies 4719, 4720
Wire and Cable 4721

TRW IRC POTENTIOMETERS

Circuitrim Rectangular Trimmer Potentiometers 3850
Circuitrim Square and Cube Multi-Turn Trimmers 3851
Circuitrim 100 — Single-Turn Trimmers 3852
Single and Multi-Turn Potentiometers 3853
Precision Potentiometers 3854

TRW IRC RESISTORS

General Information 3736, 3737
Carbon Composition Resistors 3738, 3739
Wirewound Molded Resistors 3740, 3741
Metal Glaze™ Resistors 3742, 3743
Metal Film Resistors 3744, 3745
Resistor Networks and Sets 3746, 3747
Ladders 3748, 3749
Voltage Dividers 3750
High Voltage Resistors 3751, 3752
Power Resistors 3753, 3754
Application and Mil Spec Information 3755, 3756
Packaging Styles 3757

TRW SEMICONDUCTORS

General Information 3922
RF Transistors and Hybrids 3920, 3921
Darlingtons 3923
Rectifier Diodes 3924
Zeners 3925, 3926
Fast Recovery Rectifiers 3927
Varicaps 3928
Varactor Diodes 3929

TRW UTC TRANSFORMERS

Inductors and Filters 2762-2765
SSO Line 4504
Sub Ouncer Family 4505, 4506
Ultra-Compact Audio Units 4507
BIT-250 4508
DO-T200 and DI-T200 Series 4509
I-DOT and I-DIT Transformers and Inductors 4510, 4511
Transistor Supply Transformers 4513
Industrial Transformers 4514, 4515
Universal Rectifier Transformers 4516, 4517
Pulse Transformers 4512

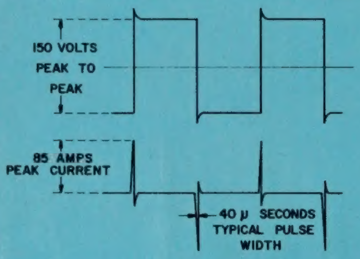
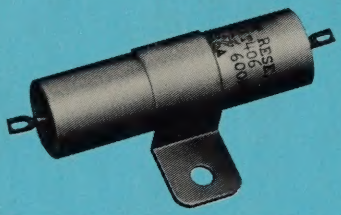
MIL-C-83421/1 QUALIFIED (SUPERMETALLIZED)

40 KHz AC rated, metallized polycarbonate capacitors qualified to MIL-C-83421/1 and MIL-C-39022/9C are available from stock. Because of superior performance they are titled "SUPERMETALLIZED." They are 100% reliability screened. For the Trident program, 30 VDC rated capacitors receive 168 hours of AC burn-in at 22 Vrms, 40 KHz, and 100°C.

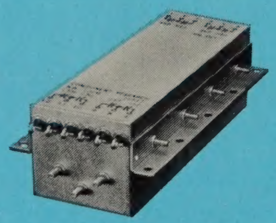


Component Research Company developed this AC dielectric withstanding test for use in MIL-C-39022/9 which was then superseded by MIL-C-83421/1. This test assists in early detection of abnormally high dissipation factor and high ESR. The voltage square wave when applied to each capacitor proves the ability of the terminations to withstand relatively high peak and RMS current.

Typical voltage and peak current waveforms shown at left for A12B106, 10 μF, 50 V, metallized polycarbonate capacitor during the one minute AC square wave screening at 100 Hz.

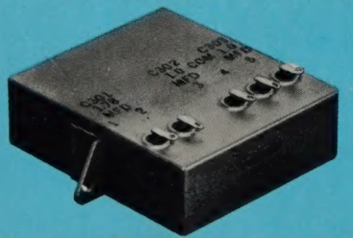


The .033 μF polystyrene capacitor shown can handle 300 Vrms at 25 KHz and fits in a 0.562" x 1.875" metal case. The capacitor features: high Q, tight capacitance tolerance and drift, and low controlled temperature coefficient. Additional configurations are available which are smaller in size and have higher AC current ratings.



This polystyrene capacitor network contains 8 precisely matched 1.2 μF sections. Each capacitor section is capable of operating with 170 Vrms applied at 25 KHz, with low heat rise. This network is one of many critical components supplied by Component Research Company for major weapons systems.

Component Research Company foil-polypropylene capacitors are used for various AC applications. This capacitor network is used in a weapons system where utmost reliability is required. Lower cost types can also be supplied for industrial applications with complete AC rating information.



In 1965 Component Research Company developed this precision metallized capacitor network for very accurate guidance and control of a sophisticated missile system. These networks are still being purchased annually due to their superb proven performance in field use. Their unique characteristics are: high insulation resistance, low dielectric absorption, low temperature coefficient, and low noise during environmental exposure.
